

# I-Clicker Practice Quiz

# What is your experience with C or C++ programming?

---

Please select the most relevant answer:

- A. I have extensive expertise using C/C++.
- B. I have used C/C++, but am not an expert.
- C. I have very limited experience with C/C++.
- D. I just completed CS156 or CS157 or both.
- E. No experience, that's why I'm here!

## Do you understand transistors, gates, and simple digital circuits?

---

Please select the most relevant answer:

- A. Yes, I could design a working circuit, or at least decode what a circuit does.
- B. Maybe, I've seen some material on circuits, but don't have it wired!
- C. No, that's what I'm expecting to learn from this class.

# Are you familiar with stack or activation frames, i.e. the memory model?

---

Please select the most relevant answer:

- A. Yes, I understand these terms and could explain how the memory model works.
- B. Maybe, I have seen something about the memory model, but don't understand it.
- C. No, it's new to me, in fact I'm not sure what you're talking about!

# Have you ever programmed in assembly code, or had to decode it?

---

Please select the most relevant answer:

- A. Yes, I have experience writing assembly code.
- B. Yes, I could understand an assembly program given to me.
- C. No, I have only a limited understanding of what assembly code is.
- D. No, I never heard anything about assembly code.

# How many hours are required to do well in this class, outside of class and labs?

---

May vary depending on student background!

- A. 2.5 hours
- B. 5 hours
- C. 7.5 hours
- D. 10 hours
- E. I plan on moving into the COMSC 120 lab.
