PRE-WORK for in-class sketching activity

Read sections 3.9 and 3.10 of the Sketching User Experiences book. See these for details on creating hybrid traces and photo traces. The activity is based on the exercise in 3.10.

• **By Monday** pick a kitchen appliance that you will work on. Everyone on the team needs to pick the same kind of appliance.

• **Before class on Wednesday:**
  - **Take a photo** of the control panel of the appliance – each person may have a different version of the appliance and hence a different photo.
  - **Create a hybrid trace** of a touch screen on top of the appliance.
  - **Create hybrid traces of at least 3 different ways** to allow the same functionality of the physical controls with the touch screen
