

Lab 9

Practice User-Defined Methods

Objectives of this Lab:

1. Practice creating and using User-Defined Methods.

zyBooks

Today's lab will be in zyBooks.

Your TA will demonstrate the first program in zyBooks, **5.14 Miles to Track Laps**. You will follow along in your own zyBooks account.

After the demonstration by your TA, you will need to complete **5.17 Driving Cost** in zyBooks on your own.

Note: Make sure that you submit everything to zyBooks to get credit. All zyBooks assignments completed in lab are due by the next day; however, it's best to get them in on your lab day to prevent getting behind.
