CS548
Project Proposal (Due Feb 18, 2020)

Computer Science Department
Colorado State University

February 11, 2020

Write, as a team, a three-page proposal on what your project will be. Each team will submit one proposal. Your proposal must include a section on Background and Motivation. You must clearly explain why you have chosen what you have chosen to work on. Also, the proposal must include a section on Approach. Broadly explain the technical approach and methods that you will use (existing) or develop (new). Also, a section on Data must be included: what kind of (public) data will you use for your project and what needs to be done to download, preprocess, and prepare the data. Another section on Evaluation must be included: how are you going to evaluate your work and what will you call a success and why. Finally a section on Knowledge must be included, in which you explain what new knowledge you will learn from this project, or what hypothesis you will test. In summary, the sections must be:

- Background and Motivation

- Approach

- Data

- Evaluation

- Knowledge

Upload your document in zipped PDF or Doc on Canvas.
