EDUCATION

- 2004 - 2005 **Postdoc**, *Noble lab*, Department of Genome Sciences, University of Washington.
- 2002 - 2004 **Postdoc**, *Brutlag bioinformatics group*, Dept. of Biochemistry, Stanford University.
- 1996 - 2001 **Ph.D.**, *Information Systems*, Faculty of Industrial Engineering and Management, Technion - Israel Institute of Technology.
- 1993 - 1995 **M.Sc.**, *Physics (cum laude)*, Hebrew University, Jerusalem.
- 1990 - 1993 **B.Sc.**, *Physics and mathematics (cum laude)*, Hebrew University, Jerusalem.

PROFESSIONAL EXPERIENCE

- May 2011 - present **Associate professor**, *Department of Computer Science*, Colorado State University.
- Aug 2005 - 2011 **Assistant professor**, *Department of Computer Science*, Colorado State University.
- Oct 2007 - present **Assistant professor**, *Department of Statistics*, Colorado State University.
- 2003 **Consultant**, *PathWork Informatics*.
Provided guidance on supervised-learning methods for analysis of gene expression data
- Dec 2000 - **Researcher**, *BIOwulf Technologies*.
- Feb 2001 Developed data analysis methods for gene expression data, protein expression data, and medical databases
- 2000 **Consultant**, *Camtek*.
Conducted a feasibility study of automatic defect detection in printed circuits using support vector machines
- Oct 1996 - **Teaching and Research Assistant**, *Faculty of Industrial Engineering and Management*, Technion - Israel Institute of Technology.
- Jun 2000
- Oct 1993 - **Teaching Assistant**, *Racach Institute of Physics*, Hebrew University, Jerusalem.
- Jun 1995

TEACHING

- CS545 Machine Learning. Taught fall 13, fall 15, fall 16.
- NSCI580A3 Linux as a computational platform (1 credit). A one credit course designed to get life science students comfortable with using command-line tools and running jobs on a Linux machine. This is part of a series of modules offered by the GAUSSI program. Taught fall 15.
- NSCI580A5 Genomics data analysis in Python (2 credits). A two credit course introducing biologists to Python programming through examples of genomic data analysis tasks. Taught fall 16.
- NSCI580A4 RNA-seq data analysis. This course is part of the sequence consisting of modules on Linux and Python. Designed in collaboration with Tai Montgomery (biology) and Erin Nishimura (biochemistry), and co-taught by Tai and Erin in fall 2016.
- CS425 Introduction to bioinformatics algorithms. Christina Boucher and I were awarded a provost course redesign grant in order to create an undergraduate version of our graduate level bioinformatics course. Taught fall 13 (with Christina Boucher).
- CS440 Artificial intelligence. Taught fall 06, fall 09, fall 14.
- CS320 Algorithms: theory and practice. Taught spring 11, spring 12, fall 12.

- CS200 Data structures. Taught spring 08, spring 09.
- CS161 Object oriented problem solving. Taught fall 09, spring 13, spring 14, spring 15, spring 16.
- CS160 Foundations in programming. Taught fall 08.
- CS548 Bioinformatics algorithms (developed by Dr. Ben-Hur).
- CS646 Machine learning in bioinformatics. An advanced graduate level course focused on applications of kernel methods to bioinformatics problems. No longer being offered, as the department has phased out 600 level courses.
- CS580 Programming for the life sciences. Developed a graduate level programming course for life science students. Students learned to program in Python, with applications to biological data. Taught spring 10 and spring 13.

ADVISING

- Current students Michael Hamilton (PhD program)
- Fahad Ullah (PhD program)
- Basir Shariat (PhD program)
- Alex Fout (MS program)
- Swapnil Sneham (MS program)
- Gareth Halladay (MS program)

- Doctoral students Indika Kahanda. Ph.D. May 2016.
- Fayyaz Minhas. Ph.D. February 2014.
- graduated Mark Rogers. Ph.D. August 2013.
- Artem Sokolov. Ph.D. August 2011.
- Todd Iverson. Ph.D. in Statistics June 2008. Co-advisor.

- Masters students Kiley Graim. M.Sc. April 2012.
- Adam Labadorf. M.Sc. April 2010.
- graduated Michael Hamilton. M.Sc. April 2010.

GRANTS AND RESEARCH FUNDING

- NSF (PI) DeepStruct: learning representations of protein 3-d structures and their interfaces using deep architectures. coPI: Charles Anderson (CS). NSF ABI, \$570,295 to Colorado State University, 2016 - 2019.
- NSF-NRT (co-PI) GAUSSI: Generating, Analyzing, and Understanding Sensory and Sequencing Information—A Trans-Disciplinary Graduate Training Program in Biosensing and Computational Biology (award number 1450032). CSU was awarded a 2.9M grant from NSF to start a new interdisciplinary program on the interface of biology and computer science/engineering/statistics/math. This award comes from the NRT program which replaces the IGERT program. For more details on our GAUSSI program see <http://gaussi.colostate.edu>. The program awards 8 one-year NSF fellowships a year, and includes 0.5 month of summer salary for the co-PIs. PI is Tom Chen in ECE. Co-PIs are Drs. Ben-Hur and Willusz.
- DOE (co-PI) Global analysis of epigenetic regulation of gene expression in response to drought stress in sorghum. PI is A.S.N. Reddy in the biology department. DOE Plant Feedstock Genomics for Bioenergy program, \$1,385,763 to Colorado State University, 2013 - 2016.
- NIH (co-PI) The Determinants of Aggregation and Toxicity of Prion-like Domains PI is Eric Ross in the biochemistry department. NIH R01.
- NSF (PI) GOSTRUCT: modeling the structure of the Gene Ontology for accurate protein function prediction. A collaboration between Asa Ben-Hur and Karin Verspoor in University of Colorado at Denver. NSF Advances in biological informatics 0965768, \$523,303 to Colorado State University, 2010 - 2015.
- NSF (PI) PREVALT: Predicting and validating alternative splicing in plants. A collaboration between Asa Ben-Hur and A.S.N. Reddy in the biology department. NSF Division of Biological Infrastructure 0743097, \$1,086,612.00 to Colorado State University, 2008 - 2013.

- course redesign competition Asa Ben-Hur and Christina Boucher were awarded a provost course redesign grant to convert the department's graduate level bioinformatics course as an undergraduate course. \$5,000, 2013.
- Infectious Disease SuperCluster (co-PI) A pipeline for diagnostic marker identification from next-generation genomic sequence. A collaboration with Jan Leach from the BSPM department. \$30,687, 2010.

EXTERNAL SERVICE

- Workshops/symposia Co-organizer of the workshop "Post-transcriptional Gene Regulation", for the Plant and Animal Genome conference, 2015,2016.
- Organized the Front Range Computational and Systems Biology 2015 symposium. See <http://combi.cs.colostate.edu/csb2015/>.
- Organizer of a bioinformatics workshop as part of the yearly Graybill conference, 2007. See <http://www.stat.colostate.edu/graybillconference2007/Workshop.htm>.
- Program committees ISMB 2005 - 2016; RECOMB 2014; ECCB 2010, 2012, 2014; ACMBCB 2011-2016; IJCNN 2011, 2013; MLOSS 2013, 2015; 22nd IEEE International Conference on Tools with Artificial Intelligence 2010; AISTATS 2009; Automated Function Prediction (AFP) SIG at ISMB 2011,2012, 2013; Bio-KDD 2016; NIPS workshop on open source software 2008, 2013; ICML workshop on open source software 2010; NIPS workshop: Machine Learning in Computational Biology (MLCB) 2009; AAAI bioinformatics track 2010; 22nd IEEE International Conference on Tools with Artificial Intelligence 2010.
- Conference reviewing NIPS 2004 - 2010, RECOMB 2009,2011, Pacific Symposium on Biocomputing (PSB) 2016.
- Journal reviewing Reviewer for: Oxford Bioinformatics, PLoS Computational Biology, Journal of Bioinformatics and Computational Biology, BMC Bioinformatics, BMC Genomics, Genome Biology, Scientific Reports, Nucleic Acids Research, Proteins, Protein Science, Journal of Biomedical Informatics, Molecular Systems Biology, IEEE transactions on Computational Biology and Bioinformatics, Journal of Machine Learning Research.
- Proposal reviewing and panels NSF panels: 2010 (1), 2011 (2), 2012 (2), 2013 (1), 2014 (1), 2015 (1), 2016 (1).
- Ad-hoc reviewer for NSF, ISF (Israeli Science Foundation), Canada Foundation for Innovation, Austrian Science Fund.
- Invited workshop participant Participated in NSF's iPlant cyberinfrastructure collaborative organizational conferences, March 2009, July 2009.

UNIVERSITY SERVICE AND AWARDS

- Awards Recipient of the Graduate Student Council Advising and Mentorship Award, 2016.
- Recipient of the College of Natural Sciences 2013-2014 award for Faculty Excellence in Graduate Education and Mentoring.
- Workshops/symposia Organized a session on human-computer interaction as part of The bi-annual Future Visions symposium in 2010.
- Organized a CSU bioinformatics retreat bringing together researchers on campus interested in bioinformatics, 2008.
- Department committees Awards committee 2006/7, 2009/10, Research committee 2007/8, Undergraduate committee 2008-14, Search committee 2012, 2013, Graduate recruiting 2014 - present, GTA assignment committee 2015 - present, Executive committee 2016 - present.
- University committees Bioinformatics Center Search Committee 2006, Bioinformatics Center Steering Committee 2006 - 2010, ISTeC Education Advisory Committee 2009/10, Biology search committee 2012, MIP search committee 2013. Bioinformatics steering committee 2015 - present.

TALKS AND POSTERS

- Refereed posters and presentations
- Predicting differential intron retention with iDiffIR. Presented by Michael Hamilton at the Plant and Animal Genome Conference, 2016.
- GOstruct 2.0: Automated Protein Function Prediction for Annotated Proteins. Presented at Function SIG 2016, part of Intelligent Systems for Molecular Biology (ISMB) 2016.
- Alternative and differential polyadenylation detection from single molecule long sequencing reads. Presented by Michael Hamilton at the Integrative RNA Biology SIG 2016, part of Intelligent Systems for Molecular Biology (ISMB) 2016.
- Exploring the relationship between intron retention and DNase I hypersensitivity in plants. Poster presentation by Fahad Ullah at the Integrative RNA Biology SIG 2016, part of Intelligent Systems for Molecular Biology (ISMB) 2016.
- 2014 Corey Broeckling, Fayyaz-ul-Amir Afsar Minhas, Steffen Neumann, Asa Ben-Hur, and Jessica Prenni. ramclustR: post-XCMS feature clustering for data reduction and spectral matching-based annotation. In: ASMS2014 (American Association for Mass Spectrometry), 2014.
- Indika Kahanda, Christopher Funk, Fahad Ullah, Karin Verspoor and Asa Ben-Hur. PHENOStruct: Prediction of human phenotype ontology using heterogeneous data sources. In AFP 2014 (workshop of ISMB).
- 2013 Fayyaz Minhas, Brian Geiss, and Asa Ben-Hur. PAIRpred: A large margin method for partner-specific prediction of protein interfaces. in: 11th Annual Rocky Mountain Bioinformatics Conference, 2013.
- RAMClust: an unsupervised feature clustering method for non-targeted metabolomics datasets", Corey Broeckling, Fayyaz A. Afsar, Asa Ben-Hur, Jessica Prenni, accepted for oral presentation in 61st American Society for Mass Spectrometry (ASMS) Conference, June 9 - 13, 2013, Minneapolis, USA.
- PAIRpred: Prediction of partner-specific interacting residues from sequence and structure, Fayyaz A. Afsar, Brian Geiss and Asa Ben-Hur, oral presentation in Seventh International Workshop on Machine Learning in Systems Biology (MLSB13), July 19-20, 2013, Berlin, Germany.

INVITED TALKS

- 2015 Multiple instance learning for the detection of imprecisely defined protein sub-structures. CSU Department of Statistics, 2015.
- Differential splicing and long read transcriptome assembly using iDiffIR and TAPIS. Presented at: Computational Biology: Data Analysis and Modeling in the Genomic Sciences. DOE PI meeting Tysons, Virginia, 2015.
- Biology in the era of big data. RMACC High Performance Computing Symposium, 2015.
- Partner-specific prediction of protein interfaces from sequence and structure: it takes two to tango. University of Indiana Bloomington computer science department colloquium. January 2015.
- 2013 Intron retention: tools and insights from RNA-seq data. Computational Bioscience Program, University of Colorado-Denver October 2013.
- 2011 SpliceGrapher: detecting patterns of alternative splicing from RNA-seq data in the context of gene models and EST data. University of Wisconsin-Madison, October 2011, University of Colorado-Boulder, October 2011.
- 2010 Prediction of Calmodulin binding and binding sites. Hebrew University, June 2010.
- GOstruct: utilizing the structure of the Gene Ontology for accurate protein function prediction. Tel-Aviv University, June 2010; Technion, Israel Institute of Technology, June 2010; Iowa State University summer bioinformatics program, August 2009; Computational bioscience program, school of medicine at the University of Dolorado Denver, July 2009.
- A structured outputs method for predicting protein function. Machine learning in systems biology (MLSB) 2008 (presented by Artem Sokolov).
- Machine learning for the analysis of DNA and proteins. Integrated systems biology seminar series. Colorado State University, October 2007.
- Predicting Calmodulin-binding proteins. University of Wyoming, July 2007; Plant Supergroup, Colorado State University, April 2007.
- Keynote presentation Kernel methods for the analysis of proteins: insights and caveats. Rocky05 bioinformatics conference, December 2005.
- Kernel methods for predicting protein-protein interactions. University of Colorado, Denver, October 2005; Colorado State University: Department of Statistics, MCIN, Biochemistry Department, Department of Microbiology, Immunology, Pathology (2005/6).
- Inferring motifs that mediate protein-protein interactions. Invited presentation, NIPS bioinformatics workshop, December 2003
- Protein sequence motifs: Highly predictive features of protein function. International Computer Science Institute, Berkeley, April 2004; Workshop on feature selection, NIPS, December 2003
- Remote homology detection: A motif based approach. Chemistry department, University of California at Berkeley, April 2004 Max-Planck Institute for Informatics, Saarbrucken, July 2003 Max-Planck Institute for Biological Cybernetics, Tubingen, July 2003 Department of Computer Science, Columbia University, June 2003

A stability-based method for detecting structure in clustered data. International Computer Science Institute, Berkeley, March 2003 Center for the Study of Language and Information, Stanford, January 2003 EECS Department, University of California at Berkeley, March 2002 Department of computer science, University of Massachusetts at Amherst, November 2002

Introduction to machine learning and support vector machines.

Bay Area Python Interest Group, April 2003

Support vector clustering.

Department of computer science, University of Massachusetts at Amherst, November 2002 Department of physiology, McGill University, April 1999.

A theory of complexity for continuous time systems.

EECS department, University of California at Berkeley, November 2002 Santa Fe Institute, April 1999

PATENTS

A. Ben Hur, A. Elisseeff, O. Chapelle and J. Weston. Kernels and kernel methods for spectral data. US Patent Application 20050228591.

A. Ben Hur, A. Elisseeff and I. Guyon. Model selection for cluster data analysis. US Patent Application 20080140592.

Corey Broeckling, Jessica Prenni, Asa Ben-Hur, and Fayyaz Minhas. RAMClust - Clustering of Mass Spectrometry Features for Identification. U.S. Provisional Patent Application.
