SetFRULedState.datafield.LEDID  LED ID
  Unsigned 8-bit integer
  LED ID

SetFRULedState.datafield.Offduration  Off-duration
  Unsigned 8-bit integer
  Off-duration

SetFRULedState.datafield.Onduration  On-duration
  Unsigned 8-bit integer
  On-duration

SetFRULedState.datafield.PICMGIdentifier  PICMG Identifier
  Unsigned 8-bit integer
  PICMG Identifier

SetFanLevel.datafield.FRUDeviceID  FRU Device ID
  Unsigned 8-bit integer
  FRU Device ID

SetFanLevel.datafield.FanLevel  Fan Level
  Unsigned 8-bit integer
  Fan Level

SetFanLevel.datafield.PICMGIdentifier  PICMG Identifier
  Unsigned 8-bit integer
  PICMG Identifier

SetPowerLevel.datafield.FRUDeviceID  FRU Device ID
  Unsigned 8-bit integer
  FRU Device ID

SetPowerLevel.datafield.PICMGIdentifier  PICMG Identifier
  Unsigned 8-bit integer
  PICMG Identifier
```

```

SetPowerLevel.datafield.PowerLevel  Power Level
    Unsigned 8-bit integer
    Power Level

SetPowerLevel.datafield.SetPresentLevelsToDesiredLevels  Set Present Levels to D
    Unsigned 8-bit integer
    Set Present Levels to Desired Levels

SetSensorHysteresis.datafield.NegativegoingThresholdHysteresisValue  Negative-go
    Unsigned 8-bit integer
    Negative-going Threshold Hysteresis Value

SetSensorHysteresis.datafield.PositivegoingThresholdHysteresisValue  Positive-go
    Unsigned 8-bit integer
    Positive-going Threshold Hysteresis Value

SetSensorHysteresis.datafield.ReservedForHysteresisMask  Reserved for future ' H
    Unsigned 8-bit integer
    Reserved For Hysteresis Mask

SetSensorHysteresis.datafield.SensorNumber  Sensor Number
    Unsigned 8-bit integer
    Sensor Number

SetSensorThresholds.datafield.ControlByte.Bit0  lower non-critical threshold
    Unsigned 8-bit integer
    lower non-critical threshold

SetSensorThresholds.datafield.ControlByte.Bit1  lower critical threshold
    Unsigned 8-bit integer
    lower critical threshold

SetSensorThresholds.datafield.ControlByte.Bit2  lower non-recoverable threshold
    Unsigned 8-bit integer
    lower non-recoverable threshold

SetSensorThresholds.datafield.ControlByte.Bit3  upper non-critical threshold
    Unsigned 8-bit integer
    upper non-critical threshold

SetSensorThresholds.datafield.ControlByte.Bit4  upper critical threshold
    Unsigned 8-bit integer
    upper critical threshold

SetSensorThresholds.datafield.ControlByte.Bit5  upper non-recoverable threshold
    Unsigned 8-bit integer
    upper non-recoverable threshold

SetSensorThresholds.datafield.ControlByte.Bit76  Bit 7...6 Reserved
    Unsigned 8-bit integer
    Bit 7...6 Reserved

SetSensorThresholds.datafield.LowerCriticalThreshold  lower critical threshold
    Unsigned 8-bit integer
    lower critical threshold

SetSensorThresholds.datafield.LowerNonCriticalThreshold  lower non-critical thre
    Unsigned 8-bit integer
    lower non-critical threshold

SetSensorThresholds.datafield.LowerNonRecoverableThreshold  lower non-recoverabl
    Unsigned 8-bit integer
    lower non-recoverable threshold

```

```
SetSensorThresholds.datafield.SensorNumber  Sensor Number
    Unsigned 8-bit integer
    Sensor Number

SetSensorThresholds.datafield.UpperCriticalThreshold  upper critical threshold
    Unsigned 8-bit integer
    upper critical threshold

SetSensorThresholds.datafield.UpperNonCriticalThreshold  upper non-critical thre
    Unsigned 8-bit integer
    upper non-critical threshold

SetSensorThresholds.datafield.UpperNonRecoverableThreshold  upper non-recoverabl
    Unsigned 8-bit integer
    upper non-recoverable threshold

ipmi.msg.ccode  Completion Code
    Unsigned 8-bit integer
    Completion Code for Request

ipmi.msg.cmd  Command
    Unsigned 8-bit integer
    IPMI Command Byte

ipmi.msg.confhdr  Confidentiality Header
    Unsigned 8-bit integer
    IPMI Confidentiality Header

ipmi.msg.csum1  Checksum 1
    Unsigned 8-bit integer
    2s Complement Checksum

ipmi.msg.csum2  Checksum 2
    Unsigned 8-bit integer
    2s Complement Checksum

ipmi.msg.len  Message Length
    Unsigned 8-bit integer
    IPMI Message Length

ipmi.msg.nlfield  NetFn/LUN
    Unsigned 8-bit integer
    Network Function and LUN field

ipmi.msg.nlfield.netfn  NetFn
    Unsigned 8-bit integer
    Network Function Code

ipmi.msg.nlfield.rqlun  Request LUN
    Unsigned 8-bit integer
    Requester's Logical Unit Number

ipmi.msg.rqaddr  Request Address
    Unsigned 8-bit integer
    Requester's Address (SA or SWID)

ipmi.msg.rsaddr  Response Address
    Unsigned 8-bit integer
    Responder's Slave Address

ipmi.msg.slfield  Seq/LUN
    Unsigned 8-bit integer
    Sequence and LUN field
```

```

ipmi.msg.slfield.rslun  Response LUN
    Unsigned 8-bit integer
    Responder's Logical Unit Number

ipmi.msg.slfield.seq  Sequence
    Unsigned 8-bit integer
    Sequence Number (requester)

ipmi.session.authcode  Authentication Code
    Byte array
    IPMI Message Authentication Code

ipmi.session.authtype  Authentication Type
    Unsigned 8-bit integer
    IPMI Authentication Type

ipmi.session.id  Session ID
    Unsigned 32-bit integer
    IPMI Session ID

ipmi.session.oem.iana  OEM IANA
    Byte array
    IPMI OEM IANA

ipmi.session.oem.payloadid  OEM Payload ID
    Byte array
    IPMI OEM Payload ID

ipmi.session.payloadtype  Payload Type
    Unsigned 8-bit integer
    IPMI Payload Type

ipmi.session.payloadtype.auth  Authenticated
    Boolean
    IPMI Payload Type authenticated

ipmi.session.payloadtype.enc  Encryption
    Boolean
    IPMI Payload Type encryption

ipmi.session.sequence  Session Sequence Number
    Unsigned 32-bit integer
    IPMI Session Sequence Number

```

**Inter-Access-Point Protocol (iapp)**

```

iapp.type  type
    Unsigned 8-bit integer

iapp.version  Version
    Unsigned 8-bit integer

```

**Inter-Asterisk eXchange v2 (iax2)**

```

iax2.abstime  Absolute Time
    Date/Time stamp
    The absolute time of this packet (calculated by adding the IAX timestamp to

iax2.call  Call identifier
    Unsigned 32-bit integer
    This is the identifier Wireshark assigns to identify this call. It does not

```

```
iax2.cap.adpcm  ADPCM
  Boolean
  ADPCM

iax2.cap.alaw  Raw A-law data (G.711)
  Boolean
  Raw A-law data (G.711)

iax2.cap.g723_1  G.723.1 compression
  Boolean
  G.723.1 compression

iax2.cap.g726  G.726 compression
  Boolean
  G.726 compression

iax2.cap.g729a  G.729a Audio
  Boolean
  G.729a Audio

iax2.cap.gsm  GSM compression
  Boolean
  GSM compression

iax2.cap.h261  H.261 video
  Boolean
  H.261 video

iax2.cap.h263  H.263 video
  Boolean
  H.263 video

iax2.cap.ilbc  iLBC Free compressed Audio
  Boolean
  iLBC Free compressed Audio

iax2.cap.jpeg  JPEG images
  Boolean
  JPEG images

iax2.cap.lpc10  LPC10, 180 samples/frame
  Boolean
  LPC10, 180 samples/frame

iax2.cap.png  PNG images
  Boolean
  PNG images

iax2.cap.slinear  Raw 16-bit Signed Linear (8000 Hz) PCM
  Boolean
  Raw 16-bit Signed Linear (8000 Hz) PCM

iax2.cap.speex  SPEEX Audio
  Boolean
  SPEEX Audio

iax2.cap.ulaw  Raw mu-law data (G.711)
  Boolean
  Raw mu-law data (G.711)

iax2.control.subclass  Control subclass
  Unsigned 8-bit integer
  This gives the command number for a Control packet.
```

iax2.dst\_call Destination call  
Unsigned 16-bit integer  
dst\_call holds the number of this call at the packet destination

iax2.dtmf.subclass DTMF subclass (digit)  
String  
DTMF subclass gives the DTMF digit

iax2.fragment IAX2 Fragment data  
Frame number  
IAX2 Fragment data

iax2.fragment.error Defragmentation error  
Frame number  
Defragmentation error due to illegal fragments

iax2.fragment.multipletails Multiple tail fragments found  
Boolean  
Several tails were found when defragmenting the packet

iax2.fragment.overlap Fragment overlap  
Boolean  
Fragment overlaps with other fragments

iax2.fragment.overlap.conflict Conflicting data in fragment overlap  
Boolean  
Overlapping fragments contained conflicting data

iax2.fragment.toolongfragment Fragment too long  
Boolean  
Fragment contained data past end of packet

iax2.fragments IAX2 Fragments  
No value  
IAX2 Fragments

iax2.iax.aesprovisioning AES Provisioning info  
String

iax2.iax.app\_addr.sinaddr Address  
IPv4 address  
Address

iax2.iax.app\_addr.sinfamily Family  
Unsigned 16-bit integer  
Family

iax2.iax.app\_addr.sinport Port  
Unsigned 16-bit integer  
Port

iax2.iax.auth.challenge Challenge data for MD5/RSA  
String

iax2.iax.auth.md5 MD5 challenge result  
String

iax2.iax.auth.methods Authentication method(s)  
Unsigned 16-bit integer

iax2.iax.auth.rsa RSA challenge result  
String

```
iax2.iax.autoanswer  Request auto-answering
    No value
iax2.iax.call_no     Call number of peer
    Unsigned 16-bit integer
iax2.iax.called_context  Context for number
    String
iax2.iax.called_number  Number/extension being called
    String
iax2.iax.calling_ani   Calling number ANI for billing
    String
iax2.iax.calling_name  Name of caller
    String
iax2.iax.calling_number  Calling number
    String
iax2.iax.callingpres   Calling presentation
    Unsigned 8-bit integer
iax2.iax.callingtms   Calling transit network select
    Unsigned 16-bit integer
iax2.iax.callington   Calling type of number
    Unsigned 8-bit integer
iax2.iax.capability   Actual codec capability
    Unsigned 32-bit integer
iax2.iax.cause        Cause
    String
iax2.iax.causecode    Hangup cause
    Unsigned 8-bit integer
iax2.iax.codecprefs   Codec negotiation
    String
iax2.iax.cpe_adsi     CPE ADSI capability
    Unsigned 16-bit integer
iax2.iax.dataformat   Data call format
    Unsigned 32-bit integer
iax2.iax.datetime    Date/Time
    Date/Time stamp
iax2.iax.datetime.raw  Date/Time
    Unsigned 32-bit integer
iax2.iax.devicetype   Device type
    String
iax2.iax.dialplan_status  Dialplan status
    Unsigned 16-bit integer
iax2.iax.dnid        Originally dialed DNID
    String
iax2.iax.enckey      Encryption key
    String
```

```
iax2.iax.encryption  Encryption format
                    Unsigned 16-bit integer
iax2.iax.firmwarever  Firmware version
                    Unsigned 16-bit integer
iax2.iax.format      Desired codec format
                    Unsigned 32-bit integer
iax2.iax.fwblockdata  Firmware block of data
                    String
iax2.iax.fwblockdesc  Firmware block description
                    Unsigned 32-bit integer
iax2.iax.iax_unknown  Unknown IAX command
                    Byte array
iax2.iax.language    Desired language
                    String
iax2.iax.moh         Request musiconhold with QUELCH
                    No value
iax2.iax.msg_count   How many messages waiting
                    Signed 16-bit integer
iax2.iax.password    Password for authentication
                    String
iax2.iax.provisioning  Provisioning info
                    String
iax2.iax.provver     Provisioning version
                    Unsigned 32-bit integer
iax2.iax.rdnis       Referring DNIS
                    String
iax2.iax.refresh     When to refresh registration
                    Signed 16-bit integer
iax2.iax.rrdelay     Max playout delay in ms for received frames
                    Unsigned 16-bit integer
iax2.iax.rrdropped   Dropped frames (presumably by jitterbuffer)
                    Unsigned 32-bit integer
iax2.iax.rrjitter    Received jitter (as in RFC1889)
                    Unsigned 32-bit integer
iax2.iax.rrloss      Received loss (high byte loss pct, low 24 bits loss count, as i
                    Unsigned 32-bit integer
iax2.iax.rrooo       Frame received out of order
                    Unsigned 32-bit integer
iax2.iax.rrpkts     Total frames received
                    Unsigned 32-bit integer
iax2.iax.samplingrate  Supported sampling rates
                    Unsigned 16-bit integer
iax2.iax.serviceident  Service identifier
                    String
```

`iax2.iax.subclass` IAX subclass  
Unsigned 8-bit integer  
IAX subclass gives the command number for IAX signalling packets

`iax2.iax.transferid` Transfer Request Identifier  
Unsigned 32-bit integer

`iax2.iax.unknownbyte` Unknown  
Unsigned 8-bit integer  
Raw data for unknown IEs

`iax2.iax.unknownlong` Unknown  
Unsigned 32-bit integer  
Raw data for unknown IEs

`iax2.iax.unknownshort` Unknown  
Unsigned 16-bit integer  
Raw data for unknown IEs

`iax2.iax.unknownstring` Unknown  
String  
Raw data for unknown IEs

`iax2.iax.username` Username (peer or user) for authentication  
String

`iax2.iax.version` Protocol version  
Unsigned 16-bit integer

`iax2.iseqno` Inbound seq.no.  
Unsigned 16-bit integer  
iseqno is the sequence no of the last successfully received packet

`iax2.lateness` Lateness  
Time duration  
The lateness of this packet compared to its timestamp

`iax2.modem.subclass` Modem subclass  
Unsigned 8-bit integer  
Modem subclass gives the type of modem

`iax2.oseqno` Outbound seq.no.  
Unsigned 16-bit integer  
oseqno is the sequence no of this packet. The first packet has oseqno==0, and

`iax2.packet_type` Packet type  
Unsigned 8-bit integer  
Full/minivoice/minivideo/meta packet

`iax2.reassembled_in` IAX2 fragment, reassembled in frame  
Frame number  
This IAX2 packet is reassembled in this frame

`iax2.retransmission` Retransmission  
Boolean  
retransmission is set if this packet is a retransmission of an earlier failed

`iax2.src_call` Source call  
Unsigned 16-bit integer  
src\_call holds the number of this call at the packet source pbx

```
iax2.subclass Unknown subclass
    Unsigned 8-bit integer
    Subclass of unknown type of full IAX2 frame

iax2.timestamp Timestamp
    Unsigned 32-bit integer
    timestamp is the time, in ms after the start of this call, at which this pac

iax2.type Type
    Unsigned 8-bit integer
    For full IAX2 frames, type is the type of frame

iax2.video.codec CODEC
    Unsigned 32-bit integer
    The codec used to encode video data

iax2.video.marker Marker
    Unsigned 16-bit integer
    RTP end-of-frame marker

iax2.video.subclass Video Subclass (compressed codec no)
    Unsigned 8-bit integer
    Video Subclass (compressed codec no)

iax2.voice.codec CODEC
    Unsigned 32-bit integer
    CODEC gives the codec used to encode audio data

iax2.voice.subclass Voice Subclass (compressed codec no)
    Unsigned 8-bit integer
    Voice Subclass (compressed codec no)
```

### **InterSwitch Message Protocol (ismp)**

```
ismp.authdata Auth Data
    Byte array

ismp.codelen Auth Code Length
    Unsigned 8-bit integer

ismp.edp.chassisip Chassis IP Address
    IPv4 address

ismp.edp.chassismac Chassis MAC Address
    6-byte Hardware (MAC) Address

ismp.edp.devtype Device Type
    Unsigned 16-bit integer

ismp.edp.maccount Number of Known Neighbors
    Unsigned 16-bit integer

ismp.edp.modip Module IP Address
    IPv4 address

ismp.edp.modmac Module MAC Address
    6-byte Hardware (MAC) Address

ismp.edp.modport Module Port (ifIndex num)
    Unsigned 32-bit integer

ismp.edp.nbrs Neighbors
    Byte array
```

ismep.edp.numtups Number of Tuples  
Unsigned 16-bit integer

ismep.edp.opts Device Options  
Unsigned 32-bit integer

ismep.edp.rev Module Firmware Revision  
Unsigned 32-bit integer

ismep.edp.tups Number of Tuples  
Byte array

ismep.edp.version Version  
Unsigned 16-bit integer

ismep.msgtype Message Type  
Unsigned 16-bit integer

ismep.seqnum Sequence Number  
Unsigned 16-bit integer

ismep.version Version  
Unsigned 16-bit integer

### **International Passenger Airline Reservation System (ipars)**

#### **Internet Cache Protocol (icp)**

icp.length Length  
Unsigned 16-bit integer

icp.nr Request Number  
Unsigned 32-bit integer

icp.opcode Opcode  
Unsigned 8-bit integer

icp.version Version  
Unsigned 8-bit integer

#### **Internet Communications Engine Protocol (icep)**

icep.compression\_status Compression Status  
Signed 8-bit integer  
The compression status of the message

icep.context Invocation Context  
String  
The invocation context

icep.encoding\_major Encoding Major  
Signed 8-bit integer  
The encoding major version number

icep.encoding\_minor Encoding Minor  
Signed 8-bit integer  
The encoding minor version number

icep.facet Facet Name  
String  
The facet name

```
icep.id.content  Object Identity Content
  String
  The object identity content
icep.id.name    Object Identity Name
  String
  The object identity name
icep.message_status  Message Size
  Signed 32-bit integer
  The size of the message in bytes, including the header
icep.message_type  Message Type
  Signed 8-bit integer
  The message type
icep.operation    Operation Name
  String
  The operation name
icep.operation_mode  Ice::OperationMode
  Signed 8-bit integer
  A byte representing Ice::OperationMode
icep.params.major  Input Parameters Encoding Major
  Signed 8-bit integer
  The major encoding version of encapsulated parameters
icep.params.minor  Input Parameters Encoding Minor
  Signed 8-bit integer
  The minor encoding version of encapsulated parameters
icep.params.size   Input Parameters Size
  Signed 32-bit integer
  The encapsulated input parameters size
icep.protocol_major  Protocol Major
  Signed 8-bit integer
  The protocol major version number
icep.protocol_minor  Protocol Minor
  Signed 8-bit integer
  The protocol minor version number
icep.request_id     Request Identifier
  Signed 32-bit integer
  The request identifier
```

#### **Internet Content Adaptation Protocol (icap)**

```
icap.options     Options
  Boolean
  TRUE if ICAP options
icap.other       Other
  Boolean
  TRUE if ICAP other
icap.reqmod      Reqmod
  Boolean
  TRUE if ICAP reqmod
```

```
icap.respmod  Respmod
  Boolean
  TRUE if ICAP respmod
icap.response Response
  Boolean
  TRUE if ICAP response
```

**Internet Control Message Protocol (icmp)**

```
icmp.checksum  Checksum
  Unsigned 16-bit integer
icmp.checksum_bad  Bad Checksum
  Boolean
icmp.code  Code
  Unsigned 8-bit integer
icmp.ident  Identifier
  Unsigned 16-bit integer
icmp.mip.b  Busy
  Boolean
  This FA will not accept requests at this time
icmp.mip.challenge  Challenge
  Byte array
icmp.mip.coa  Care-Of-Address
  IPv4 address
icmp.mip.f  Foreign Agent
  Boolean
  Foreign Agent Services Offered
icmp.mip.flags  Flags
  Unsigned 16-bit integer
icmp.mip.g  GRE
  Boolean
  GRE encapsulated tunneled datagram support
icmp.mip.h  Home Agent
  Boolean
  Home Agent Services Offered
icmp.mip.length  Length
  Unsigned 8-bit integer
icmp.mip.life  Registration Lifetime
  Unsigned 16-bit integer
icmp.mip.m  Minimal Encapsulation
  Boolean
  Minimal encapsulation tunneled datagram support
icmp.mip.prefixlength  Prefix Length
  Unsigned 8-bit integer
icmp.mip.r  Registration Required
  Boolean
  Registration with this FA is required
```

```
icmp.mip.reserved  Reserved
                   Unsigned 16-bit integer

icmp.mip.rt       Reverse tunneling
                   Boolean
                   Reverse tunneling support

icmp.mip.seq      Sequence Number
                   Unsigned 16-bit integer

icmp.mip.type     Extension Type
                   Unsigned 8-bit integer

icmp.mip.u        UDP tunneling
                   Boolean
                   UDP tunneling support

icmp.mip.v        VJ Comp
                   Boolean
                   Van Jacobson Header Compression Support

icmp.mip.x        Revocation support
                   Boolean
                   Registration revocation support

icmp.mpls         ICMP Extensions for MPLS
                   No value

icmp.mpls.checksum  Checksum
                   Unsigned 16-bit integer

icmp.mpls.checksum_bad  Bad Checksum
                   Boolean

icmp.mpls.class   Class
                   Unsigned 8-bit integer

icmp.mpls.ctype   C-Type
                   Unsigned 8-bit integer

icmp.mpls.exp     Experimental
                   Unsigned 24-bit integer

icmp.mpls.label   Label
                   Unsigned 24-bit integer

icmp.mpls.length  Length
                   Unsigned 16-bit integer

icmp.mpls.res     Reserved
                   Unsigned 16-bit integer

icmp.mpls.s       Stack bit
                   Boolean

icmp.mpls.ttl     Time to live
                   Unsigned 8-bit integer

icmp.mpls.version Version
                   Unsigned 8-bit integer

icmp.mtu          MTU of next hop
                   Unsigned 16-bit integer

icmp.redir_gw     Gateway address
                   IPv4 address
```

icmp.seq Sequence number  
Unsigned 16-bit integer

icmp.type Type  
Unsigned 8-bit integer

### **Internet Control Message Protocol v6 (icmpv6)**

icmpv6.all\_comp All Components  
Unsigned 16-bit integer  
All Components

icmpv6.checksum Checksum  
Unsigned 16-bit integer

icmpv6.checksum\_bad Bad Checksum  
Boolean

icmpv6.code Code  
Unsigned 8-bit integer

icmpv6.comp Component  
Unsigned 16-bit integer  
Component

icmpv6.haad.ha\_addr Home Agent Addresses  
IPv6 address

icmpv6.identifier Identifier  
Unsigned 16-bit integer  
Identifier

icmpv6.option ICMPv6 Option  
No value  
Option

icmpv6.option.cga CGA  
Byte array  
CGA

icmpv6.option.cga.pad\_length Pad Length  
Unsigned 8-bit integer  
Pad Length (in bytes)

icmpv6.option.length Length  
Unsigned 8-bit integer  
Options length (in bytes)

icmpv6.option.name\_type Name Type  
Unsigned 8-bit integer  
Name Type

icmpv6.option.name\_type.fqdn FQDN  
String  
FQDN

icmpv6.option.name\_x501 DER Encoded X.501 Name  
Byte array  
DER Encoded X.501 Name

icmpv6.option.rsa.key\_hash Key Hash  
Byte array  
Key Hash

```
icmpv6.option.type  Type
    Unsigned 8-bit integer
    Options type

icmpv6.ra.cur_hop_limit  Cur hop limit
    Unsigned 8-bit integer
    Current hop limit

icmpv6.ra.reachable_time  Reachable time
    Unsigned 32-bit integer
    Reachable time (ms)

icmpv6.ra.retrans_timer  Retrans timer
    Unsigned 32-bit integer
    Retrans timer (ms)

icmpv6.ra.router_lifetime  Router lifetime
    Unsigned 16-bit integer
    Router lifetime (s)

icmpv6.recursive_dns_serv  Recursive DNS Servers
    IPv6 address
    Recursive DNS Servers

icmpv6.type  Type
    Unsigned 8-bit integer

icmpv6.x509_Name  Name
    Unsigned 32-bit integer
    Name

icmpv6_x509_Certificate  Certificate
    No value
    Certificate
```

### **Internet Group Management Protocol (igmp)**

```
igmp.access_key  Access Key
    Byte array
    IGMP V0 Access Key

igmp.aux_data  Aux Data
    Byte array
    IGMP V3 Auxiliary Data

igmp.aux_data_len  Aux Data Len
    Unsigned 8-bit integer
    Aux Data Len, In units of 32bit words

igmp.checksum  Checksum
    Unsigned 16-bit integer
    IGMP Checksum

igmp.checksum_bad  Bad Checksum
    Boolean
    Bad IGMP Checksum

igmp.group_type  Type Of Group
    Unsigned 8-bit integer
    IGMP V0 Type Of Group
```

```
igmp.identifier Identifier
    Unsigned 32-bit integer
    IGMP V0 Identifier

igmp.maddr Multicast Address
    IPv4 address
    Multicast Address

igmp.max_resp Max Resp Time
    Unsigned 8-bit integer
    Max Response Time

igmp.max_resp.exp Exponent
    Unsigned 8-bit integer
    Maximum Response Time, Exponent

igmp.max_resp.mant Mantissa
    Unsigned 8-bit integer
    Maximum Response Time, Mantissa

igmp.mtrace.max_hops # hops
    Unsigned 8-bit integer
    Maximum Number of Hops to Trace

igmp.mtrace.q_arrival Query Arrival
    Unsigned 32-bit integer
    Query Arrival Time

igmp.mtrace.q_fwd_code Forwarding Code
    Unsigned 8-bit integer
    Forwarding information/error code

igmp.mtrace.q_fwd_ttl FwdTTL
    Unsigned 8-bit integer
    TTL required for forwarding

igmp.mtrace.q_id Query ID
    Unsigned 24-bit integer
    Identifier for this Traceroute Request

igmp.mtrace.q_inaddr In itf addr
    IPv4 address
    Incoming Interface Address

igmp.mtrace.q_inpkt In pkts
    Unsigned 32-bit integer
    Input packet count on incoming interface

igmp.mtrace.q_mbz MBZ
    Unsigned 8-bit integer
    Must be zeroed on transmission and ignored on reception

igmp.mtrace.q_outaddr Out itf addr
    IPv4 address
    Outgoing Interface Address

igmp.mtrace.q_outpkt Out pkts
    Unsigned 32-bit integer
    Output packet count on outgoing interface

igmp.mtrace.q_prevrtr Previous rtr addr
    IPv4 address
    Previous-Hop Router Address
```

```
igmp.mtrace.q_rtg_proto  Rtg Protocol
    Unsigned 8-bit integer
    Routing protocol between this and previous hop rtr

igmp.mtrace.q_s  S
    Unsigned 8-bit integer
    Set if S,G packet count is for source network

igmp.mtrace.q_src_mask  Src Mask
    Unsigned 8-bit integer
    Source mask length. 63 when forwarding on group state

igmp.mtrace.q_total  S,G pkt count
    Unsigned 32-bit integer
    Total number of packets for this source-group pair

igmp.mtrace.raddr  Receiver Address
    IPv4 address
    Multicast Receiver for the Path Being Traced

igmp.mtrace.resp_ttl  Response TTL
    Unsigned 8-bit integer
    TTL for Multicast Responses

igmp.mtrace.rspaddr  Response Address
    IPv4 address
    Destination of Completed Traceroute Response

igmp.mtrace.saddr  Source Address
    IPv4 address
    Multicast Source for the Path Being Traced

igmp.num_grp_recs  Num Group Records
    Unsigned 16-bit integer
    Number Of Group Records

igmp.num_src  Num Src
    Unsigned 16-bit integer
    Number Of Sources

igmp.qqic  QQIC
    Unsigned 8-bit integer
    Querier's Query Interval Code

igmp.qrv  QRV
    Unsigned 8-bit integer
    Querier's Robustness Value

igmp.record_type  Record Type
    Unsigned 8-bit integer
    Record Type

igmp.reply  Reply
    Unsigned 8-bit integer
    IGMP V0 Reply

igmp.reply.pending  Reply Pending
    Unsigned 8-bit integer
    IGMP V0 Reply Pending, Retry in this many seconds

igmp.s  S
    Boolean
    Suppress Router Side Processing
```

```
igmp.saddr  Source Address
            IPv4 address
            Source Address

igmp.type   Type
            Unsigned 8-bit integer
            IGMP Packet Type

igmp.version IGMP Version
            Unsigned 8-bit integer
            IGMP Version
```

### **Internet Group membership Authentication Protocol (igap)**

```
igap.account  User Account
              String
              User account

igap.asize    Account Size
              Unsigned 8-bit integer
              Length of the User Account field

igap.challengeid Challenge ID
              Unsigned 8-bit integer
              Challenge ID

igap.checksum Checksum
              Unsigned 16-bit integer
              Checksum

igap.checksum_bad Bad Checksum
                  Boolean
                  Bad Checksum

igap.maddr    Multicast group address
              IPv4 address
              Multicast group address

igap.max_resp Max Resp Time
              Unsigned 8-bit integer
              Max Response Time

igap.msize    Message Size
              Unsigned 8-bit integer
              Length of the Message field

igap.subtype  Subtype
              Unsigned 8-bit integer
              Subtype

igap.type     Type
              Unsigned 8-bit integer
              IGAP Packet Type

igap.version  Version
              Unsigned 8-bit integer
              IGAP protocol version
```

**Internet Message Access Protocol (imap)**

```
imap.request Request
  Boolean
  TRUE if IMAP request

imap.response Response
  Boolean
  TRUE if IMAP response
```

**Internet Message Format (imf)**

```

**Internet Printing Protocol (ipp)**

```
ipp.timestamp  Time
  Date/Time stamp
```

**Internet Protocol (ip)**

```
ip.addr  Source or Destination Address
  IPv4 address
ip.checksum  Header checksum
  Unsigned 16-bit integer
ip.checksum_bad  Bad
  Boolean
  True: checksum doesn't match packet content; False: matches content or not c
ip.checksum_good  Good
  Boolean
  True: checksum matches packet content; False: doesn't match content or not c
ip.dsfield  Differentiated Services field
  Unsigned 8-bit integer
ip.dsfield.ce  ECN-CE
  Unsigned 8-bit integer
ip.dsfield.dscp  Differentiated Services Codepoint
  Unsigned 8-bit integer
ip.dsfield.ect  ECN-Capable Transport (ECT)
  Unsigned 8-bit integer
ip.dst  Destination
  IPv4 address
ip.dst_host  Destination Host
  String
ip.flags  Flags
  Unsigned 8-bit integer
```

```
ip.flags.df  Don't fragment
             Boolean

ip.flags.mf  More fragments
             Boolean

ip.flags.rb  Reserved bit
             Boolean

ip.frag_offset  Fragment offset
               Unsigned 16-bit integer
               Fragment offset (13 bits)

ip.fragment  IP Fragment
             Frame number
             IP Fragment

ip.fragment.error  Defragmentation error
                  Frame number
                  Defragmentation error due to illegal fragments

ip.fragment.multipletails  Multiple tail fragments found
                           Boolean
                           Several tails were found when defragmenting the packet

ip.fragment.overlap  Fragment overlap
                    Boolean
                    Fragment overlaps with other fragments

ip.fragment.overlap.conflict  Conflicting data in fragment overlap
                              Boolean
                              Overlapping fragments contained conflicting data

ip.fragment.toolongfragment  Fragment too long
                              Boolean
                              Fragment contained data past end of packet

ip.fragments  IP Fragments
              No value
              IP Fragments

ip.hdr_len  Header Length
           Unsigned 8-bit integer

ip.host  Source or Destination Host
        String

ip.id  Identification
      Unsigned 16-bit integer

ip.len  Total Length
       Unsigned 16-bit integer

ip.proto  Protocol
         Unsigned 8-bit integer

ip.reassembled_in  Reassembled IP in frame
                  Frame number
                  This IP packet is reassembled in this frame

ip.src  Source
       IPv4 address
```

```
ip.src_host  Source Host
             String
ip.tos       Type of Service
             Unsigned 8-bit integer
ip.tos.cost  Cost
             Boolean
ip.tos.delay Delay
             Boolean
ip.tos.precedence Precedence
             Unsigned 8-bit integer
ip.tos.reliability Reliability
             Boolean
ip.tos.throughput Throughput
             Boolean
ip.ttl       Time to live
             Unsigned 8-bit integer
ip.version   Version
             Unsigned 8-bit integer
```

**Internet Protocol Version 6 (ipv6)**

```
ipv6.addr    Address
             IPv6 address
             Source or Destination IPv6 Address
ipv6.class   Traffic class
             Unsigned 32-bit integer
ipv6.dst     Destination
             IPv6 address
             Destination IPv6 Address
ipv6.dst_host Destination Host
             String
             Destination IPv6 Host
ipv6.dst_opt Destination Option
             No value
             Destination Option
ipv6.flow    Flowlabel
             Unsigned 32-bit integer
ipv6.fragment IPv6 Fragment
             Frame number
             IPv6 Fragment
ipv6.fragment.error Defragmentation error
             Frame number
             Defragmentation error due to illegal fragments
ipv6.fragment.more More Fragment
             Boolean
             More Fragments
```

ipv6.fragment.multipletails Multiple tail fragments found  
Boolean  
Several tails were found when defragmenting the packet

ipv6.fragment.offset Offset  
Unsigned 16-bit integer  
Fragment Offset

ipv6.fragment.overlap Fragment overlap  
Boolean  
Fragment overlaps with other fragments

ipv6.fragment.overlap.conflict Conflicting data in fragment overlap  
Boolean  
Overlapping fragments contained conflicting data

ipv6.fragment.toolongfragment Fragment too long  
Boolean  
Fragment contained data past end of packet

ipv6.fragments IPv6 Fragments  
No value  
IPv6 Fragments

ipv6.framgent.id Identification  
Unsigned 32-bit integer  
Fragment Identification

ipv6.hlim Hop limit  
Unsigned 8-bit integer

ipv6.hop\_opt Hop-by-Hop Option  
No value  
Hop-by-Hop Option

ipv6.host Host  
String  
IPv6 Host

ipv6.mipv6\_home\_address Home Address  
IPv6 address

ipv6.mipv6\_length Option Length  
Unsigned 8-bit integer

ipv6.mipv6\_type Option Type  
Unsigned 8-bit integer

ipv6.nxt Next header  
Unsigned 8-bit integer

ipv6.opt.pad1 Pad1  
No value  
Pad1 Option

ipv6.opt.padn PadN  
Unsigned 8-bit integer  
PadN Option

ipv6.plen Payload length  
Unsigned 16-bit integer

```
ipv6.reassembled_in  Reassembled IPv6 in frame
    Frame number
    This IPv6 packet is reassembled in this frame
ipv6.routing_hdr    Routing Header, Type
    Unsigned 8-bit integer
    Routing Header Option
ipv6.routing_hdr.addr  Address
    IPv6 address
    Routing Header Address
ipv6.routing_hdr.left  Left Segments
    Unsigned 8-bit integer
    Routing Header Left Segments
ipv6.routing_hdr.type  Type
    Unsigned 8-bit integer
    Routing Header Type
ipv6.shim6          SHIM6
    No value
ipv6.shim6.checksum  Checksum
    Unsigned 16-bit integer
    Shim6 Checksum
ipv6.shim6.checksum_bad  Bad Checksum
    Boolean
    Shim6 Bad Checksum
ipv6.shim6.checksum_good  Good Checksum
    Boolean
ipv6.shim6.ct        Context Tag
    No value
ipv6.shim6.inonce    Initiator Nonce
    Unsigned 32-bit integer
ipv6.shim6.len        Header Ext Length
    Unsigned 8-bit integer
ipv6.shim6.loc.flags  Flags
    Unsigned 8-bit integer
    Locator Preferences Flags
ipv6.shim6.loc.prio   Priority
    Unsigned 8-bit integer
    Locator Preferences Priority
ipv6.shim6.loc.weight  Weight
    Unsigned 8-bit integer
    Locator Preferences Weight
ipv6.shim6.locator    Locator
    IPv6 address
    Shim6 Locator
ipv6.shim6.nxt        Next Header
    Unsigned 8-bit integer
```

```
ipv6.shim6.opt.critical  Option Critical Bit
    Boolean
    TRUE : option is critical, FALSE: option is not critical
ipv6.shim6.opt.elemlen  Element Length
    Unsigned 8-bit integer
    Length of Elements in Locator Preferences Option
ipv6.shim6.opt.fii     Forked Instance Identifier
    Unsigned 32-bit integer
ipv6.shim6.opt.len     Content Length
    Unsigned 16-bit integer
    Content Length Option
ipv6.shim6.opt.loclist  Locator List Generation
    Unsigned 32-bit integer
ipv6.shim6.opt.locnum  Num Locators
    Unsigned 8-bit integer
    Number of Locators in Locator List
ipv6.shim6.opt.total_len  Total Length
    Unsigned 16-bit integer
    Total Option Length
ipv6.shim6.opt.type    Option Type
    Unsigned 16-bit integer
    Shim6 Option Type
ipv6.shim6.opt.verif_method  Verification Method
    Unsigned 8-bit integer
    Locator Verification Method
ipv6.shim6.p          P Bit
    Boolean
ipv6.shim6.pdata     Data
    Unsigned 32-bit integer
    Shim6 Probe Data
ipv6.shim6.pdst     Destination Address
    IPv6 address
    Shim6 Probe Destination Address
ipv6.shim6.pnonce   Nonce
    Unsigned 32-bit integer
    Shim6 Probe Nonce
ipv6.shim6.precvd   Probes Received
    Unsigned 8-bit integer
ipv6.shim6.proto    Protocol
    Unsigned 8-bit integer
ipv6.shim6.psent    Probes Sent
    Unsigned 8-bit integer
ipv6.shim6.psrc     Source Address
    IPv6 address
    Shim6 Probe Source Address
ipv6.shim6.reap     REAP State
    Unsigned 8-bit integer
```

```
ipv6.shim6.rnonce  Responder Nonce
                   Unsigned 32-bit integer

ipv6.shim6.rulid  Receiver ULID
                   IPv6 address
                   Shim6 Receiver ULID

ipv6.shim6.sulid  Sender ULID
                   IPv6 address
                   Shim6 Sender ULID

ipv6.shim6.type   Message Type
                   Unsigned 8-bit integer

ipv6.src          Source
                   IPv6 address
                   Source IPv6 Address

ipv6.src_host     Source Host
                   String
                   Source IPv6 Host

ipv6.version      Version
                   Unsigned 8-bit integer
```

**Internet Relay Chat (irc)**

```
irc.request       Request
                   String
                   Line of request message

irc.response      Response
                   String
                   Line of response message
```

```

```
isakmp.doi      Domain of interpretation
                Unsigned 32-bit integer
                ISAKMP Domain of Interpretation

isakmp.exchangetype  Exchange type
                Unsigned 8-bit integer
                ISAKMP Exchange Type

isakmp.flags     Flags
                Unsigned 8-bit integer
                ISAKMP Flags

isakmp.frag.last  Frag last
                Unsigned 8-bit integer
                ISAKMP last fragment

isakmp.frag.packetid  Frag ID
                Unsigned 16-bit integer
                ISAKMP fragment packet-id

isakmp.icookie   Initiator cookie
                Byte array
                ISAKMP Initiator Cookie

isakmp.id.port   Port
                Unsigned 16-bit integer
                ISAKMP ID Port

isakmp.id.type   ID type
                Unsigned 8-bit integer
                ISAKMP ID Type

isakmp.length    Length
                Unsigned 32-bit integer
                ISAKMP Length

isakmp.messageid  Message ID
                Unsigned 32-bit integer
                ISAKMP Message ID

isakmp.nextpayload  Next payload
                Unsigned 8-bit integer
                ISAKMP Next Payload

isakmp.notify.msgtype  Port
                Unsigned 8-bit integer
                ISAKMP Notify Message Type

isakmp.payloadlength  Payload length
                Unsigned 16-bit integer
                ISAKMP Payload Length

isakmp.prop.number  Proposal number
                Unsigned 8-bit integer
                ISAKMP Proposal Number

isakmp.prop.transforms  Proposal transforms
                Unsigned 8-bit integer
                ISAKMP Proposal Transforms

isakmp.protoid    Protocol ID
                Unsigned 8-bit integer
                ISAKMP Protocol ID
```

```
isakmp.rcookie Responder cookie
    Byte array
    ISAKMP Responder Cookie

isakmp.sa.situation Situation
    Byte array
    ISAKMP SA Situation

isakmp.spinum Port
    Unsigned 16-bit integer
    ISAKMP Number of SPIs

isakmp.spisize SPI Size
    Unsigned 8-bit integer
    ISAKMP SPI Size

isakmp.trans.id Transform ID
    Unsigned 8-bit integer
    ISAKMP Transform ID

isakmp.trans.number Transform number
    Unsigned 8-bit integer
    ISAKMP Transform Number

isakmp.version Version
    Unsigned 8-bit integer
    ISAKMP Version (major + minor)

msg.fragment Message fragment
    Frame number

msg.fragment.error Message defragmentation error
    Frame number

msg.fragment.multiple_tails Message has multiple tail fragments
    Boolean

msg.fragment.overlap Message fragment overlap
    Boolean

msg.fragment.overlap.conflicts Message fragment overlapping with conflicting da
    Boolean

msg.fragment.too_long_fragment Message fragment too long
    Boolean

msg.fragments Message fragments
    No value

msg.reassembled.in Reassembled in
    Frame number
```

### **Internet Datagram Protocol (idp)**

```
idp.checksum Checksum
    Unsigned 16-bit integer

idp.dst Destination Address
    String
    Destination Address

idp.dst.net Destination Network
    Unsigned 32-bit integer
```

```
idp.dst.node  Destination Node
              6-byte Hardware (MAC) Address
idp.dst.socket Destination Socket
              Unsigned 16-bit integer
idp.hops      Transport Control (Hops)
              Unsigned 8-bit integer
idp.len       Length
              Unsigned 16-bit integer
idp.packet_type Packet Type
              Unsigned 8-bit integer
idp.src       Source Address
              String
              Source Address
idp.src.net   Source Network
              Unsigned 32-bit integer
idp.src.node  Source Node
              6-byte Hardware (MAC) Address
idp.src.socket Source Socket
              Unsigned 16-bit integer
```

**Internetwork Packet eXchange (ipx)**

```
ipx.addr      Src/Dst Address
              String
              Source or Destination IPX Address  "network.node"
ipx.checksum  Checksum
              Unsigned 16-bit integer
ipx.dst       Destination Address
              String
              Destination IPX Address  "network.node"
ipx.dst.net   Destination Network
              IPX network or server name
ipx.dst.node  Destination Node
              6-byte Hardware (MAC) Address
ipx.dst.socket Destination Socket
              Unsigned 16-bit integer
ipx.hops      Transport Control (Hops)
              Unsigned 8-bit integer
ipx.len       Length
              Unsigned 16-bit integer
ipx.net       Source or Destination Network
              IPX network or server name
ipx.node      Source or Destination Node
              6-byte Hardware (MAC) Address
ipx.packet_type Packet Type
              Unsigned 8-bit integer
```

```
ipx.socket  Source or Destination Socket
            Unsigned 16-bit integer

ipx.src     Source Address
            String
            Source IPX Address  "network.node"

ipx.src.net Source Network
            IPX network or server name

ipx.src.node Source Node
            6-byte Hardware (MAC) Address

ipx.src.socket Source Socket
            Unsigned 16-bit integer
```

**IrCOMM Protocol (ircomm)**

```
ircomm.control Control Channel
            No value

ircomm.control.len Clen
            Unsigned 8-bit integer

ircomm.parameter IrCOMM Parameter
            No value

ircomm.pi Parameter Identifier
            Unsigned 8-bit integer

ircomm.pl Parameter Length
            Unsigned 8-bit integer

ircomm.pv Parameter Value
            Byte array
```

**IrDA Link Access Protocol (irlap)**

```
irlap.a Address Field
            Unsigned 8-bit integer

irlap.a.address Address
            Unsigned 8-bit integer

irlap.a.cr C/R
            Boolean

irlap.c Control Field
            Unsigned 8-bit integer

irlap.c.f Final
            Boolean

irlap.c.ftype Frame Type
            Unsigned 8-bit integer

irlap.c.n_r N(R)
            Unsigned 8-bit integer

irlap.c.n_s N(S)
            Unsigned 8-bit integer

irlap.c.p Poll
            Boolean
```

```
irlap.c.s_fctype  Supervisory frame type
                  Unsigned 8-bit integer
irlap.c.u_modifier_cmd  Command
                  Unsigned 8-bit integer
irlap.c.u_modifier_resp  Response
                  Unsigned 8-bit integer
irlap.i  Information Field
         No value
irlap.negotiation  Negotiation Parameter
                 No value
irlap.pi  Parameter Identifier
          Unsigned 8-bit integer
irlap.pl  Parameter Length
          Unsigned 8-bit integer
irlap.pv  Parameter Value
          Byte array
irlap.snrm.ca  Connection Address
              Unsigned 8-bit integer
irlap.snrm.daddr  Destination Device Address
                 Unsigned 32-bit integer
irlap.snrm.saddr  Source Device Address
                 Unsigned 32-bit integer
irlap.ua.daddr  Destination Device Address
                 Unsigned 32-bit integer
irlap.ua.saddr  Source Device Address
                 Unsigned 32-bit integer
irlap.xid.conflict  Conflict
                   Boolean
irlap.xid.daddr  Destination Device Address
                 Unsigned 32-bit integer
irlap.xid.fi  Format Identifier
              Unsigned 8-bit integer
irlap.xid.flags  Discovery Flags
                 Unsigned 8-bit integer
irlap.xid.s  Number of Slots
             Unsigned 8-bit integer
irlap.xid.saddr  Source Device Address
                 Unsigned 32-bit integer
irlap.xid.slotnr  Slot Number
                  Unsigned 8-bit integer
irlap.xid.version  Version Number
                   Unsigned 8-bit integer
```

**IrDA Link Management Protocol (irlmp)**

```
irlmp.dst Destination
    Unsigned 8-bit integer
irlmp.dst.c Control Bit
    Boolean
irlmp.dst.lsap Destination LSAP
    Unsigned 8-bit integer
irlmp.mode Mode
    Unsigned 8-bit integer
irlmp.opcode Opcode
    Unsigned 8-bit integer
irlmp.reason Reason
    Unsigned 8-bit integer
irlmp.rsvd Reserved
    Unsigned 8-bit integer
irlmp.src Source
    Unsigned 8-bit integer
irlmp.src.lsap Source LSAP
    Unsigned 8-bit integer
irlmp.src.r reserved
    Unsigned 8-bit integer
irlmp.status Status
    Unsigned 8-bit integer
irlmp.xid.charset Character Set
    Unsigned 8-bit integer
irlmp.xid.hints Service Hints
    Byte array
irlmp.xid.name Device Nickname
    String
```

**IuUP (iuup)**

```
iuup.ack Ack/Nack
    Unsigned 8-bit integer
    Ack/Nack
iuup.advance Advance
    Unsigned 32-bit integer
iuup.chain_ind Chain Indicator
    Unsigned 8-bit integer
iuup.circuit_id Circuit ID
    Unsigned 16-bit integer
iuup.data_pdu_type RFCI Data Pdu Type
    Unsigned 8-bit integer
iuup.delay Delay
    Unsigned 32-bit integer
iuup.delta Delta Time
```

```
iuup.direction  Frame Direction
                 Unsigned 16-bit integer

iuup.error_cause  Error Cause
                 Unsigned 8-bit integer

iuup.error_distance  Error DISTANCE
                 Unsigned 8-bit integer

iuup.fqc  FQC
          Unsigned 8-bit integer
          Frame Quality Classification

iuup.frameenum  Frame Number
               Unsigned 8-bit integer

iuup.header_crc  Header CRC
                Unsigned 8-bit integer

iuup.mode  Mode Version
          Unsigned 8-bit integer

iuup.p  Number of RFCI Indicators
       Unsigned 8-bit integer

iuup.payload_crc  Payload CRC
                 Unsigned 16-bit integer

iuup.payload_data  Payload Data
                  Byte array

iuup.pdu_type  PDU Type
              Unsigned 8-bit integer

iuup.procedure  Procedure
               Unsigned 8-bit integer

iuup.rfci  RFCI
          Unsigned 8-bit integer
          RAB sub-Flow Combination Indicator

iuup.rfci.0  RFCI 0
            Unsigned 8-bit integer

iuup.rfci.0.flow.0  RFCI 0 Flow 0
                  Byte array

#### **JPEG File Interchange Format (image-jfif)**

```

image-jfif.RGB  RGB values of thumbnail pixels
    Byte array
    RGB values of the thumbnail pixels (24 bit per pixel, Xthumbnail x Ythumbnail)
image-jfif.Xdensity  Xdensity
    Unsigned 16-bit integer
    Horizontal pixel density
image-jfif.Xthumbnail  Xthumbnail
    Unsigned 16-bit integer
    Thumbnail horizontal pixel count
image-jfif.Ydensity  Ydensity
    Unsigned 16-bit integer
    Vertical pixel density
image-jfif.Ythumbnail  Ythumbnail
    Unsigned 16-bit integer
    Thumbnail vertical pixel count

```

```
image-jfif.extension.code  Extension code
    Unsigned 8-bit integer
    JFXX extension code for thumbnail encoding
image-jfif.header.sos      Start of Segment header
    No value
    Start of Segment header
image-jfif.identifier      Identifier
    String
    Identifier of the segment
image-jfif.length          Length
    Unsigned 16-bit integer
    Length of segment (including length field)
image-jfif.marker          Marker
    Unsigned 8-bit integer
    JFIF Marker
image-jfif.sof             Start of Frame header
    No value
    Start of Frame header
image-jfif.sof.c_i         Component identifier
    Unsigned 8-bit integer
    Assigns a unique label to the ith component in the sequence of frame compone
image-jfif.sof.h_i         Horizontal sampling factor
    Unsigned 8-bit integer
    Specifies the relationship between the component horizontal dimension and ma
image-jfif.sof.lines       Lines
    Unsigned 16-bit integer
    Specifies the maximum number of lines in the source image.
image-jfif.sof.nf          Number of image components in frame
    Unsigned 8-bit integer
    Specifies the number of source image components in the frame.
image-jfif.sof.precision  Sample Precision (bits)
    Unsigned 8-bit integer
    Specifies the precision in bits for the samples of the components in the fra
image-jfif.sof.samples_per_line  Samples per line
    Unsigned 16-bit integer
    Specifies the maximum number of samples per line in the source image.
image-jfif.sof.tq_i        Quantization table destination selector
    Unsigned 8-bit integer
    Specifies one of four possible quantization table destinations from which th
image-jfif.sof.v_i         Vertical sampling factor
    Unsigned 8-bit integer
    Specifies the relationship between the component vertical dimension and maxi
image-jfif.sos.ac_entropy_selector  AC entropy coding table destination selector
    Unsigned 8-bit integer
    Specifies one of four possible AC entropy coding table destinations from whi
image-jfif.sos.ah          Successive approximation bit position high
    Unsigned 8-bit integer
    This parameter specifies the point transform used in the preceding scan (i.e
```

image-jfif.sos.al Successive approximation bit position low or point transform  
 Unsigned 8-bit integer  
 In the DCT modes of operation this parameter specifies the point transform,

image-jfif.sos.component\_selector Scan component selector  
 Unsigned 8-bit integer  
 Selects which of the Nf image components specified in the frame parameters s

image-jfif.sos.dc\_entropy\_selector DC entropy coding table destination selector  
 Unsigned 8-bit integer  
 Specifies one of four possible DC entropy coding table destinations from whi

image-jfif.sos.ns Number of image components in scan  
 Unsigned 8-bit integer  
 Specifies the number of source image components in the scan.

image-jfif.sos.se End of spectral selection  
 Unsigned 8-bit integer  
 Specifies the last DCT coefficient in each block in zig-zag order which shal

image-jfif.sos.ss Start of spectral or predictor selection  
 Unsigned 8-bit integer  
 In the DCT modes of operation, this parameter specifies the first DCT coeffi

image-jfif.units Units  
 Unsigned 8-bit integer  
 Units used in this segment

image-jfif.version Version  
 No value  
 JFIF Version

image-jfif.version.major Major Version  
 Unsigned 8-bit integer  
 JFIF Major Version

image-jfif.version.minor Minor Version  
 Unsigned 8-bit integer  
 JFIF Minor Version

image-jfifmarker\_segment Marker segment  
 No value  
 Marker segment

    Unsigned 16-bit integer
    NSRP AUTH CHECKSUM
nsrp.authflag AuthFlag
    Unsigned 8-bit integer
    NSRP Auth Flag
nsrp.checksum Checksum
    Unsigned 16-bit integer
    NSRP PACKET CHECKSUM
nsrp.clustid Clust ID
    Unsigned 8-bit integer
    NSRP CLUST ID
nsrp.data Data
    String
    PADDING
```

```
nsrp.dst Destination
    Unsigned 32-bit integer
    DESTINATION UNIT INFORMATION

nsrp.dummy Dummy
    Unsigned 8-bit integer
    NSRP Dummy

nsrp.encflag Enc Flag
    Unsigned 8-bit integer
    NSRP ENCRYPT FLAG

nsrp.flag Flag
    Unsigned 8-bit integer
    NSRP FLAG

nsrp.haport Port
    Unsigned 8-bit integer
    NSRP HA Port

nsrp.hst Hst group
    Unsigned 8-bit integer
    NSRP HST GROUP

nsrp.ifnum Ifnum
    Unsigned 16-bit integer
    NSRP IfNum

nsrp.length Length
    Unsigned 16-bit integer
    NSRP Length

nsrp.msgflag Msgflag
    Unsigned 8-bit integer
    NSRP MSG FLAG

nsrp.msglen Msg Length
    Unsigned 16-bit integer
    NSRP MESSAGE LENGTH

nsrp.msgtype MsgType
    Unsigned 8-bit integer
    Message Type

nsrp.notused Not used
    Unsigned 8-bit integer
    NOT USED

nsrp.nr Nr
    Unsigned 16-bit integer
    Nr

nsrp.ns Ns
    Unsigned 16-bit integer
    Ns

nsrp.priority Priority
    Unsigned 8-bit integer
    NSRP Priority

nsrp.reserved Reserved
    Unsigned 16-bit integer
    RESERVED
```

```
nsrp.src Source
    Unsigned 32-bit integer
    SOURCE UNIT INFORMATION

nsrp.totalsize Total Size
    Unsigned 32-bit integer
    NSRP MSG TOTAL MESSAGE

nsrp.type Type
    Unsigned 8-bit integer
    NSRP Message Type

nsrp.version Version
    Unsigned 8-bit integer
    NSRP Version

nsrp.wst Wst group
    Unsigned 8-bit integer
    NSRP WST GROUP
```

**K12xx (k12)**

```
aal2.cid AAL2 CID
    Unsigned 16-bit integer

k12.ds0.ts Timeslot mask
    Unsigned 32-bit integer

k12.input_type Port type
    Unsigned 32-bit integer

k12.port_id Port Id
    Unsigned 32-bit integer

k12.port_name Port Name
    String

k12.stack_file Stack file used
    String
```

**Kerberized Internet Negotiation of Key (kink)**

```
kink.A A
    Unsigned 8-bit integer
    the A of kink

kink.checkSum Checksum
    Byte array
    the checkSum of kink

kink.checkSumLength Checksum Length
    Unsigned 8-bit integer
    the check sum length of kink

kink.length Length
    Unsigned 16-bit integer
    the length of the kink length

kink.nextPayload Next Payload
    Unsigned 8-bit integer
    the next payload of kink
```

kink.reserved Reserved  
Unsigned 16-bit integer  
the reserved of kink

kink.transactionId Transaction ID  
Unsigned 32-bit integer  
the transactionID of kink

kink.type Type  
Unsigned 8-bit integer  
the type of the kink

**Kerberos (kerberos)**

kerberos.Authenticator Authenticator  
No value  
This is a decrypted Kerberos Authenticator sequence

kerberos.AuthorizationData AuthorizationData  
No value  
This is a Kerberos AuthorizationData sequence

kerberos.Checksum Checksum  
No value  
This is a Kerberos Checksum sequence

kerberos.ENC\_PRIV enc PRIV  
Byte array  
Encrypted PRIV blob

kerberos.EncAPRepPart EncAPRepPart  
No value  
This is a decrypted Kerberos EncAPRepPart sequence

kerberos.EncKDCRepPart EncKDCRepPart  
No value  
This is a decrypted Kerberos EncKDCRepPart sequence

kerberos.EncKrbCredPart EncKrbCredPart  
No value  
This is a decrypted Kerberos EncKrbCredPart sequence

kerberos.EncKrbCredPart.encrypted enc EncKrbCredPart  
Byte array  
Encrypted EncKrbCredPart blob

kerberos.EncKrbPrivPart EncKrbPrivPart  
No value  
This is a decrypted Kerberos EncKrbPrivPart sequence

kerberos.EncTicketPart EncTicketPart  
No value  
This is a decrypted Kerberos EncTicketPart sequence

kerberos.IF\_RELEVANT.type Type  
Unsigned 32-bit integer  
IF-RELEVANT Data Type

kerberos.IF\_RELEVANT.value Data  
Byte array  
IF\_RELEVANT Data

```
kerberos.KrbCredInfo  KrbCredInfo
    No value
    This is a Kerberos KrbCredInfo
kerberos.KrbCredInfos  Sequence of KrbCredInfo
    No value
    This is a list of KrbCredInfo
kerberos.LastReq  LastReq
    No value
    This is a LastReq sequence
kerberos.LastReqs  LastReqs
    No value
    This is a list of LastReq structures
kerberos.PAC_CLIENT_INFO_TYPE  PAC_CLIENT_INFO_TYPE
    Byte array
    PAC_CLIENT_INFO_TYPE structure
kerberos.PAC_CONSTRAINED_DELEGATION  PAC_CONSTRAINED_DELEGATION
    Byte array
    PAC_CONSTRAINED_DELEGATION structure
kerberos.PAC_CREDENTIAL_TYPE  PAC_CREDENTIAL_TYPE
    Byte array
    PAC_CREDENTIAL_TYPE structure
kerberos.PAC_LOGON_INFO  PAC_LOGON_INFO
    Byte array
    PAC_LOGON_INFO structure
kerberos.PAC_PRIVSVR_CHECKSUM  PAC_PRIVSVR_CHECKSUM
    Byte array
    PAC_PRIVSVR_CHECKSUM structure
kerberos.PAC_SERVER_CHECKSUM  PAC_SERVER_CHECKSUM
    Byte array
    PAC_SERVER_CHECKSUM structure
kerberos.PA_ENC_TIMESTAMP.encrypted  enc PA_ENC_TIMESTAMP
    Byte array
    Encrypted PA-ENC-TIMESTAMP blob
kerberos.PRIV_BODY.user_data  User Data
    Byte array
    PRIV BODY userdata field
kerberos.SAFE_BODY.timestamp  Timestamp
    String
    Timestamp of this SAFE_BODY
kerberos.SAFE_BODY.usec  usec
    Unsigned 32-bit integer
    micro second component of SAFE_BODY time
kerberos.SAFE_BODY.user_data  User Data
    Byte array
    SAFE BODY userdata field
kerberos.TransitedEncoding  TransitedEncoding
    No value
    This is a Kerberos TransitedEncoding sequence
```

```
kerberos.addr_ip  IP Address
  IPv4 address
  IP Address
kerberos.addr_nb  NetBIOS Address
  String
  NetBIOS Address and type
kerberos.addr_type  Addr-type
  Unsigned 32-bit integer
  Address Type
kerberos.adtype  Type
  Unsigned 32-bit integer
  Authorization Data Type
kerberos.advalue  Data
  Byte array
  Authentication Data
kerberos.apoptions  APOptions
  Byte array
  Kerberos APOptions bitstring
kerberos.apoptions.mutual_required  Mutual required
  Boolean
kerberos.apoptions.use_session_key  Use Session Key
  Boolean
kerberos.aprep.data  enc-part
  Byte array
  The encrypted part of AP-REP
kerberos.aprep.enc_part  enc-part
  No value
  The structure holding the encrypted part of AP-REP
kerberos.authenticator  Authenticator
  No value
  Encrypted authenticator blob
kerberos.authenticator.data  Authenticator data
  Byte array
  Data content of an encrypted authenticator
kerberos.authenticator_vno  Authenticator vno
  Unsigned 32-bit integer
  Version Number for the Authenticator
kerberos.authtime  Authtime
  String
  Time of initial authentication
kerberos.checksum.checksum  checksum
  Byte array
  Kerberos Checksum
kerberos.checksum.type  Type
  Unsigned 32-bit integer
  Type of checksum
```

kerberos.cname Client Name  
No value  
The name part of the client principal identifier

kerberos.crealm Client Realm  
String  
Name of the Clients Kerberos Realm

kerberos.cred\_body CRED\_BODY  
No value  
Kerberos CREDential BODY

kerberos.ctime ctime  
String  
Current Time on the client host

kerberos.cusec cusec  
Unsigned 32-bit integer  
micro second component of client time

kerberos.e\_checksum e-checksum  
No value  
This is a Kerberos e-checksum

kerberos.e\_data e-data  
No value  
The e-data blob

kerberos.e\_text e-text  
String  
Additional (human readable) error description

kerberos.enc\_priv Encrypted PRIV  
No value  
Kerberos Encrypted PRIVate blob data

kerberos.encrypted\_cred EncKrbCredPart  
No value  
Encrypted Cred blob

kerberos.endtime End time  
String  
The time after which the ticket has expired

kerberos.error\_code error\_code  
Unsigned 32-bit integer  
Kerberos error code

kerberos.etype Encryption type  
Signed 32-bit integer  
Encryption Type

kerberos.etype\_info.s2kparams Salt  
Byte array  
S2kparams

kerberos.etype\_info.salt Salt  
Byte array  
Salt

kerberos.etype\_info2.salt Salt  
Byte array  
Salt

```
kerberos.etypes  Encryption Types
  No value
  This is a list of Kerberos encryption types
kerberos.from    from
  String
  From when the ticket is to be valid (postdating)
kerberos.gssapi.bdn  Bnd
  Byte array
  GSSAPI Bnd field
kerberos.gssapi.checksum.flags.conf  Conf
  Boolean
kerberos.gssapi.checksum.flags.dce-style  DCE-style
  Boolean
kerberos.gssapi.checksum.flags.deleg  Deleg
  Boolean
kerberos.gssapi.checksum.flags.integ  Integ
  Boolean
kerberos.gssapi.checksum.flags.mutual  Mutual
  Boolean
kerberos.gssapi.checksum.flags.replay  Replay
  Boolean
kerberos.gssapi.checksum.flags.sequence  Sequence
  Boolean
kerberos.gssapi.dlglen  DlgLen
  Unsigned 16-bit integer
  GSSAPI DlgLen
kerberos.gssapi.dlgopt  DlgOpt
  Unsigned 16-bit integer
  GSSAPI DlgOpt
kerberos.gssapi.len  Length
  Unsigned 32-bit integer
  Length of GSSAPI Bnd field
kerberos.hostaddress  HostAddress
  No value
  This is a Kerberos HostAddress sequence
kerberos.hostaddresses  HostAddresses
  No value
  This is a list of Kerberos HostAddress sequences
kerberos.if_relevant  IF_RELEVANT
  No value
  This is a list of IF-RELEVANT sequences
kerberos.kdc_req_body  KDC_REQ_BODY
  No value
  Kerberos KDC REQuest BODY
kerberos.kdcoptions  KDCOptions
  Byte array
  Kerberos KDCOptions bitstring
```

kerberos.kdcoptions.allow\_postdate Allow Postdate  
Boolean  
Flag controlling whether we allow postdated tickets or not

kerberos.kdcoptions.canonicalize Canonicalize  
Boolean  
Do we want the KDC to canonicalize the principal or not

kerberos.kdcoptions.constrained\_delegation Constrained Delegation  
Boolean  
Do we want a PAC containing constrained delegation info or not

kerberos.kdcoptions.disable\_transited\_check Disable Transited Check  
Boolean  
Whether we should do transited checking or not

kerberos.kdcoptions.enc\_tkt\_in\_skey Enc-Tkt-in-Skey  
Boolean  
Whether the ticket is encrypted in the skey or not

kerberos.kdcoptions.forwardable Forwardable  
Boolean  
Flag controlling whether the tickes are forwardable or not

kerberos.kdcoptions.forwarded Forwarded  
Boolean  
Has this ticket been forwarded?

kerberos.kdcoptions.opt\_hardware\_auth Opt HW Auth  
Boolean  
Opt HW Auth flag

kerberos.kdcoptions.postdated Postdated  
Boolean  
Whether this ticket is postdated or not

kerberos.kdcoptions.proxy Proxy  
Boolean  
Has this ticket been proxied?

kerberos.kdcoptions.proxyable Proxyable  
Boolean  
Flag controlling whether the tickes are proxyable or not

kerberos.kdcoptions.renew Renew  
Boolean  
Is this a request to renew a ticket?

kerberos.kdcoptions.renewable Renewable  
Boolean  
Whether this ticket is renewable or not

kerberos.kdcoptions.renewable\_ok Renewable OK  
Boolean  
Whether we accept renewed tickets or not

kerberos.kdcoptions.validate Validate  
Boolean  
Is this a request to validate a postdated ticket?

kerberos.kdcrep.data enc-part  
Byte array  
The encrypted part of KDC-REP

```
kerberos.kdcprep.enc_part  enc-part
    No value
    The structure holding the encrypted part of KDC-REP
kerberos.key  key
    No value
    This is a Kerberos EncryptionKey sequence
kerberos.key_expiration  Key Expiration
    String
    The time after which the key will expire
kerberos.keytype  Key type
    Unsigned 32-bit integer
    Key Type
kerberos.keyvalue  Key value
    Byte array
    Key value (encryption key)
kerberos.kvno  Kvno
    Unsigned 32-bit integer
    Version Number for the encryption Key
kerberos.lr_time  Lr-time
    String
    Time of LR-entry
kerberos.lr_type  Lr-type
    Unsigned 32-bit integer
    Type of lastreq value
kerberos.midl.fill_bytes  Fill bytes
    Unsigned 32-bit integer
    Just some fill bytes
kerberos.midl.hdr_len  HDR Length
    Unsigned 16-bit integer
    Length of header
kerberos.midl.version  Version
    Unsigned 8-bit integer
    Version of pickling
kerberos.midl_blob_len  Blob Length
    Unsigned 64-bit integer
    Length of NDR encoded data that follows
kerberos.msg.type  MSG Type
    Unsigned 32-bit integer
    Kerberos Message Type
kerberos.name_string  Name
    String
    String component that is part of a PrincipalName
kerberos.name_type  Name-type
    Signed 32-bit integer
    Type of principal name
kerberos.nonce  Nonce
    Unsigned 32-bit integer
    Kerberos Nonce random number
```

```
kerberos.pac.clientid  ClientID
    Date/Time stamp
    ClientID Timestamp

kerberos.pac.entries  Num Entries
    Unsigned 32-bit integer
    Number of W2k PAC entries

kerberos.pac.name     Name
    String
    Name of the Client in the PAC structure

kerberos.pac.namelen  Name Length
    Unsigned 16-bit integer
    Length of client name

kerberos.pac.offset   Offset
    Unsigned 32-bit integer
    Offset to W2k PAC entry

kerberos.pac.signature.signature  Signature
    Byte array
    A PAC signature blob

kerberos.pac.signature.type  Type
    Signed 32-bit integer
    PAC Signature Type

kerberos.pac.size     Size
    Unsigned 32-bit integer
    Size of W2k PAC entry

kerberos.pac.type     Type
    Unsigned 32-bit integer
    Type of W2k PAC entry

kerberos.pac.version  Version
    Unsigned 32-bit integer
    Version of PAC structures

kerberos.pac_request.flag  PAC Request
    Unsigned 32-bit integer
    This is a MS PAC Request Flag

kerberos.padata       padata
    No value
    Sequence of preauthentication data

kerberos.padata.type  Type
    Unsigned 32-bit integer
    Type of preauthentication data

kerberos.padata.value  Value
    Byte array
    Content of the PADATA blob

kerberos.patimestamp  patimestamp
    String
    Time of client

kerberos.pausec       pausec
    Unsigned 32-bit integer
    Microsecond component of client time
```

```
kerberos.pname  Delegated Principal Name
  No value
  Identity of the delegated principal
kerberos.prealm Delegated Principal Realm
  String
  Name of the Kerberos PRealm
kerberos.priv_body  PRIV_BODY
  No value
  Kerberos PRIVate BODY
kerberos.provsrv_location  PROVSRV Location
  String
  PacketCable PROV SRV Location
kerberos.pvno  Pvno
  Unsigned 32-bit integer
  Kerberos Protocol Version Number
kerberos.r_address  R-Address
  No value
  This is the Recipient address
kerberos.realm  Realm
  String
  Name of the Kerberos Realm
kerberos.renew_till  Renew-till
  String
  The maximum time we can renew the ticket until
kerberos.rm.length  Record Length
  Unsigned 32-bit integer
  Record length
kerberos.rm.reserved  Reserved
  Boolean
  Record mark reserved bit
kerberos.rtime  rtime
  String
  Renew Until timestamp
kerberos.s4u2self.auth  S4U2Self Auth
  String
  S4U2Self authentication string
kerberos.s_address  S-Address
  No value
  This is the Senders address
kerberos.seq_number  Seq Number
  Unsigned 32-bit integer
  This is a Kerberos sequence number
kerberos.smb.nt_status  NT Status
  Unsigned 32-bit integer
  NT Status code
kerberos.smb.unknown  Unknown
  Unsigned 32-bit integer
  unknown
```

kerberos.sname Server Name  
No value  
This is the name part server's identity

kerberos.sq.tickets Tickets  
No value  
This is a list of Kerberos Tickets

kerberos.srealm SRealm  
String  
Name of the Kerberos SRealm

kerberos.starttime Start time  
String  
The time after which the ticket is valid

kerberos.stime stime  
String  
Current Time on the server host

kerberos.subkey Subkey  
No value  
This is a Kerberos subkey

kerberos.susec susec  
Unsigned 32-bit integer  
micro second component of server time

kerberos.ticket Ticket  
No value  
This is a Kerberos Ticket

kerberos.ticket.data enc-part  
Byte array  
The encrypted part of a ticket

kerberos.ticket.enc\_part enc-part  
No value  
The structure holding the encrypted part of a ticket

kerberos.ticketflags Ticket Flags  
No value  
Kerberos Ticket Flags

kerberos.ticketflags.allow\_postdate Allow Postdate  
Boolean  
Flag controlling whether we allow postdated tickets or not

kerberos.ticketflags.forwardable Forwardable  
Boolean  
Flag controlling whether the tickets are forwardable or not

kerberos.ticketflags.forwarded Forwarded  
Boolean  
Has this ticket been forwarded?

kerberos.ticketflags.hw\_auth HW-Auth  
Boolean  
Whether this ticket is hardware-authenticated or not

kerberos.ticketflags.initial Initial  
Boolean  
Whether this ticket is an initial ticket or not

```
kerberos.ticketflags.invalid  Invalid
    Boolean
    Whether this ticket is invalid or not
kerberos.ticketflags.ok_as_delegate  Ok As Delegate
    Boolean
    Whether this ticket is Ok As Delegate or not
kerberos.ticketflags.postdated  Postdated
    Boolean
    Whether this ticket is postdated or not
kerberos.ticketflags.pre_auth  Pre-Auth
    Boolean
    Whether this ticket is pre-authenticated or not
kerberos.ticketflags.proxy  Proxy
    Boolean
    Has this ticket been proxied?
kerberos.ticketflags.proxyable  Proxyable
    Boolean
    Flag controlling whether the tickes are proxyable or not
kerberos.ticketflags.renewable  Renewable
    Boolean
    Whether this ticket is renewable or not
kerberos.ticketflags.transited_policy_checked  Transited Policy Checked
    Boolean
    Whether this ticket is transited policy checked or not
kerberos.till  till
    String
    When the ticket will expire
kerberos.tkt_vno  Tkt-vno
    Unsigned 32-bit integer
    Version number for the Ticket format
kerberos.transited.contents  Contents
    Byte array
    Transient Contents string
kerberos.transited.type  Type
    Unsigned 32-bit integer
    Transited Type
```

#### **Kerberos Administration (kadm5)**

```
kadm5.procedure_v2  V2 Procedure
    Unsigned 32-bit integer
    V2 Procedure
```

#### **Kerberos v4 (krb4)**

```
krb4.auth_msg_type  Msg Type
    Unsigned 8-bit integer
    Message Type/Byte Order
```

```
krb4.byte_order  Byte Order
    Unsigned 8-bit integer
    Byte Order

krb4.encrypted_blob  Encrypted Blob
    Byte array
    Encrypted blob

krb4.exp_date  Exp Date
    Date/Time stamp
    Exp Date

krb4.instance  Instance
    String
    Instance

krb4.kvno  Kvno
    Unsigned 8-bit integer
    Key Version No

krb4.length  Length
    Unsigned 32-bit integer
    Length of encrypted blob

krb4.lifetime  Lifetime
    Unsigned 8-bit integer
    Lifetime (in 5 min units)

krb4.m_type  M Type
    Unsigned 8-bit integer
    Message Type

krb4.name  Name
    String
    Name

krb4.realm  Realm
    String
    Realm

krb4.req_date  Req Date
    Date/Time stamp
    Req Date

krb4.request.blob  Request Blob
    Byte array
    Request Blob

krb4.request.length  Request Length
    Unsigned 8-bit integer
    Length of request

krb4.s_instance  Service Instance
    String
    Service Instance

krb4.s_name  Service Name
    String
    Service Name

krb4.ticket.blob  Ticket Blob
    Byte array
    Ticket blob
```

```
krb4.ticket.length  Ticket Length
    Unsigned 8-bit integer
    Length of ticket

krb4.time_sec      Time Sec
    Date/Time stamp
    Time Sec

krb4.unknown_transarc_blob  Unknown Transarc Blob
    Byte array
    Unknown blob only present in Transarc packets

krb4.version      Version
    Unsigned 8-bit integer
    Kerberos(v4) version number
```

**Kernel Lock Manager (klm)**

```
klm.block  block
    Boolean
    Block

klm.exclusive  exclusive
    Boolean
    Exclusive lock

klm.holder  holder
    No value
    KLM lock holder

klm.len  length
    Unsigned 32-bit integer
    Length of lock region

klm.lock  lock
    No value
    KLM lock structure

klm.offset  offset
    Unsigned 32-bit integer
    File offset

klm.pid  pid
    Unsigned 32-bit integer
    ProcessID

klm.procedure_v1  V1 Procedure
    Unsigned 32-bit integer
    V1 Procedure

klm.servername  server name
    String
    Server name

klm.stats  stats
    Unsigned 32-bit integer
    stats
```

**Kingfisher (kf)**

```
kingfisher.checksum  Checksum
    Unsigned 16-bit integer
kingfisher.from      From RTU
    Unsigned 16-bit integer
kingfisher.function  Function Code
    Unsigned 8-bit integer
kingfisher.length    Length
    Unsigned 8-bit integer
kingfisher.message   Message Number
    Unsigned 8-bit integer
kingfisher.system    System Identifier
    Unsigned 8-bit integer
kingfisher.target    Target RTU
    Unsigned 16-bit integer
kingfisher.version   Version
    Unsigned 8-bit integer
kingfisher.via       Via RTU
    Unsigned 16-bit integer
```

**Kismet Client/Server Protocol (kismet)**

```
kismet.request       Request
    Boolean
    TRUE if kismet request
kismet.response      Response
    Boolean
    TRUE if kismet response
```

**LGE Monitor (lge\_monitor)**

```
lge_monitor.dir      Direction
    Unsigned 32-bit integer
    Direction
lge_monitor.length   Payload Length
    Unsigned 32-bit integer
    Payload Length
lge_monitor.prot     Protocol Identifier
    Unsigned 32-bit integer
    Protocol Identifier
```

**LWAPP Control Message (lwapp-ctrl)****LWAPP Encapsulated Packet (lwapp)**

```
lwapp.Length         Length
    Unsigned 16-bit integer
lwapp.apid           AP Identity
    6-byte Hardware (MAC) Address
    Access Point Identity
```

```
lwapp.control    Control Data (not dissected yet)
                 Byte array
lwapp.control.length  Control Length
                 Unsigned 16-bit integer
lwapp.control.seqno  Control Sequence Number
                 Unsigned 8-bit integer
lwapp.control.type   Control Type
                 Unsigned 8-bit integer
lwapp.flags.fragment  Fragment
                 Boolean
lwapp.flags.fragmentType  Fragment Type
                 Boolean
lwapp.flags.type     Type
                 Boolean
lwapp.fragmentId    Fragment Id
                 Unsigned 8-bit integer
lwapp.rssi          RSSI
                 Unsigned 8-bit integer
lwapp.slotId       slotId
                 Unsigned 24-bit integer
lwapp.snr          SNR
                 Unsigned 8-bit integer
lwapp.version      Version
                 Unsigned 8-bit integer
```

### **LWAPP Layer 3 Packet (lwapp-l3)**

#### **Label Distribution Protocol (ldp)**

```
ldp.hdr.ldpid.lsid  Label Space ID
                   Unsigned 16-bit integer
                   LDP Label Space ID
ldp.hdr.ldpid.lsr   LSR ID
                   IPv4 address
                   LDP Label Space Router ID
ldp.hdr.pdu_len     PDU Length
                   Unsigned 16-bit integer
                   LDP PDU Length
ldp.hdr.version     Version
                   Unsigned 16-bit integer
                   LDP Version Number
ldp.msg.experiment.id  Experiment ID
                   Unsigned 32-bit integer
                   LDP Experimental Message ID
ldp.msg.id          Message ID
                   Unsigned 32-bit integer
                   LDP Message ID
```

```
ldp.msg.len    Message Length
               Unsigned 16-bit integer
               LDP Message Length (excluding message type and len)

ldp.msg.tlv.addr1.addr  Address
                       String
                       Address

ldp.msg.tlv.addr1.addr_family  Address Family
                               Unsigned 16-bit integer
                               Address Family List

ldp.msg.tlv.atm.label.vbits  V-bits
                              Unsigned 8-bit integer
                              ATM Label V Bits

ldp.msg.tlv.atm.label.vci  VCI
                           Unsigned 16-bit integer
                           ATM Label VCI

ldp.msg.tlv.atm.label.vpi  VPI
                           Unsigned 16-bit integer
                           ATM Label VPI

ldp.msg.tlv.cbs  CBS
                 Double-precision floating point
                 Committed Burst Size

ldp.msg.tlv.cdr  CDR
                 Double-precision floating point
                 Committed Data Rate

ldp.msg.tlv.diffserv  Diff-Serv TLV
                     No value
                     Diffserv TLV

ldp.msg.tlv.diffserv.map  MAP
                          No value
                          MAP entry

ldp.msg.tlv.diffserv.map.exp  EXP
                              Unsigned 8-bit integer
                              EXP bit code

ldp.msg.tlv.diffserv.mapnb  MAPnb
                            Unsigned 8-bit integer
                            Number of MAP entries

ldp.msg.tlv.diffserv.phbid  PHBID
                             No value
                             PHBID

ldp.msg.tlv.diffserv.phbid.bit14  Bit 14
                                   Unsigned 16-bit integer
                                   Bit 14

ldp.msg.tlv.diffserv.phbid.bit15  Bit 15
                                   Unsigned 16-bit integer
                                   Bit 15

ldp.msg.tlv.diffserv.phbid.code  PHB id code
                                  Unsigned 16-bit integer
                                  PHB id code
```

```
ldp.msg.tlv.diffserv.phbid.dscp  DSCP
    Unsigned 16-bit integer
    DSCP

ldp.msg.tlv.diffserv.type  LSP Type
    Unsigned 8-bit integer
    LSP Type

ldp.msg.tlv.ebs  EBS
    Double-precision floating point
    Excess Burst Size

ldp.msg.tlv.er_hop.as  AS Number
    Unsigned 16-bit integer
    AS Number

ldp.msg.tlv.er_hop.localldspid  Local CR-LSP ID
    Unsigned 16-bit integer
    Local CR-LSP ID

ldp.msg.tlv.er_hop.loose  Loose route bit
    Unsigned 24-bit integer
    Loose route bit

ldp.msg.tlv.er_hop.lsrld  Local CR-LSP ID
    IPv4 address
    Local CR-LSP ID

ldp.msg.tlv.er_hop.prefix4  IPv4 Address
    IPv4 address
    IPv4 Address

ldp.msg.tlv.er_hop.prefix6  IPv6 Address
    IPv6 address
    IPv6 Address

ldp.msg.tlv.er_hop.prefixlen  Prefix length
    Unsigned 8-bit integer
    Prefix len

ldp.msg.tlv.experiment_id  Experiment ID
    Unsigned 32-bit integer
    Experiment ID

ldp.msg.tlv.extstatus.data  Extended Status Data
    Unsigned 32-bit integer
    Extended Status Data

ldp.msg.tlv.fec.af  FEC Element Address Type
    Unsigned 16-bit integer
    Forwarding Equivalence Class Element Address Family

ldp.msg.tlv.fec.hoval  FEC Element Host Address Value
    String
    Forwarding Equivalence Class Element Address

ldp.msg.tlv.fec.len  FEC Element Length
    Unsigned 8-bit integer
    Forwarding Equivalence Class Element Length

ldp.msg.tlv.fec.pfval  FEC Element Prefix Value
    String
    Forwarding Equivalence Class Element Prefix
```

```
ldp.msg.tlv.fec.type    FEC Element Type
    Unsigned 8-bit integer
    Forwarding Equivalence Class Element Types

ldp.msg.tlv.fec.vc.controlword  C-bit
    Boolean
    Control Word Present

ldp.msg.tlv.fec.vc.groupid  Group ID
    Unsigned 32-bit integer
    VC FEC Group ID

ldp.msg.tlv.fec.vc.infolength  VC Info Length
    Unsigned 8-bit integer
    VC FEC Info Length

ldp.msg.tlv.fec.vc.intparam.cepbytes  Payload Bytes
    Unsigned 16-bit integer
    VC FEC Interface Param CEP/TDM Payload Bytes

ldp.msg.tlv.fec.vc.intparam.cepopt_ais  AIS
    Boolean
    VC FEC Interface Param CEP Option AIS

ldp.msg.tlv.fec.vc.intparam.cepopt_ceptype  CEP Type
    Unsigned 16-bit integer
    VC FEC Interface Param CEP Option CEP Type

ldp.msg.tlv.fec.vc.intparam.cepopt_e3  Async E3
    Boolean
    VC FEC Interface Param CEP Option Async E3

ldp.msg.tlv.fec.vc.intparam.cepopt_ebm  EBM
    Boolean
    VC FEC Interface Param CEP Option EBM Header

ldp.msg.tlv.fec.vc.intparam.cepopt_mah  MAH
    Boolean
    VC FEC Interface Param CEP Option MPLS Adaptation header

ldp.msg.tlv.fec.vc.intparam.cepopt_res  Reserved
    Unsigned 16-bit integer
    VC FEC Interface Param CEP Option Reserved

ldp.msg.tlv.fec.vc.intparam.cepopt_rtp  RTP
    Boolean
    VC FEC Interface Param CEP Option RTP Header

ldp.msg.tlv.fec.vc.intparam.cepopt_t3  Async T3
    Boolean
    VC FEC Interface Param CEP Option Async T3

ldp.msg.tlv.fec.vc.intparam.cepopt_une  UNE
    Boolean
    VC FEC Interface Param CEP Option Unequipped

ldp.msg.tlv.fec.vc.intparam.desc  Description
    String
    VC FEC Interface Description

ldp.msg.tlv.fec.vc.intparam.dlcilen  DLCI Length
    Unsigned 16-bit integer
    VC FEC Interface Parameter Frame-Relay DLCI Length
```

```
ldp.msg.tlv.fec.vc.intparam.fcslen  FCS Length
    Unsigned 16-bit integer
    VC FEC Interface Paramater FCS Length

ldp.msg.tlv.fec.vc.intparam.id      ID
    Unsigned 8-bit integer
    VC FEC Interface Paramater ID

ldp.msg.tlv.fec.vc.intparam.length  Length
    Unsigned 8-bit integer
    VC FEC Interface Paramater Length

ldp.msg.tlv.fec.vc.intparam.maxatm  Number of Cells
    Unsigned 16-bit integer
    VC FEC Interface Param Max ATM Concat Cells

ldp.msg.tlv.fec.vc.intparam.mtu     MTU
    Unsigned 16-bit integer
    VC FEC Interface Paramater MTU

ldp.msg.tlv.fec.vc.intparam.tdmbps  BPS
    Unsigned 32-bit integer
    VC FEC Interface Parameter CEP/TDM bit-rate

ldp.msg.tlv.fec.vc.intparam.tdmopt_d  D Bit
    Boolean
    VC FEC Interface Param TDM Options Dynamic Timestamp

ldp.msg.tlv.fec.vc.intparam.tdmopt_f  F Bit
    Boolean
    VC FEC Interface Param TDM Options Flavor bit

ldp.msg.tlv.fec.vc.intparam.tdmopt_freq  FREQ
    Unsigned 16-bit integer
    VC FEC Interface Param TDM Options Frequency

ldp.msg.tlv.fec.vc.intparam.tdmopt_pt  PT
    Unsigned 8-bit integer
    VC FEC Interface Param TDM Options Payload Type

ldp.msg.tlv.fec.vc.intparam.tdmopt_r  R Bit
    Boolean
    VC FEC Interface Param TDM Options RTP Header

ldp.msg.tlv.fec.vc.intparam.tdmopt_res1  RSVD-1
    Unsigned 16-bit integer
    VC FEC Interface Param TDM Options Reserved

ldp.msg.tlv.fec.vc.intparam.tdmopt_res2  RSVD-2
    Unsigned 8-bit integer
    VC FEC Interface Param TDM Options Reserved

ldp.msg.tlv.fec.vc.intparam.tdmopt_ssrc  SSRC
    Unsigned 32-bit integer
    VC FEC Interface Param TDM Options SSRC

ldp.msg.tlv.fec.vc.intparam.vccv.cctype_cw  PWE3 Control Word
    Boolean
    VC FEC Interface Param VCCV CC Type PWE3 CW

ldp.msg.tlv.fec.vc.intparam.vccv.cctype_mplsra  MPLS Router Alert
    Boolean
    VC FEC Interface Param VCCV CC Type MPLS Router Alert
```

```
ldp.msg.tlv.fec.vc.intparam.vccv.cctype_ttl1  MPLS Inner Label TTL = 1
Boolean
VC FEC Interface Param VCCV CC Type Inner Label TTL 1

ldp.msg.tlv.fec.vc.intparam.vccv.cvtype_bfd    BFD
Boolean
VC FEC Interface Param VCCV CV Type BFD

ldp.msg.tlv.fec.vc.intparam.vccv.cvtype_icmpping ICMP Ping
Boolean
VC FEC Interface Param VCCV CV Type ICMP Ping

ldp.msg.tlv.fec.vc.intparam.vccv.cvtype_lspping LSP Ping
Boolean
VC FEC Interface Param VCCV CV Type LSP Ping

ldp.msg.tlv.fec.vc.intparam.vlanid  VLAN Id
Unsigned 16-bit integer
VC FEC Interface Param VLAN Id

ldp.msg.tlv.fec.vc.vcid  VC ID
Unsigned 32-bit integer
VC FEC VCID

ldp.msg.tlv.fec.vc.vctype  VC Type
Unsigned 16-bit integer
Virtual Circuit Type

ldp.msg.tlv.flags_cbs  CBS
Boolean
CBS negotiability flag

ldp.msg.tlv.flags_cdr  CDR
Boolean
CDR negotiability flag

ldp.msg.tlv.flags_ebs  EBS
Boolean
EBS negotiability flag

ldp.msg.tlv.flags_pbs  PBS
Boolean
PBS negotiability flag

ldp.msg.tlv.flags_pdr  PDR
Boolean
PDR negotiability flag

ldp.msg.tlv.flags_reserv  Reserved
Unsigned 8-bit integer
Reserved

ldp.msg.tlv.flags_weight  Weight
Boolean
Weight negotiability flag

ldp.msg.tlv.fr.label.dlci  DLCI
Unsigned 24-bit integer
FRAME RELAY Label DLCI

ldp.msg.tlv.fr.label.len  Number of DLCI bits
Unsigned 16-bit integer
DLCI Number of bits
```

```
ldp.msg.tlv.frequency      Frequency
    Unsigned 8-bit integer
    Frequency

ldp.msg.tlv.ft_ack.sequence_num  FT ACK Sequence Number
    Unsigned 32-bit integer
    FT ACK Sequence Number

ldp.msg.tlv.ft_protect.sequence_num  FT Sequence Number
    Unsigned 32-bit integer
    FT Sequence Number

ldp.msg.tlv.ft_sess.flag_a  A bit
    Boolean
    All-Label protection Required

ldp.msg.tlv.ft_sess.flag_c  C bit
    Boolean
    Check-Pointint Flag

ldp.msg.tlv.ft_sess.flag_l  L bit
    Boolean
    Learn From network Flag

ldp.msg.tlv.ft_sess.flag_r  R bit
    Boolean
    FT Reconnect Flag

ldp.msg.tlv.ft_sess.flag_res  Reserved
    Unsigned 16-bit integer
    Reserved bits

ldp.msg.tlv.ft_sess.flag_s  S bit
    Boolean
    Save State Flag

ldp.msg.tlv.ft_sess.flags  Flags
    Unsigned 16-bit integer
    FT Session Flags

ldp.msg.tlv.ft_sess.reconn_to  Reconnect Timeout
    Unsigned 32-bit integer
    FT Reconnect Timeout

ldp.msg.tlv.ft_sess.recovery_time  Recovery Time
    Unsigned 32-bit integer
    Recovery Time

ldp.msg.tlv.ft_sess.res  Reserved
    Unsigned 16-bit integer
    Reserved

ldp.msg.tlv.generic.label  Generic Label
    Unsigned 32-bit integer
    Generic Label

ldp.msg.tlv.hc.value  Hop Count Value
    Unsigned 8-bit integer
    Hop Count

ldp.msg.tlv.hello.cnf_seqno  Configuration Sequence Number
    Unsigned 32-bit integer
    Hello Configuration Sequence Number
```

```
ldp.msg.tlv.hello.hold  Hold Time
    Unsigned 16-bit integer
    Hello Common Parameters Hold Time

ldp.msg.tlv.hello.requested  Hello Requested
    Boolean
    Hello Common Parameters Hello Requested Bit

ldp.msg.tlv.hello.res  Reserved
    Unsigned 16-bit integer
    Hello Common Parameters Reserved Field

ldp.msg.tlv.hello.targeted  Targeted Hello
    Boolean
    Hello Common Parameters Targeted Bit

ldp.msg.tlv.hold_prio  Hold Prio
    Unsigned 8-bit integer
    LSP hold priority

ldp.msg.tlv.ipv4.taddr  IPv4 Transport Address
    IPv4 address
    IPv4 Transport Address

ldp.msg.tlv.ipv6.taddr  IPv6 Transport Address
    IPv6 address
    IPv6 Transport Address

ldp.msg.tlv.len  TLV Length
    Unsigned 16-bit integer
    TLV Length Field

ldp.msg.tlv.lspid.actflg  Action Indicator Flag
    Unsigned 16-bit integer
    Action Indicator Flag

ldp.msg.tlv.lspid.local lspid  Local CR-LSP ID
    Unsigned 16-bit integer
    Local CR-LSP ID

ldp.msg.tlv.lspid.lsr id  Ingress LSR Router ID
    IPv4 address
    Ingress LSR Router ID

ldp.msg.tlv.mac  MAC address
    6-byte Hardware (MAC) Address
    MAC address

ldp.msg.tlv.pbs  PBS
    Double-precision floating point
    Peak Burst Size

ldp.msg.tlv.pdr  PDR
    Double-precision floating point
    Peak Data Rate

ldp.msg.tlv.pv.lsr id  LSR Id
    IPv4 address
    Path Vector LSR Id

ldp.msg.tlv.resource_class  Resource Class
    Unsigned 32-bit integer
    Resource Class (Color)
```

ldp.msg.tlv.returned.ldpid.lsid Returned PDU Label Space ID  
Unsigned 16-bit integer  
LDP Label Space ID

ldp.msg.tlv.returned.ldpid.lsr Returned PDU LSR ID  
IPv4 address  
LDP Label Space Router ID

ldp.msg.tlv.returned.msg.id Returned Message ID  
Unsigned 32-bit integer  
LDP Message ID

ldp.msg.tlv.returned.msg.len Returned Message Length  
Unsigned 16-bit integer  
LDP Message Length (excluding message type and len)

ldp.msg.tlv.returned.msg.type Returned Message Type  
Unsigned 16-bit integer  
LDP message type

ldp.msg.tlv.returned.msg.ubit Returned Message Unknown bit  
Boolean  
Message Unknown bit

ldp.msg.tlv.returned.pdu\_len Returned PDU Length  
Unsigned 16-bit integer  
LDP PDU Length

ldp.msg.tlv.returned.version Returned PDU Version  
Unsigned 16-bit integer  
LDP Version Number

ldp.msg.tlv.route\_pinning Route Pinning  
Unsigned 32-bit integer  
Route Pinning

ldp.msg.tlv.sess.advbit Session Label Advertisement Discipline  
Boolean  
Common Session Parameters Label Advertisement Discipline

ldp.msg.tlv.sess.atm.dir Directionality  
Boolean  
Label Directionality

ldp.msg.tlv.sess.atm.lr Number of ATM Label Ranges  
Unsigned 8-bit integer  
Number of Label Ranges

ldp.msg.tlv.sess.atm.maxvci Maximum VCI  
Unsigned 16-bit integer  
Maximum VCI

ldp.msg.tlv.sess.atm.maxvpi Maximum VPI  
Unsigned 16-bit integer  
Maximum VPI

ldp.msg.tlv.sess.atm.merge Session ATM Merge Parameter  
Unsigned 8-bit integer  
Merge ATM Session Parameters

ldp.msg.tlv.sess.atm.minvci Minimum VCI  
Unsigned 16-bit integer  
Minimum VCI

```
ldp.msg.tlv.sess.atm.minvpi  Minimum VPI
    Unsigned 16-bit integer
    Minimum VPI

ldp.msg.tlv.sess.fr.dir  Directionality
    Boolean
    Label Directionality

ldp.msg.tlv.sess.fr.len  Number of DLCI bits
    Unsigned 16-bit integer
    DLCI Number of bits

ldp.msg.tlv.sess.fr.lr  Number of Frame Relay Label Ranges
    Unsigned 8-bit integer
    Number of Label Ranges

ldp.msg.tlv.sess.fr.maxdlci  Maximum DLCI
    Unsigned 24-bit integer
    Maximum DLCI

ldp.msg.tlv.sess.fr.merge  Session Frame Relay Merge Parameter
    Unsigned 8-bit integer
    Merge Frame Relay Session Parameters

ldp.msg.tlv.sess.fr.mindlci  Minimum DLCI
    Unsigned 24-bit integer
    Minimum DLCI

ldp.msg.tlv.sess.ka  Session KeepAlive Time
    Unsigned 16-bit integer
    Common Session Parameters KeepAlive Time

ldp.msg.tlv.sess.ldetbit  Session Loop Detection
    Boolean
    Common Session Parameters Loop Detection

ldp.msg.tlv.sess.mxpdu  Session Max PDU Length
    Unsigned 16-bit integer
    Common Session Parameters Max PDU Length

ldp.msg.tlv.sess.pvlim  Session Path Vector Limit
    Unsigned 8-bit integer
    Common Session Parameters Path Vector Limit

ldp.msg.tlv.sess.rxlslr  Session Receiver LSR Identifier
    IPv4 address
    Common Session Parameters LSR Identifier

ldp.msg.tlv.sess.ver  Session Protocol Version
    Unsigned 16-bit integer
    Common Session Parameters Protocol Version

ldp.msg.tlv.set_prio  Set Prio
    Unsigned 8-bit integer
    LSP setup priority

ldp.msg.tlv.status.data  Status Data
    Unsigned 32-bit integer
    Status Data

ldp.msg.tlv.status.ebit  E Bit
    Boolean
    Fatal Error Bit
```

```
ldp.msg.tlv.status.fbit  F Bit
    Boolean
    Forward Bit

ldp.msg.tlv.status.msg.id  Message ID
    Unsigned 32-bit integer
    Identifies peer message to which Status TLV refers

ldp.msg.tlv.status.msg.type  Message Type
    Unsigned 16-bit integer
    Type of peer message to which Status TLV refers

ldp.msg.tlv.type  TLV Type
    Unsigned 16-bit integer
    TLV Type Field

ldp.msg.tlv.unknown  TLV Unknown bits
    Unsigned 8-bit integer
    TLV Unknown bits Field

ldp.msg.tlv.value  TLV Value
    Byte array
    TLV Value Bytes

ldp.msg.tlv.vendor_id  Vendor ID
    Unsigned 32-bit integer
    IEEE 802 Assigned Vendor ID

ldp.msg.tlv.weight  Weight
    Unsigned 8-bit integer
    Weight of the CR-LSP

ldp.msg.type  Message Type
    Unsigned 16-bit integer
    LDP message type

ldp.msg.ubit  U bit
    Boolean
    Unknown Message Bit

ldp.msg.vendor.id  Vendor ID
    Unsigned 32-bit integer
    LDP Vendor-private Message ID

ldp.req  Request
    Boolean

ldp.rsp  Response
    Boolean

ldp.tlv.lbl_req_msg_id  Label Request Message ID
    Unsigned 32-bit integer
    Label Request Message to be aborted
```

**Laplink (laplink)**

```
laplink.tcp_data  Unknown TCP data
    Byte array
    TCP data

laplink.tcp_ident  TCP Ident
    Unsigned 32-bit integer
    Unknown magic
```

```
laplink.tcp_length  TCP Data payload length
                    Unsigned 16-bit integer
                    Length of remaining payload

laplink.udp_ident   UDP Ident
                    Unsigned 32-bit integer
                    Unknown magic

laplink.udp_name    UDP Name
                    String
                    Machine name
```

**Layer 2 Tunneling Protocol (l2tp)**

```
l2tp.Nr  Nr
         Unsigned 16-bit integer

l2tp.Ns  Ns
         Unsigned 16-bit integer

l2tp.avp.ciscotype  Type
                   Unsigned 16-bit integer
                   AVP Type

l2tp.avp.hidden    Hidden
                   Boolean
                   Hidden AVP

l2tp.avp.length    Length
                   Unsigned 16-bit integer
                   AVP Length

l2tp.avp.mandatory  Mandatory
                    Boolean
                    Mandatory AVP

l2tp.avp.type      Type
                   Unsigned 16-bit integer
                   AVP Type

l2tp.avp.vendor_id  Vendor ID
                    Unsigned 16-bit integer
                    AVP Vendor ID

l2tp.ccid          Control Connection ID
                   Unsigned 32-bit integer
                   Control Connection ID

l2tp.length        Length
                   Unsigned 16-bit integer

l2tp.length_bit    Length Bit
                   Boolean
                   Length bit

l2tp.offset        Offset
                   Unsigned 16-bit integer
                   Number of octest past the L2TP header at which thepayload data starts.

l2tp.offset_bit    Offset bit
                   Boolean
                   Offset bit
```

```
l2tp.priority  Priority
  Boolean
  Priority bit

l2tp.res  Reserved
  Unsigned 16-bit integer
  Reserved

l2tp.seq_bit  Sequence Bit
  Boolean
  Sequence bit

l2tp.session  Session ID
  Unsigned 16-bit integer
  Session ID

l2tp.sid  Session ID
  Unsigned 32-bit integer
  Session ID

l2tp.tie_breaker  Tie Breaker
  Unsigned 64-bit integer
  Tie Breaker

l2tp.tunnel  Tunnel ID
  Unsigned 16-bit integer
  Tunnel ID

l2tp.type  Type
  Unsigned 16-bit integer
  Type bit

l2tp.version  Version
  Unsigned 16-bit integer
  Version

lt2p.cookie  Cookie
  Byte array
  Cookie

lt2p.l2_spec_atm  ATM-Specific Sublayer
  No value
  ATM-Specific Sublayer

lt2p.l2_spec_c  C-bit
  Boolean
  CLP Bit

lt2p.l2_spec_def  Default L2-Specific Sublayer
  No value
  Default L2-Specific Sublayer

lt2p.l2_spec_g  G-bit
  Boolean
  EFCI Bit

lt2p.l2_spec_s  S-bit
  Boolean
  Sequence Bit

lt2p.l2_spec_sequence  Sequence Number
  Unsigned 24-bit integer
  Sequence Number
```

```
lt2p.l2_spec_t  T-bit
  Boolean
  Transport Type Bit
lt2p.l2_spec_u  U-bit
  Boolean
  C/R Bit
```

**Light Weight DNS RESolver (BIND9) (lwres)**

```
lwres.adn.addr.addr  IP Address
  String
  lwres adn addr addr
lwres.adn.addr.family  Address family
  Unsigned 32-bit integer
  lwres adn addr family
lwres.adn.addr.length  Address length
  Unsigned 16-bit integer
  lwres adn addr length
lwres.adn.addrtype  Address type
  Unsigned 32-bit integer
  lwres adn addrtype
lwres.adn.aliasname  Alias name
  String
  lwres adn aliasname
lwres.adn.flags  Flags
  Unsigned 32-bit integer
  lwres adn flags
lwres.adn.naddrs  Number of addresses
  Unsigned 16-bit integer
  lwres adn naddrs
lwres.adn.naliases  Number of aliases
  Unsigned 16-bit integer
  lwres adn naliases
lwres.adn.name  Name
  String
  lwres adn name
lwres.adn.namelen  Name length
  Unsigned 16-bit integer
  lwres adn namelen
lwres.adn.realname  Real name
  String
  lwres adn realname
lwres.areclen  Length
  Unsigned 16-bit integer
  lwres areclen
lwres.arecord  IPv4 Address
  Unsigned 32-bit integer
  lwres arecord
```

```
lwres.authlen  Auth. length
                Unsigned 16-bit integer
                lwres authlen

lwres.authtype Auth. type
                Unsigned 16-bit integer
                lwres authtype

lwres.class    Class
                Unsigned 16-bit integer
                lwres class

lwres.flags    Packet Flags
                Unsigned 16-bit integer
                lwres flags

lwres.length   Length
                Unsigned 32-bit integer
                lwres length

lwres.namelen  Name length
                Unsigned 16-bit integer
                lwres namelen

lwres.nrdatas  Number of rdata records
                Unsigned 16-bit integer
                lwres nrdatas

lwres.nsig     Number of signature records
                Unsigned 16-bit integer
                lwres nsigs

lwres.opcode   Operation code
                Unsigned 32-bit integer
                lwres opcode

lwres.realname Real doname name
                String
                lwres realname

lwres.realnamelen Real name length
                Unsigned 16-bit integer
                lwres realnamelen

lwres.recvlen  Received length
                Unsigned 32-bit integer
                lwres recvlen

lwres.reqdname Domain name
                String
                lwres reqdname

lwres.result   Result
                Unsigned 32-bit integer
                lwres result

lwres.rflags   Flags
                Unsigned 32-bit integer
                lwres rflags

lwres.serial   Serial
                Unsigned 32-bit integer
                lwres serial
```

```
lwres.srv.port  Port
  Unsigned 16-bit integer
  lwres srv port

lwres.srv.priority  Priority
  Unsigned 16-bit integer
  lwres srv prio

lwres.srv.weight  Weight
  Unsigned 16-bit integer
  lwres srv weight

lwres.ttl  Time To Live
  Unsigned 32-bit integer
  lwres ttl

lwres.type  Type
  Unsigned 16-bit integer
  lwres type

lwres.version  Version
  Unsigned 16-bit integer
  lwres version
```

#### **Lightweight User Datagram Protocol (udplite)**

```
udp.checksum_coverage  Checksum coverage
  Unsigned 16-bit integer

udp.checksum_coverage_bad  Bad Checksum coverage
  Boolean
```

#### **Lightweight-Directory-Access-Protocol (ldap)**

```
ldap.AccessMask.ADS_CONTROL_ACCESS  Control Access
  Boolean

    Unsigned 32-bit integer
    ldap.T_scope

ldap.searchRequest searchRequest
    No value
    ldap.SearchRequest

ldap.searchResDone searchResDone
    No value
    ldap.SearchResultDone

ldap.searchResEntry searchResEntry
    No value
    ldap.SearchResultEntry

ldap.searchResRef searchResRef
    Unsigned 32-bit integer
    ldap.SearchResultReference

ldap.serverSaslCreds serverSaslCreds
    Byte array
    ldap.ServerSaslCreds

ldap.sid Sid
    String
    Sid

ldap.simple simple
    Byte array
    ldap.Simple

ldap.size size
    Signed 32-bit integer
    ldap.INTEGER

ldap.sizeLimit sizeLimit
    Unsigned 32-bit integer
    ldap.INTEGER_0_maxInt

ldap.sortResult sortResult
    Unsigned 32-bit integer
    ldap.T_sortResult

ldap.substrings substrings
    No value
    ldap.SubstringFilter

ldap.substrings_item Item
    Unsigned 32-bit integer
    ldap.T_substringFilter_substrings_item

ldap.time Time
    Time duration
    The time between the Call and the Reply

ldap.timeLimit timeLimit
    Unsigned 32-bit integer
    ldap.INTEGER_0_maxInt

ldap.type type
    String
    ldap.AttributeDescription
```

```
ldap.typesOnly  typesOnly
  Boolean
  ldap.BOOLEAN

ldap.unbindRequest  unbindRequest
  No value
  ldap.UnbindRequest

ldap.userIdentity  userIdentity
  Byte array
  ldap.OCTET_STRING

ldap.vals  vals
  Unsigned 32-bit integer
  ldap.SET_OF_AttributeValue

ldap.vals_item  Item
  Byte array
  ldap.AttributeValue

ldap.version  version
  Unsigned 32-bit integer
  ldap.INTEGER_1_127

msldap.clientsitename  Client Site
  String
  Client Site name

msldap.domain  Domain
  String
  Domainname

msldap.domain.guid  Domain GUID
  Byte array
  Domain GUID

msldap.forest  Forest
  String
  Forest

msldap.hostname  Hostname
  String
  Hostname

msldap.nb_domain  NetBios Domain
  String
  NetBios Domainname

msldap.nb_hostname  NetBios Hostname
  String
  NetBios Hostname

msldap.netlogon.flags  Flags
  Unsigned 32-bit integer
  Netlogon flags describing the DC properties

msldap.netlogon.flags.closest  Closest
  Boolean
  Is this the closest dc? (is this used at all?)

msldap.netlogon.flags.ds  DS
  Boolean
  Does this dc provide DS services?
```

```

msclldap.netlogon.flags.gc  GC
    Boolean
    Does this dc service as a GLOBAL CATALOGUE?
msclldap.netlogon.flags.good_timeserv  Good Time Serv
    Boolean
    Is this a Good Time Server? (i.e. does it have a hardware clock)
msclldap.netlogon.flags.kdc  KDC
    Boolean
    Does this dc act as a KDC?
msclldap.netlogon.flags.ldap  LDAP
    Boolean
    Does this DC act as an LDAP server?
msclldap.netlogon.flags.ndnc  NDNC
    Boolean
    Is this an NDNC dc?
msclldap.netlogon.flags.pdc  PDC
    Boolean
    Is this DC a PDC or not?
msclldap.netlogon.flags.timeserv  Time Serv
    Boolean
    Does this dc provide time services (ntp) ?
msclldap.netlogon.flags.writable  Writable
    Boolean
    Is this dc writable? (i.e. can it update the AD?)
msclldap.netlogon.lm_token  LM Token
    Unsigned 16-bit integer
    LM Token
msclldap.netlogon.nt_token  NT Token
    Unsigned 16-bit integer
    NT Token
msclldap.netlogon.type  Type
    Unsigned 32-bit integer
    Type of <please tell Wireshark developers what this type is>
msclldap.netlogon.version  Version
    Unsigned 32-bit integer
    Version of <please tell Wireshark developers what this type is>
msclldap.sitename  Site
    String
    Site name
msclldap.username  User
    String
    User name

```

#### **Line Printer Daemon Protocol (lpd)**

```

lpd.request  Request
    Boolean
    TRUE if LPD request

```

```
lpd.response  Response
              Boolean
              TRUE if LPD response
```

#### **Line-based text data (data-text-lines)**

#### **Link Access Procedure Balanced (LAPB) (lapb)**

```
lapb.address  Address Field
              Unsigned 8-bit integer
              Address

lapb.control  Control Field
              Unsigned 8-bit integer
              Control field

lapb.control.f  Final
              Boolean

lapb.control.ftype  Frame type
                  Unsigned 8-bit integer

lapb.control.n_r  N(R)
                  Unsigned 8-bit integer

lapb.control.n_s  N(S)
                  Unsigned 8-bit integer

lapb.control.p  Poll
              Boolean

lapb.control.s_ftype  Supervisory frame type
                    Unsigned 8-bit integer

lapb.control.u_modifier_cmd  Command
                             Unsigned 8-bit integer

lapb.control.u_modifier_resp  Response
                              Unsigned 8-bit integer
```

#### **Link Access Procedure Balanced Ethernet (LAPBETHER) (lapbether)**

```
lapbether.length  Length Field
                  Unsigned 16-bit integer
                  LAPBEther Length Field
```

#### **Link Access Procedure, Channel D (LAPD) (lapd)**

```
lapd.address  Address Field
              Unsigned 16-bit integer
              Address

lapd.control  Control Field
              Unsigned 16-bit integer
              Control field

lapd.control.f  Final
              Boolean

lapd.control.ftype  Frame type
                  Unsigned 16-bit integer
```

lapd.control.n\_r N(R)  
Unsigned 16-bit integer

lapd.control.n\_s N(S)  
Unsigned 16-bit integer

lapd.control.p Poll  
Boolean

lapd.control.s\_ftype Supervisory frame type  
Unsigned 16-bit integer

lapd.control.u\_modifier\_cmd Command  
Unsigned 8-bit integer

lapd.control.u\_modifier\_resp Response  
Unsigned 8-bit integer

lapd.cr C/R  
Unsigned 16-bit integer  
Command/Response bit

lapd.direction Direction  
Unsigned 8-bit integer  
Direction

lapd.ea1 EA1  
Unsigned 16-bit integer  
First Address Extension bit

lapd.ea2 EA2  
Unsigned 16-bit integer  
Second Address Extension bit

lapd.sapi SAPI  
Unsigned 16-bit integer  
Service Access Point Identifier

lapd.tei TEI  
Unsigned 16-bit integer  
Terminal Endpoint Identifier

#### **Link Layer Discovery Protocol (lldp)**

lldp.chassis.id Chassis Id  
Byte array

lldp.chassis.id.ip4 Chassis Id  
IPv4 address

    Unsigned 8-bit integer

lldp.profinet.cable_delay_local  Port Cable Delay Local
    Unsigned 32-bit integer

lldp.profinet.cm_mac_add  CMMacAdd
    6-byte Hardware (MAC) Address
    CMResponderMacAdd or CMInitiatorMacAdd

lldp.profinet.green_period_begin_offset  GreenPeriodBegin.Offset
    Unsigned 32-bit integer
    Unrestricted period, offset to cycle begin in nanoseconds

lldp.profinet.green_period_begin_valid  GreenPeriodBegin.Valid
    Unsigned 32-bit integer
    Offset field is valid/invalid

lldp.profinet.ir_data_uuid  IRDataUUID

lldp.profinet.length_of_period_length  LengthOfPeriod.Length
    Unsigned 32-bit integer
    Duration of a cycle in nanoseconds

lldp.profinet.length_of_period_valid  LengthOfPeriod.Valid
    Unsigned 32-bit integer
    Length field is valid/invalid

lldp.profinet.master_source_address  MasterSourceAddress
    6-byte Hardware (MAC) Address

lldp.profinet.mrp_domain_uuid  MRP DomainUUID

lldp.profinet.mrrt_port_status  MRRT PortStatus
    Unsigned 16-bit integer
```

```

lldp.profinet.orange_period_begin_offset  OrangePeriodBegin.Offset
    Unsigned 32-bit integer
    RT_CLASS_2 period, offset to cycle begin in nanoseconds
lldp.profinet.orange_period_begin_valid  OrangePeriodBegin.Valid
    Unsigned 32-bit integer
    Offset field is valid/invalid
lldp.profinet.port_rx_delay_local  Port RX Delay Local
    Unsigned 32-bit integer
lldp.profinet.port_rx_delay_remote  Port RX Delay Remote
    Unsigned 32-bit integer
lldp.profinet.port_tx_delay_local  Port TX Delay Local
    Unsigned 32-bit integer
lldp.profinet.port_tx_delay_remote  Port TX Delay Remote
    Unsigned 32-bit integer
lldp.profinet.red_period_begin_offset  RedPeriodBegin.Offset
    Unsigned 32-bit integer
    RT_CLASS_3 period, offset to cycle begin in nanoseconds
lldp.profinet.red_period_begin_valid  RedPeriodBegin.Valid
    Unsigned 32-bit integer
    Offset field is valid/invalid
lldp.profinet.rtc2_port_status  RTClass2 Port Status
    Unsigned 16-bit integer
lldp.profinet.rtc3_port_status  RTClass3 Port Status
    Unsigned 16-bit integer
lldp.profinet.subdomain_uuid  SubdomainUUID
lldp.profinet.subtype  Subtype
    Unsigned 8-bit integer
    PROFINET Subtype
lldp.time_to_live  Seconds
    Unsigned 16-bit integer
lldp.tlv.len  TLV Length
    Unsigned 16-bit integer
lldp.tlv.type  TLV Type
    Unsigned 16-bit integer
lldp.unknown_subtype  Unknown Subtype Content
    Byte array

```

#### Link Management Protocol (LMP) (Imp)

```

lmp.begin_verify.all_links  Verify All Links
    Boolean
lmp.begin_verify.enctype  Encoding Type
    Unsigned 8-bit integer
lmp.begin_verify.flags  Flags
    Unsigned 16-bit integer
lmp.begin_verify.link_type  Data Link Type
    Boolean

```

```
lmp.data_link.link_verify  Data-Link is Allocated
    Boolean
lmp.data_link.local_ipv4   Data-Link Local ID - IPv4
    IPv4 address
lmp.data_link.local_unnum  Data-Link Local ID - Unnumbered
    Unsigned 32-bit integer
lmp.data_link.port        Data-Link is Individual Port
    Boolean
lmp.data_link.remote_ipv4  Data-Link Remote ID - IPv4
    IPv4 address
lmp.data_link.remote_unnum Data-Link Remote ID - Unnumbered
    Unsigned 32-bit integer
lmp.data_link_encoding    LSP Encoding Type
    Unsigned 8-bit integer
lmp.data_link_flags       Data-Link Flags
    Unsigned 8-bit integer
lmp.data_link_subobj      Subobject
    No value
lmp.data_link_switching   Interface Switching Capability
    Unsigned 8-bit integer
lmp.error                 Error Code
    Unsigned 32-bit integer
lmp.error.config_bad_ccid Config - Bad CC ID
    Boolean
lmp.error.config_bad_params Config - Unacceptable non-negotiable parameters
    Boolean
lmp.error.config_renegotiate Config - Renegotiate Parametere
    Boolean
lmp.error.summary_bad_data_link Summary - Bad Data Link Object
    Boolean
lmp.error.summary_bad_params Summary - Unacceptable non-negotiable parameters
    Boolean
lmp.error.summary_bad_remote_link_id Summary - Bad Remote Link ID
    Boolean
lmp.error.summary_bad_te_link Summary - Bad TE Link Object
    Boolean
lmp.error.summary_renegotiate Summary - Renegotiate Parametere
    Boolean
lmp.error.summary_unknown_dl_ctype Summary - Bad Data Link C-Type
    Boolean
lmp.error.summary_unknown_tel_ctype Summary - Bad TE Link C-Type
    Boolean
lmp.error.verify_te_link_id Verification - TE Link ID Configuration Error
    Boolean
```

lmp.error.verify\_unknown\_ctype Verification - Unknown Object C-Type  
Boolean

lmp.error.verify\_unsupported\_link Verification - Unsupported for this TE-Link  
Boolean

lmp.error.verify\_unsupported\_transport Verification - Transport Unsupported  
Boolean

lmp.error.verify\_unwilling Verification - Unwilling to Verify at this time  
Boolean

lmp.hdr.ccdown ControlChannelDown  
Boolean

lmp.hdr.flags LMP Header - Flags  
Unsigned 8-bit integer

lmp.hdr.reboot Reboot  
Boolean

lmp.hellodeadinterval HelloDeadInterval  
Unsigned 32-bit integer

lmp.hellointerval HelloInterval  
Unsigned 32-bit integer

lmp.local\_ccid Local CCID Value  
Unsigned 32-bit integer

lmp.local\_interfaceid\_ipv4 Local Interface ID - IPv4  
IPv4 address

lmp.local\_interfaceid\_unnum Local Interface ID - Unnumbered  
Unsigned 32-bit integer

lmp.local\_linkid\_ipv4 Local Link ID - IPv4  
IPv4 address

lmp.local\_linkid\_unnum Local Link ID - Unnumbered  
Unsigned 32-bit integer

lmp.local\_nodeid Local Node ID Value  
IPv4 address

lmp.messageid Message-ID Value  
Unsigned 32-bit integer

lmp.messageid\_ack Message-ID Ack Value  
Unsigned 32-bit integer

lmp.msg Message Type  
Unsigned 8-bit integer

lmp.msg.beginverify BeginVerify Message  
Boolean

               Unsigned 32-bit integer
```

```
lmp.service_config.cct    Contiguous Concatenation Types
                          Unsigned 8-bit integer
lmp.service_config.cpsa  Client Port Service Attributes
                          Unsigned 8-bit integer
lmp.service_config.cpsa.line_overhead  Line/MS Overhead Transparency Supported
                          Boolean
lmp.service_config.cpsa.local_ifid  Local interface id of the client interface r
                          IPv4 address
lmp.service_config.cpsa.max_ncc  Maximum Number of Contiguously Concatenated Com
                          Unsigned 8-bit integer
lmp.service_config.cpsa.max_nvc  Minimum Number of Virtually Concatenated Compon
                          Unsigned 8-bit integer
lmp.service_config.cpsa.min_ncc  Minimum Number of Contiguously Concatenated Com
                          Unsigned 8-bit integer
lmp.service_config.cpsa.min_nvc  Maximum Number of Contiguously Concatenated Com
                          Unsigned 8-bit integer
lmp.service_config.cpsa.path_overhead  Path/VC Overhead Transparency Supported
                          Boolean
lmp.service_config.cpsa.section_overhead  Section/RS Overhead Transparency Suppo
                          Boolean
lmp.service_config.nsa.diversity  Network Diversity Flags
                          Unsigned 8-bit integer
lmp.service_config.nsa.diversity.link  Link diversity supported
                          Boolean
lmp.service_config.nsa.diversity.node  Node diversity supported
                          Boolean
lmp.service_config.nsa.diversity.srlg  SRLG diversity supported
                          Boolean
lmp.service_config.nsa.tcm  TCM Monitoring
                          Unsigned 8-bit integer
lmp.service_config.nsa.transparency  Network Transparency Flags
                          Unsigned 32-bit integer
lmp.service_config.nsa.transparency.loh  Standard LOH/MSOH transparency supporte
                          Boolean
lmp.service_config.nsa.transparency.soh  Standard SOH/RSOH transparency supporte
                          Boolean
lmp.service_config.nsa.transparency.tcm  TCM Monitoring Supported
                          Boolean
lmp.service_config.sp  Service Config - Supported Signalling Protocols
                          Unsigned 8-bit integer
lmp.service_config.sp.ldap  LDP is supported
                          Boolean
lmp.service_config.sp.rsvp  RSVP is supported
                          Boolean
```

```

lmp.te_link.fault_mgmt  Fault Management Supported
                        Boolean

lmp.te_link.link_verify  Link Verification Supported
                        Boolean

lmp.te_link.local_ipv4  TE-Link Local ID - IPv4
                        IPv4 address

lmp.te_link.local_unnum  TE-Link Local ID - Unnumbered
                        Unsigned 32-bit integer

lmp.te_link.remote_ipv4  TE-Link Remote ID - IPv4
                        IPv4 address

lmp.te_link.remote_unnum  TE-Link Remote ID - Unnumbered
                        Unsigned 32-bit integer

lmp.te_link.flags  TE-Link Flags
                  Unsigned 8-bit integer

lmp.txseqnum  TxSeqNum
             Unsigned 32-bit integer

lmp.verifyid  Verify-ID
             Unsigned 32-bit integer

```

#### **Linux Kernel Packet Generator (pktgen)**

```

pktgen.magic  Magic number
             Unsigned 32-bit integer
             The pktgen magic number

pktgen.seqnum  Sequence number
             Unsigned 32-bit integer
             Sequence number

pktgen.timestamp  Timestamp
                Date/Time stamp
                Timestamp

pktgen.tvsec  Timestamp tvsec
             Unsigned 32-bit integer
             Timestamp tvsec part

pktgen.tvusec  Timestamp tvusec
             Unsigned 32-bit integer
             Timestamp tvusec part

```

#### **Linux cooked-mode capture (sll)**

```

sll.etype  Protocol
          Unsigned 16-bit integer
          Ethernet protocol type

sll.gretype  Protocol
          Unsigned 16-bit integer
          GRE protocol type

sll.halen  Link-layer address length
          Unsigned 16-bit integer
          Link-layer address length

```

```
sll.hatype  Link-layer address type
            Unsigned 16-bit integer
            Link-layer address type

sll.ltype   Protocol
            Unsigned 16-bit integer
            Linux protocol type

sll.pkttype Packet type
            Unsigned 16-bit integer
            Packet type

sll.src.eth Source
            6-byte Hardware (MAC) Address
            Source link-layer address

sll.src.ipv4 Source
            IPv4 address
            Source link-layer address

sll.src.other Source
            Byte array
            Source link-layer address

sll.trailer Trailer
            Byte array
            Trailer
```

#### **Local Management Interface (lmi)**

```
lmi.cmd    Call reference
            Unsigned 8-bit integer
            Call Reference

lmi.dlci_act  DLCI Active
            Unsigned 8-bit integer
            DLCI Active Flag

lmi.dlci_hi   DLCI High
            Unsigned 8-bit integer
            DLCI High bits

lmi.dlci_low  DLCI Low
            Unsigned 8-bit integer
            DLCI Low bits

lmi.dlci_new  DLCI New
            Unsigned 8-bit integer
            DLCI New Flag

lmi.ele_rcd_type Record Type
            Unsigned 8-bit integer
            Record Type

lmi.inf_ele_len Length
            Unsigned 8-bit integer
            Information Element Length

lmi.inf_ele_type Type
            Unsigned 8-bit integer
            Information Element Type
```

```
lmi.msg_type  Message Type
              Unsigned 8-bit integer
              Message Type

lmi.recv_seq  Recv Seq
              Unsigned 8-bit integer
              Receive Sequence

lmi.send_seq  Send Seq
              Unsigned 8-bit integer
              Send Sequence
```

**LocalTalk Link Access Protocol (llap)**

```
llap.dst  Destination Node
          Unsigned 8-bit integer

llap.src  Source Node
          Unsigned 8-bit integer

llap.type  Type
          Unsigned 8-bit integer
```

**Log Message (log)**

```
log.missed  WARNING: Missed one or more messages while capturing!
           No value

log.msg  Message
        String
```

**Logical Link Control GPRS (llcgprs)**

```
llcgprs.as  Ackn request bit
           Boolean
           Acknowledgement request bit A

llcgprs.cr  Command/Response bit
           Boolean
           Command/Response bit

llcgprs.e  E bit
           Boolean
           Encryption mode bit

llcgprs.frmrcr  C/R
              Unsigned 32-bit integer
              Rejected command response

logotypecertextn.ySize  ySize
    Signed 32-bit integer
    logotypecertextn.INTEGER
```

**Lucent/Ascend debug output (ascend)**

```
ascend.chunk  WDD Chunk
    Unsigned 32-bit integer

ascend.number  Called number
    String

ascend.ssess  Session ID
    Unsigned 32-bit integer

ascend.task  Task
    Unsigned 32-bit integer

ascend.type  Link type
    Unsigned 32-bit integer

ascend.user  User name
    String
```

**MAC Control (macc)**

```
macctrl.pause  Pause
    Unsigned 16-bit integer
    MAC control Pause

macctrl.quanta  Quanta
    Unsigned 16-bit integer
    MAC control quanta
```

**MDS Header (mdshdr)**

```
mdshdr.crc  CRC
    Unsigned 32-bit integer

mdshdr.dstidx  Dst Index
    Unsigned 16-bit integer

mdshdr.eof  EOF
    Unsigned 8-bit integer

mdshdr.plen  Packet Len
    Unsigned 16-bit integer

mdshdr.sof  SOF
    Unsigned 8-bit integer

mdshdr.span  SPAN Frame
    Unsigned 8-bit integer

mdshdr.srcidx  Src Index
    Unsigned 16-bit integer
```

mdshdr.vsan VSAN  
Unsigned 16-bit integer

**MEGACO (megaco)**

megaco.\_h324\_h223capr h324/h223capr  
String  
h324/h223capr

megaco.audit Audit Descriptor  
String  
Audit Descriptor of the megaco Command

megaco.command Command  
String  
Command of this message

  Local Control Descriptor in Media Descriptor
megaco.localdescriptor  Local Descriptor
  String
  Local Descriptor in Media Descriptor
megaco.mId  MediagatewayID
  String
  Mediagateway ID
megaco.media  Media Descriptor
  String
  Media Descriptor of the megaco Command
megaco.mode  Mode
  String
  Mode sendonly/receiveonly/inactive/loopback
megaco.modem  Modem Descriptor
  String
  Modem Descriptor of the megaco Command
megaco.multiplex  Multiplex Descriptor
  String
  Multiplex Descriptor of the megaco Command
megaco.observedevents  Observed Events Descriptor
  String
  Observed Events Descriptor of the megaco Command
megaco.packagesdescriptor  Packages Descriptor
  String
  Packages Descriptor
megaco.pkgdname  pkgdName
  String
  PackageName SLASH ItemID
megaco.remotedescriptor  Remote Descriptor
  String
  Remote Descriptor in Media Descriptor
```

megaco.requestid RequestID  
String  
RequestID in Events or Observedevents Descriptor

megaco.reservegroup Reserve Group  
String  
Reserve Group on or off

megaco.reservevalue Reserve Value  
String  
Reserve Value on or off

megaco.servicechange Service Change Descriptor  
String  
Service Change Descriptor of the megaco Command

megaco.servicestates Service State  
String  
Service States in Termination State Descriptor

megaco.signal Signal Descriptor  
String  
Signal Descriptor of the megaco Command

megaco.statistics Statistics Descriptor  
String  
Statistics Descriptor of the megaco Command

megaco.streamid StreamID  
String  
StreamID in the Media Descriptor

megaco.termid Termination ID  
String  
Termination ID of this Command

megaco.terminationstate Termination State Descriptor  
String  
Termination State Descriptor in Media Descriptor

megaco.topology Topology Descriptor  
String  
Topology Descriptor of the megaco Command

megaco.transaction Transaction  
String  
Message Originator

megaco.transid Transaction ID  
String  
Transaction ID of this message

megaco.version Version  
String  
Version

    mms.T_objectClass

mms.objectScope  objectScope
    Unsigned 32-bit integer
    mms.T_objectScope

mms.obtainFile  obtainFile
    No value
    mms.ObtainFile_Request

mms.occurrenceTime  occurrenceTime
    Byte array
    mms.TimeOfDay

mms.octet_string  octet-string
    Signed 32-bit integer
    mms.Integer32

mms.operatorStationName  operatorStationName
    String
    mms.Identifier

mms.originalInvokeID  originalInvokeID
    Signed 32-bit integer
    mms.Unsigned32
```

```
mms.originatingApplication  originatingApplication
    No value
    mms.ApplicationReference

mms.others  others
    Signed 32-bit integer
    mms.INTEGER

mms.output  output
    No value
    mms.Output_Request

mms.ownedNamedToken  ownedNamedToken
    String
    mms.Identifier

mms.packed  packed
    Boolean
    mms.BOOLEAN

mms.pdu_error  pdu-error
    Signed 32-bit integer
    mms.T_pdu_error

mms.prio_rity  prio-rity
    Signed 32-bit integer
    mms.Priority

mms.priority  priority
    Signed 32-bit integer
    mms.Priority

mms.programInvocationName  programInvocationName
    String
    mms.Identifier

mms.proposedDataStructureNestingLevel  proposedDataStructureNestingLevel
    Signed 32-bit integer
    mms.Integer8

mms.proposedMaxServOutstandingCalled  proposedMaxServOutstandingCalled
    Signed 32-bit integer
    mms.Integer16

mms.proposedMaxServOutstandingCalling  proposedMaxServOutstandingCalling
    Signed 32-bit integer
    mms.Integer16

mms.proposedParameterCBB  proposedParameterCBB
    Byte array
    mms.ParameterSupportOptions

mms.proposedVersionNumber  proposedVersionNumber
    Signed 32-bit integer
    mms.Integer16

mms.rangeStartSpecification  rangeStartSpecification
    Unsigned 32-bit integer
    mms.T_rangeStartSpecification

mms.rangeStopSpecification  rangeStopSpecification
    Unsigned 32-bit integer
    mms.T_rangeStopSpecification
```

```
mms.read read
    No value
    mms.Read_Request

mms.readJournal readJournal
    No value
    mms.ReadJournal_Request

mms.real real
    Boolean

mms.rejectPDU rejectPDU
    No value
    mms.RejectPDU

mms.rejectReason rejectReason
    Unsigned 32-bit integer
    mms.T_rejectReason

mms.relinquishControl relinquishControl
    No value
    mms.RelinquishControl_Request

mms.relinquishIfConnectionLost relinquishIfConnectionLost
    Boolean
    mms.BOOLEAN

mms.remainingAcceptableDelay remainingAcceptableDelay
    Signed 32-bit integer
    mms.Unsigned32

mms.remainingTimeOut remainingTimeOut
    Signed 32-bit integer
    mms.Unsigned32

mms.rename rename
    No value
    mms.Rename_Request

mms.reportActionStatus reportActionStatus
    Signed 32-bit integer
    mms.ReportEventActionStatus_Response

mms.reportEventActionStatus reportEventActionStatus
    Unsigned 32-bit integer
    mms.ReportEventActionStatus_Request

mms.reportEventConditionStatus reportEventConditionStatus
    Unsigned 32-bit integer
    mms.ReportEventConditionStatus_Request

mms.reportEventEnrollmentStatus reportEventEnrollmentStatus
    Unsigned 32-bit integer
    mms.ReportEventEnrollmentStatus_Request

mms.reportJournalStatus reportJournalStatus
    Unsigned 32-bit integer
    mms.ReportJournalStatus_Request

mms.reportPoolSemaphoreStatus reportPoolSemaphoreStatus
    No value
    mms.ReportPoolSemaphoreStatus_Request
```

```
mms.reportSemaphoreEntryStatus  reportSemaphoreEntryStatus
    No value
    mms.ReportSemaphoreEntryStatus_Request

mms.reportSemaphoreStatus  reportSemaphoreStatus
    Unsigned 32-bit integer
    mms.ReportSemaphoreStatus_Request

mms.requestDomainDownload  requestDomainDownload
    No value
    mms.RequestDomainDownload_Response

mms.requestDomainDownload  requestDomainDownload
    No value
    mms.RequestDomainDownload_Request

mms.requestDomainUpload  requestDomainUpload
    No value
    mms.RequestDomainUpload_Request

mms.reset  reset
    No value
    mms.Reset_Request

mms.resource  resource
    Signed 32-bit integer
    mms.T_resource

mms.resume  resume
    No value
    mms.Resume_Request

mms.reusable  reusable
    Boolean
    mms.BOOLEAN

mms.revision  revision
    String
    mms.VisibleString

mms.scatteredAccessDescription  scatteredAccessDescription
    Unsigned 32-bit integer
    mms.ScatteredAccessDescription

mms.scatteredAccessName  scatteredAccessName
    Unsigned 32-bit integer
    mms.ObjectName

mms.scopeOfDelete  scopeOfDelete
    Signed 32-bit integer
    mms.T_scopeOfDelete

mms.scopeOfRequest  scopeOfRequest
    Signed 32-bit integer
    mms.T_scopeOfRequest

mms.selectAccess  selectAccess
    Unsigned 32-bit integer
    mms.T_selectAccess

mms.semaphoreName  semaphoreName
    Unsigned 32-bit integer
    mms.ObjectName
```

```
mms.service service
Signed 32-bit integer
mms.T_service

mms.serviceError serviceError
No value
mms.ServiceError

mms.serviceSpecificInformation serviceSpecificInformation
Unsigned 32-bit integer
mms.T_serviceSpecificInformation

mms.service_preempt service-preempt
Signed 32-bit integer
mms.T_service_preempt

mms.servicesSupportedCalled servicesSupportedCalled
Byte array
mms.ServiceSupportOptions

mms.servicesSupportedCalling servicesSupportedCalling
Byte array
mms.ServiceSupportOptions

mms.severity severity
Signed 32-bit integer
mms.Unsigned8

mms.severityFilter severityFilter
No value
mms.T_severityFilter

  No value
  mms.Write_Request

mms.writeJournal writeJournal
  No value
  mms.WriteJournal_Request
```

### **MMS Message Encapsulation (mmse)**

```
mmse.bcc Bcc
  String
  Blind carbon copy.

mmse.cc Cc
  String
  Carbon copy.

mmse.content_location X-Mms-Content-Location
  String
  Defines the location of the message.

mmse.content_type Data
  No value
  Media content of the message.

mmse.date Date
  Date/Time stamp
  Arrival timestamp of the message or sending timestamp.

mmse.delivery_report X-Mms-Delivery-Report
  Unsigned 8-bit integer
  Whether a report of message delivery is wanted or not.

mmse.delivery_time.abs X-Mms-Delivery-Time
  Date/Time stamp
  The time at which message delivery is desired.

mmse.delivery_time.rel X-Mms-Delivery-Time
  Time duration
  The desired message delivery delay.

mmse.expiry.abs X-Mms-Expiry
  Date/Time stamp
  Time when message expires and need not be delivered anymore.

mmse.expiry.rel X-Mms-Expiry
  Time duration
  Delay before message expires and need not be delivered anymore.

mmse.ffheader Free format (not encoded) header
  String
  Application header without corresponding encoding.

mmse.from From
  String
  Address of the message sender.
```

```
mmse.message_class.id X-Mms-Message-Class
    Unsigned 8-bit integer
    Of what category is the message.
mmse.message_class.str X-Mms-Message-Class
    String
    Of what category is the message.
mmse.message_id Message-Id
    String
    Unique identification of the message.
mmse.message_size X-Mms-Message-Size
    Unsigned 32-bit integer
    The size of the message in octets.
mmse.message_type X-Mms-Message-Type
    Unsigned 8-bit integer
    Specifies the transaction type. Effectively defines PDU.
mmse.mms_version X-Mms-MMS-Version
    String
    Version of the protocol used.
mmse.previously_sent_by X-Mms-Previously-Sent-By
    String
    Indicates that the MM has been previously sent by this user.
mmse.previously_sent_by.address Address
    String
    Indicates from whom the MM has been previously sent.
mmse.previously_sent_by.forward_count Forward Count
    Unsigned 32-bit integer
    Forward count of the previously sent MM.
mmse.previously_sent_date X-Mms-Previously-Sent-Date
    String
    Indicates the date that the MM has been previously sent.
mmse.previously_sent_date.date Date
    String
    Time when the MM has been previously sent.
mmse.previously_sent_date.forward_count Forward Count
    Unsigned 32-bit integer
    Forward count of the previously sent MM.
mmse.priority X-Mms-Priority
    Unsigned 8-bit integer
    Priority of the message.
mmse.read_reply X-Mms-Read-Reply
    Unsigned 8-bit integer
    Whether a read report from every recipient is wanted.
mmse.read_report X-Mms-Read-Report
    Unsigned 8-bit integer
    Whether a read report from every recipient is wanted.
mmse.read_status X-Mms-Read-Status
    Unsigned 8-bit integer
    MMS-specific message read status.
```

mmse.reply\_charging X-Mms-Reply-Charging  
Unsigned 8-bit integer  
MMS-specific message reply charging method.

mmse.reply\_charging\_deadline.abs X-Mms-Reply-Charging-Deadline  
Date/Time stamp  
The latest time of the recipient(s) to submit the Reply MM.

mmse.reply\_charging\_deadline.rel X-Mms-Reply-Charging-Deadline  
Time duration  
The latest time of the recipient(s) to submit the Reply MM.

mmse.reply\_charging\_id X-Mms-Reply-Charging-Id  
String  
Unique reply charging identification of the message.

mmse.reply\_charging\_size X-Mms-Reply-Charging-Size  
Unsigned 32-bit integer  
The size of the reply charging in octets.

mmse.report\_allowed X-Mms-Report-Allowed  
Unsigned 8-bit integer  
Sending of delivery report allowed or not.

mmse.response\_status Response-Status  
Unsigned 8-bit integer  
MMS-specific result of a message submission or retrieval.

mmse.response\_text Response-Text  
String  
Additional information on MMS-specific result.

mmse.retrieve\_status X-Mms-Retrieve-Status  
Unsigned 8-bit integer  
MMS-specific result of a message retrieval.

mmse.retrieve\_text X-Mms-Retrieve-Text  
String  
Status text of a MMS message retrieval.

mmse.sender\_visibility Sender-Visibility  
Unsigned 8-bit integer  
Disclose sender identity to receiver or not.

mmse.status Status  
Unsigned 8-bit integer  
Current status of the message.

mmse.subject Subject  
String  
Subject of the message.

mmse.to To  
String  
Recipient(s) of the message.

mmse.transaction\_id X-Mms-Transaction-ID  
String  
A unique identifier for this transaction. Identifies request and correspondi

**MS Kpasswd (kpasswd)**

```

kpasswd.ChangePasswdData  ChangePasswdData
    No value
    Change Password Data structure

kpasswd.ap_req  AP_REQ
    No value
    AP_REQ structure

kpasswd.ap_req_len  AP_REQ Length
    Unsigned 16-bit integer
    Length of AP_REQ data

kpasswd.krb_priv  KRB-PRIV
    No value
    KRB-PRIV message

kpasswd.message_len  Message Length
    Unsigned 16-bit integer
    Message Length

kpasswd.new_password  New Password
    String
    New Password

kpasswd.result  Result
    Unsigned 16-bit integer
    Result

kpasswd.result_string  Result String
    String
    Result String

kpasswd.version  Version
    Unsigned 16-bit integer
    Version

```

**MS Network Load Balancing (msnlb)**

```

msnlb.cluster_virtual_ip  Cluster Virtual IP
    IPv4 address
    Cluster Virtual IP address

msnlb.count  Count
    Unsigned 32-bit integer
    Count

msnlb.host_ip  Host IP
    IPv4 address
    Host IP address

msnlb.host_name  Host name
    String
    Host name

msnlb.hpn  Host Priority Number
    Unsigned 32-bit integer
    Host Priority Number

msnlb.unknown  Unknown
    Byte array

```

**MS Proxy Protocol (msproxy)**

```
msproxy.bindaddr  Destination
                  IPv4 address

msproxy.bindid   Bound Port Id
                  Unsigned 32-bit integer

msproxy.bindport Bind Port
                  Unsigned 16-bit integer

msproxy.boundport Bound Port
                  Unsigned 16-bit integer

msproxy.clntport Client Port
                  Unsigned 16-bit integer

msproxy.command  Command
                  Unsigned 16-bit integer

msproxy.dstaddr  Destination Address
                  IPv4 address

msproxy.dstport  Destination Port
                  Unsigned 16-bit integer

msproxy.resolvaddr Address
                  IPv4 address

msproxy.server_ext_addr  Server External Address
                          IPv4 address

msproxy.server_ext_port  Server External Port
                          Unsigned 16-bit integer

msproxy.server_int_addr  Server Internal Address
                          IPv4 address

msproxy.server_int_port  Server Internal Port
                          Unsigned 16-bit integer

msproxy.serveraddr  Server Address
                    IPv4 address

msproxy.serverport  Server Port
                    Unsigned 16-bit integer

msproxy.srcport     Source Port
                    Unsigned 16-bit integer
```

**MSN Messenger Service (msnms)****MSNIP: Multicast Source Notification of Interest Protocol (msnip)**

```
msnip.checksum  Checksum
                 Unsigned 16-bit integer
                 MSNIP Checksum

msnip.checksum_bad  Bad Checksum
                    Boolean
                    Bad MSNIP Checksum

msnip.count  Count
             Unsigned 8-bit integer
             MSNIP Number of groups
```

msnip.genid Generation ID  
Unsigned 16-bit integer  
MSNIP Generation ID

msnip.groups Groups  
No value  
MSNIP Groups

msnip.holdtime Holdtime  
Unsigned 32-bit integer  
MSNIP Holdtime in seconds

msnip.holdtime16 Holdtime  
Unsigned 16-bit integer  
MSNIP Holdtime in seconds

msnip.maddr Multicast group  
IPv4 address  
MSNIP Multicast Group

msnip.netmask Netmask  
Unsigned 8-bit integer  
MSNIP Netmask

msnip.rec\_type Record Type  
Unsigned 8-bit integer  
MSNIP Record Type

msnip.type Type  
Unsigned 8-bit integer  
MSNIP Packet Type

### **MTP 2 Transparent Proxy (m2tp)**

m2tp.diagnostic\_info Diagnostic information  
Byte array

m2tp.error\_code Error code  
Unsigned 32-bit integer

m2tp.heartbeat\_data Heartbeat data  
Byte array

m2tp.info\_string Info string  
String

m2tp.interface\_identifier Interface Identifier  
Unsigned 32-bit integer

m2tp.master\_slave Master Slave Indicator  
Unsigned 32-bit integer

m2tp.message\_class Message class  
Unsigned 8-bit integer

m2tp.message\_length Message length  
Unsigned 32-bit integer

m2tp.message\_type Message Type  
Unsigned 8-bit integer

m2tp.parameter\_length Parameter length  
Unsigned 16-bit integer

```
m2tp.parameter_padding  Padding
    Byte array
m2tp.parameter_tag      Parameter Tag
    Unsigned 16-bit integer
m2tp.parameter_value    Parameter Value
    Byte array
m2tp.reason             Reason
    Unsigned 32-bit integer
m2tp.reserved           Reserved
    Unsigned 8-bit integer
m2tp.user_identifier    M2tp User Identifier
    Unsigned 32-bit integer
m2tp.version            Version
    Unsigned 8-bit integer
```

### **MTP 2 User Adaptation Layer (m2ua)**

```
m2ua.action             Actions
    Unsigned 32-bit integer
m2ua.asp_identifier      ASP identifier
    Unsigned 32-bit integer
m2ua.congestion_status  Congestion status
    Unsigned 32-bit integer
m2ua.correlation_identifier  Correlation identifier
    Unsigned 32-bit integer
m2ua.data_2_li          Length indicator
    Unsigned 8-bit integer
m2ua.deregistration_status  Deregistration status
    Unsigned 32-bit integer
m2ua.diagnostic_information  Diagnostic information
    Byte array
m2ua.discard_status     Discard status
    Unsigned 32-bit integer
m2ua.error_code         Error code
    Unsigned 32-bit integer
m2ua.event              Event
    Unsigned 32-bit integer
m2ua.heartbeat_data     Heartbeat data
    Byte array
m2ua.info_string        Info string
    String
m2ua.interface_identifier_int  Interface Identifier (integer)
    Unsigned 32-bit integer
m2ua.interface_identifier_start  Interface Identifier (start)
    Unsigned 32-bit integer
```

```
m2ua.interface_identifier_stop  Interface Identifier (stop)
    Unsigned 32-bit integer
m2ua.interface_identifier_text  Interface identifier (text)
    String
m2ua.local_lk_identifier        Local LK identifier
    Unsigned 32-bit integer
m2ua.message_class             Message class
    Unsigned 8-bit integer
m2ua.message_length            Message length
    Unsigned 32-bit integer
m2ua.message_type              Message Type
    Unsigned 8-bit integer

**Malformed Packet (malformed)**

**Media Gateway Control Protocol (mgcp)**

mgcp.dup Duplicate Message  
Unsigned 32-bit integer  
Duplicate Message

mgcp.messagecount MGCP Message Count  
Unsigned 32-bit integer  
Number of MGCP message in a packet

mgcp.param.bearerinfo BearerInformation (B)  
String  
Bearer Information

mgcp.param.callid CallId (C)  
String  
Call Id

mgcp.param.capabilities Capabilities (A)  
String  
Capabilities

mgcp.param.connectionid ConnectionIdentifier (I)  
String  
Connection Identifier

mgcp.param.connectionmode ConnectionMode (M)  
String  
Connection Mode

mgcp.param.connectionparam ConnectionParameters (P)  
String  
Connection Parameters

mgcp.param.connectionparam.ji Jitter (JI)  
Unsigned 32-bit integer  
Average inter-packet arrival jitter in milliseconds (P:JI)

mgcp.param.connectionparam.la Latency (LA)  
Unsigned 32-bit integer  
Average latency in milliseconds (P:LA)

mgcp.param.connectionparam.or Octets received (OR)  
Unsigned 32-bit integer  
Octets received (P:OR)

mgcp.param.connectionparam.os Octets sent (OS)  
Unsigned 32-bit integer  
Octets sent (P:OS)

mgcp.param.connectionparam.pcrji Remote Jitter (PC/RJI)  
Unsigned 32-bit integer  
Remote Jitter (P:PC/RJI)

mgcp.param.connectionparam.pcross Remote Octets sent (PC/ROS)  
Unsigned 32-bit integer  
Remote Octets sent (P:PC/ROS)

mgcp.param.connectionparam.pcrpl Remote Packets lost (PC/RPL)  
Unsigned 32-bit integer  
Remote Packets lost (P:PC/RPL)

```
mgcp.param.connectionparam.pcrps  Remote Packets sent (PC/RPS)
    Unsigned 32-bit integer
    Remote Packets sent (P:PC/RPS)
mgcp.param.connectionparam.pl  Packets lost (PL)
    Unsigned 32-bit integer
    Packets lost (P:PL)
mgcp.param.connectionparam.pr  Packets received (PR)
    Unsigned 32-bit integer
    Packets received (P:PR)
mgcp.param.connectionparam.ps  Packets sent (PS)
    Unsigned 32-bit integer
    Packets sent (P:PS)
mgcp.param.connectionparam.x  Vendor Extension
    String
    Vendor Extension (P:X-*)
mgcp.param.detectedevents  DetectedEvents (T)
    String
    Detected Events
mgcp.param.digitmap  DigitMap (D)
    String
    Digit Map
mgcp.param.eventstates  EventStates (ES)
    String
    Event States
mgcp.param.extension  Extension Parameter (non-critical)
    String
    Extension Parameter
mgcp.param.extensioncritical  Extension Parameter (critical)
    String
    Critical Extension Parameter
mgcp.param.invalid  Invalid Parameter
    String
    Invalid Parameter
mgcp.param.localconnectionoptions  LocalConnectionOptions (L)
    String
    Local Connection Options
mgcp.param.localconnectionoptions.a  Codecs (a)
    String
    Codecs
mgcp.param.localconnectionoptions.b  Bandwidth (b)
    String
    Bandwidth
mgcp.param.localconnectionoptions.dqgi  D-QoS GateID (dq-gi)
    String
    D-QoS GateID
mgcp.param.localconnectionoptions.dqrd  D-QoS Reserve Destination (dq-rd)
    String
    D-QoS Reserve Destination
```

```
mgcp.param.localconnectionoptions.dqri  D-QoS Resource ID (dq-ri)
    String
    D-QoS Resource ID
mgcp.param.localconnectionoptions.dqrr  D-QoS Resource Reservation (dq-rr)
    String
    D-QoS Resource Reservation
mgcp.param.localconnectionoptions.e     Echo Cancellation (e)
    String
    Echo Cancellation
mgcp.param.localconnectionoptions.esccd Content Destination (es-ccd)
    String
    Content Destination
mgcp.param.localconnectionoptions.escci Content Identifier (es-cci)
    String
    Content Identifier
mgcp.param.localconnectionoptions.fmtpl Media Format (fmtpl)
    String
    Media Format
mgcp.param.localconnectionoptions.gc    Gain Control (gc)
    Unsigned 32-bit integer
    Gain Control
mgcp.param.localconnectionoptions.k     Encryption Key (k)
    String
    Encryption Key
mgcp.param.localconnectionoptions.nt    Network Type (nt)
    String
    Network Type
mgcp.param.localconnectionoptions.ofmtpl Optional Media Format (o-fmtpl)
    String
    Optional Media Format
mgcp.param.localconnectionoptions.p     Packetization period (p)
    Unsigned 32-bit integer
    Packetization period
mgcp.param.localconnectionoptions.r     Resource Reservation (r)
    String
    Resource Reservation
mgcp.param.localconnectionoptions.rcnfl Reservation Confirmation (r-cnfl)
    String
    Reservation Confirmation
mgcp.param.localconnectionoptions.rdir  Reservation Direction (r-dir)
    String
    Reservation Direction
mgcp.param.localconnectionoptions.rsh   Resource Sharing (r-sh)
    String
    Resource Sharing
mgcp.param.localconnectionoptions.s     Silence Suppression (s)
    String
    Silence Suppression
```

```
mgcp.param.localconnectionoptions.scrtcp  RTCP ciphersuite (sc-rtcp)
    String
    RTCP ciphersuite
mgcp.param.localconnectionoptions.scrtp  RTP ciphersuite (sc-rtp)
    String
    RTP ciphersuite
mgcp.param.localconnectionoptions.t  Type of Service (r)
    String
    Type of Service
mgcp.param.maxmgcpdatagram  MaxMGCPDatagram (MD)
    String
    Maximum MGCP Datagram size
mgcp.param.notifiedentity  NotifiedEntity (N)
    String
    Notified Entity
mgcp.param.observedevents  ObservedEvents (O)
    String
    Observed Events
mgcp.param.packagelist  PackageList (PL)
    String
    Package List
mgcp.param.quarantinehandling  QuarantineHandling (Q)
    String
    Quarantine Handling
mgcp.param.reasoncode  ReasonCode (E)
    String
    Reason Code
mgcp.param.reqevents  RequestedEvents (R)
    String
    Requested Events
mgcp.param.reqinfo  RequestedInfo (F)
    String
    Requested Info
mgcp.param.requestid  RequestIdentifier (X)
    String
    Request Identifier
mgcp.param.restartdelay  RestartDelay (RD)
    String
    Restart Delay
mgcp.param.restartmethod  RestartMethod (RM)
    String
    Restart Method
mgcp.param.rspack  ResponseAck (K)
    String
    Response Ack
mgcp.param.secondconnectionid  SecondConnectionID (I2)
    String
    Second Connection Identifier
```

mgcp.param.seconddendpointid SecondEndpointID (Z)  
String  
Second Endpoing ID

mgcp.param.signalreq SignalRequests (S)  
String  
Signal Request

mgcp.param.specificendpointid SpecificEndpointID (Z)  
String  
Specific Endpoint ID

mgcp.params Parameters  
No value  
MGCP parameters

mgcp.req Request  
Boolean  
True if MGCP request

mgcp.req.dup Duplicate Request  
Unsigned 32-bit integer  
Duplicate Request

mgcp.req.dup.frame Original Request Frame  
Frame number  
Frame containing original request

mgcp.req.endpoint Endpoint  
String  
Endpoint referenced by the message

mgcp.req.verb Verb  
String  
Name of the verb

mgcp.reqframe Request Frame  
Frame number  
Request Frame

mgcp.rsp Response  
Boolean  
TRUE if MGCP response

mgcp.rsp.dup Duplicate Response  
Unsigned 32-bit integer  
Duplicate Response

mgcp.rsp.dup.frame Original Response Frame  
Frame number  
Frame containing original response

mgcp.rsp.rspcode Response Code  
Unsigned 32-bit integer  
Response Code

mgcp.rsp.rspstring Response String  
String  
Response String

mgcp.rspframe Response Frame  
Frame number  
Response Frame

```
mgcp.time    Time from request
             Time duration
             Timedelta between Request and Response
mgcp.transid Transaction ID
             String
             Transaction ID of this message
mgcp.version Version
             String
             MGCP Version
```

lsa.access_mask.audit_log_admin  Administer audit log attributes
                                  Boolean
                                  Administer audit log attributes

lsa.access_mask.create_account  Create special accounts (for assignment of user
                                  Boolean
                                  Create special accounts (for assignment of user rights)
```

```
lsa.access_mask.create_priv  Create a privilege
    Boolean
    Create a privilege

lsa.access_mask.create_secret  Create a secret object
    Boolean
    Create a secret object

lsa.access_mask.get_privateinfo  Get sensitive policy information
    Boolean
    Get sensitive policy information

lsa.access_mask.lookup_names  Lookup Names/SIDs
    Boolean
    Lookup Names/SIDs

lsa.access_mask.server_admin  Enable/Disable LSA
    Boolean
    Enable/Disable LSA

lsa.access_mask.set_audit_requirements  Change system audit requirements
    Boolean
    Change system audit requirements

lsa.access_mask.set_default_quota_limits  Set default quota limits
    Boolean
    Set default quota limits

lsa.access_mask.trust_admin  Modify domain trust relationships
    Boolean
    Modify domain trust relationships

lsa.access_mask.view_audit_info  View system audit requirements
    Boolean
    View system audit requirements

lsa.access_mask.view_local_info  View non-sensitive policy information
    Boolean
    View non-sensitive policy information

lsa.acct  Account
    String
    Account

lsa.attr  Attr
    Unsigned 64-bit integer
    LSA Attributes

lsa.auth.blob  Auth blob
    Byte array

lsa.auth.len  Auth Len
    Unsigned 32-bit integer
    Auth Info len

lsa.auth.type  Auth Type
    Unsigned 32-bit integer
    Auth Info type

lsa.auth.update  Update
    Unsigned 64-bit integer
    LSA Auth Info update
```

```
lsa.controller  Controller
                String
                Name of Domain Controller

lsa.count      Count
                Unsigned 32-bit integer
                Count of objects

lsa.cur.mtime   Current MTime
                Date/Time stamp
                Current MTime to set

lsa.domain     Domain
                String
                Domain

lsa.flat_name   Flat Name
                String

lsa.forest     Forest
                String

lsa.fqdn_domain FQDN
                String
                Fully Qualified Domain Name

lsa.hnd        Context Handle
                Byte array
                LSA policy handle

lsa.index      Index
                Unsigned 32-bit integer

lsa.info.level  Level
                Unsigned 16-bit integer
                Information level of requested data

lsa.info_type  Info Type
                Unsigned 32-bit integer

lsa.key        Key
                String

lsa.max_count   Max Count
                Unsigned 32-bit integer

lsa.mod.mtime   MTime
                Date/Time stamp
                Time when this modification occurred

lsa.mod.seq_no  Seq No
                Unsigned 64-bit integer
                Sequence number for this modification

lsa.name       Name
                String

lsa.new_pwd     New Password
                Byte array
                New password

lsa.num_mapped  Num Mapped
                Unsigned 32-bit integer
```

```
lsa.obj_attr  Attributes
    Unsigned 32-bit integer
    LSA Attributes

lsa.obj_attr.len  Length
    Unsigned 32-bit integer
    Length of object attribute structure

lsa.obj_attr.name  Name
    String
    Name of object attribute

lsa.old.mtime  Old MTime
    Date/Time stamp
    Old MTime for this object

lsa.old_pwd  Old Password
    Byte array
    Old password

lsa.opnum  Operation
    Unsigned 16-bit integer
    Operation

lsa.paei.enabled  Auditing enabled
    Unsigned 8-bit integer
    If Security auditing is enabled or not

lsa.paei.settings  Settings
    Unsigned 32-bit integer
    Audit Events Information settings

lsa.pali.log_size  Log Size
    Unsigned 32-bit integer
    Size of audit log

lsa.pali.next_audit_record  Next Audit Record
    Unsigned 32-bit integer
    Next audit record

lsa.pali.percent_full  Percent Full
    Unsigned 32-bit integer
    How full audit log is in percentage

lsa.pali.retention_period  Retention Period
    Time duration

lsa.pali.shutdown_in_progress  Shutdown in progress
    Unsigned 8-bit integer
    Flag whether shutdown is in progress or not

lsa.pali.time_to_shutdown  Time to shutdown
    Time duration
    Time to shutdown

lsa.policy.info  Info Class
    Unsigned 16-bit integer
    Policy information class

lsa.policy_information  POLICY INFO
    No value
    Policy Information union
```

```
lsa.privilege.display__name.size  Size Needed
    Unsigned 32-bit integer
    Number of characters in the privilege display name

lsa.privilege.display_name  Display Name
    String
    LSA Privilege Display Name

lsa.privilege.name  Name
    String
    LSA Privilege Name

lsa.qos.effective_only  Effective only
    Unsigned 8-bit integer
    QOS Flag whether this is Effective Only or not

lsa.qos.imp_lev  Impersonation level
    Unsigned 16-bit integer
    QOS Impersonation Level

lsa.qos.len  Length
    Unsigned 32-bit integer
    Length of quality of service structure

lsa.qos.track_ctx  Context Tracking
    Unsigned 8-bit integer
    QOS Context Tracking Mode

lsa.quota.max_wss  Max WSS
    Unsigned 32-bit integer
    Size of Quota Max WSS

lsa.quota.min_wss  Min WSS
    Unsigned 32-bit integer
    Size of Quota Min WSS

lsa.quota.non_paged_pool  Non Paged Pool
    Unsigned 32-bit integer
    Size of Quota non-Paged Pool

lsa.quota.paged_pool  Paged Pool
    Unsigned 32-bit integer
    Size of Quota Paged Pool

lsa.quota.pagefile  Pagefile
    Unsigned 32-bit integer
    Size of quota pagefile usage

lsa.rc  Return code
    Unsigned 32-bit integer
    LSA return status code

lsa.remove_all  Remove All
    Unsigned 8-bit integer
    Flag whether all rights should be removed or only the specified ones

lsa.resume_handle  Resume Handle
    Unsigned 32-bit integer
    Resume Handle

lsa.rid  RID
    Unsigned 32-bit integer
    RID
```

```
lsa.rid.offset  RID Offset
                Unsigned 32-bit integer
                RID Offset

lsa.rights     Rights
                String
                Account Rights

lsa.sd_size    Size
                Unsigned 32-bit integer
                Size of lsa security descriptor

lsa.secret     LSA Secret
                Byte array

lsa.server     Server
                String
                Name of Server

lsa.server_role Role
                Unsigned 16-bit integer
                LSA Server Role

lsa.sid_type   SID Type
                Unsigned 16-bit integer
                Type of SID

lsa.size       Size
                Unsigned 32-bit integer

lsa.source     Source
                String
                Replica Source

lsa.trust.attr Trust Attr
                Unsigned 32-bit integer
                Trust attributes

lsa.trust.attr.non_trans Non Transitive
                Boolean
                Non Transitive trust

lsa.trust.attr.tree_parent Tree Parent
                Boolean
                Tree Parent trust

lsa.trust.attr.tree_root Tree Root
                Boolean
                Tree Root trust

lsa.trust.attr.uplevel_only Upleve only
                Boolean
                Uplevel only trust

lsa.trust.direction Trust Direction
                Unsigned 32-bit integer
                Trust direction

lsa.trust.type Trust Type
                Unsigned 32-bit integer
                Trust type
```

lsa.trusted.info\_level Info Level  
Unsigned 16-bit integer  
Information level of requested Trusted Domain Information

lsa.unknown.char Unknown char  
Unsigned 8-bit integer  
Unknown char. If you know what this is, contact wireshark developers.

lsa.unknown.hyper Unknown hyper  
Unsigned 64-bit integer  
Unknown hyper. If you know what this is, contact wireshark developers.

lsa.unknown.long Unknown long  
Unsigned 32-bit integer  
Unknown long. If you know what this is, contact wireshark developers.

lsa.unknown.short Unknown short  
Unsigned 16-bit integer  
Unknown short. If you know what this is, contact wireshark developers.

lsa.unknown\_string Unknown string  
String  
Unknown string. If you know what this is, contact wireshark developers.

nt.luid.high High  
Unsigned 32-bit integer  
LUID High component

nt.luid.low Low  
Unsigned 32-bit integer  
LUID Low component

#### Microsoft Media Server (msmms)

msmms.command Command  
String  
MSMMS command hidden filter

msmms.command.broadcast-indexing Broadcast indexing  
Unsigned 8-bit integer

msmms.command.broadcast-liveness Broadcast liveness  
Unsigned 8-bit integer

msmms.command.client-transport-info Client transport info  
String

msmms.command.common-header Command common header  
String  
MSMMS command common header

msmms.command.direction Command direction  
Unsigned 16-bit integer

msmms.command.download-update-player-url Download update player URL  
String

msmms.command.download-update-player-url-length Download update URL length  
Unsigned 32-bit integer

msmms.command.length Command length  
Unsigned 32-bit integer

```
msmms.command.length-remaining  Length until end (8-byte blocks)
    Unsigned 32-bit integer
msmms.command.length-remaining2  Length until end (8-byte blocks)
    Unsigned 32-bit integer
msmms.command.password-encryption-type  Password encryption type
    String
msmms.command.password-encryption-type-length  Password encryption type length
    Unsigned 32-bit integer
msmms.command.player-info  Player info
    String
msmms.command.prefix1  Prefix 1
    Unsigned 32-bit integer
msmms.command.prefix1-command-level  Prefix 1 Command Level
    Unsigned 32-bit integer
msmms.command.prefix1-error-code  Prefix 1 ErrorCode
    Unsigned 32-bit integer
msmms.command.prefix2  Prefix 2
    Unsigned 32-bit integer
msmms.command.protocol-type  Protocol type
    String
msmms.command.result-flags  Result flags
    Unsigned 32-bit integer
msmms.command.sequence-number  Sequence number
    Unsigned 32-bit integer
msmms.command.server-file  Server file
    String
msmms.command.server-version  Server version
    String
msmms.command.server-version-length  Server Version Length
    Unsigned 32-bit integer
msmms.command.signature  Command signature
    Unsigned 32-bit integer
msmms.command.strange-string  Strange string
    String
msmms.command.timestamp  Time stamp (s)
    Double-precision floating point
msmms.command.to-client-id  Command
    Unsigned 16-bit integer
msmms.command.to-server-id  Command
    Unsigned 16-bit integer
msmms.command.tool-version  Tool version
    String
msmms.command.tool-version-length  Tool Version Length
    Unsigned 32-bit integer
```

```
msmms.command.version  Version
    Unsigned 32-bit integer
msmms.data  Data
    No value
msmms.data.client-id  Client ID
    Unsigned 32-bit integer
msmms.data.command-id  Command ID
    Unsigned 16-bit integer
msmms.data.header-id  Header ID
    Unsigned 32-bit integer
msmms.data.header-packet-id-type  Header packet ID type
    Unsigned 32-bit integer
msmms.data.media-packet-length  Media packet length (bytes)
    Unsigned 32-bit integer
msmms.data.packet-id-type  Packet ID type
    Unsigned 8-bit integer
msmms.data.packet-length  Packet length
    Unsigned 16-bit integer
msmms.data.packet-to-resend  Packet to resend
    Unsigned 32-bit integer
msmms.data.prerecorded-media-length  Pre-recorded media length (seconds)
    Unsigned 32-bit integer
msmms.data.selection-stream-action  Action
    Unsigned 16-bit integer
msmms.data.selection-stream-id  Stream id
    Unsigned 16-bit integer
msmms.data.sequence  Sequence number
    Unsigned 32-bit integer
msmms.data.stream-selection-flags  Stream selection flags
    Unsigned 16-bit integer
msmms.data.stream-structure-count  Stream structure count
    Unsigned 32-bit integer
msmms.data.tcp-flags  TCP flags
    Unsigned 8-bit integer
msmms.data.timing-pair  Data timing pair
    No value
msmms.data.timing-pair.flag  Flag
    Unsigned 8-bit integer
msmms.data.timing-pair.flags  Flags
    Unsigned 24-bit integer
msmms.data.timing-pair.id  ID
    Unsigned 8-bit integer
msmms.data.timing-pair.packet-length  Packet length
    Unsigned 16-bit integer
```

msmms.data.timing-pair.sequence-number Sequence number  
Unsigned 8-bit integer

msmms.data.udp-sequence UDP Sequence  
Unsigned 8-bit integer

msmms.data.unparsed Unparsed data  
No value

msmms.data.words-in-structure Number of 4 byte fields in structure  
Unsigned 32-bit integer

#### **Microsoft Messenger Service (messenger)**

messenger.client Client  
String  
Client that sent the message

messenger.message Message  
String  
The message being sent

messenger.opnum Operation  
Unsigned 16-bit integer  
Operation

messenger.rc Return code  
Unsigned 32-bit integer

messenger.server Server  
String  
Server to send the message to

#### **Microsoft Network Logon (rpc\_netlogon)**

netlogon.acct.expiry\_time Acct Expiry Time  
Date/Time stamp  
When this account will expire

netlogon.acct\_desc Acct Desc  
String  
Account Description

netlogon.acct\_name Acct Name  
String  
Account Name

netlogon.alias\_name Alias Name  
String  
Alias Name

netlogon.alias\_rid Alias RID  
Unsigned 32-bit integer

netlogon.attrs Attributes  
Unsigned 32-bit integer  
Attributes

netlogon.audit\_retention\_period Audit Retention Period  
Time duration  
Audit retention period

```
netlogon.auditing_mode  Auditing Mode
    Unsigned 8-bit integer
    Auditing Mode

netlogon.auth.data  Auth Data
    Byte array
    Auth Data

netlogon.auth.size  Auth Size
    Unsigned 32-bit integer
    Size of AuthData in bytes

netlogon.auth_flags  Auth Flags
    Unsigned 32-bit integer

netlogon.authoritative  Authoritative
    Unsigned 8-bit integer

netlogon.bad_pw_count  Bad PW Count
    Unsigned 32-bit integer
    Number of failed logins

netlogon.bad_pw_count16  Bad PW Count
    Unsigned 16-bit integer
    Number of failed logins

netlogon.blob  BLOB
    Byte array
    BLOB

netlogon.blob.size  Size
    Unsigned 32-bit integer
    Size in bytes of BLOB

netlogon.challenge  Challenge
    Byte array
    Netlogon challenge

netlogon.cipher_current_data  Cipher Current Data
    Byte array

netlogon.cipher_current_set_time  Cipher Current Set Time
    Date/Time stamp
    Time when current cipher was initiated

netlogon.cipher_len  Cipher Len
    Unsigned 32-bit integer

netlogon.cipher_maxlen  Cipher Max Len
    Unsigned 32-bit integer

netlogon.cipher_old_data  Cipher Old Data
    Byte array

netlogon.cipher_old_set_time  Cipher Old Set Time
    Date/Time stamp
    Time when previous cipher was initiated

netlogon.client.site_name  Client Site Name
    String
    Client Site Name
```

```
netlogon.code    Code
    Unsigned 32-bit integer
    Code

netlogon.codepage    Codepage
    Unsigned 16-bit integer
    Codepage setting for this account

netlogon.comment    Comment
    String
    Comment

netlogon.computer_name    Computer Name
    String
    Computer Name

netlogon.count    Count
    Unsigned 32-bit integer

netlogon.country    Country
    Unsigned 16-bit integer
    Country setting for this account

netlogon.credential    Credential
    Byte array
    Netlogon Credential

netlogon.database_id    Database Id
    Unsigned 32-bit integer
    Database Id

netlogon.db_create_time    DB Create Time
    Date/Time stamp
    Time when created

netlogon.db_modify_time    DB Modify Time
    Date/Time stamp
    Time when last modified

netlogon.dc.address    DC Address
    String
    DC Address

netlogon.dc.address_type    DC Address Type
    Unsigned 32-bit integer
    DC Address Type

netlogon.dc.flags    Domain Controller Flags
    Unsigned 32-bit integer
    Domain Controller Flags

netlogon.dc.flags.closest    Closest
    Boolean
    If this is the closest server

netlogon.dc.flags.dns_controller    DNS Controller
    Boolean
    If this server is a DNS Controller

netlogon.dc.flags.dns_domain    DNS Domain
    Boolean
```

```
netlogon.dc.flags.dns_forest  DNS Forest
    Boolean
    If this server is a DNS

netlogon.dc.flags.ds  DS
    Boolean
    If this server is a DS

netlogon.dc.flags.gc  GC
    Boolean
    If this server is a GC

netlogon.dc.flags.good_timeserv  Good Timeserv
    Boolean
    If this is a Good TimeServer

netlogon.dc.flags.kdc  KDC
    Boolean
    If this is a KDC

netlogon.dc.flags.ldap  LDAP
    Boolean
    If this is an LDAP server

netlogon.dc.flags.ndnc  NDNC
    Boolean
    If this is an NDNC server

netlogon.dc.flags.pdc  PDC
    Boolean
    If this server is a PDC

netlogon.dc.flags.timeserv  Timeserv
    Boolean
    If this server is a TimeServer

netlogon.dc.flags.writable  Writable
    Boolean
    If this server can do updates to the database

netlogon.dc.name  DC Name
    String
    DC Name

netlogon.dc.site_name  DC Site Name
    String
    DC Site Name

netlogon.delta_type  Delta Type
    Unsigned 16-bit integer
    Delta Type

netlogon.dir_drive  Dir Drive
    String
    Drive letter for home directory

netlogon.dns.forest_name  DNS Forest Name
    String
    DNS Forest Name

netlogon.dns_domain  DNS Domain
    String
    DNS Domain Name
```

```
netlogon.dns_host  DNS Host
    String
    DNS Host

netlogon.domain  Domain
    String
    Domain

netlogon.domain_create_time  Domain Create Time
    Date/Time stamp
    Time when this domain was created

netlogon.domain_modify_time  Domain Modify Time
    Date/Time stamp
    Time when this domain was last modified

netlogon.dos.rc  DOS error code
    Unsigned 32-bit integer
    DOS Error Code

netlogon.downlevel_domain  Downlevel Domain
    String
    Downlevel Domain Name

netlogon.dummy  Dummy
    String
    Dummy string

netlogon.entries  Entries
    Unsigned 32-bit integer

netlogon.event_audit_option  Event Audit Option
    Unsigned 32-bit integer
    Event audit option

netlogon.flags  Flags
    Unsigned 32-bit integer

netlogon.full_name  Full Name
    String
    Full Name

netlogon.get_dcname.request.flags  Flags
    Unsigned 32-bit integer
    Flags for DSGetDCName request

netlogon.get_dcname.request.flags.avoid_self  Avoid Self
    Boolean
    Return another DC than the one we ask

netlogon.get_dcname.request.flags.background_only  Background Only
    Boolean
    If we want cached data, even if it may have expired

netlogon.get_dcname.request.flags.ds_preferred  DS Preferred
    Boolean
    Whether we prefer the call to return a w2k server (if available)

netlogon.get_dcname.request.flags.ds_required  DS Required
    Boolean
    Whether we require that the returned DC supports w2k or not
```

```
netlogon.get_dcname.request.flags.force_rediscovery  Force Rediscovery
Boolean
Whether to allow the server to returned cached information or not
netlogon.get_dcname.request.flags.gc_server_required  GC Required
Boolean
Whether we require that the returned DC is a Global Catalog server
netlogon.get_dcname.request.flags.good_timeserv_preferred  Timeserv Preferred
Boolean
If we prefer Windows Time Servers
netlogon.get_dcname.request.flags.ip_required  IP Required
Boolean
If we require the IP of the DC in the reply
netlogon.get_dcname.request.flags.is_dns_name  Is DNS Name
Boolean
If the specified domain name is a DNS name
netlogon.get_dcname.request.flags.is_flat_name  Is Flat Name
Boolean
If the specified domain name is a NetBIOS name
netlogon.get_dcname.request.flags.kdc_required  KDC Required
Boolean
If we require that the returned server is a KDC
netlogon.get_dcname.request.flags.only_ldap_needed  Only LDAP Needed
Boolean
We just want an LDAP server, it does not have to be a DC
netlogon.get_dcname.request.flags.pdc_required  PDC Required
Boolean
Whether we require the returned DC to be the PDC
netlogon.get_dcname.request.flags.return_dns_name  Return DNS Name
Boolean
Only return a DNS name (or an error)
netlogon.get_dcname.request.flags.return_flat_name  Return Flat Name
Boolean
Only return a NetBIOS name (or an error)
netlogon.get_dcname.request.flags.timeserv_required  Timeserv Required
Boolean
If we require the returned server to be a WindowsTimeServ server
netlogon.get_dcname.request.flags.writable_required  Writable Required
Boolean
If we require that the returned server is writable
netlogon.group_desc  Group Desc
String
Group Description
netlogon.group_name  Group Name
String
Group Name
netlogon.group_rid  Group RID
Unsigned 32-bit integer
```

netlogon.groups.attrs.enabled Enabled  
Boolean  
The group attributes ENABLED flag

netlogon.groups.attrs.enabled\_by\_default Enabled By Default  
Boolean  
The group attributes ENABLED\_BY\_DEFAULT flag

netlogon.groups.attrs.mandatory Mandatory  
Boolean  
The group attributes MANDATORY flag

netlogon.handle Handle  
String  
Logon Srv Handle

netlogon.home\_dir Home Dir  
String  
Home Directory

netlogon.kickoff\_time Kickoff Time  
Date/Time stamp  
Time when this user will be kicked off

netlogon.last\_logoff\_time Last Logoff Time  
Date/Time stamp  
Time for last time this user logged off

netlogon.len Len  
Unsigned 32-bit integer  
Length

netlogon.level Level  
Unsigned 32-bit integer  
Which option of the union is represented here

netlogon.level16 Level  
Unsigned 16-bit integer  
Which option of the union is represented here

netlogon.lm\_chal\_resp LM Chal resp  
Byte array  
Challenge response for LM authentication

netlogon.lm\_owf\_pwd LM Pwd  
Byte array  
LanManager OWF Password

netlogon.lm\_owf\_pwd.encrypted Encrypted LM Pwd  
Byte array  
Encrypted LanManager OWF Password

netlogon.lm\_pwd\_present LM PWD Present  
Unsigned 8-bit integer  
Is LanManager password present for this account?

netlogon.logoff\_time Logoff Time  
Date/Time stamp  
Time for last time this user logged off

netlogon.logon\_attempts Logon Attempts  
Unsigned 32-bit integer  
Number of logon attempts

```
netlogon.logon_count  Logon Count
    Unsigned 32-bit integer
    Number of successful logins

netlogon.logon_count16  Logon Count
    Unsigned 16-bit integer
    Number of successful logins

netlogon.logon_id  Logon ID
    Unsigned 64-bit integer
    Logon ID

netlogon.logon_script  Logon Script
    String
    Logon Script

netlogon.logon_time  Logon Time
    Date/Time stamp
    Time for last time this user logged on

netlogon.max_audit_event_count  Max Audit Event Count
    Unsigned 32-bit integer
    Max audit event count

netlogon.max_log_size  Max Log Size
    Unsigned 32-bit integer
    Max Size of log

netlogon.max_size  Max Size
    Unsigned 32-bit integer
    Max Size of database

netlogon.max_working_set_size  Max Working Set Size
    Unsigned 32-bit integer

netlogon.min_passwd_len  Min Password Len
    Unsigned 16-bit integer
    Minimum length of password

netlogon.min_working_set_size  Min Working Set Size
    Unsigned 32-bit integer

netlogon.modify_count  Modify Count
    Unsigned 64-bit integer
    How many times the object has been modified

netlogon.neg_flags  Neg Flags
    Unsigned 32-bit integer
    Negotiation Flags

netlogon.next_reference  Next Reference
    Unsigned 32-bit integer

netlogon.nonpaged_pool_limit  Non-Paged Pool Limit
    Unsigned 32-bit integer

netlogon.nt_chal_resp  NT Chal resp
    Byte array
    Challenge response for NT authentication

netlogon.nt_owf_pwd  NT Pwd
    Byte array
    NT OWF Password
```

```
netlogon.nt_pwd_present  NT PWD Present
    Unsigned 8-bit integer
    Is NT password present for this account?

netlogon.num_dc  Num DCs
    Unsigned 32-bit integer
    Number of domain controllers

netlogon.num_deltas  Num Deltas
    Unsigned 32-bit integer
    Number of SAM Deltas in array

netlogon.num_other_groups  Num Other Groups
    Unsigned 32-bit integer

netlogon.num_rids  Num RIDs
    Unsigned 32-bit integer
    Number of RIDs

netlogon.num_trusts  Num Trusts
    Unsigned 32-bit integer

netlogon.oem_info  OEM Info
    String
    OEM Info

netlogon.opnum  Operation
    Unsigned 16-bit integer
    Operation

netlogon.pac.data  Pac Data
    Byte array
    Pac Data

netlogon.pac.size  Pac Size
    Unsigned 32-bit integer
    Size of PacData in bytes

netlogon.page_file_limit  Page File Limit
    Unsigned 32-bit integer

netlogon.paged_pool_limit  Paged Pool Limit
    Unsigned 32-bit integer

netlogon.param_ctrl  Param Ctrl
    Unsigned 32-bit integer
    Param ctrl

netlogon.parameters  Parameters
    String
    Parameters

netlogon.parent_index  Parent Index
    Unsigned 32-bit integer
    Parent Index

netlogon.passwd_history_len  Passwd History Len
    Unsigned 16-bit integer
    Length of password history

netlogon.pdc_connection_status  PDC Connection Status
    Unsigned 32-bit integer
    PDC Connection Status
```

```
netlogon.principal  Principal
    String
    Principal
netlogon.priv  Priv
    Unsigned 32-bit integer
netlogon.privilege_control  Privilege Control
    Unsigned 32-bit integer
netlogon.privilege_entries  Privilege Entries
    Unsigned 32-bit integer
netlogon.privilege_name  Privilege Name
    String
netlogon.profile_path  Profile Path
    String
    Profile Path
netlogon.pwd_age  PWD Age
    Time duration
    Time since this users password was changed
netlogon.pwd_can_change_time  PWD Can Change
    Date/Time stamp
    When this users password may be changed
netlogon.pwd_expired  PWD Expired
    Unsigned 8-bit integer
    Whether this password has expired or not
netlogon.pwd_last_set_time  PWD Last Set
    Date/Time stamp
    Last time this users password was changed
netlogon.pwd_must_change_time  PWD Must Change
    Date/Time stamp
    When this users password must be changed
netlogon.rc  Return code
    Unsigned 32-bit integer
    Netlogon return code
netlogon.reference  Reference
    Unsigned 32-bit integer
netlogon.reserved  Reserved
    Unsigned 32-bit integer
    Reserved
netlogon.resourcegroupcount  ResourceGroup count
    Unsigned 32-bit integer
    Number of Resource Groups
netlogon.restart_state  Restart State
    Unsigned 16-bit integer
    Restart State
netlogon.rid  User RID
    Unsigned 32-bit integer
```

```
netlogon.sec_chan_type  Sec Chan Type
    Unsigned 16-bit integer
    Secure Channel Type

netlogon.secchan.bind.unknown1  Unknown1
    Unsigned 32-bit integer

netlogon.secchan.bind.unknown2  Unknown2
    Unsigned 32-bit integer

netlogon.secchan.bind_ack.unknown1  Unknown1
    Unsigned 32-bit integer

netlogon.secchan.bind_ack.unknown2  Unknown2
    Unsigned 32-bit integer

netlogon.secchan.bind_ack.unknown3  Unknown3
    Unsigned 32-bit integer

netlogon.secchan.digest  Packet Digest
    Byte array
    Packet Digest

netlogon.secchan.domain  Domain
    String

netlogon.secchan.host  Host
    String

netlogon.secchan.nonce  Nonce
    Byte array
    Nonce

netlogon.secchan.seq  Sequence No
    Byte array
    Sequence No

netlogon.secchan.sig  Signature
    Byte array
    Signature

netlogon.secchan.verifier  Secure Channel Verifier
    No value
    Verifier

netlogon.security_information  Security Information
    Unsigned 32-bit integer
    Security Information

netlogon.sensitive_data  Data
    Byte array
    Sensitive Data

netlogon.sensitive_data_flag  Sensitive Data
    Unsigned 8-bit integer
    Sensitive data flag

netlogon.sensitive_data_len  Length
    Unsigned 32-bit integer
    Length of sensitive data

netlogon.serial_number  Serial Number
    Unsigned 32-bit integer
```

```
netlogon.server      Server
    String
    Server

netlogon.site_name  Site Name
    String
    Site Name

netlogon.sync_context  Sync Context
    Unsigned 32-bit integer
    Sync Context

netlogon.system_flags  System Flags
    Unsigned 32-bit integer

netlogon.tc_connection_status  TC Connection Status
    Unsigned 32-bit integer
    TC Connection Status

netlogon.time_limit  Time Limit
    Time duration

netlogon.timestamp  Timestamp
    Date/Time stamp

netlogon.trust.attrs.cross_organization  Cross Organization
    Boolean

netlogon.trust.attrs.forest_transitive  Forest Transitive
    Boolean

netlogon.trust.attrs.non_transitive  Non Transitive
    Boolean

netlogon.trust.attrs.quarantined_domain  Quarantined Domain
    Boolean

netlogon.trust.attrs.treat_as_external  Treat As External
    Boolean

netlogon.trust.attrs.uplevel_only  Uplevel Only
    Boolean

netlogon.trust.attrs.within_forest  Within Forest
    Boolean

netlogon.trust.flags.in_forest  In Forest
    Boolean
    Whether this domain is a member of the same forest as the servers domain

netlogon.trust.flags.inbound  Inbound Trust
    Boolean
    Inbound trust. Whether the domain directly trusts the queried servers domain

netlogon.trust.flags.native_mode  Native Mode
    Boolean
    Whether the domain is a w2k native mode domain or not

netlogon.trust.flags.outbound  Outbound Trust
    Boolean
    Outbound Trust. Whether the domain is directly trusted by the servers domain
```

```
netlogon.trust.flags.primary Primary
  Boolean
  Whether the domain is the primary domain for the queried server or not
netlogon.trust.flags.tree_root Tree Root
  Boolean
  Whether the domain is the root of the tree for the queried server
netlogon.trust_attribs Trust Attributes
  Unsigned 32-bit integer
  Trust Attributes
netlogon.trust_flags Trust Flags
  Unsigned 32-bit integer
  Trust Flags
netlogon.trust_type Trust Type
  Unsigned 32-bit integer
  Trust Type
netlogon.trusted_dc Trusted DC
  String
  Trusted DC
netlogon.unknown.char Unknown char
  Unsigned 8-bit integer
  Unknown char. If you know what this is, contact wireshark developers.
netlogon.unknown.long Unknown long
  Unsigned 32-bit integer
  Unknown long. If you know what this is, contact wireshark developers.
netlogon.unknown.short Unknown short
  Unsigned 16-bit integer
  Unknown short. If you know what this is, contact wireshark developers.
netlogon.unknown_string Unknown string
  String
  Unknown string. If you know what this is, contact wireshark developers.
netlogon.user.account_control.account_auto_locked Account Auto Locked
  Boolean
  The user account control account_auto_locked flag
netlogon.user.account_control.account_disabled Account Disabled
  Boolean
  The user account control account_disabled flag
netlogon.user.account_control.dont_expire_password Dont Expire Password
  Boolean
  The user account control dont_expire_password flag
netlogon.user.account_control.dont_require_preauth Dont Require PreAuth
  Boolean
  The user account control DONT_REQUIRE_PREAUTH flag
netlogon.user.account_control.encrypted_text_password_allowed Encrypted Text Pa
  Boolean
  The user account control encrypted_text_password_allowed flag
netlogon.user.account_control.home_directory_required Home Directory Required
  Boolean
  The user account control home_directory_required flag
```

netlogon.user.account\_control.interdomain\_trust\_account Interdomain trust Account  
Boolean  
The user account control interdomain\_trust\_account flag

netlogon.user.account\_control.mns\_logon\_account MNS Logon Account  
Boolean  
The user account control mns\_logon\_account flag

netlogon.user.account\_control.normal\_account Normal Account  
Boolean  
The user account control normal\_account flag

netlogon.user.account\_control.not\_delegated Not Delegated  
Boolean  
The user account control not\_delegated flag

netlogon.user.account\_control.password\_not\_required Password Not Required  
Boolean  
The user account control password\_not\_required flag

netlogon.user.account\_control.server\_trust\_account Server Trust Account  
Boolean  
The user account control server\_trust\_account flag

netlogon.user.account\_control.smartcard\_required SmartCard Required  
Boolean  
The user account control smartcard\_required flag

netlogon.user.account\_control.temp\_duplicate\_account Temp Duplicate Account  
Boolean  
The user account control temp\_duplicate\_account flag

netlogon.user.account\_control.trusted\_for\_delegation Trusted For Delegation  
Boolean  
The user account control trusted\_for\_delegation flag

netlogon.user.account\_control.use\_des\_key\_only Use DES Key Only  
Boolean  
The user account control use\_des\_key\_only flag

netlogon.user.account\_control.workstation\_trust\_account Workstation Trust Account  
Boolean  
The user account control workstation\_trust\_account flag

netlogon.user.flags.extra\_sids Extra SIDs  
Boolean  
The user flags EXTRA\_SIDS

netlogon.user.flags.resource\_groups Resource Groups  
Boolean  
The user flags RESOURCE\_GROUPS

netlogon.user\_account\_control User Account Control  
Unsigned 32-bit integer  
User Account control

netlogon.user\_flags User Flags  
Unsigned 32-bit integer  
User flags

netlogon.user\_session\_key User Session Key  
Byte array  
User Session Key

```
netlogon.validation_level  Validation Level
    Unsigned 16-bit integer
    Requested level of validation
netlogon.werr.rc  WERR error code
    Unsigned 32-bit integer
    WERR Error Code
netlogon.wkst.fqdn  Wkst FQDN
    String
    Workstation FQDN
netlogon.wkst.name  Wkst Name
    String
    Workstation Name
netlogon.wkst.os  Wkst OS
    String
    Workstation OS
netlogon.wkst.site_name  Wkst Site Name
    String
    Workstation Site Name
netlogon.wksts  Workstations
    String
    Workstations
```

#### **Microsoft Plug and Play service (pnp)**

```
pnp.opnum  Operation
    Unsigned 16-bit integer
    Operation
```

#### **Microsoft Routing and Remote Access Service (rras)**

```
rras.opnum  Operation
    Unsigned 16-bit integer
    Operation
```

#### **Microsoft Service Control (svcctl)**

```
svcctl.access_mask  Access Mask
    Unsigned 32-bit integer
    SVCCTL Access Mask
svcctl.database  Database
    String
    Name of the database to open
svcctl.hnd  Context Handle
    Byte array
    SVCCTL Context handle
svcctl.is_locked  IsLocked
    Unsigned 32-bit integer
    SVCCTL whether the database is locked or not
svcctl.lock  Lock
    Byte array
    SVCCTL Database Lock
```

```
svcctl.lock_duration  Duration
    Unsigned 32-bit integer
    SVCCTL number of seconds the database has been locked

svcctl.lock_owner    Owner
    String
    SVCCTL the user that holds the database lock

svcctl.machinename  MachineName
    String
    Name of the host we want to open the database on

svcctl.opnum        Operation
    Unsigned 16-bit integer
    Operation

svcctl.rc           Return code
    Unsigned 32-bit integer
    SVCCTL return code

svcctl.required_size  Required Size
    Unsigned 32-bit integer
    SVCCTL required size of buffer for data to fit

svcctl.resume       Resume Handle
    Unsigned 32-bit integer
    SVCCTL resume handle

svcctl.scm_rights_connect  Connect
    Boolean
    SVCCTL Rights to connect to SCM

svcctl.scm_rights_create_service  Create Service
    Boolean
    SVCCTL Rights to create services

svcctl.scm_rights_enumerate_service  Enumerate Service
    Boolean
    SVCCTL Rights to enumerate services

svcctl.scm_rights_lock  Lock
    Boolean
    SVCCTL Rights to lock database

svcctl.scm_rights_modify_boot_config  Modify Boot Config
    Boolean
    SVCCTL Rights to modify boot config

svcctl.scm_rights_query_lock_status  Query Lock Status
    Boolean
    SVCCTL Rights to query database lock status

svcctl.service_state  State
    Unsigned 32-bit integer
    SVCCTL service state

svcctl.service_type  Type
    Unsigned 32-bit integer
    SVCCTL type of service

svcctl.size          Size
    Unsigned 32-bit integer
    SVCCTL size of buffer
```

**Microsoft Spool Subsystem (spoolss)**

```
secdescbuf.len      Length
  Unsigned 32-bit integer
  Length

secdescbuf.max_len  Max len
  Unsigned 32-bit integer
  Max len

secdescbuf.undoc    Undocumented
  Unsigned 32-bit integer
  Undocumented

setprinterdataex.data  Data
  Byte array
  Data

setprinterdataex.max_len  Max len
  Unsigned 32-bit integer
  Max len

setprinterdataex.real_len  Real len
  Unsigned 32-bit integer
  Real len

spoolprinterinfo.devmode_ptr  Devmode pointer
  Unsigned 32-bit integer
  Devmode pointer

spoolprinterinfo.secdesc_ptr  Secdesc pointer
  Unsigned 32-bit integer
  Secdesc pointer

spoolss.Datatype  Datatype
  String
  Datatype

spoolss.access_mask.job_admin  Job admin
  Boolean
  Job admin

spoolss.access_mask.printer_admin  Printer admin
  Boolean
  Printer admin

spoolss.access_mask.printer_use  Printer use
  Boolean
  Printer use

spoolss.access_mask.server_admin  Server admin
  Boolean
  Server admin

spoolss.access_mask.server_enum  Server enum
  Boolean
  Server enum

spoolss.access_required  Access required
  Unsigned 32-bit integer
  Access required
```

```
spoolss.architecture  Architecture name
    String
    Architecture name
spoolss.buffer.data   Buffer data
    Byte array
    Contents of buffer
spoolss.buffer.size   Buffer size
    Unsigned 32-bit integer
    Size of buffer
spoolss.clientmajorversion  Client major version
    Unsigned 32-bit integer
    Client printer driver major version
spoolss.clientminorversion  Client minor version
    Unsigned 32-bit integer
    Client printer driver minor version
spoolss.configfile    Config file
    String
    Printer name
spoolss.datafile     Data file
    String
    Data file
spoolss.defaultdatatype  Default data type
    String
    Default data type
spoolss.dependentfiles  Dependent files
    String
    Dependent files
spoolss.devicemodectr.size  Devicemode ctr size
    Unsigned 32-bit integer
    Devicemode ctr size
spoolss.devmode       Devicemode
    Unsigned 32-bit integer
    Devicemode
spoolss.devmode.bits_per_pel  Bits per pel
    Unsigned 32-bit integer
    Bits per pel
spoolss.devmode.collate  Collate
    Unsigned 16-bit integer
    Collate
spoolss.devmode.color    Color
    Unsigned 16-bit integer
    Color
spoolss.devmode.copies   Copies
    Unsigned 16-bit integer
    Copies
spoolss.devmode.default_source  Default source
    Unsigned 16-bit integer
    Default source
```

```
spoolss.devmode.display_flags  Display flags
    Unsigned 32-bit integer
    Display flags

spoolss.devmode.display_freq  Display frequency
    Unsigned 32-bit integer
    Display frequency

spoolss.devmode.dither_type  Dither type
    Unsigned 32-bit integer
    Dither type

spoolss.devmode.driver_extra  Driver extra
    Byte array
    Driver extra

spoolss.devmode.driver_extra_len  Driver extra length
    Unsigned 32-bit integer
    Driver extra length

spoolss.devmode.driver_version  Driver version
    Unsigned 16-bit integer
    Driver version

spoolss.devmode.duplex  Duplex
    Unsigned 16-bit integer
    Duplex

spoolss.devmode.fields  Fields
    Unsigned 32-bit integer
    Fields

spoolss.devmode.fields.bits_per_pel  Bits per pel
    Boolean
    Bits per pel

```
spoolss.enumforms.num    Num
    Unsigned 32-bit integer
    Num

spoolss.enumjobs.firstjob  First job
    Unsigned 32-bit integer
    Index of first job to return

spoolss.enumjobs.level    Info level
    Unsigned 32-bit integer
    Info level

spoolss.enumjobs.numjobs  Num jobs
    Unsigned 32-bit integer
    Number of jobs to return

spoolss.enumprinterdata.data_needed  Data size needed
    Unsigned 32-bit integer
    Buffer size needed for printerdata data

spoolss.enumprinterdata.data_offered  Data size offered
    Unsigned 32-bit integer
    Buffer size offered for printerdata data

spoolss.enumprinterdata.enumindex  Enum index
    Unsigned 32-bit integer
    Index for start of enumeration

spoolss.enumprinterdata.value_len  Value length
    Unsigned 32-bit integer
    Size of printerdata value

spoolss.enumprinterdata.value_needed  Value size needed
    Unsigned 32-bit integer
    Buffer size needed for printerdata value

spoolss.enumprinterdata.value_offered  Value size offered
    Unsigned 32-bit integer
    Buffer size offered for printerdata value

spoolss.enumprinterdataex.name  Name
    String
    Name

spoolss.enumprinterdataex.name_len  Name len
    Unsigned 32-bit integer
    Name len

spoolss.enumprinterdataex.name_offset  Name offset
    Unsigned 32-bit integer
    Name offset

spoolss.enumprinterdataex.num_values  Num values
    Unsigned 32-bit integer
    Number of values returned

spoolss.enumprinterdataex.val_dword.high  DWORD value (high)
    Unsigned 16-bit integer
    DWORD value (high)

spoolss.enumprinterdataex.val_dword.low  DWORD value (low)
    Unsigned 16-bit integer
    DWORD value (low)
```

```
spoolss.enumprinterdataex.value_len  Value len
    Unsigned 32-bit integer
    Value len

spoolss.enumprinterdataex.value_offset  Value offset
    Unsigned 32-bit integer
    Value offset

spoolss.enumprinterdataex.value_type  Value type
    Unsigned 32-bit integer
    Value type

spoolss.enumprinters.flags  Flags
    Unsigned 32-bit integer
    Flags

spoolss.enumprinters.flags.enum_connections  Enum connections
    Boolean
    Enum connections

spoolss.enumprinters.flags.enum_default  Enum default
    Boolean
    Enum default

spoolss.enumprinters.flags.enum_local  Enum local
    Boolean
    Enum local

spoolss.enumprinters.flags.enum_name  Enum name
    Boolean
    Enum name

spoolss.enumprinters.flags.enum_network  Enum network
    Boolean
    Enum network

spoolss.enumprinters.flags.enum_remote  Enum remote
    Boolean
    Enum remote

spoolss.enumprinters.flags.enum_shared  Enum shared
    Boolean
    Enum shared

spoolss.form  Data
    Unsigned 32-bit integer
    Data

spoolss.form.flags  Flags
    Unsigned 32-bit integer
    Flags

spoolss.form.height  Height
    Unsigned 32-bit integer
    Height

spoolss.form.horiz  Horizontal
    Unsigned 32-bit integer
    Horizontal

spoolss.form.left  Left margin
    Unsigned 32-bit integer
    Left
```

```
spoolss.form.level  Level
    Unsigned 32-bit integer
    Level

spoolss.form.name  Name
    String
    Name

spoolss.form.top   Top
    Unsigned 32-bit integer
    Top

spoolss.form.unknown  Unknown
    Unsigned 32-bit integer
    Unknown

spoolss.form.vert  Vertical
    Unsigned 32-bit integer
    Vertical

spoolss.form.width  Width
    Unsigned 32-bit integer
    Width

spoolss.hardwareid  Hardware ID
    String
    Hardware Identification Information

spoolss.helpfile   Help file
    String
    Help file

spoolss.hnd        Context handle
    Byte array
    SPOOLSS policy handle

spoolss.job.bytesprinted  Job bytes printed
    Unsigned 32-bit integer
    Job bytes printed

spoolss.job.id     Job ID
    Unsigned 32-bit integer
    Job identification number

spoolss.job.pagesprinted  Job pages printed
    Unsigned 32-bit integer
    Job pages printed

spoolss.job.position  Job position
    Unsigned 32-bit integer
    Job position

spoolss.job.priority  Job priority
    Unsigned 32-bit integer
    Job priority

spoolss.job.size     Job size
    Unsigned 32-bit integer
    Job size

spoolss.job.status   Job status
    Unsigned 32-bit integer
    Job status
```

```
spoolss.job.status.blocked  Blocked
    Boolean
    Blocked

spoolss.job.status.deleted  Deleted
    Boolean
    Deleted

spoolss.job.status.deleting  Deleting
    Boolean
    Deleting

spoolss.job.status.error    Error
    Boolean
    Error

spoolss.job.status.offline  Offline
    Boolean
    Offline

spoolss.job.status.paperout  Paperout
    Boolean
    Paperout

spoolss.job.status.paused   Paused
    Boolean
    Paused

spoolss.job.status.printed  Printed
    Boolean
    Printed

spoolss.job.status.printing  Printing
    Boolean
    Printing

spoolss.job.status.spooling  Spooling
    Boolean
    Spooling

spoolss.job.status.user_intervention  User intervention
    Boolean
    User intervention

spoolss.job.totalbytes      Job total bytes
    Unsigned 32-bit integer
    Job total bytes

spoolss.job.totalpages      Job total pages
    Unsigned 32-bit integer
    Job total pages

spoolss.keybuffer.data      Key Buffer data
    Byte array
    Contents of buffer

spoolss.keybuffer.size      Key Buffer size
    Unsigned 32-bit integer
    Size of buffer

spoolss.machinename         Machine name
    String
    Machine name
```

```
spoolss.majordriverversion  Major Driver Version
    Unsigned 32-bit integer
    Driver Version High

spoolss.mfgname  Mfgname
    String
    Manufacturer Name

spoolss.minordriverversion  Minor Driver Version
    Unsigned 32-bit integer
    Driver Version Low

spoolss.monitorname  Monitor name
    String
    Monitor name

spoolss.needed  Needed
    Unsigned 32-bit integer
    Size of buffer required for request

spoolss.notify_field  Field
    Unsigned 16-bit integer
    Field

spoolss.notify_info.count  Count
    Unsigned 32-bit integer
    Count

spoolss.notify_info.flags  Flags
    Unsigned 32-bit integer
    Flags

spoolss.notify_info.version  Version
    Unsigned 32-bit integer
    Version

spoolss.notify_info_data.buffer  Buffer
    Unsigned 32-bit integer
    Buffer

spoolss.notify_info_data.buffer.data  Buffer data
    Byte array
    Buffer data

spoolss.notify_info_data.buffer.len  Buffer length
    Unsigned 32-bit integer
    Buffer length

spoolss.notify_info_data.bufsize  Buffer size
    Unsigned 32-bit integer
    Buffer size

spoolss.notify_info_data.count  Count
    Unsigned 32-bit integer
    Count

spoolss.notify_info_data.jobid  Job Id
    Unsigned 32-bit integer
    Job Id

spoolss.notify_info_data.type  Type
    Unsigned 16-bit integer
    Type
```

```
spoolss.notify_info_data.value1  Value1
    Unsigned 32-bit integer
    Value1
spoolss.notify_info_data.value2  Value2
    Unsigned 32-bit integer
    Value2
spoolss.notify_option.count      Count
    Unsigned 32-bit integer
    Count
spoolss.notify_option.reserved1  Reserved1
    Unsigned 16-bit integer
    Reserved1
spoolss.notify_option.reserved2  Reserved2
    Unsigned 32-bit integer
    Reserved2
spoolss.notify_option.reserved3  Reserved3
    Unsigned 32-bit integer
    Reserved3
spoolss.notify_option.type       Type
    Unsigned 16-bit integer
    Type
spoolss.notify_option_data.count  Count
    Unsigned 32-bit integer
    Count
spoolss.notify_options.count     Count
    Unsigned 32-bit integer
    Count
spoolss.notify_options.flags     Flags
    Unsigned 32-bit integer
    Flags
spoolss.notify_options.version   Version
    Unsigned 32-bit integer
    Version
spoolss.notifyname               Notify name
    String
    Notify name
spoolss.oemrul                   OEM URL
    String
    OEM URL - Website of Vendor
spoolss.offered                  Offered
    Unsigned 32-bit integer
    Size of buffer offered in this request
spoolss.offset                   Offset
    Unsigned 32-bit integer
    Offset of data
spoolss.opnum                    Operation
    Unsigned 16-bit integer
    Operation
```

```
spoolss.outputfile  Output file
    String
    Output File

spoolss.padding  Padding
    Unsigned 32-bit integer
    Some padding - conveys no semantic information

spoolss.parameters  Parameters
    String
    Parameters

spoolss.portname  Port name
    String
    Port name

spoolss.previousdrivernames  Previous Driver Names
    String
    Previous Driver Names

spoolss.printer.action  Action
    Unsigned 32-bit integer
    Action

spoolss.printer.averageppm  Average PPM
    Unsigned 32-bit integer
    Average PPM

spoolss.printer.build_version  Build version
    Unsigned 16-bit integer
    Build version

spoolss.printer.c_setprinter  Csetprinter
    Unsigned 32-bit integer
    Csetprinter

spoolss.printer.changeid  Change id
    Unsigned 32-bit integer
    Change id

spoolss.printer.cjobs  CJobs
    Unsigned 32-bit integer
    CJobs

spoolss.printer.default_priority  Default Priority
    Unsigned 32-bit integer
    Default Priority

spoolss.printer.flags  Flags
    Unsigned 32-bit integer
    Flags

spoolss.printer.global_counter  Global counter
    Unsigned 32-bit integer
    Global counter

spoolss.printer.guid  GUID
    String
    GUID

spoolss.printer.jobs  Jobs
    Unsigned 32-bit integer
    Jobs
```

```
spoolss.printer.major_version  Major version
    Unsigned 16-bit integer
    Major version

spoolss.printer.printer_errors  Printer errors
    Unsigned 32-bit integer
    Printer errors

spoolss.printer.priority  Priority
    Unsigned 32-bit integer
    Priority

spoolss.printer.session_ctr  Session counter
    Unsigned 32-bit integer
    Sessopm counter

spoolss.printer.total_bytes  Total bytes
    Unsigned 32-bit integer
    Total bytes

spoolss.printer.total_jobs  Total jobs
    Unsigned 32-bit integer
    Total jobs

spoolss.printer.total_pages  Total pages
    Unsigned 32-bit integer
    Total pages

spoolss.printer.unknown11  Unknown 11
    Unsigned 32-bit integer
    Unknown 11

spoolss.printer.unknown13  Unknown 13
    Unsigned 32-bit integer
    Unknown 13

spoolss.printer.unknown14  Unknown 14
    Unsigned 32-bit integer
    Unknown 14

spoolss.printer.unknown15  Unknown 15
    Unsigned 32-bit integer
    Unknown 15

spoolss.printer.unknown16  Unknown 16
    Unsigned 32-bit integer
    Unknown 16

spoolss.printer.unknown18  Unknown 18
    Unsigned 32-bit integer
    Unknown 18

spoolss.printer.unknown20  Unknown 20
    Unsigned 32-bit integer
    Unknown 20

spoolss.printer.unknown22  Unknown 22
    Unsigned 16-bit integer
    Unknown 22

spoolss.printer.unknown23  Unknown 23
    Unsigned 16-bit integer
    Unknown 23
```

```
spoolss.printer.unknown24  Unknown 24
    Unsigned 16-bit integer
    Unknown 24

spoolss.printer.unknown25  Unknown 25
    Unsigned 16-bit integer
    Unknown 25

spoolss.printer.unknown26  Unknown 26
    Unsigned 16-bit integer
    Unknown 26

spoolss.printer.unknown27  Unknown 27
    Unsigned 16-bit integer
    Unknown 27

spoolss.printer.unknown28  Unknown 28
    Unsigned 16-bit integer
    Unknown 28

spoolss.printer.unknown29  Unknown 29
    Unsigned 16-bit integer
    Unknown 29

spoolss.printer.unknown7   Unknown 7
    Unsigned 32-bit integer
    Unknown 7

spoolss.printer.unknown8   Unknown 8
    Unsigned 32-bit integer
    Unknown 8

spoolss.printer.unknown9   Unknown 9
    Unsigned 32-bit integer
    Unknown 9

spoolss.printer_attributes  Attributes
    Unsigned 32-bit integer
    Attributes

spoolss.printer_attributes.default  Default (9x/ME only)
    Boolean
    Default

spoolss.printer_attributes.direct  Direct
    Boolean
    Direct

spoolss.printer_attributes.do_complete_first  Do complete first
    Boolean
    Do complete first

spoolss.printer_attributes.enable_bidi  Enable bidi (9x/ME only)
    Boolean
    Enable bidi

spoolss.printer_attributes.enable_devq  Enable devq
    Boolean
    Enable evq

spoolss.printer_attributes.hidden  Hidden
    Boolean
    Hidden
```

```
spoolss.printer_attributes.keep_printed_jobs  Keep printed jobs
  Boolean
  Keep printed jobs

spoolss.printer_attributes.local  Local
  Boolean
  Local

spoolss.printer_attributes.network  Network
  Boolean
  Network

spoolss.printer_attributes.published  Published
  Boolean
  Published

spoolss.printer_attributes.queued  Queued
  Boolean
  Queued

spoolss.printer_attributes.raw_only  Raw only
  Boolean
  Raw only

spoolss.printer_attributes.shared  Shared
  Boolean
  Shared

spoolss.printer_attributes.work_offline  Work offline (9x/ME only)
  Boolean
  Work offline

spoolss.printer_local  Printer local
  Unsigned 32-bit integer
  Printer local

spoolss.printer_status  Status
  Unsigned 32-bit integer
  Status

spoolss.printercomment  Printer comment
  String
  Printer comment

spoolss.printerdata  Data
  Unsigned 32-bit integer
  Data

spoolss.printerdata.data  Data
  Byte array
  Printer data

spoolss.printerdata.data.dword  DWORD data
  Unsigned 32-bit integer
  DWORD data

spoolss.printerdata.data.sz  String data
  String
  String data

spoolss.printerdata.key  Key
  String
  Printer data key
```

```
spoolss.printerdata.size  Size
    Unsigned 32-bit integer
    Printer data size

spoolss.printerdata.type  Type
    Unsigned 32-bit integer
    Printer data type

spoolss.printerdata.val_sz  SZ value
    String
    SZ value

spoolss.printerdata.value  Value
    String
    Printer data value

spoolss.printerdesc  Printer description
    String
    Printer description

spoolss.printerlocation  Printer location
    String
    Printer location

spoolss.printername  Printer name
    String
    Printer name

spoolss.printprocessor  Print processor
    String
    Print processor

spoolss.provider  Provider
    String
    Provider of Driver

spoolss.rc  Return code
    Unsigned 32-bit integer
    SPOOLSS return code

spoolss.replyopenprinter.unk0  Unknown 0
    Unsigned 32-bit integer
    Unknown 0

spoolss.replyopenprinter.unk1  Unknown 1
    Unsigned 32-bit integer
    Unknown 1

spoolss.returned  Returned
    Unsigned 32-bit integer
    Number of items returned

spoolss.rffpcnex.flags  RFFPCNEX flags
    Unsigned 32-bit integer
    RFFPCNEX flags

spoolss.rffpcnex.flags.add_driver  Add driver
    Boolean
    Add driver

spoolss.rffpcnex.flags.add_form  Add form
    Boolean
    Add form
```

```
spoolss.rffpcnex.flags.add_job    Add job
    Boolean
    Add job

spoolss.rffpcnex.flags.add_port    Add port
    Boolean
    Add port

spoolss.rffpcnex.flags.add_printer  Add printer
    Boolean
    Add printer

spoolss.rffpcnex.flags.add_processor  Add processor
    Boolean
    Add processor

spoolss.rffpcnex.flags.configure_port  Configure port
    Boolean
    Configure port

spoolss.rffpcnex.flags.delete_driver  Delete driver
    Boolean
    Delete driver

spoolss.rffpcnex.flags.delete_form    Delete form
    Boolean
    Delete form

spoolss.rffpcnex.flags.delete_job     Delete job
    Boolean
    Delete job

spoolss.rffpcnex.flags.delete_port    Delete port
    Boolean
    Delete port

spoolss.rffpcnex.flags.delete_printer  Delete printer
    Boolean
    Delete printer

spoolss.rffpcnex.flags.delete_processor  Delete processor
    Boolean
    Delete processor

spoolss.rffpcnex.flags.failed_connection_printer  Failed printer connection
    Boolean
    Failed printer connection

spoolss.rffpcnex.flags.set_driver     Set driver
    Boolean
    Set driver

spoolss.rffpcnex.flags.set_form       Set form
    Boolean
    Set form

spoolss.rffpcnex.flags.set_job        Set job
    Boolean
    Set job

spoolss.rffpcnex.flags.set_printer    Set printer
    Boolean
    Set printer
```

```
spoolss.rffpcnex.flags.timeout  Timeout
    Boolean
    Timeout

spoolss.rffpcnex.flags.write_job  Write job
    Boolean
    Write job

spoolss.rffpcnex.options  Options
    Unsigned 32-bit integer
    RFFPCNEX options

spoolss.routerreplyprinter.changeid  Change id
    Unsigned 32-bit integer
    Change id

spoolss.routerreplyprinter.condition  Condition
    Unsigned 32-bit integer
    Condition

spoolss.routerreplyprinter.unknown1  Unknown1
    Unsigned 32-bit integer
    Unknown1

spoolss.rrpcn.changehigh  Change high
    Unsigned 32-bit integer
    Change high

spoolss.rrpcn.changelow  Change low
    Unsigned 32-bit integer
    Change low

spoolss.rrpcn.unk0  Unknown 0
    Unsigned 32-bit integer
    Unknown 0

spoolss.rrpcn.unk1  Unknown 1
    Unsigned 32-bit integer
    Unknown 1

spoolss.servermajorversion  Server major version
    Unsigned 32-bit integer
    Server printer driver major version

spoolss.serverminorversion  Server minor version
    Unsigned 32-bit integer
    Server printer driver minor version

spoolss.servername  Server name
    String
    Server name

spoolss.setjob.cmd  Set job command
    Unsigned 32-bit integer
    Printer data name

spoolss.setpfile  Separator file
    String
    Separator file

spoolss.setprinter_cmd  Command
    Unsigned 32-bit integer
    Command
```

```
spoolss.sharename  Share name
    String
    Share name

spoolss.start_time  Start time
    Unsigned 32-bit integer
    Start time

spoolss.textstatus  Text status
    String
    Text status

spoolss.time.day    Day
    Unsigned 32-bit integer
    Day

spoolss.time.dow    Day of week
    Unsigned 32-bit integer
    Day of week

spoolss.time.hour   Hour
    Unsigned 32-bit integer
    Hour

spoolss.time.minute Minute
    Unsigned 32-bit integer
    Minute

spoolss.time.month  Month
    Unsigned 32-bit integer
    Month

spoolss.time.msec   Millisecond
    Unsigned 32-bit integer
    Millisecond

spoolss.time.second Second
    Unsigned 32-bit integer
    Second

spoolss.time.year   Year
    Unsigned 32-bit integer
    Year

spoolss.userlevel.build  Build
    Unsigned 32-bit integer
    Build

spoolss.userlevel.client  Client
    String
    Client

spoolss.userlevel.major  Major
    Unsigned 32-bit integer
    Major

spoolss.userlevel.minor  Minor
    Unsigned 32-bit integer
    Minor

spoolss.userlevel.processor  Processor
    Unsigned 32-bit integer
    Processor
```

```
spoolss.userlevel.size  Size
    Unsigned 32-bit integer
    Size

spoolss.userlevel.user  User
    String
    User

spoolss.username  User name
    String
    User name

spoolss.writeprinter.numwritten  Num written
    Unsigned 32-bit integer
    Number of bytes written
```

#### **Microsoft Telephony API Service (tapi)**

```
tapi.hnd  Context Handle
    Byte array
    Context handle

tapi.opnum  Operation
    Unsigned 16-bit integer

tapi.rc  Return code
    Unsigned 32-bit integer
    TAPI return code

tapi.unknown.bytes  Unknown bytes
    Byte array
    Unknown bytes. If you know what this is, contact wireshark developers.

tapi.unknown.long  Unknown long
    Unsigned 32-bit integer
    Unknown long. If you know what this is, contact wireshark developers.

tapi.unknown.string  Unknown string
    String
    Unknown string. If you know what this is, contact wireshark developers.
```

#### **Microsoft Windows Browser Protocol (browser)**

```
browser.backup.count  Backup List Requested Count
    Unsigned 8-bit integer
    Backup list requested count

browser.backup.server  Backup Server
    String
    Backup Server Name

browser.backup.token  Backup Request Token
    Unsigned 32-bit integer
    Backup requested/response token

browser.browser_to_promote  Browser to Promote
    String
    Browser to Promote

browser.command  Command
    Unsigned 8-bit integer
    Browse command opcode
```

```
browser.comment    Host Comment
    String
    Server Comment

browser.election.criteria Election Criteria
    Unsigned 32-bit integer
    Election Criteria

browser.election.desire Election Desire
    Unsigned 8-bit integer
    Election Desire

browser.election.desire.backup Backup
    Boolean
    Is this a backup server

browser.election.desire.domain_master Domain Master
    Boolean
    Is this a domain master

browser.election.desire.master Master
    Boolean
    Is this a master server

browser.election.desire.nt NT
    Boolean
    Is this a NT server

browser.election.desire.standby Standby
    Boolean
    Is this a standby server?

browser.election.desire.wins WINS
    Boolean
    Is this a WINS server

browser.election.os Election OS
    Unsigned 8-bit integer
    Election OS

browser.election.os.nts NT Server
    Boolean
    Is this a NT Server?

browser.election.os.ntw NT Workstation
    Boolean
    Is this a NT Workstation?

browser.election.os.wfw WfW
    Boolean
    Is this a WfW host?

browser.election.revision Election Revision
    Unsigned 16-bit integer
    Election Revision

browser.election.version Election Version
    Unsigned 8-bit integer
    Election Version

browser.mb_server Master Browser Server Name
    String
    BROWSE Master Browser Server Name
```

```
browser.os_major  OS Major Version
  Unsigned 8-bit integer
  Operating System Major Version

browser.os_minor  OS Minor Version
  Unsigned 8-bit integer
  Operating System Minor Version

browser.period    Update Periodicity
  Unsigned 32-bit integer
  Update Periodicity in ms

browser.proto_major  Browser Protocol Major Version
  Unsigned 8-bit integer
  Browser Protocol Major Version

browser.proto_minor  Browser Protocol Minor Version
  Unsigned 8-bit integer
  Browser Protocol Minor Version

browser.reset_cmd  ResetBrowserState Command
  Unsigned 8-bit integer
  ResetBrowserState Command

browser.reset_cmd.demote  Demote LMB
  Boolean
  Demote LMB

browser.reset_cmd.flush  Flush Browse List
  Boolean
  Flush Browse List

browser.reset_cmd.stop_lmb  Stop Being LMB
  Boolean
  Stop Being LMB

browser.response_computer_name  Response Computer Name
  String
  Response Computer Name

browser.server  Server Name
  String
  BROWSE Server Name

browser.server_type  Server Type
  Unsigned 32-bit integer
  Server Type Flags

browser.server_type.apple  Apple
  Boolean
  Is This An Apple Server ?

browser.server_type.backup_controller  Backup Controller
  Boolean
  Is This A Backup Domain Controller?

browser.server_type.browser.backup  Backup Browser
  Boolean
  Is This A Backup Browser?

browser.server_type.browser.domain_master  Domain Master Browser
  Boolean
  Is This A Domain Master Browser?
```

```
browser.server_type.browser.master  Master Browser
  Boolean
  Is This A Master Browser?
browser.server_type.browser.potential  Potential Browser
  Boolean
  Is This A Potential Browser?
browser.server_type.dialin  Dialin
  Boolean
  Is This A Dialin Server?
browser.server_type.domain_controller  Domain Controller
  Boolean
  Is This A Domain Controller?
browser.server_type.domainenum  Domain Enum
  Boolean
  Is This A Domain Enum request?
browser.server_type.local  Local
  Boolean
  Is This A Local List Only request?
browser.server_type.member  Member
  Boolean
  Is This A Domain Member Server?
browser.server_type.novell  Novell
  Boolean
  Is This A Novell Server?
browser.server_type.nts  NT Server
  Boolean
  Is This A NT Server?
browser.server_type.ntw  NT Workstation
  Boolean
  Is This A NT Workstation?
browser.server_type.osf  OSF
  Boolean
  Is This An OSF server ?
browser.server_type.print  Print
  Boolean
  Is This A Print Server?
browser.server_type.server  Server
  Boolean
  Is This A Server?
browser.server_type.sql  SQL
  Boolean
  Is This A SQL Server?
browser.server_type.time  Time Source
  Boolean
  Is This A Time Source?
browser.server_type.vms  VMS
  Boolean
  Is This A VMS Server?
```

```

browser.server_type.w95  Windows 95+
  Boolean
  Is This A Windows 95 or above server?
browser.server_type.wfw  WfW
  Boolean
  Is This A Windows For Workgroups Server?
browser.server_type.workstation  Workstation
  Boolean
  Is This A Workstation?
browser.server_type.xenix  Xenix
  Boolean
  Is This A Xenix Server?
browser.sig  Signature
  Unsigned 16-bit integer
  Signature Constant
browser.unused  Unused flags
  Unsigned 8-bit integer
  Unused/unknown flags
browser.update_count  Update Count
  Unsigned 8-bit integer
  Browse Update Count
browser.uptime  Uptime
  Unsigned 32-bit integer
  Server uptime in ms

```

#### Microsoft Windows Lanman Remote API Protocol (lanman)

```

lanman.aux_data_desc  Auxiliary Data Descriptor
  String
  LANMAN Auxiliary Data Descriptor
lanman.available_bytes  Available Bytes
  Unsigned 16-bit integer
  LANMAN Number of Available Bytes
lanman.available_count  Available Entries
  Unsigned 16-bit integer
  LANMAN Number of Available Entries
lanman.bad_pw_count  Bad Password Count
  Unsigned 16-bit integer
  LANMAN Number of incorrect passwords entered since last successful login
lanman.code_page  Code Page
  Unsigned 16-bit integer
  LANMAN Code Page
lanman.comment  Comment
  String
  LANMAN Comment
lanman.computer_name  Computer Name
  String
  LANMAN Computer Name

```

lanman.continuation\_from Continuation from message in frame  
Unsigned 32-bit integer  
This is a LANMAN continuation from the message in the frame in question

lanman.convert Convert  
Unsigned 16-bit integer  
LANMAN Convert

lanman.country\_code Country Code  
Unsigned 16-bit integer  
LANMAN Country Code

lanman.current\_time Current Date/Time  
Date/Time stamp  
LANMAN Current date and time, in seconds since 00:00:00, January 1, 1970

lanman.day Day  
Unsigned 8-bit integer  
LANMAN Current day

lanman.duration Duration of Session  
Time duration  
LANMAN Number of seconds the user was logged on

lanman.entry\_count Entry Count  
Unsigned 16-bit integer  
LANMAN Number of Entries

lanman.enumeration\_domain Enumeration Domain  
String  
LANMAN Domain in which to enumerate servers

lanman.full\_name Full Name  
String  
LANMAN Full Name

lanman.function\_code Function Code  
Unsigned 16-bit integer  
LANMAN Function Code/Command

lanman.group\_name Group Name  
String  
LANMAN Group Name

lanman.homedir Home Directory  
String  
LANMAN Home Directory

lanman.hour Hour  
Unsigned 8-bit integer  
LANMAN Current hour

lanman.hundredths Hundredths of a second  
Unsigned 8-bit integer  
LANMAN Current hundredths of a second

lanman.kickoff\_time Kickoff Date/Time  
Date/Time stamp  
LANMAN Date and time when user will be logged off

lanman.last\_entry Last Entry  
String  
LANMAN last reported entry of the enumerated servers

```
lanman.last_logoff  Last Logoff Date/Time
                    Date/Time stamp
                    LANMAN Date and time of last logoff

lanman.last_logon   Last Logon Date/Time
                    Date/Time stamp
                    LANMAN Date and time of last logon

lanman.level        Detail Level
                    Unsigned 16-bit integer
                    LANMAN Detail Level

lanman.logoff_code  Logoff Code
                    Unsigned 16-bit integer
                    LANMAN Logoff Code

lanman.logoff_time  Logoff Date/Time
                    Date/Time stamp
                    LANMAN Date and time when user should log off

lanman.logon_code   Logon Code
                    Unsigned 16-bit integer
                    LANMAN Logon Code

lanman.logon_domain Logon Domain
                    String
                    LANMAN Logon Domain

lanman.logon_hours  Logon Hours
                    Byte array
                    LANMAN Logon Hours

lanman.logon_server Logon Server
                    String
                    LANMAN Logon Server

lanman.max_storage  Max Storage
                    Unsigned 32-bit integer
                    LANMAN Max Storage

lanman.minute       Minute
                    Unsigned 8-bit integer
                    LANMAN Current minute

lanman.month        Month
                    Unsigned 8-bit integer
                    LANMAN Current month

lanman.msecs        Milliseconds
                    Unsigned 32-bit integer
                    LANMAN Milliseconds since arbitrary time in the past (typically boot time)

lanman.new_password New Password
                    Byte array
                    LANMAN New Password (encrypted)

lanman.num_logons   Number of Logons
                    Unsigned 16-bit integer
                    LANMAN Number of Logons

lanman.old_password Old Password
                    Byte array
                    LANMAN Old Password (encrypted)
```

```
lanman.operator_privileges  Operator Privileges
    Unsigned 32-bit integer
    LANMAN Operator Privileges

lanman.other_domains  Other Domains
    String
    LANMAN Other Domains

lanman.param_desc  Parameter Descriptor
    String
    LANMAN Parameter Descriptor

lanman.parameters  Parameters
    String
    LANMAN Parameters

lanman.password  Password
    String
    LANMAN Password

lanman.password_age  Password Age
    Time duration
    LANMAN Time since user last changed his/her password

lanman.password_can_change  Password Can Change
    Date/Time stamp
    LANMAN Date and time when user can change their password

lanman.password_must_change  Password Must Change
    Date/Time stamp
    LANMAN Date and time when user must change their password

lanman.privilege_level  Privilege Level
    Unsigned 16-bit integer
    LANMAN Privilege Level

lanman.recv_buf_len  Receive Buffer Length
    Unsigned 16-bit integer
    LANMAN Receive Buffer Length

lanman.reserved  Reserved
    Unsigned 32-bit integer
    LANMAN Reserved

lanman.ret_desc  Return Descriptor
    String
    LANMAN Return Descriptor

lanman.script_path  Script Path
    String
    LANMAN Pathname of user's logon script

lanman.second  Second
    Unsigned 8-bit integer
    LANMAN Current second

lanman.send_buf_len  Send Buffer Length
    Unsigned 16-bit integer
    LANMAN Send Buffer Length

lanman.server.comment  Server Comment
    String
    LANMAN Server Comment
```

```
lanman.server.major  Major Version
    Unsigned 8-bit integer
    LANMAN Server Major Version

lanman.server.minor  Minor Version
    Unsigned 8-bit integer
    LANMAN Server Minor Version

lanman.server.name   Server Name
    String
    LANMAN Name of Server

lanman.share.comment  Share Comment
    String
    LANMAN Share Comment

lanman.share.current_uses  Share Current Uses
    Unsigned 16-bit integer
    LANMAN Current connections to share

lanman.share.max_uses  Share Max Uses
    Unsigned 16-bit integer
    LANMAN Max connections allowed to share

lanman.share.name    Share Name
    String
    LANMAN Name of Share

lanman.share.password  Share Password
    String
    LANMAN Share Password

lanman.share.path     Share Path
    String
    LANMAN Share Path

lanman.share.permissions  Share Permissions
    Unsigned 16-bit integer
    LANMAN Permissions on share

lanman.share.type     Share Type
    Unsigned 16-bit integer
    LANMAN Type of Share

lanman.status         Status
    Unsigned 16-bit integer
    LANMAN Return status

lanman.timeinterval  Time Interval
    Unsigned 16-bit integer
    LANMAN .0001 second units per clock tick

lanman.tzoffset      Time Zone Offset
    Signed 16-bit integer
    LANMAN Offset of time zone from GMT, in minutes

lanman.units_per_week  Units Per Week
    Unsigned 16-bit integer
    LANMAN Units Per Week

lanman.user_comment  User Comment
    String
    LANMAN User Comment
```

```
lanman.user_name  User Name
  String
  LANMAN User Name

lanman.ustruct_size  Length of UStruct
  Unsigned 16-bit integer
  LANMAN UStruct Length

lanman.weekday  Weekday
  Unsigned 8-bit integer
  LANMAN Current day of the week

lanman.workstation_domain  Workstation Domain
  String
  LANMAN Workstation Domain

lanman.workstation_major  Workstation Major Version
  Unsigned 8-bit integer
  LANMAN Workstation Major Version

lanman.workstation_minor  Workstation Minor Version
  Unsigned 8-bit integer
  LANMAN Workstation Minor Version

lanman.workstation_name  Workstation Name
  String
  LANMAN Workstation Name

lanman.workstations  Workstations
  String
  LANMAN Workstations

lanman.year  Year
  Unsigned 16-bit integer
  LANMAN Current year
```

#### **Microsoft Windows Logon Protocol (Old) (smb\_netlogon)**

```
smb_netlogon.client_site_name  Client Site Name
  String
  SMB NETLOGON Client Site Name

smb_netlogon.command  Command
  Unsigned 8-bit integer
  SMB NETLOGON Command

smb_netlogon.computer_name  Computer Name
  String
  SMB NETLOGON Computer Name

smb_netlogon.date_time  Date/Time
  Unsigned 32-bit integer
  SMB NETLOGON Date/Time

smb_netlogon.db_count  DB Count
  Unsigned 32-bit integer
  SMB NETLOGON DB Count

smb_netlogon.db_index  Database Index
  Unsigned 32-bit integer
  SMB NETLOGON Database Index
```

```
smb_netlogon.domain.guid    Domain GUID
    Byte array
    Domain GUID

smb_netlogon.domain_dns_name  Domain DNS Name
    String
    SMB NETLOGON Domain DNS Name

smb_netlogon.domain_name    Domain Name
    String
    SMB NETLOGON Domain Name

smb_netlogon.domain_sid_size  Domain SID Size
    Unsigned 32-bit integer
    SMB NETLOGON Domain SID Size

smb_netlogon.flags.autolock  Autolock
    Boolean
    SMB NETLOGON Account Autolock

smb_netlogon.flags.enabled   Enabled
    Boolean
    SMB NETLOGON Is This Account Enabled

smb_netlogon.flags.expire    Expire
    Boolean
    SMB NETLOGON Will Account Expire

smb_netlogon.flags.homedir  Homedir
    Boolean
    SMB NETLOGON Homedir Required

smb_netlogon.flags.interdomain  Interdomain Trust
    Boolean
    SMB NETLOGON Inter-domain Trust Account

smb_netlogon.flags.mns      MNS User
    Boolean
    SMB NETLOGON MNS User Account

smb_netlogon.flags.normal   Normal User
    Boolean
    SMB NETLOGON Normal User Account

smb_netlogon.flags.password Password
    Boolean
    SMB NETLOGON Password Required

smb_netlogon.flags.server   Server Trust
    Boolean
    SMB NETLOGON Server Trust Account

smb_netlogon.flags.temp_dup  Temp Duplicate User
    Boolean
    SMB NETLOGON Temp Duplicate User Account

smb_netlogon.flags.workstation  Workstation Trust
    Boolean
    SMB NETLOGON Workstation Trust Account

smb_netlogon.forest_dns_name  Forest DNS Name
    String
    SMB NETLOGON Forest DNS Name
```

```
smb_netlogon.large_serial  Large Serial Number
    Unsigned 64-bit integer
    SMB NETLOGON Large Serial Number

smb_netlogon.lm_token      LM Token
    Unsigned 16-bit integer
    SMB NETLOGON LM Token

smb_netlogon.lmnt_token    LMNT Token
    Unsigned 16-bit integer
    SMB NETLOGON LMNT Token

smb_netlogon.low_serial    Low Serial Number
    Unsigned 32-bit integer
    SMB NETLOGON Low Serial Number

smb_netlogon.mailslot_name Mailslot Name
    String
    SMB NETLOGON Mailslot Name

smb_netlogon.major_version Workstation Major Version
    Unsigned 8-bit integer
    SMB NETLOGON Workstation Major Version

smb_netlogon.minor_version Workstation Minor Version
    Unsigned 8-bit integer
    SMB NETLOGON Workstation Minor Version

smb_netlogon.nt_date_time  NT Date/Time
    Date/Time stamp
    SMB NETLOGON NT Date/Time

smb_netlogon.nt_version    NT Version
    Unsigned 32-bit integer
    SMB NETLOGON NT Version

smb_netlogon.os_version    Workstation OS Version
    Unsigned 8-bit integer
    SMB NETLOGON Workstation OS Version

smb_netlogon.pdc_name      PDC Name
    String
    SMB NETLOGON PDC Name

smb_netlogon.pulse         Pulse
    Unsigned 32-bit integer
    SMB NETLOGON Pulse

smb_netlogon.random        Random
    Unsigned 32-bit integer
    SMB NETLOGON Random

smb_netlogon.request_count Request Count
    Unsigned 16-bit integer
    SMB NETLOGON Request Count

smb_netlogon.script_name   Script Name
    String
    SMB NETLOGON Script Name

smb_netlogon.server_dns_name Server DNS Name
    String
    SMB NETLOGON Server DNS Name
```

```
smb_netlogon.server_ip  Server IP
    IPv4 address
    Server IP Address

smb_netlogon.server_name  Server Name
    String
    SMB NETLOGON Server Name

smb_netlogon.server_site_name  Server Site Name
    String
    SMB NETLOGON Server Site Name

smb_netlogon.unicode_computer_name  Unicode Computer Name
    String
    SMB NETLOGON Unicode Computer Name

smb_netlogon.unicode_pdc_name  Unicode PDC Name
    String
    SMB NETLOGON Unicode PDC Name

smb_netlogon.unknown  Unknown
    Unsigned 8-bit integer
    Unknown

smb_netlogon.update  Update Type
    Unsigned 16-bit integer
    SMB NETLOGON Update Type

smb_netlogon.user_name  User Name
    String
    SMB NETLOGON User Name
```

**Mobile IP (mip)**

```
mip.ack.i  Inform
    Boolean
    Inform Mobile Node

mip.ack.reserved  Reserved
    Unsigned 8-bit integer

mip.ack.reserved2  Reserved
    Unsigned 16-bit integer

mip.auth.auth  Authenticator
    Byte array
    Authenticator.

mip.auth.spi  SPI
    Unsigned 32-bit integer
    Authentication Header Security Parameter Index.

mip.b  Broadcast Datagrams
    Boolean
    Broadcast Datagrams requested

mip.coa  Care of Address
    IPv4 address
    Care of Address.

mip.code  Reply Code
    Unsigned 8-bit integer
    Mobile IP Reply code.
```

```
mip.d    Co-located Care-of Address
         Boolean
         MN using Co-located Care-of address
mip.ext.auth.subtype  Gen Auth Ext SubType
         Unsigned 8-bit integer
         Mobile IP Auth Extension Sub Type.
mip.ext.dynha.ha     DynHA Home Agent
         IPv4 address
         Dynamic Home Agent IP Address
mip.ext.dynha.subtype  DynHA Ext SubType
         Unsigned 8-bit integer
         Dynamic HA Extension Sub-type
mip.ext.len     Extension Length
         Unsigned 16-bit integer
         Mobile IP Extension Length.
mip.ext.msgstr.subtype  MsgStr Ext SubType
         Unsigned 8-bit integer
         Message String Extension Sub-type
mip.ext.msgstr.text  MsgStr Text
         String
         Message String Extension Text
mip.ext.rev.flags  Rev Ext Flags
         Unsigned 16-bit integer
         Revocation Support Extension Flags
mip.ext.rev.i     'I' bit Support
         Boolean
         Agent surevidpports Inform bit in Revocation
mip.ext.rev.reserved  Reserved
         Unsigned 16-bit integer
mip.ext.rev.tstamp  Timestamp
         Unsigned 32-bit integer
         Revocation Timestamp of Sending Agent
mip.ext.type     Extension Type
         Unsigned 8-bit integer
         Mobile IP Extension Type.
mip.ext.utrp.code  UDP TunRep Code
         Unsigned 8-bit integer
         UDP Tunnel Reply Code
mip.ext.utrp.f     Rep Forced
         Boolean
         HA wants to Force UDP Tunneling
mip.ext.utrp.flags  UDP TunRep Ext Flags
         Unsigned 16-bit integer
         UDP Tunnel Request Extension Flags
mip.ext.utrp.keepalive  Keepalive Interval
         Unsigned 16-bit integer
         NAT Keepalive Interval
```

```
mip.ext.utrp.reserved  Reserved
    Unsigned 16-bit integer
mip.ext.utrp.subtype  UDP TunRep Ext SubType
    Unsigned 8-bit integer
    UDP Tunnel Reply Extension Sub-type
mip.ext.utrq.encaptype  UDP Encap Type
    Unsigned 8-bit integer
    UDP Encapsulation Type
mip.ext.utrq.f  Req Forced
    Boolean
    MN wants to Force UDP Tunneling
mip.ext.utrq.flags  UDP TunReq Ext Flags
    Unsigned 8-bit integer
    UDP Tunnel Request Extension Flags
mip.ext.utrq.r  FA Registration Required
    Boolean
    Registration through FA Required
mip.ext.utrq.reserved1  Reserved 1
    Unsigned 8-bit integer
mip.ext.utrq.reserved2  Reserved 2
    Unsigned 8-bit integer
mip.ext.utrq.reserved3  Reserved 3
    Unsigned 16-bit integer
mip.ext.utrq.subtype  UDP TunReq Ext SubType
    Unsigned 8-bit integer
    UDP Tunnel Request Extension Sub-type
mip.extension  Extension
    Byte array
    Extension
mip.flags  Flags
    Unsigned 8-bit integer
mip.g  GRE
    Boolean
    MN wants GRE encapsulation
mip.haaddr  Home Agent
    IPv4 address
    Home agent IP Address.
mip.homeaddr  Home Address
    IPv4 address
    Mobile Node's home address.
mip.ident  Identification
    Byte array
    MN Identification.
mip.life  Lifetime
    Unsigned 16-bit integer
    Mobile IP Lifetime.
```

```
mip.m Minimal Encapsulation
  Boolean
  MN wants Minimal encapsulation

mip.nai NAI
  String
  NAI

mip.nattt.nexthdr NATTT NextHeader
  Unsigned 8-bit integer
  NAT Traversal Tunnel Next Header.

mip.nattt.reserved Reserved
  Unsigned 16-bit integer

mip.rev.a Home Agent
  Boolean
  Revocation sent by Home Agent

mip.rev.fda Foreign Domain Address
  IPv4 address
  Revocation Foreign Domain IP Address

mip.rev.hda Home Domain Address
  IPv4 address
  Revocation Home Domain IP Address

mip.rev.i Inform
  Boolean
  Inform Mobile Node

mip.rev.reserved Reserved
  Unsigned 8-bit integer

mip.rev.reserved2 Reserved
  Unsigned 16-bit integer

mip.revid Revocation Identifier
  Unsigned 32-bit integer
  Revocation Identifier of Initiating Agent

mip.s Simultaneous Bindings
  Boolean
  Simultaneous Bindings Allowed

mip.t Reverse Tunneling
  Boolean
  Reverse tunneling requested

mip.type Message Type
  Unsigned 8-bit integer
  Mobile IP Message type.

mip.v Van Jacobson
  Boolean
  Van Jacobson

mip.x Reserved
  Boolean
  Reserved
```

    Unsigned 8-bit integer
    Type

netsync.command  Command
    Unsigned 8-bit integer
    Command

netsync.data  Data
    Byte array
    Data

netsync.size  Size
    Unsigned 32-bit integer
    Size

netsync.version  Version
    Unsigned 8-bit integer
    Version
```

**Mount Service (mount)**

```
mount.dump.directory  Directory
    String
    Directory

mount.dump.entry  Mount List Entry
    No value
    Mount List Entry

mount.dump.hostname  Hostname
    String
    Hostname

mount.export.directory  Directory
    String
    Directory

mount.export.entry  Export List Entry
    No value
    Export List Entry

mount.export.group  Group
    String
    Group

mount.export.groups  Groups
    No value
    Groups

mount.export.has_options  Has options
    Unsigned 32-bit integer
    Has options
```

```
mount.export.options  Options
    String
    Options

mount.flavor  Flavor
    Unsigned 32-bit integer
    Flavor

mount.flavors  Flavors
    Unsigned 32-bit integer
    Flavors

mount.path  Path
    String
    Path

mount.pathconf.link_max  Maximum number of links to a file
    Unsigned 32-bit integer
    Maximum number of links allowed to a file

mount.pathconf.mask  Reply error/status bits
    Unsigned 16-bit integer
    Bit mask with error and status bits

mount.pathconf.mask.chown_restricted  CHOWN_RESTRICTED
    Boolean

mount.pathconf.mask.error_all  ERROR_ALL
    Boolean

mount.pathconf.mask.error_link_max  ERROR_LINK_MAX
    Boolean

mount.pathconf.mask.error_max_canon  ERROR_MAX_CANON
    Boolean

mount.pathconf.mask.error_max_input  ERROR_MAX_INPUT
    Boolean

mount.pathconf.mask.error_name_max  ERROR_NAME_MAX
    Boolean

mount.pathconf.mask.error_path_max  ERROR_PATH_MAX
    Boolean

mount.pathconf.mask.error_pipe_buf  ERROR_PIPE_BUF
    Boolean

mount.pathconf.mask.error_vdisable  ERROR_VDISABLE
    Boolean

mount.pathconf.mask.no_trunc  NO_TRUNC
    Boolean

mount.pathconf.max_canon  Maximum terminal input line length
    Unsigned 16-bit integer
    Max tty input line length

mount.pathconf.max_input  Terminal input buffer size
    Unsigned 16-bit integer
    Terminal input buffer size
```

mount.pathconf.name\_max Maximum file name length  
Unsigned 16-bit integer  
Maximum file name length

mount.pathconf.path\_max Maximum path name length  
Unsigned 16-bit integer  
Maximum path name length

mount.pathconf.pipe\_buf Pipe buffer size  
Unsigned 16-bit integer  
Maximum amount of data that can be written atomically to a pipe

mount.pathconf.vdisable\_char VDISABLE character  
Unsigned 8-bit integer  
Character value to disable a terminal special character

mount.procedure\_sgi\_v1 SGI V1 procedure  
Unsigned 32-bit integer  
SGI V1 Procedure

mount.procedure\_v1 V1 Procedure  
Unsigned 32-bit integer  
V1 Procedure

mount.procedure\_v2 V2 Procedure  
Unsigned 32-bit integer  
V2 Procedure

mount.procedure\_v3 V3 Procedure  
Unsigned 32-bit integer  
V3 Procedure

mount.status Status  
Unsigned 32-bit integer  
Status

mount.statvfs.f\_basetype Type  
String  
File system type

mount.statvfs.f\_bavail Blocks Available  
Unsigned 32-bit integer  
Available fragment sized blocks

mount.statvfs.f\_bfree Blocks Free  
Unsigned 32-bit integer  
Free fragment sized blocks

mount.statvfs.f\_blocks Blocks  
Unsigned 32-bit integer  
Total fragment sized blocks

mount.statvfs.f\_bsize Block size  
Unsigned 32-bit integer  
File system block size

mount.statvfs.f\_favail Files Available  
Unsigned 32-bit integer  
Available files/inodes

mount.statvfs.f\_ffree Files Free  
Unsigned 32-bit integer  
Free files/inodes

```

mount.statvfs.f_files  Files
    Unsigned 32-bit integer
    Total files/inodes

mount.statvfs.f_flag  Flags
    Unsigned 32-bit integer
    Flags bit-mask

mount.statvfs.f_flag.st_grpid  ST_GRPID
    Boolean

mount.statvfs.f_flag.st_local  ST_LOCAL
    Boolean

mount.statvfs.f_flag.st_nodev  ST_NODEV
    Boolean

mount.statvfs.f_flag.st_nosuid  ST_NOSUID
    Boolean

mount.statvfs.f_flag.st_notrunc  ST_NOTRUNC
    Boolean

mount.statvfs.f_flag.st_ronly  ST_RDONLY
    Boolean

mount.statvfs.f_frsize  Fragment size
    Unsigned 32-bit integer
    File system fragment size

mount.statvfs.f_fsid  File system ID
    Unsigned 32-bit integer
    File system identifier

mount.statvfs.f_fstr  File system specific string
    Byte array
    File system specific string

mount.statvfs.f_namemax  Maximum file name length
    Unsigned 32-bit integer
    Maximum file name length

```

**Multicast Router DIScovery protocol (mrdisc)**

mrdisc.adv\_int Advertising Interval  
Unsigned 8-bit integer  
MRDISC Advertising Interval in seconds

mrdisc.checksum Checksum  
Unsigned 16-bit integer  
MRDISC Checksum

mrdisc.checksum\_bad Bad Checksum  
Boolean  
Bad MRDISC Checksum

mrdisc.num\_opts Number Of Options  
Unsigned 16-bit integer  
MRDISC Number Of Options

mrdisc.opt\_len Length  
Unsigned 8-bit integer  
MRDISC Option Length

mrdisc.option Option  
Unsigned 8-bit integer  
MRDISC Option Type

mrdisc.option\_data Data  
Byte array  
MRDISC Unknown Option Data

mrdisc.options Options  
No value  
MRDISC Options

mrdisc.query\_int Query Interval  
Unsigned 16-bit integer  
MRDISC Query Interval

mrdisc.rob\_var Robustness Variable  
Unsigned 16-bit integer  
MRDISC Robustness Variable

mrdisc.type Type  
Unsigned 8-bit integer  
MRDISC Packet Type

**Multicast Source Discovery Protocol (msdp)**

msdp.length Length  
Unsigned 16-bit integer  
MSDP TLV Length

msdp.not.entry\_count Entry Count  
Unsigned 24-bit integer  
Entry Count in Notification messages

msdp.not.error Error Code  
Unsigned 8-bit integer  
Indicates the type of Notification

msdp.not.error\_sub Error subcode  
Unsigned 8-bit integer  
Error subcode

msdp.not.ipv4 IPv4 address  
IPv4 address  
Group/RP/Source address in Notification messages

msdp.not.o Open-bit  
Unsigned 8-bit integer  
If clear, the connection will be closed

msdp.not.res Reserved  
Unsigned 24-bit integer  
Reserved field in Notification messages

msdp.not.sprefix\_len Sprefix len  
Unsigned 8-bit integer  
Source prefix length in Notification messages

msdp.sa.entry\_count Entry Count  
Unsigned 8-bit integer  
MSDP SA Entry Count

msdp.sa.group\_addr Group Address  
IPv4 address  
The group address the active source has sent data to

msdp.sa.reserved Reserved  
Unsigned 24-bit integer  
Transmitted as zeros and ignored by a receiver

msdp.sa.rp\_addr RP Address  
IPv4 address  
Active source's RP address

msdp.sa.sprefix\_len Sprefix len  
Unsigned 8-bit integer  
The route prefix length associated with source address

msdp.sa.src\_addr Source Address  
IPv4 address  
The IP address of the active source

msdp.sa\_req.group\_addr Group Address  
IPv4 address  
The group address the MSDP peer is requesting

msdp.sa\_req.res Reserved  
Unsigned 8-bit integer  
Transmitted as zeros and ignored by a receiver

msdp.type Type  
Unsigned 8-bit integer  
MSDP TLV type

              Byte array
mikey.key.data.len  Key len
              Unsigned 16-bit integer
mikey.key.kv  KV
              Unsigned 8-bit integer
mikey.key.kv.from  Valid from
              Byte array
mikey.key.kv.from.len  Valid from len
              Unsigned 8-bit integer
mikey.key.kv.spi  Valid SPI
              Byte array
mikey.key.kv.spi.len  Valid SPI len
              Unsigned 8-bit integer
mikey.key.kv.to  Valid to
              Byte array
mikey.key.kv.to.len  Valid to len
              Unsigned 8-bit integer
mikey.key.salt  Salt key
              Byte array
mikey.key.salt.len  Salt key len
              Unsigned 16-bit integer
mikey.key.type  Type
              Unsigned 8-bit integer
mikey.next_payload  Next Payload
              Unsigned 8-bit integer
```

```
mikey.payload  Payload
  String
mikey.pke.c    C
  Unsigned 16-bit integer
mikey.pke.data Data
  Byte array
mikey.pke.len  Data len
  Unsigned 16-bit integer
mikey.prf_func PRF func
  Unsigned 8-bit integer
mikey.rand    RAND
  No value
mikey.rand.data RAND
  Byte array
mikey.rand.len RAND len
  Unsigned 8-bit integer
mikey.sign    Signature (SIGN)
  No value
mikey.sign.data Signature
  Byte array
mikey.sign.len Signature len
  Unsigned 16-bit integer
mikey.sign.type Signature type
  Unsigned 16-bit integer
mikey.sp      Security Policy (SP)
  No value
mikey.sp.auth_alg Authentication algorithm
  Unsigned 8-bit integer
mikey.sp.auth_key_len Session Auth. key length
  Unsigned 8-bit integer
mikey.sp.auth_tag_len Authentication tag length
  Unsigned 8-bit integer
mikey.sp.encr_alg Encryption algorithm
  Unsigned 8-bit integer
mikey.sp.encr_len Session Encr. key length
  Unsigned 8-bit integer
mikey.sp.fec  Sender's FEC order
  Unsigned 8-bit integer
mikey.sp.kd_rate Key derivation rate
  Unsigned 8-bit integer
mikey.sp.no   Policy No
  Unsigned 8-bit integer
mikey.sp.param Policy param
  Byte array
```

```
mikey.sp.param.len  Length
                    Unsigned 8-bit integer
mikey.sp.param.type  Type
                    Unsigned 8-bit integer
mikey.sp.param_len  Policy param length
                    Unsigned 16-bit integer
mikey.sp.patam.value  Value
                    Byte array
mikey.sp.prf  SRTP Pseudo Random Function
                    Unsigned 8-bit integer
mikey.sp.proto_type  Protocol type
                    Unsigned 8-bit integer
mikey.sp.salt_len  Session Salt key length
                    Unsigned 8-bit integer
mikey.sp.srtcp_encr  SRTCP encryption
                    Unsigned 8-bit integer
mikey.sp.srtcp_auth  SRTP authentication
                    Unsigned 8-bit integer
mikey.sp.srtcp_encr  SRTP encryption
                    Unsigned 8-bit integer
mikey.sp.srtcp_prefix  SRTP prefix length
                    Unsigned 8-bit integer
mikey.srtcp_id  SRTP ID
                    No value
mikey.srtcp_id.policy_no  Policy No
                    Unsigned 8-bit integer
mikey.srtcp_id.roc  ROC
                    Unsigned 32-bit integer
mikey.srtcp_id.ssrc  SSRC
                    Unsigned 32-bit integer
mikey.t  Timestamp (T)
                    No value
mikey.t.ntp  NTP timestamp
                    String
mikey.t.ts_type  TS type
                    Unsigned 8-bit integer
mikey.type  Data Type
                    Unsigned 8-bit integer
mikey.v  Ver msg (V)
                    No value
mikey.v.auth_alg  Auth alg
                    Unsigned 8-bit integer
mikey.v.ver_data  Ver data
                    Byte array
```

mikey.version Version  
Unsigned 8-bit integer

### **Multiprotocol Label Switching Echo (mpls-echo)**

mpls\_echo.flag\_sbz Reserved  
Unsigned 16-bit integer  
MPLS ECHO Reserved Flags

mpls\_echo.flag\_v Validate FEC Stack  
Boolean  
MPLS ECHO Validate FEC Stack Flag

mpls\_echo.flags Global Flags  
Unsigned 16-bit integer  
MPLS ECHO Global Flags

mpls\_echo.mbz MBZ  
Unsigned 16-bit integer  
MPLS ECHO Must be Zero

mpls\_echo.msg\_type Message Type  
Unsigned 8-bit integer  
MPLS ECHO Message Type

mpls\_echo.reply\_mode Reply Mode  
Unsigned 8-bit integer  
MPLS ECHO Reply Mode

mpls\_echo.return\_code Return Code  
Unsigned 8-bit integer  
MPLS ECHO Return Code

mpls\_echo.return\_subcode Return Subcode  
Unsigned 8-bit integer  
MPLS ECHO Return Subcode

mpls\_echo.sender\_handle Sender's Handle  
Unsigned 32-bit integer  
MPLS ECHO Sender's Handle

mpls\_echo.sequence Sequence Number  
Unsigned 32-bit integer  
MPLS ECHO Sequence Number

mpls\_echo.timestamp\_rec Timestamp Received  
Byte array  
MPLS ECHO Timestamp Received

mpls\_echo.timestamp\_sent Timestamp Sent  
Byte array  
MPLS ECHO Timestamp Sent

mpls\_echo.tlv.ds\_map.addr\_type Address Type  
Unsigned 8-bit integer  
MPLS ECHO TLV Downstream Map Address Type

mpls\_echo.tlv.ds\_map.depth Depth Limit  
Unsigned 8-bit integer  
MPLS ECHO TLV Downstream Map Depth Limit

```
mpls_echo.tlv.ds_map.ds_ip  Downstream IP Address
    IPv4 address
    MPLS ECHO TLV Downstream Map IP Address
mpls_echo.tlv.ds_map.ds_ipv6  Downstream IPv6 Address
    IPv6 address
    MPLS ECHO TLV Downstream Map IPv6 Address
mpls_echo.tlv.ds_map.flag_i  Interface and Label Stack Request
    Boolean
    MPLS ECHO TLV Downstream Map I-Flag
mpls_echo.tlv.ds_map.flag_n  Treat as Non-IP Packet
    Boolean
    MPLS ECHO TLV Downstream Map N-Flag
mpls_echo.tlv.ds_map.flag_res  MBZ
    Unsigned 8-bit integer
    MPLS ECHO TLV Downstream Map Reserved Flags
mpls_echo.tlv.ds_map.hash_type  Multipath Type
    Unsigned 8-bit integer
    MPLS ECHO TLV Downstream Map Multipath Type
mpls_echo.tlv.ds_map.if_index  Upstream Interface Index
    Unsigned 32-bit integer
    MPLS ECHO TLV Downstream Map Interface Index
mpls_echo.tlv.ds_map.int_ip  Downstream Interface Address
    IPv4 address
    MPLS ECHO TLV Downstream Map Interface Address
mpls_echo.tlv.ds_map.int_ipv6  Downstream Interface IPv6 Address
    IPv6 address
    MPLS ECHO TLV Downstream Map Interface IPv6 Address
mpls_echo.tlv.ds_map.mp_bos  Downstream BOS
    Unsigned 8-bit integer
    MPLS ECHO TLV Downstream Map Downstream BOS
mpls_echo.tlv.ds_map.mp_exp  Downstream Experimental
    Unsigned 8-bit integer
    MPLS ECHO TLV Downstream Map Downstream Experimental
mpls_echo.tlv.ds_map.mp_label  Downstream Label
    Unsigned 24-bit integer
    MPLS ECHO TLV Downstream Map Downstream Label
mpls_echo.tlv.ds_map.mp_proto  Downstream Protocol
    Unsigned 8-bit integer
    MPLS ECHO TLV Downstream Map Downstream Protocol
mpls_echo.tlv.ds_map.mtu  MTU
    Unsigned 16-bit integer
    MPLS ECHO TLV Downstream Map MTU
mpls_echo.tlv.ds_map.multi_len  Multipath Length
    Unsigned 16-bit integer
    MPLS ECHO TLV Downstream Map Multipath Length
mpls_echo.tlv.ds_map.res  DS Flags
    Unsigned 8-bit integer
    MPLS ECHO TLV Downstream Map DS Flags
```

```
mpls_echo.tlv.ds_map_mp.ip  IP Address
    IPv4 address
    MPLS ECHO TLV Downstream Map Multipath IP Address
mpls_echo.tlv.ds_map_mp.ip_high  IP Address High
    IPv4 address
    MPLS ECHO TLV Downstream Map Multipath High IP Address
mpls_echo.tlv.ds_map_mp.ip_low  IP Address Low
    IPv4 address
    MPLS ECHO TLV Downstream Map Multipath Low IP Address
mpls_echo.tlv.ds_map_mp.mask  Mask
    Byte array
    MPLS ECHO TLV Downstream Map Multipath Mask
mpls_echo.tlv.ds_map_mp.value  Multipath Value
    Byte array
    MPLS ECHO TLV Multipath Value
mpls_echo.tlv.errorred.type  Errored TLV Type
    Unsigned 16-bit integer
    MPLS ECHO TLV Errored TLV Type
mpls_echo.tlv.fec.bgp_ipv4  IPv4 Prefix
    IPv4 address
    MPLS ECHO TLV FEC Stack BGP IPv4
mpls_echo.tlv.fec.bgp_len  Prefix Length
    Unsigned 8-bit integer
    MPLS ECHO TLV FEC Stack BGP Prefix Length
mpls_echo.tlv.fec.bgp_nh  BGP Next Hop
    IPv4 address
    MPLS ECHO TLV FEC Stack BGP Next Hop
mpls_echo.tlv.fec.gen_ipv4  IPv4 Prefix
    IPv4 address
    MPLS ECHO TLV FEC Stack Generic IPv4
mpls_echo.tlv.fec.gen_ipv4_mask  Prefix Length
    Unsigned 8-bit integer
    MPLS ECHO TLV FEC Stack Generic IPv4 Prefix Length
mpls_echo.tlv.fec.gen_ipv6  IPv6 Prefix
    IPv6 address
    MPLS ECHO TLV FEC Stack Generic IPv6
mpls_echo.tlv.fec.gen_ipv6_mask  Prefix Length
    Unsigned 8-bit integer
    MPLS ECHO TLV FEC Stack Generic IPv6 Prefix Length
mpls_echo.tlv.fec.l2cid_encap  Encapsulation
    Unsigned 16-bit integer
    MPLS ECHO TLV FEC Stack L2CID Encapsulation
mpls_echo.tlv.fec.l2cid_mbz  MBZ
    Unsigned 16-bit integer
    MPLS ECHO TLV FEC Stack L2CID MBZ
mpls_echo.tlv.fec.l2cid_remote  Remote PE Address
    IPv4 address
    MPLS ECHO TLV FEC Stack L2CID Remote
```

```
mpls_echo.tlv.fec.l2cid_sender  Sender's PE Address
    IPv4 address
    MPLS ECHO TLV FEC Stack L2CID Sender

mpls_echo.tlv.fec.l2cid_vcid  VC ID
    Unsigned 32-bit integer
    MPLS ECHO TLV FEC Stack L2CID VCID

mpls_echo.tlv.fec.ldp_ipv4  IPv4 Prefix
    IPv4 address
    MPLS ECHO TLV FEC Stack LDP IPv4

mpls_echo.tlv.fec.ldp_ipv4_mask  Prefix Length
    Unsigned 8-bit integer
    MPLS ECHO TLV FEC Stack LDP IPv4 Prefix Length

mpls_echo.tlv.fec.ldp_ipv6  IPv6 Prefix
    IPv6 address
    MPLS ECHO TLV FEC Stack LDP IPv6

mpls_echo.tlv.fec.ldp_ipv6_mask  Prefix Length
    Unsigned 8-bit integer
    MPLS ECHO TLV FEC Stack LDP IPv6 Prefix Length

mpls_echo.tlv.fec.len  Length
    Unsigned 16-bit integer
    MPLS ECHO TLV FEC Stack Length

mpls_echo.tlv.fec.nil_label  Label
    Unsigned 24-bit integer
    MPLS ECHO TLV FEC Stack NIL Label

mpls_echo.tlv.fec.rsvp_ip_lsp_id  LSP ID
    Unsigned 16-bit integer
    MPLS ECHO TLV FEC Stack RSVP LSP ID

mpls_echo.tlv.fec.rsvp_ip_mbz1  Must Be Zero
    Unsigned 16-bit integer
    MPLS ECHO TLV FEC Stack RSVP MBZ

mpls_echo.tlv.fec.rsvp_ip_mbz2  Must Be Zero
    Unsigned 16-bit integer
    MPLS ECHO TLV FEC Stack RSVP MBZ

mpls_echo.tlv.fec.rsvp_ip_tun_id  Tunnel ID
    Unsigned 16-bit integer
    MPLS ECHO TLV FEC Stack RSVP Tunnel ID

mpls_echo.tlv.fec.rsvp_ipv4_ep  IPv4 Tunnel endpoint address
    IPv4 address
    MPLS ECHO TLV FEC Stack RSVP IPv4 Tunnel Endpoint Address

mpls_echo.tlv.fec.rsvp_ipv4_ext_tun_id  Extended Tunnel ID
    Unsigned 32-bit integer
    MPLS ECHO TLV FEC Stack RSVP IPv4 Extended Tunnel ID

mpls_echo.tlv.fec.rsvp_ipv4_sender  IPv4 Tunnel sender address
    IPv4 address
    MPLS ECHO TLV FEC Stack RSVP IPv4 Sender

mpls_echo.tlv.fec.rsvp_ipv6_ep  IPv6 Tunnel endpoint address
    IPv6 address
    MPLS ECHO TLV FEC Stack RSVP IPv6 Tunnel Endpoint Address
```

```
mpls_echo.tlv.fec.rsvp_ipv6_ext_tun_id  Extended Tunnel ID
    Byte array
    MPLS ECHO TLV FEC Stack RSVP IPv6 Extended Tunnel ID
mpls_echo.tlv.fec.rsvp_ipv6_sender  IPv6 Tunnel sender address
    IPv6 address
    MPLS ECHO TLV FEC Stack RSVP IPv4 Sender
mpls_echo.tlv.fec.type  Type
    Unsigned 16-bit integer
    MPLS ECHO TLV FEC Stack Type
mpls_echo.tlv.fec.value  Value
    Byte array
    MPLS ECHO TLV FEC Stack Value
mpls_echo.tlv.ilso_ipv4.addr  Downstream IPv4 Address
    IPv4 address
    MPLS ECHO TLV Interface and Label Stack Address
mpls_echo.tlv.ilso_ipv4.bos  BOS
    Unsigned 8-bit integer
    MPLS ECHO TLV Interface and Label Stack BOS
mpls_echo.tlv.ilso_ipv4.exp  Exp
    Unsigned 8-bit integer
    MPLS ECHO TLV Interface and Label Stack Exp
mpls_echo.tlv.ilso_ipv4.int_addr  Downstream Interface Address
    IPv4 address
    MPLS ECHO TLV Interface and Label Stack Address
mpls_echo.tlv.ilso_ipv4.label  Label
    Unsigned 24-bit integer
    MPLS ECHO TLV Interface and Label Stack Label
mpls_echo.tlv.ilso_ipv4.ttl  TTL
    Unsigned 8-bit integer
    MPLS ECHO TLV Interface and Label Stack TTL
mpls_echo.tlv.ilso_ipv6.addr  Downstream IPv6 Address
    IPv6 address
    MPLS ECHO TLV Interface and Label Stack Address
mpls_echo.tlv.ilso_ipv6.int_addr  Downstream Interface Address
    IPv6 address
    MPLS ECHO TLV Interface and Label Stack Address
mpls_echo.tlv.len  Length
    Unsigned 16-bit integer
    MPLS ECHO TLV Length
mpls_echo.tlv.pad_action  Pad Action
    Unsigned 8-bit integer
    MPLS ECHO Pad TLV Action
mpls_echo.tlv.pad_padding  Padding
    Byte array
    MPLS ECHO Pad TLV Padding
mpls_echo.tlv.reply.tos  Reply-TOS Byte
    Unsigned 8-bit integer
    MPLS ECHO TLV Reply-TOS Byte
```

```

mpls_echo.tlv.reply.tos.mbz  MBZ
    Unsigned 24-bit integer
    MPLS ECHO TLV Reply-TOS MBZ

mpls_echo.tlv.rto.ipv4  Reply-to IPv4 Address
    IPv4 address
    MPLS ECHO TLV IPv4 Reply-To Object

mpls_echo.tlv.rto.ipv6  Reply-to IPv6 Address
    IPv6 address
    MPLS ECHO TLV IPv6 Reply-To Object

mpls_echo.tlv.type  Type
    Unsigned 16-bit integer
    MPLS ECHO TLV Type

mpls_echo.tlv.value  Value
    Byte array
    MPLS ECHO TLV Value

mpls_echo.tlv.vendor_id  Vendor Id
    Unsigned 32-bit integer
    MPLS ECHO Vendor Id

mpls_echo.version  Version
    Unsigned 16-bit integer
    MPLS ECHO Version Number

```

### MySQL Protocol (mysql)

```

mysql.affected_rows  Affected Rows
    Unsigned 64-bit integer
    Affected Rows

mysql.caps  Caps
    Unsigned 16-bit integer
    MySQL Capabilities

mysql.caps.cd  Connect With Database
    Boolean

mysql.caps.cp  Can use compression protocol
    Boolean

mysql.caps.cu  Speaks 4.1 protocol (new flag)
    Boolean

mysql.caps.fr  Found Rows
    Boolean

mysql.caps.ia  Interactive Client
    Boolean

mysql.caps.ii  Ignore sigpipes
    Boolean

mysql.caps.is  Ignore Spaces before '('
    Boolean

mysql.caps.lf  Long Column Flags
    Boolean

mysql.caps.li  Can Use LOAD DATA LOCAL
    Boolean

```

```
mysql.caps.lp  Long Password
               Boolean
mysql.caps.mr  Supports multiple results
               Boolean
mysql.caps.ms  Supports multiple statements
               Boolean
mysql.caps.ns  Dont Allow database.table.column
               Boolean
mysql.caps.ob  ODBC Client
               Boolean
mysql.caps.rs  Speaks 4.1 protocol (old flag)
               Boolean
mysql.caps.sc  Can do 4.1 authentication
               Boolean
mysql.caps.sl  Switch to SSL after handshake
               Boolean
mysql.caps.ta  Knows about transactions
               Boolean
mysql.charset  Charset
               Unsigned 8-bit integer
               MySQL Charset
mysql.eof     EOF
               Unsigned 8-bit integer
               EOF
mysql.error.message  Error message
               String
               Error string in case of MySQL error message
mysql.error_code  Error Code
               Unsigned 16-bit integer
               Error Code
mysql.exec_flags  Flags (unused)
               Unsigned 8-bit integer
               Flags (unused)
mysql.exec_iter  Iterations (unused)
               Unsigned 32-bit integer
               Iterations (unused)
mysql.extcaps  Ext. Caps
               Unsigned 16-bit integer
               MySQL Extended Capabilities
mysql.extra  Extra data
               Unsigned 64-bit integer
               Extra data
mysql.insert_id  Last INSERT ID
               Unsigned 64-bit integer
               Last INSERT ID
```

```
mysql.max_packet  MAX Packet
    Unsigned 24-bit integer
    MySQL Max packet

mysql.message  Message
    String
    Message

mysql.num_fields  Number of fields
    Unsigned 64-bit integer
    Number of fields

mysql.num_rows  Rows to fetch
    Unsigned 32-bit integer
    Rows to fetch

mysql.opcode  Command
    Unsigned 8-bit integer
    Command

mysql.option  Option
    Unsigned 16-bit integer
    Option

mysql.packet_length  Packet Length
    Unsigned 24-bit integer
    Packet Length

mysql.packet_number  Packet Number
    Unsigned 8-bit integer
    Packet Number

mysql.param  Parameter
    Unsigned 16-bit integer
    Parameter

mysql.parameter  Parameter
    String
    Parameter

mysql.passwd  Password
    String
    Password

mysql.payload  Payload
    String
    Additional Payload

mysql.protocol  Protocol
    Unsigned 8-bit integer
    Protocol Version

mysql.query  Statement
    String
    Statement

mysql.refresh  Refresh Option
    Unsigned 8-bit integer
    Refresh Option

mysql.response_code  Response Code
    Unsigned 8-bit integer
    Response Code
```

```
mysql.rfsh.grants  reload permissions
  Boolean
mysql.rfsh.hosts  flush hosts
  Boolean
mysql.rfsh.log    flush logfiles
  Boolean
mysql.rfsh.master flush master status
  Boolean
mysql.rfsh.slave  flush slave status
  Boolean
mysql.rfsh.status reset statistics
  Boolean
mysql.rfsh.tables flush tables
  Boolean
mysql.rfsh.threads empty thread cache
  Boolean
mysql.salt  Salt
  String
  Salt
mysql.salt2 Salt
  String
  Salt
mysql.schema Schema
  String
  Login Schema
mysql.sqlstate SQL state
  String
mysql.stat.ac  AUTO_COMMIT
  Boolean
mysql.stat.bi  Bad index used
  Boolean
mysql.stat.bs  No backslash escapes
  Boolean
mysql.stat.cr  Cursor exists
  Boolean
mysql.stat.dr  database dropped
  Boolean
mysql.stat.it  In transaction
  Boolean
mysql.stat.lr  Last row sebd
  Boolean
mysql.stat.mr  More results
  Boolean
mysql.stat.mu  Multi query - more resultsets
  Boolean
```

```
mysql.stat.ni  No index used
               Boolean

mysql.status  Status
               Unsigned 16-bit integer
               MySQL Status

mysql.stmt_id Statement ID
               Unsigned 32-bit integer
               Statement ID

mysql.thd_id  Thread ID
               Unsigned 32-bit integer
               Thread ID

mysql.thread_id Thread ID
               Unsigned 32-bit integer
               MySQL Thread ID

mysql.unused  Unused
               String
               Unused

mysql.user    Username
               String
               Login Username

mysql.version Version
               String
               MySQL Version

mysql.warnings Warnings
               Unsigned 16-bit integer
               Warnings
```

**NBMA Next Hop Resolution Protocol (nhrp)**

```
nhrp.cli.addr.tl  Client Address Type/Len
                  Unsigned 8-bit integer

nhrp.cli.saddr.tl Client Sub Address Type/Len
                  Unsigned 8-bit integer

nhrp.client.nbma.addr  Client NBMA Address
                       IPv4 address

nhrp.client.nbma.saddr Client NBMA Sub Address

nhrp.client.prot.addr  Client Protocol Address
                       IPv4 address

nhrp.code  Code
           Unsigned 8-bit integer

nhrp.dst.prot.addr  Destination Protocol Address
                   IPv4 address

nhrp.dst.prot.len  Destination Protocol Len
                   Unsigned 16-bit integer

nhrp.err.offset  Error Offset
                 Unsigned 16-bit integer

nhrp.err.pkt  Errored Packet
```

```
nhrp.ext.c  Compulsary Flag
            Boolean

nhrp.ext.len  Extension length
            Unsigned 16-bit integer

nhrp.ext.type  Extension Type
            Unsigned 16-bit integer

nhrp.ext.val  Extension Value

nhrp.flag.a  Authoritative
            Boolean
            A bit

nhrp.flag.d  Stable Association
            Boolean
            D bit

nhrp.flag.n  Expected Purge Reply
            Boolean

nhrp.flag.nat  Cisco NAT Supported
            Boolean
            NAT bit

nhrp.flag.q  Is Router
            Boolean

nhrp.flag.s  Stable Binding
            Boolean
            S bit

nhrp.flag.ul  Uniqueness Bit
            Boolean
            U bit

nhrp.flags  Flags
            Unsigned 16-bit integer

nhrp.hdr.afn  Address Family Number
            Unsigned 16-bit integer

nhrp.hdr.chksum  Packet Checksum
            Unsigned 16-bit integer

nhrp.hdr.extoff  Extension Offset
            Unsigned 16-bit integer

nhrp.hdr.hopcnt  Hop Count
            Unsigned 8-bit integer

nhrp.hdr.op.type  NHRP Packet Type
            Unsigned 8-bit integer

nhrp.hdr.pktsz  Packet Length
            Unsigned 16-bit integer

nhrp.hdr.pro.snap  Protocol Type (long form)

nhrp.hdr.pro.type  Protocol Type (short form)
            Unsigned 16-bit integer

nhrp.hdr.shtl  Source Address Type/Len
            Unsigned 8-bit integer
```

```
nhrp.hdr.sst1 Source SubAddress Type/Len
    Unsigned 8-bit integer
nhrp.hdr.version Version
    Unsigned 8-bit integer
nhrp.htime Holding Time (s)
    Unsigned 16-bit integer
nhrp.mtu Max Transmission Unit
    Unsigned 16-bit integer
nhrp.pref CIE Preference Value
    Unsigned 8-bit integer
nhrp.prefix Prefix Length
    Unsigned 8-bit integer
nhrp.prot.len Client Protocol Length
    Unsigned 8-bit integer
nhrp.reqid Request ID
    Unsigned 32-bit integer
nhrp.src.nbma.addr Source NBMA Address
    IPv4 address
nhrp.src.nbma.saddr Source NBMA Sub Address
nhrp.src.prot.addr Source Protocol Address
    IPv4 address
nhrp.src.prot.len Source Protocol Len
    Unsigned 16-bit integer
nhrp.unused Unused
    Unsigned 16-bit integer
```

**NFSACL (nfsacl)**

```
nfsacl.acl ACL
    No value
    ACL
nfsacl.aclcnt ACL count
    Unsigned 32-bit integer
    ACL count
nfsacl.aclent ACL Entry
    No value
    ACL
nfsacl.aclent.perm Permissions
    Unsigned 32-bit integer
    Permissions
nfsacl.aclent.type Type
    Unsigned 32-bit integer
    Type
nfsacl.aclent.uid UID
    Unsigned 32-bit integer
    UID
```

```
nfsacl.create create
  Boolean
  Create?

nfsacl.dfaclcnt Default ACL count
  Unsigned 32-bit integer
  Default ACL count

nfsacl.procedure_v1 V1 Procedure
  Unsigned 32-bit integer
  V1 Procedure

nfsacl.procedure_v2 V2 Procedure
  Unsigned 32-bit integer
  V2 Procedure

nfsacl.procedure_v3 V3 Procedure
  Unsigned 32-bit integer
  V3 Procedure
```

**NFSAUTH (nfsauth)**

```
nfsauth.procedure_v1 V1 Procedure
  Unsigned 32-bit integer
  V1 Procedure
```

**NIS+ (nisplus)**

```
.nisplus.dummy
  Byte array

nisplus.access.mask access mask
  No value
  NIS Access Mask

nisplus.aticks aticks
  Unsigned 32-bit integer

nisplus.attr Attribute
  No value
  Attribute

nisplus.attr.name name
  String
  Attribute Name

nisplus.attr.val val
  Byte array
  Attribute Value

nisplus.attributes Attributes
  No value
  List Of Attributes

nisplus.callback.status status
  Boolean
  Status Of Callback Thread

nisplus.checkpoint.dticks dticks
  Unsigned 32-bit integer
  Database Ticks
```

```
nisplus.checkpoint.status  status
    Unsigned 32-bit integer
    Checkpoint Status

nisplus.checkpoint.zticks  zticks
    Unsigned 32-bit integer
    Service Ticks

nisplus.cookie  cookie
    Byte array
    Cookie

nisplus.cticks  cticks
    Unsigned 32-bit integer

nisplus.ctime  ctime
    Date/Time stamp
    Time Of Creation

nisplus.directory  directory
    No value
    NIS Directory Object

nisplus.directory.mask  mask
    No value
    NIS Directory Create/Destroy Rights

nisplus.directory.mask.group_create  GROUP CREATE
    Boolean
    Group Create Flag

nisplus.directory.mask.group_destroy  GROUP DESTROY
    Boolean
    Group Destroy Flag

nisplus.directory.mask.group_modify  GROUP MODIFY
    Boolean
    Group Modify Flag

nisplus.directory.mask.group_read  GROUP READ
    Boolean
    Group Read Flag

nisplus.directory.mask.nobody_create  NOBODY CREATE
    Boolean
    Nobody Create Flag

nisplus.directory.mask.nobody_destroy  NOBODY DESTROY
    Boolean
    Nobody Destroy Flag

nisplus.directory.mask.nobody_modify  NOBODY MODIFY
    Boolean
    Nobody Modify Flag

nisplus.directory.mask.nobody_read  NOBODY READ
    Boolean
    Nobody Read Flag

nisplus.directory.mask.owner_create  OWNER CREATE
    Boolean
    Owner Create Flag
```

```
nisplus.directory.mask.owner_destroy  OWNER DESTROY
  Boolean
  Owner Destroy Flag
nisplus.directory.mask.owner_modify  OWNER MODIFY
  Boolean
  Owner Modify Flag
nisplus.directory.mask.owner_read  OWNER READ
  Boolean
  Owner Read Flag
nisplus.directory.mask.world_create  WORLD CREATE
  Boolean
  World Create Flag
nisplus.directory.mask.world_destroy  WORLD DESTROY
  Boolean
  World Destroy Flag
nisplus.directory.mask.world_modify  WORLD MODIFY
  Boolean
  World Modify Flag
nisplus.directory.mask.world_read  WORLD READ
  Boolean
  World Read Flag
nisplus.directory.mask_list  mask list
  No value
  List Of Directory Create/Destroy Rights
nisplus.directory.name  directory name
  String
  Name Of Directory Being Served
nisplus.directory.ttl  ttl
  Unsigned 32-bit integer
  Time To Live
nisplus.directory.type  type
  Unsigned 32-bit integer
  NIS Type Of Name Service
nisplus.dticks  dticks
  Unsigned 32-bit integer
nisplus.dump.dir  directory
  String
  Directory To Dump
nisplus.dump.time  time
  Date/Time stamp
  From This Timestamp
nisplus.endpoint  endpoint
  No value
  Endpoint For This NIS Server
nisplus.endpoint.family  family
  String
  Transport Family
```

```
nisplus.endpoint.proto  proto
    String
    Protocol

nisplus.endpoint.uaddr  addr
    String
    Address

nisplus.endpoints  nis endpoints
    No value
    Endpoints For This NIS Server

nisplus.entry  entry
    No value
    Entry Object

nisplus.entry.col  column
    No value
    Entry Column

nisplus.entry.cols  columns
    No value
    Entry Columns

nisplus.entry.flags  flags
    Unsigned 32-bit integer
    Entry Col Flags

nisplus.entry.flags.asn  ASN.1
    Boolean
    Is This Entry ASN.1 Encoded Flag

nisplus.entry.flags.binary  BINARY
    Boolean
    Is This Entry BINARY Flag

nisplus.entry.flags.encrypted  ENCRYPTED
    Boolean
    Is This Entry ENCRYPTED Flag

nisplus.entry.flags.modified  MODIFIED
    Boolean
    Is This Entry MODIFIED Flag

nisplus.entry.flags.xdr  XDR
    Boolean
    Is This Entry XDR Encoded Flag

nisplus.entry.type  type
    String
    Entry Type

nisplus.entry.val  val
    String
    Entry Value

nisplus.fd.dir.data  data
    Byte array
    Directory Data In XDR Format

nisplus.fd.dirname  dirname
    String
    Directory Name
```

```
nisplus.fd.requester  requester
    String
    Host Principal Name For Signature
nisplus.fd.sig  signature
    Byte array
    Signature Of The Source
nisplus.group  Group
    No value
    Group Object
nisplus.group.flags  flags
    Unsigned 32-bit integer
    Group Object Flags
nisplus.group.name  group name
    String
    Name Of Group Member
nisplus.grps  Groups
    No value
    List Of Groups
nisplus.ib.bufsize  bufsize
    Unsigned 32-bit integer
    Optional First/NextBufSize
nisplus.ib.flags  flags
    Unsigned 32-bit integer
    Information Base Flags
nisplus.key.data  key data
    Byte array
    Encryption Key
nisplus.key.type  type
    Unsigned 32-bit integer
    Type Of Key
nisplus.link  link
    No value
    NIS Link Object
nisplus.log.entries  log entries
    No value
    Log Entries
nisplus.log.entry  log entry
    No value
    Log Entry
nisplus.log.entry.type  type
    Unsigned 32-bit integer
    Type Of Entry In Transaction Log
nisplus.log.principal  principal
    String
    Principal Making The Change
nisplus.log.time  time
    Date/Time stamp
    Time Of Log Entry
```

```
nisplus.mtime  mtime
    Date/Time stamp
    Time Last Modified

nisplus.object  NIS Object
    No value
    NIS Object

nisplus.object.domain  domain
    String
    NIS Administrator For This Object

nisplus.object.group  group
    String
    NIS Name Of Access Group

nisplus.object.name  name
    String
    NIS Name For This Object

nisplus.object.oid  Object Identity Verifier
    No value
    NIS Object Identity Verifier

nisplus.object.owner  owner
    String
    NIS Name Of Object Owner

nisplus.object.private  private
    Byte array
    NIS Private Object

nisplus.object.ttl  ttl
    Unsigned 32-bit integer
    NIS Time To Live For This Object

nisplus.object.type  type
    Unsigned 32-bit integer
    NIS Type Of Object

nisplus.ping.dir  directory
    String
    Directory That Had The Change

nisplus.ping.time  time
    Date/Time stamp
    Timestamp Of The Transaction

nisplus.procedure_v3  V3 Procedure
    Unsigned 32-bit integer
    V3 Procedure

nisplus.server  server
    No value
    NIS Server For This Directory

nisplus.server.name  name
    String
    Name Of NIS Server

nisplus.servers  nis servers
    No value
    NIS Servers For This Directory
```

```
nisplus.status  status
    Unsigned 32-bit integer
    NIS Status Code

nisplus.table  table
    No value
    Table Object

nisplus.table.col  column
    No value
    Table Column

nisplus.table.col.flags  flags
    No value
    Flags For This Column

nisplus.table.col.name  column name
    String
    Column Name

nisplus.table.cols  columns
    No value
    Table Columns

nisplus.table.flags.asn  asn
    Boolean
    Is This Column ASN.1 Encoded

nisplus.table.flags.binary  binary
    Boolean
    Is This Column BINARY

nisplus.table.flags.casesensitive  casesensitive
    Boolean
    Is This Column CASESENSITIVE

nisplus.table.flags.encrypted  encrypted
    Boolean
    Is This Column ENCRYPTED

nisplus.table.flags.modified  modified
    Boolean
    Is This Column MODIFIED

nisplus.table.flags.searchable  searchable
    Boolean
    Is This Column SEARCHABLE

nisplus.table.flags.xdr  xdr
    Boolean
    Is This Column XDR Encoded

nisplus.table.maxcol  max columns
    Unsigned 16-bit integer
    Maximum Number Of Columns For Table

nisplus.table.path  path
    String
    Table Path

nisplus.table.separator  separator
    Unsigned 8-bit integer
    Separator Character
```

```
nisplus.table.type  type
    String
    Table Type

nisplus.tag  tag
    No value
    Tag

nisplus.tag.type  type
    Unsigned 32-bit integer
    Type Of Statistics Tag

nisplus.tag.value  value
    String
    Value Of Statistics Tag

nisplus.taglist  taglist
    No value
    List Of Tags

nisplus.zticks  zticks
    Unsigned 32-bit integer
```

**NIS+ Callback (nispluscb)**

```
nispluscb.entries  entries
    No value
    NIS Callback Entries

nispluscb.entry  entry
    No value
    NIS Callback Entry

nispluscb.procedure_v1  V1 Procedure
    Unsigned 32-bit integer
    V1 Procedure
```

**NTLM Secure Service Provider (ntlmssp)**

```
ntlmssp.auth.domain  Domain name
    String

ntlmssp.auth.hostname  Host name
    String

ntlmssp.auth.lmresponse  Lan Manager Response
    Byte array

ntlmssp.auth.ntresponse  NTLM Response
    Byte array

ntlmssp.auth.sesskey  Session Key
    Byte array

ntlmssp.auth.username  User name
    String

ntlmssp.blob.length  Length
    Unsigned 16-bit integer

ntlmssp.blob.maxlen  Maxlen
    Unsigned 16-bit integer
```

```
ntlmssp.blob.offset    Offset
    Unsigned 32-bit integer
ntlmssp.challenge.addresslist    Address List
    No value
ntlmssp.challenge.addresslist.domaindns    Domain DNS Name
    String
ntlmssp.challenge.addresslist.domainnb    Domain NetBIOS Name
    String
ntlmssp.challenge.addresslist.item.content    Target item Content
    String
ntlmssp.challenge.addresslist.item.length    Target item Length
    Unsigned 16-bit integer
ntlmssp.challenge.addresslist.length    Length
    Unsigned 16-bit integer
ntlmssp.challenge.addresslist.maxlen    Maxlen
    Unsigned 16-bit integer
ntlmssp.challenge.addresslist.offset    Offset
    Unsigned 32-bit integer
ntlmssp.challenge.addresslist.serverdns    Server DNS Name
    String
ntlmssp.challenge.addresslist.servernb    Server NetBIOS Name
    String
ntlmssp.challenge.addresslist.terminator    List Terminator
    No value
ntlmssp.challenge.domain    Domain
    String
ntlmssp.decrypted_payload    NTLM Decrypted Payload
    Byte array
ntlmssp.identifier    NTLMSSP identifier
    String
    NTLMSSP Identifier
ntlmssp.messagesize    NTLM Message Size
    Unsigned 32-bit integer
ntlmssp.message.type    NTLM Message Type
    Unsigned 32-bit integer
ntlmssp.negotiate.callingworkstation    Calling workstation name
    String
ntlmssp.negotiate.callingworkstation.buffer    Calling workstation name buffer
    Unsigned 32-bit integer
ntlmssp.negotiate.callingworkstation.maxlen    Calling workstation name max length
    Unsigned 16-bit integer
ntlmssp.negotiate.callingworkstation.strlen    Calling workstation name length
    Unsigned 16-bit integer
ntlmssp.negotiate.domain    Calling workstation domain
    String
ntlmssp.negotiate.domain.buffer    Calling workstation domain buffer
    Unsigned 32-bit integer
```

```
ntlmssp.negotiate.domain.maxlen  Calling workstation domain max length
    Unsigned 16-bit integer
ntlmssp.negotiate.domain.strlen  Calling workstation domain length
    Unsigned 16-bit integer
ntlmssp.negotiate00000008  Request 0x00000008
    Boolean
ntlmssp.negotiate00000400  Negotiate 0x00000400
    Boolean
ntlmssp.negotiate128  Negotiate 128
    Boolean
    128-bit encryption is supported
ntlmssp.negotiate56  Negotiate 56
    Boolean
    56-bit encryption is supported
ntlmssp.negotiatealwaysign  Negotiate Always Sign
    Boolean
ntlmssp.negotiateanonymous  Negotiate Anonymous
    Boolean
ntlmssp.negotiatechallengeacceptresponse  Negotiate Challenge Accept Response
    Boolean
ntlmssp.negotiatechallengeinitresponse  Negotiate Challenge Init Response
    Boolean
ntlmssp.negotiatechallengenonntsessionkey  Negotiate Challenge Non NT Session Key
    Boolean
ntlmssp.negotiatedatagramstyle  Negotiate Datagram Style
    Boolean
ntlmssp.negotiatedomainsupplied  Negotiate Domain Supplied
    Boolean
ntlmssp.negotiateflags  Flags
    Unsigned 32-bit integer
ntlmssp.negotiatekeyexch  Negotiate Key Exchange
    Boolean
ntlmssp.negotiatelmkey  Negotiate Lan Manager Key
    Boolean
ntlmssp.negotiatenetware  Negotiate Netware
    Boolean
ntlmssp.negotiatent00100000  Negotiate 0x00100000
    Boolean
ntlmssp.negotiatent00200000  Negotiate 0x00200000
    Boolean
ntlmssp.negotiatent00400000  Negotiate 0x00400000
    Boolean

Boolean
ntlmssp.negotiatentlm  Negotiate NTLM key
Boolean
ntlmssp.negotiatentlm2  Negotiate NTLM2 key
Boolean
ntlmssp.negotiateoem  Negotiate OEM
Boolean
ntlmssp.negotiateseal  Negotiate Seal
Boolean
ntlmssp.negotiatesign  Negotiate Sign
Boolean
ntlmssp.negotiatetargetinfo  Negotiate Target Info
Boolean
ntlmssp.negotiatethisislocalcall  Negotiate This is Local Call
Boolean
ntlmssp.negotiateunicode  Negotiate UNICODE
Boolean
ntlmssp.negotiateworkstationsupplied  Negotiate Workstation Supplied
Boolean
ntlmssp.ntlmchallenge  NTLM Challenge
Byte array
ntlmssp.ntlmv2response  NTLMv2 Response
Byte array
ntlmssp.ntlmv2response.chal  Client challenge
Byte array
ntlmssp.ntlmv2response.client_time  Client Time
Date/Time stamp
ntlmssp.ntlmv2response.header  Header
Unsigned 32-bit integer
ntlmssp.ntlmv2response.hmac  HMAC
Byte array
ntlmssp.ntlmv2response.name  Name
String
ntlmssp.ntlmv2response.name.len  Name len
Unsigned 32-bit integer
ntlmssp.ntlmv2response.name.type  Name type
Unsigned 32-bit integer
```

```
ntlmssp.ntlmv2response.reserved  Reserved
    Unsigned 32-bit integer
ntlmssp.ntlmv2response.time      Time
    Date/Time stamp
ntlmssp.ntlmv2response.unknown  Unknown
    Unsigned 32-bit integer
ntlmssp.requesttarget           Request Target
    Boolean
ntlmssp.reserved                Reserved
    Byte array
ntlmssp.string.length           Length
    Unsigned 16-bit integer
ntlmssp.string.maxlen           Maxlen
    Unsigned 16-bit integer
ntlmssp.string.offset           Offset
    Unsigned 32-bit integer
ntlmssp.targetitemtype          Target item type
    Unsigned 16-bit integer
ntlmssp.verf                    NTLMSPP Verifier
    No value
    NTLMSPP Verifier
ntlmssp.verf.body               Verifier Body
    Byte array
ntlmssp.verf.crc32              Verifier CRC32
    Unsigned 32-bit integer
ntlmssp.verf.sequence           Verifier Sequence Number
    Unsigned 32-bit integer
ntlmssp.verf.unknown1          Unknown 1
    Unsigned 32-bit integer
ntlmssp.verf.vers               Version Number
    Unsigned 32-bit integer
```

**Name Binding Protocol (nbp)**

```
nbp.count                       Count
    Unsigned 8-bit integer
    Count
nbp.enum                         Enumerator
    Unsigned 8-bit integer
    Enumerator
nbp.info                         Info
    Unsigned 8-bit integer
    Info
nbp.net                          Network
    Unsigned 16-bit integer
    Network

                    Boolean
norm.nack.flags.object Object
                    Boolean
norm.nack.flags.segment Segment
                    Boolean
norm.nack.form      NACK FORM
                    Unsigned 8-bit integer
norm.nack.grtt_sec  NACK GRTT Sec
                    Unsigned 32-bit integer
norm.nack.grtt_usec NACK GRTT usec
                    Unsigned 32-bit integer
norm.nack.length    NACK Length
                    Unsigned 16-bit integer
norm.nack.server    NACK Server
                    IPv4 address
norm.object_transport_id Object Transport ID
                    Unsigned 16-bit integer
```

```
norm.payload Payload
    No value
norm.payload.len Payload Len
    Unsigned 16-bit integer
norm.payload.offset Payload Offset
    Unsigned 32-bit integer
norm.reserved Reserved
    No value
norm.sequence Sequence
    Unsigned 16-bit integer
norm.source_id Source ID
    IPv4 address
norm.type Message Type
    Unsigned 8-bit integer
norm.version Version
    Unsigned 8-bit integer
```

**NetBIOS (netbios)**

```
netbios.ack Acknowledge
    Boolean
netbios.ack_expected Acknowledge expected
    Boolean
netbios.ack_with_data Acknowledge with data
    Boolean
netbios.call_name_type Caller's Name Type
    Unsigned 8-bit integer
netbios.command Command
    Unsigned 8-bit integer
netbios.data1 DATA1 value
    Unsigned 8-bit integer
netbios.data2 DATA2 value
    Unsigned 16-bit integer
netbios.fragment NetBIOS Fragment
    Frame number
    NetBIOS Fragment
netbios.fragment.error Defragmentation error
    Frame number
    Defragmentation error due to illegal fragments
netbios.fragment.multipletails Multiple tail fragments found
    Boolean
    Several tails were found when defragmenting the packet
netbios.fragment.overlap Fragment overlap
    Boolean
    Fragment overlaps with other fragments
```

```
netbios.fragment.overlap.conflict  Conflicting data in fragment overlap
    Boolean
    Overlapping fragments contained conflicting data
netbios.fragment.toolongfragment  Fragment too long
    Boolean
    Fragment contained data past end of packet
netbios.fragments  NetBIOS Fragments
    No value
    NetBIOS Fragments
netbios.hdr_len  Header Length
    Unsigned 16-bit integer
netbios.largest_frame  Largest Frame
    Unsigned 8-bit integer
netbios.local_session  Local Session No.
    Unsigned 8-bit integer
netbios.max_data_rcv_size  Maximum data receive size
    Unsigned 16-bit integer
netbios.name_type  Name type
    Unsigned 16-bit integer
netbios.nb_name  NetBIOS Name
    String
netbios.nb_name_type  NetBIOS Name Type
    Unsigned 8-bit integer
netbios.num_data_bytes_accepted  Number of data bytes accepted
    Unsigned 16-bit integer
netbios.rcv_cont_req  RECEIVE_CONTINUE requested
    Boolean
netbios.remote_session  Remote Session No.
    Unsigned 8-bit integer
netbios.resp_corrl  Response Correlator
    Unsigned 16-bit integer
netbios.send_no_ack  Handle SEND.NO.ACK
    Boolean
netbios.status  Status
    Unsigned 8-bit integer
netbios.status_buffer_len  Length of status buffer
    Unsigned 16-bit integer
netbios.termination_indicator  Termination indicator
    Unsigned 16-bit integer
netbios.version  NetBIOS Version
    Boolean
netbios.xmit_corrl  Transmit Correlator
    Unsigned 16-bit integer
```

**NetBIOS Datagram Service (nbdgm)**

nbdgm.dgram\_id Datagram ID  
Unsigned 16-bit integer  
Datagram identifier

nbdgm.first This is first fragment  
Boolean  
TRUE if first fragment

nbdgm.next More fragments follow  
Boolean  
TRUE if more fragments follow

nbdgm.node\_type Node Type  
Unsigned 8-bit integer  
Node type

nbdgm.src.ip Source IP  
IPv4 address  
Source IPv4 address

nbdgm.src.port Source Port  
Unsigned 16-bit integer  
Source port

nbdgm.type Message Type  
Unsigned 8-bit integer  
NBDGM message type

**NetBIOS Name Service (nbns)**

nbns.count.add\_rr Additional RRs  
Unsigned 16-bit integer  
Number of additional records in packet

nbns.count.answers Answer RRs  
Unsigned 16-bit integer  
Number of answers in packet

nbns.count.auth\_rr Authority RRs  
Unsigned 16-bit integer  
Number of authoritative records in packet

nbns.count.queries Questions  
Unsigned 16-bit integer  
Number of queries in packet

nbns.flags Flags  
Unsigned 16-bit integer

nbns.flags.authoritative Authoritative  
Boolean  
Is the server is an authority for the domain?

nbns.flags.broadcast Broadcast  
Boolean  
Is this a broadcast packet?

nbns.flags.opcode Opcode  
Unsigned 16-bit integer  
Operation code

```
nbns.flags.rcode  Reply code
                  Unsigned 16-bit integer
                  Reply code

nbns.flags.recavail  Recursion available
                    Boolean
                    Can the server do recursive queries?

nbns.flags.recdesired  Recursion desired
                      Boolean
                      Do query recursively?

nbns.flags.response  Response
                    Boolean
                    Is the message a response?

nbns.flags.truncated  Truncated
                    Boolean
                    Is the message truncated?

nbns.id  Transaction ID
        Unsigned 16-bit integer
        Identification of transaction
```

#### **NetBIOS Session Service (nbss)**

```
nbss.flags  Flags
            Unsigned 8-bit integer
            NBSS message flags

nbss.type  Message Type
          Unsigned 8-bit integer
          NBSS message type
```

#### **NetBIOS over IPX (nbipx)**

#### **NetScape Certificate Extensions (ns\_cert\_exts)**

```
ns_cert_exts.BaseUrl  BaseUrl
                    String
                    ns_cert_exts.BaseUrl

ns_cert_exts.CaPolicyUrl  CaPolicyUrl
                        String
                        ns_cert_exts.CaPolicyUrl

ns_cert_exts.CaRevocationUrl  CaRevocationUrl
                            String
                            ns_cert_exts.CaRevocationUrl

ns_cert_exts.CertRenewalUrl  CertRenewalUrl
                            String
                            ns_cert_exts.CertRenewalUrl

ns_cert_exts.CertType  CertType
                    Byte array
                    ns_cert_exts.CertType

ns_cert_exts.Comment  Comment
                    String
                    ns_cert_exts.Comment
```

```
ns_cert_exts.RevocationUrl  RevocationUrl
    String
    ns_cert_exts.RevocationUrl
ns_cert_exts.SslServerName  SslServerName
    String
    ns_cert_exts.SslServerName
ns_cert_exts.ca             ca
    Boolean
ns_cert_exts.client        client
    Boolean
ns_cert_exts.server        server
    Boolean
```

**NetWare Core Protocol (ncp)**

```
ncp.64_bit_flag            64 Bit Support
    Unsigned 8-bit integer
ncp.Service_type           Service Type
    Unsigned 16-bit integer
ncp.abort_q_flag           Abort Queue Flag
    Unsigned 8-bit integer
ncp.abs_min_time_since_file_delete  Absolute Minimum Time Since File Delete
    Unsigned 32-bit integer
ncp.acc_mode_comp          Compatibility Mode
    Boolean
ncp.acc_mode_deny_read     Deny Read Access
    Boolean
ncp.acc_mode_deny_write    Deny Write Access
    Boolean
ncp.acc_mode_read          Read Access
    Boolean
ncp.acc_mode_write         Write Access
    Boolean
ncp.acc_priv_create        Create Privileges (files only)
    Boolean
ncp.acc_priv_delete        Delete Privileges (files only)
    Boolean
ncp.acc_priv_modify        Modify File Status Flags Privileges (files and directories)
    Boolean
ncp.acc_priv_open          Open Privileges (files only)
    Boolean
ncp.acc_priv_parent        Parental Privileges (directories only for creating, deleting)
    Boolean
ncp.acc_priv_read          Read Privileges (files only)
    Boolean
ncp.acc_priv_search        Search Privileges (directories only)
    Boolean
```

```
ncp.acc_priv_write  Write Privileges (files only)
  Boolean
ncp.acc_rights1_create  Create Rights
  Boolean
ncp.acc_rights1_delete  Delete Rights
  Boolean
ncp.acc_rights1_modify  Modify Rights
  Boolean
ncp.acc_rights1_open  Open Rights
  Boolean
ncp.acc_rights1_parent  Parental Rights
  Boolean
ncp.acc_rights1_read  Read Rights
  Boolean
ncp.acc_rights1_search  Search Rights
  Boolean
ncp.acc_rights1_supervisor  Supervisor Access Rights
  Boolean
ncp.acc_rights1_write  Write Rights
  Boolean
ncp.acc_rights_create  Create Rights
  Boolean
ncp.acc_rights_delete  Delete Rights
  Boolean
ncp.acc_rights_modify  Modify Rights
  Boolean
ncp.acc_rights_open  Open Rights
  Boolean
ncp.acc_rights_parent  Parental Rights
  Boolean
ncp.acc_rights_read  Read Rights
  Boolean
ncp.acc_rights_search  Search Rights
  Boolean
ncp.acc_rights_write  Write Rights
  Boolean
ncp.accel_cache_node_write  Accelerate Cache Node Write Count
  Unsigned 32-bit integer
ncp.accepted_max_size  Accepted Max Size
  Unsigned 16-bit integer
ncp.access_control  Access Control
  Unsigned 8-bit integer
ncp.access_date  Access Date
  Unsigned 16-bit integer
```

```
ncp.access_mode    Access Mode
                  Unsigned 8-bit integer

ncp.access_privileges  Access Privileges
                  Unsigned 8-bit integer

ncp.access_rights_mask  Access Rights
                  Unsigned 8-bit integer

ncp.access_rights_mask_word  Access Rights
                  Unsigned 16-bit integer

ncp.account_balance  Account Balance
                  Unsigned 32-bit integer

ncp.acct_version    Acct Version
                  Unsigned 8-bit integer

ncp.ack_seqno      ACK Sequence Number
                  Unsigned 16-bit integer
                  Next expected burst sequence number

ncp.act_flag_create  Create
                  Boolean

ncp.act_flag_open   Open
                  Boolean

ncp.act_flag_replace  Replace
                  Boolean

ncp.action_flag    Action Flag
                  Unsigned 8-bit integer

ncp.active_conn_bit_list  Active Connection List
                  String

ncp.active_indexed_files  Active Indexed Files
                  Unsigned 16-bit integer

ncp.actual_max_bindery_objects  Actual Max Bindery Objects
                  Unsigned 16-bit integer

ncp.actual_max_indexed_files  Actual Max Indexed Files
                  Unsigned 16-bit integer

ncp.actual_max_open_files  Actual Max Open Files
                  Unsigned 16-bit integer

ncp.actual_max_sim_trans  Actual Max Simultaneous Transactions
                  Unsigned 16-bit integer

ncp.actual_max_used_directory_entries  Actual Max Used Directory Entries
                  Unsigned 16-bit integer

ncp.actual_max_used_routing_buffers  Actual Max Used Routing Buffers
                  Unsigned 16-bit integer

ncp.actual_response_count  Actual Response Count
                  Unsigned 16-bit integer

ncp.add_nm_spc_and_vol  Add Name Space and Volume
                  String

ncp.aes_event_count  AES Event Count
                  Unsigned 32-bit integer
```

ncp.afp\_entry\_id AFP Entry ID  
Unsigned 32-bit integer

ncp.alloc\_avail\_byte Bytes Available for Allocation  
Unsigned 32-bit integer

ncp.alloc\_blk Allocate Block Count  
Unsigned 32-bit integer

ncp.alloc\_blk\_already\_wait Allocate Block Already Waiting  
Unsigned 32-bit integer

ncp.alloc\_blk\_frm\_avail Allocate Block From Available Count  
Unsigned 32-bit integer

ncp.alloc\_blk\_frm\_lru Allocate Block From LRU Count  
Unsigned 32-bit integer

ncp.alloc\_blk\_i\_had\_to\_wait Allocate Block I Had To Wait Count  
Unsigned 32-bit integer

ncp.alloc\_blk\_i\_had\_to\_wait\_for Allocate Block I Had To Wait For Someone Count  
Unsigned 32-bit integer

ncp.alloc\_dir\_hdl Dir Handle Type  
Unsigned 16-bit integer

ncp.alloc\_dst\_name\_spc Destination Name Space Input Parameter  
Boolean

ncp.alloc\_free\_count Reclaimable Free Bytes  
Unsigned 32-bit integer

ncp.alloc\_mode Allocate Mode  
Unsigned 16-bit integer

ncp.alloc\_reply\_lvl2 Reply Level 2  
Boolean

ncp.alloc\_spec\_temp\_dir\_hdl Special Temporary Directory Handle  
Boolean

ncp.alloc\_waiting Allocate Waiting Count  
Unsigned 32-bit integer

ncp.allocation\_block\_size Allocation Block Size  
Unsigned 32-bit integer

ncp.allow\_hidden Allow Hidden Files and Folders  
Boolean

ncp.allow\_system Allow System Files and Folders  
Boolean

ncp.already\_doing\_realloc Already Doing Re-Allocate Count  
Unsigned 32-bit integer

ncp.application\_number Application Number  
Unsigned 16-bit integer

ncp.archived\_date Archived Date  
Unsigned 16-bit integer

ncp.archived\_time Archived Time  
Unsigned 16-bit integer

```
ncp.archiver_id  Archiver ID
  Unsigned 32-bit integer
ncp.associated_name_space  Associated Name Space
  Unsigned 8-bit integer
ncp.async_internl_dsk_get  Async Internal Disk Get Count
  Unsigned 32-bit integer
ncp.async_internl_dsk_get_need_to_alloc  Async Internal Disk Get Need To Alloc
  Unsigned 32-bit integer
ncp.async_internl_dsk_get_someone_beat  Async Internal Disk Get Someone Beat Me
  Unsigned 32-bit integer
ncp.async_read_error  Async Read Error Count
  Unsigned 32-bit integer

ncp.cmphibyteoutcnt     Compress High Byte Out Count
    Unsigned 32-bit integer
ncp.cmphitickcnt        Compress High Tick Count
    Unsigned 32-bit integer
ncp.cmphitickhigh       Compress High Tick
    Unsigned 32-bit integer
ncp.co_proc_string      CoProcessor String
    String
ncp.co_processor_flag    CoProcessor Present Flag
    Unsigned 32-bit integer
```

```
ncp.code_page    Code Page
                 Unsigned 32-bit integer

ncp.com_cnts     Communication Counters
                 Unsigned 16-bit integer

ncp.comment      Comment
                 String

ncp.comment_type Comment Type
                 Unsigned 16-bit integer

ncp.complete_signatures Complete Signatures
                 Boolean

ncp.completion_code Completion Code
                 Unsigned 8-bit integer

ncp.compress_volume Volume Compression
                 Unsigned 32-bit integer

ncp.compressed_data_streams_count Compressed Data Streams Count
                 Unsigned 32-bit integer

ncp.compressed_limbo_data_streams_count Compressed Limbo Data Streams Count
                 Unsigned 32-bit integer

ncp.compressed_sectors Compressed Sectors
                 Unsigned 32-bit integer

ncp.compression_ios_limit Compression IOs Limit
                 Unsigned 32-bit integer

ncp.compression_lower_limit Compression Lower Limit
                 Unsigned 32-bit integer

ncp.compression_stage Compression Stage
                 Unsigned 32-bit integer

ncp.config_major_vn Configuration Major Version Number
                 Unsigned 8-bit integer

ncp.config_minor_vn Configuration Minor Version Number
                 Unsigned 8-bit integer

ncp.configuration_description Configuration Description
                 String

ncp.configuration_text Configuration Text
                 String

ncp.configured_max_bindery_objects Configured Max Bindery Objects
                 Unsigned 16-bit integer

ncp.configured_max_open_files Configured Max Open Files
                 Unsigned 16-bit integer

ncp.configured_max_routing_buffers Configured Max Routing Buffers
                 Unsigned 16-bit integer

ncp.conn_being_aborted Connection Being Aborted Count
                 Unsigned 32-bit integer

ncp.conn_ctrl_bits Connection Control
                 Unsigned 8-bit integer
```

```
ncp.conn_list      Connection List
                   Unsigned 32-bit integer
ncp.conn_list_count Connection List Count
                   Unsigned 32-bit integer
ncp.conn_list_len  Connection List Length
                   Unsigned 8-bit integer
ncp.conn_lock_status Lock Status
                   Unsigned 8-bit integer
ncp.conn_number_byte Connection Number
                   Unsigned 8-bit integer
ncp.conn_number_word Connection Number
                   Unsigned 16-bit integer
ncp.connected_lan  LAN Adapter
                   Unsigned 32-bit integer
ncp.connection     Connection Number
                   Unsigned 16-bit integer
ncp.connection_code_page Connection Code Page
                   Boolean
ncp.connection_list Connection List
                   Unsigned 32-bit integer
ncp.connection_number Connection Number
                   Unsigned 32-bit integer
ncp.connection_number_list Connection Number List
                   String
ncp.connection_service_type Connection Service Type
                   Unsigned 8-bit integer
ncp.connection_status Connection Status
                   Unsigned 8-bit integer
ncp.connection_type Connection Type
                   Unsigned 8-bit integer
ncp.connections_in_use Connections In Use
                   Unsigned 16-bit integer
ncp.connections_max_used Connections Max Used
                   Unsigned 16-bit integer
ncp.connections_supported_max Connections Supported Max
                   Unsigned 16-bit integer
ncp.control_being_torn_down Control Being Torn Down Count
                   Unsigned 32-bit integer
ncp.control_code   Control Code
                   Unsigned 8-bit integer
ncp.control_flags  Control Flags
                   Unsigned 8-bit integer
ncp.control_invalid_message_number Control Invalid Message Number Count
                   Unsigned 32-bit integer
```

```
ncp.controller_drive_number  Controller Drive Number
    Unsigned 8-bit integer
ncp.controller_number  Controller Number
    Unsigned 8-bit integer
ncp.controller_type  Controller Type
    Unsigned 8-bit integer
ncp.cookie_1  Cookie 1
    Unsigned 32-bit integer
ncp.cookie_2  Cookie 2
    Unsigned 32-bit integer
ncp.copies  Copies
    Unsigned 8-bit integer
ncp.copyright  Copyright
    String
ncp.counter_mask  Counter Mask
    Unsigned 8-bit integer
ncp.cpu_number  CPU Number
    Unsigned 32-bit integer
ncp.cpu_string  CPU String
    String
ncp.cpu_type  CPU Type
    Unsigned 8-bit integer
ncp.creation_date  Creation Date
    Unsigned 16-bit integer
ncp.creation_time  Creation Time
    Unsigned 16-bit integer
ncp.creator_id  Creator ID
    Unsigned 32-bit integer
ncp.creator_name_space_number  Creator Name Space Number
    Unsigned 8-bit integer
ncp.credit_limit  Credit Limit
    Unsigned 32-bit integer
ncp.ctrl_bad_ack_frag_list  Control Bad ACK Fragment List Count
    Unsigned 32-bit integer
ncp.ctrl_no_data_read  Control No Data Read Count
    Unsigned 32-bit integer
ncp.ctrl_flags  Control Flags
    Unsigned 16-bit integer
ncp.cur_comp_blks  Current Compression Blocks
    Unsigned 32-bit integer
ncp.cur_initial_blks  Current Initial Blocks
    Unsigned 32-bit integer
ncp.cur_inter_blks  Current Intermediate Blocks
    Unsigned 32-bit integer
```

ncp.cur\_num\_of\_r\_tags Current Number of Resource Tags  
Unsigned 32-bit integer

ncp.curr\_num\_cache\_buff Current Number Of Cache Buffers  
Unsigned 32-bit integer

ncp.curr\_ref\_id Current Reference ID  
Unsigned 16-bit integer

ncp.current\_changed\_fats Current Changed FAT Entries  
Unsigned 16-bit integer

ncp.current\_entries Current Entries  
Unsigned 32-bit integer

ncp.current\_form\_type Current Form Type  
Unsigned 8-bit integer

ncp.current\_lfs\_counters Current LFS Counters  
Unsigned 32-bit integer

ncp.current\_open\_files Current Open Files  
Unsigned 16-bit integer

ncp.current\_server\_time Time Elapsed Since Server Was Brought Up  
Unsigned 32-bit integer

ncp.current\_servers Current Servers  
Unsigned 32-bit integer

ncp.current\_space Current Space  
Unsigned 32-bit integer

ncp.current\_trans\_count Current Transaction Count  
Unsigned 32-bit integer

ncp.current\_used\_bindery\_objects Current Used Bindery Objects  
Unsigned 16-bit integer

ncp.currently\_used\_routing\_buffers Currently Used Routing Buffers  
Unsigned 16-bit integer

ncp.custom\_cnts Custom Counters  
Unsigned 32-bit integer

ncp.custom\_count Custom Count  
Unsigned 32-bit integer

ncp.custom\_counters Custom Counters  
Unsigned 32-bit integer

ncp.custom\_string Custom String  
String

ncp.custom\_var\_value Custom Variable Value  
Unsigned 32-bit integer

ncp.data Data  
String

ncp.data\_bytes Data Bytes  
Unsigned 16-bit integer  
Number of data bytes in this packet

ncp.data\_fork\_first\_fat Data Fork First FAT Entry  
Unsigned 32-bit integer

```
ncp.data_fork_len  Data Fork Len
    Unsigned 32-bit integer
ncp.data_fork_size  Data Fork Size
    Unsigned 32-bit integer
ncp.data_offset  Data Offset
    Unsigned 32-bit integer
    Offset of this packet
ncp.data_size  Data Size
    Unsigned 32-bit integer
ncp.data_stream  Data Stream
    Unsigned 8-bit integer
ncp.data_stream_fat_blks  Data Stream FAT Blocks
    Unsigned 32-bit integer
ncp.data_stream_name  Data Stream Name
    String
ncp.data_stream_num_long  Data Stream Number
    Unsigned 32-bit integer
ncp.data_stream_number  Data Stream Number
    Unsigned 8-bit integer
ncp.data_stream_size  Size
    Unsigned 32-bit integer
ncp.data_stream_space_alloc  Space Allocated for Data Stream
    Unsigned 32-bit integer
ncp.data_streams_count  Data Streams Count
    Unsigned 32-bit integer
ncp.data_type_flag  Data Type Flag
    Unsigned 8-bit integer
ncp.dc_dirty_wait_time  DC Dirty Wait Time
    Unsigned 32-bit integer
ncp.dc_double_read_flag  DC Double Read Flag
    Unsigned 32-bit integer
ncp.dc_max_concurrent_writes  DC Maximum Concurrent Writes
    Unsigned 32-bit integer
ncp.dc_min_non_ref_time  DC Minimum Non-Referenced Time
    Unsigned 32-bit integer
ncp.dc_wait_time_before_new_buff  DC Wait Time Before New Buffer
    Unsigned 32-bit integer
ncp.dead_mirror_table  Dead Mirror Table
    Byte array
ncp.dealloc_being_proc  De-Allocate Being Processed Count
    Unsigned 32-bit integer
ncp.dealloc_forged_packet  De-Allocate Forged Packet Count
    Unsigned 32-bit integer
ncp.dealloc_invalid_slot  De-Allocate Invalid Slot Count
    Unsigned 32-bit integer
```

ncp.dealloc\_still\_transmit De-Allocate Still Transmitting Count  
Unsigned 32-bit integer

ncp.decpcbyteincnt DeCompress Byte In Count  
Unsigned 32-bit integer

ncp.decpcbyteoutcnt DeCompress Byte Out Count  
Unsigned 32-bit integer

ncp.decpcphybyteincnt DeCompress High Byte In Count  
Unsigned 32-bit integer

ncp.decpcphybyteoutcnt DeCompress High Byte Out Count  
Unsigned 32-bit integer

ncp.decpcphitickcnt DeCompress High Tick Count  
Unsigned 32-bit integer

ncp.decpcphitickhigh DeCompress High Tick  
Unsigned 32-bit integer

ncp.defined\_data\_streams Defined Data Streams  
Unsigned 8-bit integer

ncp.defined\_name\_spaces Defined Name Spaces  
Unsigned 8-bit integer

ncp.delay\_time Delay Time  
Unsigned 32-bit integer  
Delay time between consecutive packet sends (100 us increments)

ncp.delete\_existing\_file\_flag Delete Existing File Flag  
Unsigned 8-bit integer

ncp.delete\_id Deleted ID  
Unsigned 32-bit integer

ncp.deleted\_date Deleted Date  
Unsigned 16-bit integer

ncp.deleted\_file\_time Deleted File Time  
Unsigned 32-bit integer

ncp.deleted\_time Deleted Time  
Unsigned 16-bit integer

ncp.deny\_read\_count Deny Read Count  
Unsigned 16-bit integer

ncp.deny\_write\_count Deny Write Count  
Unsigned 16-bit integer

ncp.description\_string Description  
String

ncp.desired\_access\_rights Desired Access Rights  
Unsigned 16-bit integer

ncp.desired\_response\_count Desired Response Count  
Unsigned 16-bit integer

ncp.dest\_component\_count Destination Path Component Count  
Unsigned 8-bit integer

ncp.dest\_dir\_handle Destination Directory Handle  
Unsigned 8-bit integer

```
ncp.dest_name_space  Destination Name Space
    Unsigned 8-bit integer
ncp.dest_path        Destination Path
    String
ncp.dest_path_16     Destination Path
    String
ncp.detach_during_processing  Detach During Processing
    Unsigned 16-bit integer
ncp.detach_for_bad_connection_number  Detach For Bad Connection Number
    Unsigned 16-bit integer
ncp.dir_base         Directory Base
    Unsigned 32-bit integer
ncp.dir_count        Directory Count
    Unsigned 16-bit integer
ncp.dir_handle       Directory Handle
    Unsigned 8-bit integer
ncp.dir_handle_long  Directory Handle
    Unsigned 32-bit integer
ncp.dir_handle_name  Handle Name
    Unsigned 8-bit integer
ncp.directory_access_rights  Directory Access Rights
    Unsigned 8-bit integer
ncp.directory_attributes  Directory Attributes
    Unsigned 8-bit integer
ncp.directory_entry_number  Directory Entry Number
    Unsigned 32-bit integer
ncp.directory_entry_number_word  Directory Entry Number
    Unsigned 16-bit integer
ncp.directory_id     Directory ID
    Unsigned 16-bit integer
ncp.directory_name_14  Directory Name
    String
ncp.directory_number  Directory Number
    Unsigned 32-bit integer
ncp.directory_path   Directory Path
    String
ncp.directory_services_object_id  Directory Services Object ID
    Unsigned 32-bit integer
ncp.directory_stamp  Directory Stamp (0xD1D1)
    Unsigned 16-bit integer
ncp.dirty_cache_buffers  Dirty Cache Buffers
    Unsigned 16-bit integer
ncp.disable_brcasts   Disable Broadcasts
    Boolean
```

```
ncp.disable_personal_brcasts  Disable Personal Broadcasts
    Boolean
ncp.disable_wdog_messages  Disable Watchdog Message
    Boolean
ncp.disk_channel_number  Disk Channel Number
    Unsigned 8-bit integer
ncp.disk_channel_table  Disk Channel Table
    Unsigned 8-bit integer
ncp.disk_space_limit  Disk Space Limit
    Unsigned 32-bit integer
ncp.dm_flags  DM Flags
    Unsigned 8-bit integer
ncp.dm_info_entries  DM Info Entries
    Unsigned 32-bit integer
ncp.dm_info_level  DM Info Level
    Unsigned 8-bit integer
ncp.dm_major_version  DM Major Version
    Unsigned 32-bit integer
ncp.dm_minor_version  DM Minor Version
    Unsigned 32-bit integer
ncp.dm_present_flag  Data Migration Present Flag
    Unsigned 8-bit integer
ncp.dma_channels_used  DMA Channels Used
    Unsigned 32-bit integer
ncp.dos_directory_base  DOS Directory Base
    Unsigned 32-bit integer
ncp.dos_directory_entry  DOS Directory Entry
    Unsigned 32-bit integer
ncp.dos_directory_entry_number  DOS Directory Entry Number
    Unsigned 32-bit integer
ncp.dos_file_attributes  DOS File Attributes
    Unsigned 8-bit integer
ncp.dos_parent_directory_entry  DOS Parent Directory Entry
    Unsigned 32-bit integer
ncp.dos_sequence  DOS Sequence
    Unsigned 32-bit integer
ncp.drive_cylinders  Drive Cylinders
    Unsigned 16-bit integer
ncp.drive_definition_string  Drive Definition
    String
ncp.drive_heads  Drive Heads
    Unsigned 8-bit integer
ncp.drive_mapping_table  Drive Mapping Table
    Byte array
```

```
ncp.drive_mirror_table  Drive Mirror Table
    Byte array
ncp.drive_removable_flag  Drive Removable Flag
    Unsigned 8-bit integer
ncp.drive_size  Drive Size
    Unsigned 32-bit integer
ncp.driver_board_name  Driver Board Name
    String
ncp.driver_log_name  Driver Logical Name
    String
ncp.driver_short_name  Driver Short Name
    String
ncp.dsired_acc_rights_compat  Compatibility
    Boolean
ncp.dsired_acc_rights_del_file_cls  Delete File Close
    Boolean
ncp.dsired_acc_rights_deny_r  Deny Read
    Boolean
ncp.dsired_acc_rights_deny_w  Deny Write
    Boolean
ncp.dsired_acc_rights_read_o  Read Only
    Boolean
ncp.dsired_acc_rights_w_thru  File Write Through
    Boolean
ncp.dsired_acc_rights_write_o  Write Only
    Boolean
ncp.dst_connection  Destination Connection ID
    Unsigned 32-bit integer
    The server's connection identification number
ncp.dst_ea_flags  Destination EA Flags
    Unsigned 16-bit integer
ncp.dst_ns_indicator  Destination Name Space Indicator
    Unsigned 16-bit integer
ncp.dst_queue_id  Destination Queue ID
    Unsigned 32-bit integer
ncp.dup_is_being_sent  Duplicate Is Being Sent Already Count
    Unsigned 32-bit integer
ncp.duplicate_replies_sent  Duplicate Replies Sent
    Unsigned 16-bit integer
ncp.dyn_mem_struct_cur  Current Used Dynamic Space
    Unsigned 32-bit integer
ncp.dyn_mem_struct_max  Max Used Dynamic Space
    Unsigned 32-bit integer
ncp.dyn_mem_struct_total  Total Dynamic Space
    Unsigned 32-bit integer
```

```
ncp.ea_access_flag  EA Access Flag
    Unsigned 16-bit integer
ncp.ea_bytes_written  Bytes Written
    Unsigned 32-bit integer
ncp.ea_count  Count
    Unsigned 32-bit integer
ncp.ea_data_size  Data Size
    Unsigned 32-bit integer
ncp.ea_data_size_duplicated  Data Size Duplicated
    Unsigned 32-bit integer
ncp.ea_deep_freeze  Deep Freeze
    Boolean
ncp.ea_delete_privileges  Delete Privileges
    Boolean
ncp.ea_duplicate_count  Duplicate Count
    Unsigned 32-bit integer
ncp.ea_error_codes  EA Error Codes
    Unsigned 16-bit integer
ncp.ea_flags  EA Flags
    Unsigned 16-bit integer
ncp.ea_handle  EA Handle
    Unsigned 32-bit integer
ncp.ea_handle_or_netware_handle_or_volume  EAHandle or NetWare Handle or Volume
    Unsigned 32-bit integer
ncp.ea_header_being_enlarged  Header Being Enlarged
    Boolean
ncp.ea_in_progress  In Progress
    Boolean
ncp.ea_key  EA Key
    String
ncp.ea_key_size  Key Size
    Unsigned 32-bit integer
ncp.ea_key_size_duplicated  Key Size Duplicated
    Unsigned 32-bit integer
ncp.ea_need_bit_flag  EA Need Bit Flag
    Boolean
ncp.ea_new_tally_used  New Tally Used
    Boolean
ncp.ea_permanent_memory  Permanent Memory
    Boolean
ncp.ea_read_privileges  Read Privileges
    Boolean
ncp.ea_score_card_present  Score Card Present
    Boolean
```

```
ncp.ea_system_ea_only  System EA Only
  Boolean
ncp.ea_tally_need_update  Tally Need Update
  Boolean
ncp.ea_value  EA Value
  String
ncp.ea_value_length  Value Length
  Unsigned 16-bit integer
ncp.ea_value_rep  EA Value
  String
ncp.ea_write_in_progress  Write In Progress
  Boolean
ncp.ea_write_privileges  Write Privileges
  Boolean
ncp.ecb_cxl_fails  ECB Cancel Failures
  Unsigned 32-bit integer
ncp.echo_socket  Echo Socket
  Unsigned 16-bit integer
ncp.effective_rights  Effective Rights
  Unsigned 8-bit integer
ncp.effective_rights_create  Create Rights
  Boolean
ncp.effective_rights_delete  Delete Rights
  Boolean
ncp.effective_rights_modify  Modify Rights
  Boolean
ncp.effective_rights_open  Open Rights
  Boolean
ncp.effective_rights_parental  Parental Rights
  Boolean
ncp.effective_rights_read  Read Rights
  Boolean
ncp.effective_rights_search  Search Rights
  Boolean
ncp.effective_rights_write  Write Rights
  Boolean
ncp.enable_brcasts  Enable Broadcasts
  Boolean
ncp.enable_personal_brcasts  Enable Personal Broadcasts
  Boolean
ncp.enable_wdog_messages  Enable Watchdog Message
  Boolean
ncp.encryption  Encryption
  Boolean
```

```
ncp.enqueue_send_cnt  Enqueued Send Count
    Unsigned 32-bit integer
ncp.enum_info_account  Accounting Information
    Boolean
ncp.enum_info_auth     Authentication Information
    Boolean
ncp.enum_info_lock     Lock Information
    Boolean
ncp.enum_info_mask     Return Information Mask
    Unsigned 8-bit integer
ncp.enum_info_name     Name Information
    Boolean
ncp.enum_info_print    Print Information
    Boolean
ncp.enum_info_stats    Statistical Information
    Boolean
ncp.enum_info_time     Time Information
    Boolean
ncp.enum_info_transport Transport Information
    Boolean
ncp.err_doing_async_read Error Doing Async Read Count
    Unsigned 32-bit integer
ncp.error_read_last_fat Error Reading Last FAT Count
    Unsigned 32-bit integer
ncp.event_offset      Event Offset
    Byte array
ncp.event_time        Event Time
    Unsigned 32-bit integer
ncp.exc_nds_ver       Exclude NDS Version
    Unsigned 32-bit integer
ncp.expiration_time   Expiration Time
    Unsigned 32-bit integer
ncp.ext_info          Extended Return Information
    Unsigned 16-bit integer
ncp.ext_info_64_bit_fs 64 Bit File Sizes
    Boolean
ncp.ext_info_access   Last Access
    Boolean
ncp.ext_info_dos_name DOS Name
    Boolean
ncp.ext_info_effective Effective
    Boolean
ncp.ext_info_flush    Flush Time
    Boolean
```

```
ncp.ext_info_mac_date  MAC Date
  Boolean

ncp.ext_info_mac_finder  MAC Finder
  Boolean

ncp.ext_info_newstyle  New Style
  Boolean

ncp.ext_info_parental  Parental
  Boolean

ncp.ext_info_sibling  Sibling
  Boolean

ncp.ext_info_update  Last Update
  Boolean

ncp.ext_router_active_flag  External Router Active Flag
  Boolean

ncp.extended_attribute_extants_used  Extended Attribute Extants Used
  Unsigned 32-bit integer

ncp.extended_attributes_defined  Extended Attributes Defined
  Unsigned 32-bit integer

ncp.extra_extra_use_count_node_count  Errors allocating an additional use count
  Unsigned 32-bit integer

ncp.extra_use_count_node_count  Errors allocating a use count node for TTS
  Unsigned 32-bit integer

ncp.f_size_64bit  64bit File Size
  Unsigned 64-bit integer

ncp.failed_alloc_req  Failed Alloc Request Count
  Unsigned 32-bit integer

ncp.fat_moved  Number of times the OS has move the location of FAT
  Unsigned 32-bit integer

ncp.fat_scan_errors  FAT Scan Errors
  Unsigned 16-bit integer

ncp.fat_write_err  Number of write errors in both original and mirrored copies o
  Unsigned 32-bit integer

ncp.fat_write_errors  FAT Write Errors
  Unsigned 16-bit integer

ncp.fatal_fat_write_errors  Fatal FAT Write Errors
  Unsigned 16-bit integer

ncp.fields_len_table  Fields Len Table
  Byte array

ncp.file_count  File Count
  Unsigned 16-bit integer

ncp.file_date  File Date
  Unsigned 16-bit integer

ncp.file_dir_win  File/Dir Window
  Unsigned 16-bit integer
```

```
ncp.file_execute_type  File Execute Type
    Unsigned 8-bit integer
ncp.file_ext_attr      File Extended Attributes
    Unsigned 8-bit integer
ncp.file_flags         File Flags
    Unsigned 32-bit integer
ncp.file_handle        Burst File Handle
    Unsigned 32-bit integer
    Packet Burst File Handle
ncp.file_limbo         File Limbo
    Unsigned 32-bit integer
ncp.file_lock_count    File Lock Count
    Unsigned 16-bit integer
ncp.file_mig_state     File Migration State
    Unsigned 8-bit integer
ncp.file_mode          File Mode
    Unsigned 8-bit integer
ncp.file_name          Filename
    String
ncp.file_name_12       Filename
    String
ncp.file_name_14       Filename
    String
ncp.file_name_16       Filename
    String
ncp.file_name_len      Filename Length
    Unsigned 8-bit integer
ncp.file_offset        File Offset
    Unsigned 32-bit integer
ncp.file_path          File Path
    String
ncp.file_size          File Size
    Unsigned 32-bit integer
ncp.file_system_id     File System ID
    Unsigned 8-bit integer
ncp.file_time          File Time
    Unsigned 16-bit integer
ncp.file_use_count     File Use Count
    Unsigned 16-bit integer
ncp.file_write_flags   File Write Flags
    Unsigned 8-bit integer
ncp.file_write_state   File Write State
    Unsigned 8-bit integer
ncp.filler             Filler
    Unsigned 8-bit integer
```

```
ncp.finder_attr  Finder Info Attributes
  Unsigned 16-bit integer
ncp.finder_attr_bundle  Object Has Bundle
  Boolean
ncp.finder_attr_desktop  Object on Desktop
  Boolean
ncp.finder_attr_invisible  Object is Invisible
  Boolean
ncp.first_packet_isnt_a_write  First Packet Isn't A Write Count
  Unsigned 32-bit integer
ncp.fixed_bit_mask  Fixed Bit Mask
  Unsigned 32-bit integer
ncp.fixed_bits_defined  Fixed Bits Defined
  Unsigned 16-bit integer
ncp.flag_bits  Flag Bits
  Unsigned 8-bit integer
ncp.flags  Flags
  Unsigned 8-bit integer
ncp.flags_def  Flags
  Unsigned 16-bit integer
ncp.flush_time  Flush Time
  Unsigned 32-bit integer
ncp.folder_flag  Folder Flag
  Unsigned 8-bit integer
ncp.force_flag  Force Server Down Flag
  Unsigned 8-bit integer
ncp.forged_detached_requests  Forged Detached Requests
  Unsigned 16-bit integer
ncp.forged_packet  Forged Packet Count
  Unsigned 32-bit integer
ncp.fork_count  Fork Count
  Unsigned 8-bit integer
ncp.fork_indicator  Fork Indicator
  Unsigned 8-bit integer
ncp.form_type  Form Type
  Unsigned 16-bit integer
ncp.form_type_count  Form Types Count
  Unsigned 32-bit integer
ncp.found_some_mem  Found Some Memory
  Unsigned 32-bit integer
ncp.fractional_time  Fractional Time in Seconds
  Unsigned 32-bit integer
ncp.fragger_handle  Fragment Handle
  Unsigned 32-bit integer
```

```
ncp.fragger_hndl  Fragment Handle
    Unsigned 16-bit integer
ncp.fragment_write_occurred  Fragment Write Occurred
    Unsigned 16-bit integer
ncp.free_blocks  Free Blocks
    Unsigned 32-bit integer
ncp.free_directory_entries  Free Directory Entries
    Unsigned 16-bit integer
ncp.freeable_limbo_sectors  Freeable Limbo Sectors
    Unsigned 32-bit integer
ncp.freed_clusters  Freed Clusters
    Unsigned 32-bit integer
ncp.fs_engine_flag  FS Engine Flag
    Boolean
ncp.full_name  Full Name
    String
ncp.func  Function
    Unsigned 8-bit integer
ncp.generic_block_size  Block Size
    Unsigned 32-bit integer
ncp.generic_capacity  Capacity
    Unsigned 32-bit integer
ncp.generic_cartridge_type  Cartridge Type
    Unsigned 32-bit integer
ncp.generic_child_count  Child Count
    Unsigned 32-bit integer
ncp.generic_ctl_mask  Control Mask
    Unsigned 32-bit integer
ncp.generic_func_mask  Function Mask
    Unsigned 32-bit integer
ncp.generic_ident_time  Identification Time
    Unsigned 32-bit integer
ncp.generic_ident_type  Identification Type
    Unsigned 32-bit integer
ncp.generic_label  Label
    String
ncp.generic_media_slot  Media Slot
    Unsigned 32-bit integer
ncp.generic_media_type  Media Type
    Unsigned 32-bit integer
ncp.generic_name  Name
    String
ncp.generic_object_uniq_id  Unique Object ID
    Unsigned 32-bit integer
```

```
ncp.generic_parent_count  Parent Count
    Unsigned 32-bit integer
ncp.generic_pref_unit_size Preferred Unit Size
    Unsigned 32-bit integer
ncp.generic_sib_count     Sibling Count
    Unsigned 32-bit integer
ncp.generic_spec_info_sz  Specific Information Size
    Unsigned 32-bit integer
ncp.generic_status       Status
    Unsigned 32-bit integer
ncp.generic_type         Type
    Unsigned 32-bit integer
ncp.generic_unit_size    Unit Size
    Unsigned 32-bit integer
ncp.get_ecb_buf          Get ECB Buffers
    Unsigned 32-bit integer
ncp.get_ecb_fails        Get ECB Failures
    Unsigned 32-bit integer
ncp.get_set_flag         Get Set Flag
    Unsigned 8-bit integer
ncp.group                NCP Group Type
    Unsigned 8-bit integer
ncp.guid                 GUID
    Byte array
ncp.had_an_out_of_order  Had An Out Of Order Write Count
    Unsigned 32-bit integer
ncp.handle_flag          Handle Flag
    Unsigned 8-bit integer
ncp.handle_info_level    Handle Info Level
    Unsigned 8-bit integer
ncp.hardware_rx_mismatch_count Hardware Receive Mismatch Count
    Unsigned 32-bit integer
ncp.held_bytes_read      Held Bytes Read
    Byte array
ncp.held_bytes_write     Held Bytes Written
    Byte array
ncp.held_conn_time       Held Connect Time in Minutes
    Unsigned 32-bit integer
ncp.hold_amount          Hold Amount
    Unsigned 32-bit integer
ncp.hold_cancel_amount   Hold Cancel Amount
    Unsigned 32-bit integer
ncp.hold_time            Hold Time
    Unsigned 32-bit integer
```

```
ncp.holder_id    Holder ID
                 Unsigned 32-bit integer
ncp.hops_to_net  Hop Count
                 Unsigned 16-bit integer
ncp.horiz_location Horizontal Location
                 Unsigned 16-bit integer
ncp.host_address Host Address
                 Byte array
ncp.hot_fix_blocks_available Hot Fix Blocks Available
                 Unsigned 16-bit integer
ncp.hot_fix_disabled Hot Fix Disabled
                 Unsigned 8-bit integer
ncp.hot_fix_table_size Hot Fix Table Size
                 Unsigned 16-bit integer
ncp.hot_fix_table_start Hot Fix Table Start
                 Unsigned 32-bit integer
ncp.huge_bit_mask Huge Bit Mask
                 Unsigned 32-bit integer
ncp.huge_bits_defined Huge Bits Defined
                 Unsigned 16-bit integer
ncp.huge_data    Huge Data
                 String
ncp.huge_data_used Huge Data Used
                 Unsigned 32-bit integer
ncp.huge_state_info Huge State Info
                 Byte array
ncp.i_ran_out_someone_else_did_it_0 I Ran Out Someone Else Did It Count 0
                 Unsigned 32-bit integer

    Unsigned 16-bit integer
ncp.lan_drv_bd_num             LAN Driver Board Number
    Unsigned 16-bit integer
ncp.lan_drv_card_id            LAN Driver Card ID
    Unsigned 16-bit integer
ncp.lan_drv_card_name          LAN Driver Card Name
    String
ncp.lan_drv_dma_usage1         Primary DMA Channel
    Unsigned 8-bit integer
ncp.lan_drv_dma_usage2         Secondary DMA Channel
    Unsigned 8-bit integer
ncp.lan_drv_flags              LAN Driver Flags
    Unsigned 16-bit integer
ncp.lan_drv_interrupt1         Primary Interrupt Vector
    Unsigned 8-bit integer
ncp.lan_drv_interrupt2         Secondary Interrupt Vector
    Unsigned 8-bit integer
```

```
ncp.lan_drv_io_ports_and_ranges_1  Primary Base I/O Port
    Unsigned 16-bit integer
ncp.lan_drv_io_ports_and_ranges_2  Number of I/O Ports
    Unsigned 16-bit integer
ncp.lan_drv_io_ports_and_ranges_3  Secondary Base I/O Port
    Unsigned 16-bit integer
ncp.lan_drv_io_ports_and_ranges_4  Number of I/O Ports
    Unsigned 16-bit integer
ncp.lan_drv_io_reserved  LAN Driver IO Reserved
    Byte array
ncp.lan_drv_line_speed  LAN Driver Line Speed
    Unsigned 16-bit integer
ncp.lan_drv_link  LAN Driver Link
    Unsigned 32-bit integer
ncp.lan_drv_log_name  LAN Driver Logical Name
    Byte array
ncp.lan_drv_major_ver  LAN Driver Major Version
    Unsigned 8-bit integer
ncp.lan_drv_max_rcv_size  LAN Driver Maximum Receive Size
    Unsigned 32-bit integer
ncp.lan_drv_max_size  LAN Driver Maximum Size
    Unsigned 32-bit integer
ncp.lan_drv_media_id  LAN Driver Media ID
    Unsigned 16-bit integer
ncp.lan_drv_mem_decode_0  LAN Driver Memory Decode 0
    Unsigned 32-bit integer
ncp.lan_drv_mem_decode_1  LAN Driver Memory Decode 1
    Unsigned 32-bit integer
ncp.lan_drv_mem_length_0  LAN Driver Memory Length 0
    Unsigned 16-bit integer
ncp.lan_drv_mem_length_1  LAN Driver Memory Length 1
    Unsigned 16-bit integer
ncp.lan_drv_minor_ver  LAN Driver Minor Version
    Unsigned 8-bit integer
ncp.lan_drv_rcv_size  LAN Driver Receive Size
    Unsigned 32-bit integer
ncp.lan_drv_reserved  LAN Driver Reserved
    Unsigned 16-bit integer
ncp.lan_drv_share  LAN Driver Sharing Flags
    Unsigned 16-bit integer
ncp.lan_drv_slot  LAN Driver Slot
    Unsigned 16-bit integer
ncp.lan_drv_snd_retries  LAN Driver Send Retries
    Unsigned 16-bit integer
```

```
ncp.lan_drv_src_route  LAN Driver Source Routing
    Unsigned 32-bit integer
ncp.lan_drv_trans_time  LAN Driver Transport Time
    Unsigned 16-bit integer
ncp.lan_dvr_cfg_major_vrs  LAN Driver Config - Major Version
    Unsigned 8-bit integer
ncp.lan_dvr_cfg_minor_vrs  LAN Driver Config - Minor Version
    Unsigned 8-bit integer
ncp.lan_dvr_mode_flags  LAN Driver Mode Flags
    Unsigned 8-bit integer
ncp.lan_dvr_node_addr  LAN Driver Node Address
    Byte array
ncp.large_internet_packets  Large Internet Packets (LIP) Disabled
    Boolean
ncp.last_access_date  Last Accessed Date
    Unsigned 16-bit integer
ncp.last_access_time  Last Accessed Time
    Unsigned 16-bit integer
ncp.last_garbage_collect  Last Garbage Collection
    Unsigned 32-bit integer
ncp.last_instance  Last Instance
    Unsigned 32-bit integer
ncp.last_record_seen  Last Record Seen
    Unsigned 16-bit integer
ncp.last_search_index  Search Index
    Unsigned 16-bit integer
ncp.last_seen  Last Seen
    Unsigned 32-bit integer
ncp.last_sequence_number  Sequence Number
    Unsigned 16-bit integer
ncp.last_time_rx_buff_was_alloc  Last Time a Receive Buffer was Allocated
    Unsigned 32-bit integer
ncp.length  Packet Length
    Unsigned 16-bit integer
ncp.length_64bit  64bit Length
    Byte array
ncp.level  Level
    Unsigned 8-bit integer
ncp.lfs_counters  LFS Counters
    Unsigned 32-bit integer
ncp.limb_count  Limb Count
    Unsigned 32-bit integer
ncp.limb_flags  Limb Flags
    Unsigned 32-bit integer
```

```
ncp.limb_scan_num  Limb Scan Number
    Unsigned 32-bit integer
ncp.limbo_data_streams_count  Limbo Data Streams Count
    Unsigned 32-bit integer
ncp.limbo_used  Limbo Used
    Unsigned 32-bit integer
ncp.lip_echo  Large Internet Packet Echo
    String
ncp.loaded_name_spaces  Loaded Name Spaces
    Unsigned 8-bit integer
ncp.local_connection_id  Local Connection ID
    Unsigned 32-bit integer
ncp.local_login_info_ccode  Local Login Info C Code
    Unsigned 8-bit integer
ncp.local_max_packet_size  Local Max Packet Size
    Unsigned 32-bit integer
ncp.local_max_recv_size  Local Max Recv Size
    Unsigned 32-bit integer
ncp.local_max_send_size  Local Max Send Size
    Unsigned 32-bit integer
ncp.local_target_socket  Local Target Socket
    Unsigned 32-bit integer
ncp.lock_area_len  Lock Area Length
    Unsigned 32-bit integer
ncp.lock_areas_start_offset  Lock Areas Start Offset
    Unsigned 32-bit integer
ncp.lock_flag  Lock Flag
    Unsigned 8-bit integer
ncp.lock_name  Lock Name
    String
ncp.lock_status  Lock Status
    Unsigned 8-bit integer
ncp.lock_timeout  Lock Timeout
    Unsigned 16-bit integer
ncp.lock_type  Lock Type
    Unsigned 8-bit integer
ncp.locked  Locked Flag
    Unsigned 8-bit integer
ncp.log_file_flag_high  Log File Flag (byte 2)
    Unsigned 8-bit integer
ncp.log_file_flag_low  Log File Flag
    Unsigned 8-bit integer
ncp.log_flag_call_back  Call Back Requested
    Boolean
```

```
ncp.log_flag_lock_file  Lock File Immediately
                          Boolean
ncp.log_ttl_rx_pkts    Total Received Packets
                          Unsigned 32-bit integer
ncp.log_ttl_tx_pkts    Total Transmitted Packets
                          Unsigned 32-bit integer
ncp.logged_count       Logged Count
                          Unsigned 16-bit integer
ncp.logged_object_id   Logged in Object ID
                          Unsigned 32-bit integer
ncp.logical_connection_number Logical Connection Number
                          Unsigned 16-bit integer
ncp.logical_drive_count Logical Drive Count
                          Unsigned 8-bit integer
ncp.logical_drive_number Logical Drive Number
                          Unsigned 8-bit integer
ncp.logical_lock_threshold LogicalLockThreshold
                          Unsigned 8-bit integer
ncp.logical_record_name Logical Record Name
                          String
ncp.login_expiration_time Login Expiration Time
                          Unsigned 32-bit integer
ncp.login_key          Login Key
                          Byte array
ncp.login_name         Login Name
                          String
ncp.long_name          Long Name
                          String
ncp.lru_block_was_dirty LRU Block Was Dirty
                          Unsigned 16-bit integer
ncp.lru_sit_time       LRU Sitting Time
                          Unsigned 32-bit integer
ncp.mac_attr           Attributes
                          Unsigned 16-bit integer
ncp.mac_attr_archive   Archive
                          Boolean
ncp.mac_attr_execute_only Execute Only
                          Boolean
ncp.mac_attr_hidden    Hidden
                          Boolean
ncp.mac_attr_index     Index
                          Boolean
ncp.mac_attr_r_audit   Read Audit
                          Boolean
```

```
ncp.mac_attr_r_only  Read Only
  Boolean
ncp.mac_attr_share  Shareable File
  Boolean
ncp.mac_attr_smodel  Search Mode
  Boolean
ncp.mac_attr_smode2  Search Mode
  Boolean
ncp.mac_attr_smode3  Search Mode
  Boolean
ncp.mac_attr_subdirectory  Subdirectory
  Boolean
ncp.mac_attr_system  System
  Boolean
ncp.mac_attr_transaction  Transaction
  Boolean
ncp.mac_attr_w_audit  Write Audit
  Boolean
ncp.mac_backup_date  Mac Backup Date
  Unsigned 16-bit integer
ncp.mac_backup_time  Mac Backup Time
  Unsigned 16-bit integer
ncp.mac_base_directory_id  Mac Base Directory ID
  Unsigned 32-bit integer
ncp.mac_create_date  Mac Create Date
  Unsigned 16-bit integer
ncp.mac_create_time  Mac Create Time
  Unsigned 16-bit integer
ncp.mac_destination_base_id  Mac Destination Base ID
  Unsigned 32-bit integer
ncp.mac_finder_info  Mac Finder Information
  Byte array
ncp.mac_last_seen_id  Mac Last Seen ID
  Unsigned 32-bit integer
ncp.mac_root_ids  MAC Root IDs
  Unsigned 32-bit integer
ncp.mac_source_base_id  Mac Source Base ID
  Unsigned 32-bit integer
ncp.major_version  Major Version
  Unsigned 32-bit integer
ncp.map_hash_node_count  Map Hash Node Count
  Unsigned 32-bit integer
ncp.max_byte_cnt  Maximum Byte Count
  Unsigned 32-bit integer
```

ncp.max\_bytes Maximum Number of Bytes  
Unsigned 16-bit integer

ncp.max\_data\_streams Maximum Data Streams  
Unsigned 32-bit integer

ncp.max\_dir\_depth Maximum Directory Depth  
Unsigned 32-bit integer

ncp.max\_dirty\_time Maximum Dirty Time  
Unsigned 32-bit integer

ncp.max\_num\_of\_conn Maximum Number of Connections  
Unsigned 32-bit integer

ncp.max\_num\_of\_dir\_cache\_buff Maximum Number Of Directory Cache Buffers  
Unsigned 32-bit integer

ncp.max\_num\_of\_lans Maximum Number Of LAN's  
Unsigned 32-bit integer

ncp.max\_num\_of\_media\_types Maximum Number of Media Types  
Unsigned 32-bit integer

ncp.max\_num\_of\_medias Maximum Number Of Media's  
Unsigned 32-bit integer

ncp.max\_num\_of\_nme\_sps Maximum Number Of Name Spaces  
Unsigned 32-bit integer

ncp.max\_num\_of\_protocols Maximum Number of Protocols  
Unsigned 32-bit integer

ncp.max\_num\_of\_spool\_pr Maximum Number Of Spool Printers  
Unsigned 32-bit integer

ncp.max\_num\_of\_stacks Maximum Number Of Stacks  
Unsigned 32-bit integer

ncp.max\_num\_of\_users Maximum Number Of Users  
Unsigned 32-bit integer

ncp.max\_num\_of\_vol Maximum Number of Volumes  
Unsigned 32-bit integer

ncp.max\_phy\_packet\_size Maximum Physical Packet Size  
Unsigned 32-bit integer

ncp.max\_read\_data\_reply\_size Max Read Data Reply Size  
Unsigned 16-bit integer

ncp.max\_reply\_obj\_id\_count Max Reply Object ID Count  
Unsigned 8-bit integer

ncp.max\_space Maximum Space  
Unsigned 16-bit integer

ncp.maxspace Maximum Space  
Unsigned 32-bit integer

ncp.may\_had\_out\_of\_order Maybe Had Out Of Order Writes Count  
Unsigned 32-bit integer

ncp.media\_list Media List  
Unsigned 32-bit integer

```
ncp.media_list_count  Media List Count
    Unsigned 32-bit integer
ncp.media_name        Media Name
    String
ncp.media_number      Media Number
    Unsigned 32-bit integer
ncp.media_object_type Object Type
    Unsigned 8-bit integer
ncp.member_name       Member Name
    String
ncp.member_type       Member Type
    Unsigned 16-bit integer
ncp.message_language  NLM Language
    Unsigned 32-bit integer
ncp.migrated_files    Migrated Files
    Unsigned 32-bit integer
ncp.migrated_sectors  Migrated Sectors
    Unsigned 32-bit integer
ncp.min_cache_report_thresh  Minimum Cache Report Threshold
    Unsigned 32-bit integer
ncp.min_nds_version   Minimum NDS Version
    Unsigned 32-bit integer
ncp.min_num_of_cache_buff  Minimum Number Of Cache Buffers
    Unsigned 32-bit integer
ncp.min_num_of_dir_cache_buff  Minimum Number Of Directory Cache Buffers
    Unsigned 32-bit integer
ncp.min_time_since_file_delete  Minimum Time Since File Delete
    Unsigned 32-bit integer
ncp.minor_version     Minor Version
    Unsigned 32-bit integer
ncp.missing_data_count  Missing Data Count
    Unsigned 16-bit integer
    Number of bytes of missing data
ncp.missing_data_offset  Missing Data Offset
    Unsigned 32-bit integer
    Offset of beginning of missing data
ncp.missing_fraglist_count  Missing Fragment List Count
    Unsigned 16-bit integer
    Number of missing fragments reported
ncp.mixed_mode_path_flag  Mixed Mode Path Flag
    Unsigned 8-bit integer
ncp.modified_counter    Modified Counter
    Unsigned 32-bit integer
ncp.modified_date       Modified Date
    Unsigned 16-bit integer
```

```
ncp.modified_time    Modified Time
                    Unsigned 16-bit integer
ncp.modifier_id      Modifier ID
                    Unsigned 32-bit integer
ncp.modify_dos_create  Creator ID
                    Boolean
ncp.modify_dos_delete  Archive Date
                    Boolean
ncp.modify_dos_info_mask  Modify DOS Info Mask
                    Unsigned 16-bit integer
ncp.modify_dos_inheritance  Inheritance
                    Boolean
ncp.modify_dos_laccess  Last Access
                    Boolean
ncp.modify_dos_max_space  Maximum Space
                    Boolean
ncp.modify_dos_mdate  Modify Date
                    Boolean
ncp.modify_dos_mid  Modifier ID
                    Boolean
ncp.modify_dos_mtime  Modify Time
                    Boolean
ncp.modify_dos_open  Creation Time
                    Boolean
ncp.modify_dos_parent  Archive Time
                    Boolean
ncp.modify_dos_read  Attributes
                    Boolean
ncp.modify_dos_search  Archiver ID
                    Boolean
ncp.modify_dos_write  Creation Date
                    Boolean
ncp.more_flag  More Flag
                    Unsigned 8-bit integer
ncp.more_properties  More Properties
                    Unsigned 8-bit integer
ncp.move_cache_node  Move Cache Node Count
                    Unsigned 32-bit integer
ncp.move_cache_node_from_avai  Move Cache Node From Avail Count
                    Unsigned 32-bit integer
ncp.moved_the_ack_bit_dn  Moved The ACK Bit Down Count
                    Unsigned 32-bit integer
ncp.msg_flag  Broadcast Message Flag
                    Unsigned 8-bit integer
```

```
ncp.mv_string  Attribute Name
               String
ncp.name       Name
               String
ncp.name12     Name
               String
ncp.name_len   Name Space Length
               Unsigned 8-bit integer
ncp.name_length Name Length
               Unsigned 8-bit integer
ncp.name_list  Name List
               Unsigned 32-bit integer
ncp.name_space Name Space
               Unsigned 8-bit integer
ncp.name_space_name Name Space Name
               String
ncp.name_type  nameType
               Unsigned 32-bit integer
ncp.ncompletion_code Completion Code
               Unsigned 32-bit integer
ncp.ncp_data_size NCP Data Size
               Unsigned 32-bit integer
ncp.ncp_encoded_strings NCP Encoded Strings
               Boolean
ncp.ncp_encoded_strings_bits NCP Encoded Strings Bits
               Unsigned 32-bit integer
ncp.ncp_extension_major_version NCP Extension Major Version
               Unsigned 8-bit integer
ncp.ncp_extension_minor_version NCP Extension Minor Version
               Unsigned 8-bit integer
ncp.ncp_extension_name NCP Extension Name
               String
ncp.ncp_extension_number NCP Extension Number
               Unsigned 32-bit integer
ncp.ncp_extension_numbers NCP Extension Numbers
               Unsigned 32-bit integer
ncp.ncp_extension_revision_number NCP Extension Revision Number
               Unsigned 8-bit integer
ncp.ncp_peak_sta_in_use Peak Number of Connections since Server was brought up
               Unsigned 32-bit integer
ncp.ncp_sta_in_use Number of Workstations Connected to Server
               Unsigned 32-bit integer
ncp.ndirty_blocks Number of Dirty Blocks
               Unsigned 32-bit integer
```

```
ncp.nds_acflags  Attribute Constraint Flags
    Unsigned 32-bit integer
ncp.nds_acl_add  Access Control Lists to Add
    Unsigned 32-bit integer
ncp.nds_acl_del  Access Control Lists to Delete
    Unsigned 32-bit integer
ncp.nds_add_delete_self  Add/Delete Self?
    Boolean
ncp.nds_add_entry  Add Entry?
    Boolean
ncp.nds_all_attr  All Attributes
    Unsigned 32-bit integer
    Return all Attributes?
ncp.nds_asn1  ASN.1 ID
    Byte array
ncp.nds_att_add  Attribute to Add
    Unsigned 32-bit integer
ncp.nds_att_del  Attribute to Delete
    Unsigned 32-bit integer

                         Boolean

ncp.ns_info_mask_udelete  Update Date
                           Boolean

ncp.ns_info_mask_uid  Update ID
                       Boolean

ncp.ns_info_mask_utime  Update Time
                         Boolean

ncp.ns_specific_info  Name Space Specific Info
                      String

ncp.num_bytes  Number of Bytes
               Unsigned 16-bit integer

ncp.num_dir_cache_buff  Number Of Directory Cache Buffers
                        Unsigned 32-bit integer

ncp.num_of_active_tasks  Number of Active Tasks
                          Unsigned 8-bit integer
```

ncp.num\_of\_allocs Number of Allocations  
Unsigned 32-bit integer

ncp.num\_of\_cache\_check\_no\_wait Number Of Cache Check No Wait  
Unsigned 32-bit integer

ncp.num\_of\_cache\_checks Number Of Cache Checks  
Unsigned 32-bit integer

ncp.num\_of\_cache\_dirty\_checks Number Of Cache Dirty Checks  
Unsigned 32-bit integer

ncp.num\_of\_cache\_hits Number Of Cache Hits  
Unsigned 32-bit integer

ncp.num\_of\_cache\_hits\_no\_wait Number Of Cache Hits No Wait  
Unsigned 32-bit integer

ncp.num\_of\_cc\_in\_pkt Number of Custom Counters in Packet  
Unsigned 32-bit integer

ncp.num\_of\_checks Number of Checks  
Unsigned 32-bit integer

ncp.num\_of\_dir\_cache\_buff Number Of Directory Cache Buffers  
Unsigned 32-bit integer

ncp.num\_of\_dirty\_cache\_checks Number Of Dirty Cache Checks  
Unsigned 32-bit integer

ncp.num\_of\_entries Number of Entries  
Unsigned 32-bit integer

ncp.num\_of\_files\_migrated Number Of Files Migrated  
Unsigned 32-bit integer

ncp.num\_of\_garb\_coll Number of Garbage Collections  
Unsigned 32-bit integer

ncp.num\_of\_ncp\_reqs Number of NCP Requests since Server was brought up  
Unsigned 32-bit integer

ncp.num\_of\_ref\_publics Number of Referenced Public Symbols  
Unsigned 32-bit integer

ncp.num\_of\_segments Number of Segments  
Unsigned 32-bit integer

ncp.number\_of\_cpus Number of CPU's  
Unsigned 32-bit integer

ncp.number\_of\_data\_streams Number of Data Streams  
Unsigned 16-bit integer

ncp.number\_of\_data\_streams\_long Number of Data Streams  
Unsigned 32-bit integer

ncp.number\_of\_dynamic\_memory\_areas Number Of Dynamic Memory Areas  
Unsigned 16-bit integer

ncp.number\_of\_entries Number of Entries  
Unsigned 8-bit integer

ncp.number\_of\_locks Number of Locks  
Unsigned 8-bit integer

ncp.number\_of\_minutes\_to\_delay Number of Minutes to Delay  
Unsigned 32-bit integer

ncp.number\_of\_ncp\_extensions Number Of NCP Extensions  
Unsigned 32-bit integer

ncp.number\_of\_ns\_loaded Number Of Name Spaces Loaded  
Unsigned 16-bit integer

ncp.number\_of\_protocols Number of Protocols  
Unsigned 8-bit integer

ncp.number\_of\_records Number of Records  
Unsigned 16-bit integer

ncp.number\_of\_semaphores Number Of Semaphores  
Unsigned 16-bit integer

ncp.number\_of\_service\_processes Number Of Service Processes  
Unsigned 8-bit integer

ncp.number\_of\_set\_categories Number Of Set Categories  
Unsigned 32-bit integer

ncp.number\_of\_sms Number Of Storage Medias  
Unsigned 32-bit integer

ncp.number\_of\_stations Number of Stations  
Unsigned 8-bit integer

ncp.nxt\_search\_num Next Search Number  
Unsigned 32-bit integer

ncp.packet_rs_too_small_count  Receive Packet Too Small Count
                  Unsigned 32-bit integer
ncp.packet_rx_misc_error_count  Receive Packet Misc Error Count
                  Unsigned 32-bit integer
```

ncp.packet\_rx\_overflow\_count Receive Packet Overflow Count  
Unsigned 32-bit integer

ncp.packet\_rx\_too\_big\_count Receive Packet Too Big Count  
Unsigned 32-bit integer

ncp.packet\_seqno Packet Sequence Number  
Unsigned 32-bit integer  
Sequence number of this packet in a burst

ncp.packet\_tx\_misc\_error\_count Transmit Packet Misc Error Count  
Unsigned 32-bit integer

ncp.packet\_tx\_too\_big\_count Transmit Packet Too Big Count  
Unsigned 32-bit integer

ncp.packet\_tx\_too\_small\_count Transmit Packet Too Small Count  
Unsigned 32-bit integer

ncp.packets\_discarded\_by\_hop\_count Packets Discarded By Hop Count  
Unsigned 16-bit integer

ncp.packets\_discarded\_unknown\_net Packets Discarded Unknown Net  
Unsigned 16-bit integer

ncp.packets\_from\_invalid\_connection Packets From Invalid Connection  
Unsigned 16-bit integer

ncp.packets\_received\_during\_processing Packets Received During Processing  
Unsigned 16-bit integer

ncp.packets\_with\_bad\_request\_type Packets With Bad Request Type  
Unsigned 16-bit integer

ncp.packets\_with\_bad\_sequence\_number Packets With Bad Sequence Number  
Unsigned 16-bit integer

ncp.page\_table\_owner\_flag Page Table Owner  
Unsigned 32-bit integer

ncp.parent\_base\_id Parent Base ID  
Unsigned 32-bit integer

ncp.parent\_directory\_base Parent Directory Base  
Unsigned 32-bit integer

ncp.parent\_dos\_directory\_base Parent DOS Directory Base  
Unsigned 32-bit integer

ncp.parent\_id Parent ID  
Unsigned 32-bit integer

ncp.parent\_object\_number Parent Object Number  
Unsigned 32-bit integer

ncp.password Password  
String

ncp.path Path  
String

ncp.path16 Path  
String

ncp.path\_and\_name Path and Name  
String

```
ncp.path_base      Path Base
                   Unsigned 8-bit integer
ncp.path_component_count  Path Component Count
                   Unsigned 16-bit integer
ncp.path_component_size  Path Component Size
                   Unsigned 16-bit integer
ncp.path_cookie_flags  Path Cookie Flags
                   Unsigned 16-bit integer
ncp.path_count     Path Count
                   Unsigned 8-bit integer
ncp.pending_io_commands  Pending IO Commands
                   Unsigned 16-bit integer
ncp.percent_of_vol_used_by_dirs  Percent Of Volume Used By Directories
                   Unsigned 32-bit integer
ncp.physical_disk_channel  Physical Disk Channel
                   Unsigned 8-bit integer
ncp.physical_disk_number  Physical Disk Number
                   Unsigned 8-bit integer
ncp.physical_drive_count  Physical Drive Count
                   Unsigned 8-bit integer
ncp.physical_drive_type  Physical Drive Type
                   Unsigned 8-bit integer
ncp.physical_lock_threshold  Physical Lock Threshold
                   Unsigned 8-bit integer
ncp.physical_read_errors  Physical Read Errors
                   Unsigned 16-bit integer
ncp.physical_read_requests  Physical Read Requests
                   Unsigned 32-bit integer
ncp.physical_write_errors  Physical Write Errors
                   Unsigned 16-bit integer
ncp.physical_write_requests  Physical Write Requests
                   Unsigned 32-bit integer
ncp.ping_version   NDS Version
                   Unsigned 16-bit integer
ncp.poll_abort_conn  Poller Aborted The Connection Count
                   Unsigned 32-bit integer
ncp.poll_rem_old_out_of_order  Poller Removed Old Out Of Order Count
                   Unsigned 32-bit integer
ncp.pool_name      Pool Name
                   String
ncp.positive_acknowledges_sent  Positive Acknowledges Sent
                   Unsigned 16-bit integer
ncp.post_poned_events  Postponed Events
                   Unsigned 32-bit integer
```

```
ncp.pre_compressed_sectors  Precompressed Sectors
    Unsigned 32-bit integer
ncp.previous_control_packet  Previous Control Packet Count
    Unsigned 32-bit integer
ncp.previous_record  Previous Record
    Unsigned 32-bit integer
ncp.primary_entry  Primary Entry
    Unsigned 32-bit integer
ncp.print_flags  Print Flags
    Unsigned 8-bit integer
ncp.print_flags_banner  Print Banner Page
    Boolean
ncp.print_flags_cr  Create
    Boolean
ncp.print_flags_del_spool  Delete Spool File after Printing
    Boolean
ncp.print_flags_exp_tabs  Expand Tabs in the File
    Boolean
ncp.print_flags_ff  Suppress Form Feeds
    Boolean
ncp.print_server_version  Print Server Version
    Unsigned 8-bit integer
ncp.print_to_file_flag  Print to File Flag
    Boolean
ncp.printer_halted  Printer Halted
    Unsigned 8-bit integer
ncp.printer_offline  Printer Off-Line
    Unsigned 8-bit integer
ncp.priority  Priority
    Unsigned 32-bit integer
ncp.privileges  Login Privileges
    Unsigned 32-bit integer
ncp.pro_dos_info  Pro DOS Info
    Byte array
ncp.processor_type  Processor Type
    Unsigned 8-bit integer
ncp.product_major_version  Product Major Version
    Unsigned 16-bit integer
ncp.product_minor_version  Product Minor Version
    Unsigned 16-bit integer
ncp.product_revision_version  Product Revision Version
    Unsigned 8-bit integer
ncp.projected_comp_size  Projected Compression Size
    Unsigned 32-bit integer
```

```
ncp.property_data    Property Data
    Byte array
ncp.property_has_more_segments  Property Has More Segments
    Unsigned 8-bit integer
ncp.property_name    Property Name
    String
ncp.property_name_16  Property Name
    String
ncp.property_segment  Property Segment
    Unsigned 8-bit integer
ncp.property_type    Property Type
    Unsigned 8-bit integer
ncp.property_value    Property Value
    String
ncp.proposed_max_size  Proposed Max Size
    Unsigned 16-bit integer
ncp.protocol_board_num  Protocol Board Number
    Unsigned 32-bit integer
ncp.protocol_flags    Protocol Flags
    Unsigned 32-bit integer
ncp.protocol_id      Protocol ID
    Byte array
ncp.protocol_name    Protocol Name
    String
ncp.protocol_number  Protocol Number
    Unsigned 16-bit integer
ncp.purge_c_code    Purge Completion Code
    Unsigned 32-bit integer
ncp.purge_count    Purge Count
    Unsigned 32-bit integer
ncp.purge_flags    Purge Flags
    Unsigned 16-bit integer
ncp.purge_list    Purge List
    Unsigned 32-bit integer
ncp.purgeable_blocks  Purgeable Blocks
    Unsigned 32-bit integer
ncp.qms_version    QMS Version
    Unsigned 8-bit integer
ncp.queue_id      Queue ID
    Unsigned 32-bit integer
ncp.queue_name    Queue Name
    String
ncp.queue_start_position  Queue Start Position
    Unsigned 32-bit integer
```

```
ncp.queue_status  Queue Status
    Unsigned 8-bit integer
ncp.queue_status_new_jobs  Operator does not want to add jobs to the queue
    Boolean
ncp.queue_status_pserver  Operator does not want additional servers attaching
    Boolean
ncp.queue_status_svc_jobs  Operator does not want servers to service jobs
    Boolean
ncp.queue_type  Queue Type
    Unsigned 16-bit integer
ncp.r_tag_num  Resource Tag Number
    Unsigned 32-bit integer
ncp.re_mirror_current_offset  ReMirror Current Offset
    Unsigned 32-bit integer
ncp.re_mirror_drive_number  ReMirror Drive Number
    Unsigned 8-bit integer
ncp.read_beyond_write  Read Beyond Write
    Unsigned 16-bit integer
ncp.read_exist_blk  Read Existing Block Count
    Unsigned 32-bit integer
ncp.read_exist_part_read  Read Existing Partial Read Count
    Unsigned 32-bit integer
ncp.read_exist_read_err  Read Existing Read Error Count
    Unsigned 32-bit integer
ncp.read_exist_write_wait  Read Existing Write Wait Count
    Unsigned 32-bit integer
ncp.realloc_slot  Re-Allocate Slot Count
    Unsigned 32-bit integer
ncp.realloc_slot_came_too_soon  Re-Allocate Slot Came Too Soon Count
    Unsigned 32-bit integer
ncp.rec_lock_count  Record Lock Count
    Unsigned 16-bit integer
ncp.record_end  Record End
    Unsigned 32-bit integer
ncp.record_in_use  Record in Use
    Unsigned 16-bit integer
ncp.record_start  Record Start
    Unsigned 32-bit integer
ncp.redirected_printer  Redirected Printer
    Unsigned 8-bit integer
ncp.reexecute_request  Re-Execute Request Count
    Unsigned 32-bit integer
ncp.ref_addcount  Address Count
    Unsigned 32-bit integer
```

```
ncp.ref_rec Referral Record
  Unsigned 32-bit integer
ncp.reference_count Reference Count
  Unsigned 32-bit integer
ncp.relationships_count Relations Count
  Unsigned 16-bit integer
ncp.rem_cache_node Remove Cache Node Count
  Unsigned 32-bit integer
ncp.rem_cache_node_from_avail Remove Cache Node From Avail Count
  Unsigned 32-bit integer
ncp.remote_max_packet_size Remote Max Packet Size
  Unsigned 32-bit integer
ncp.remote_target_id Remote Target ID
  Unsigned 32-bit integer
ncp.removable_flag Removable Flag
  Unsigned 16-bit integer
ncp.remove_open_rights Remove Open Rights
  Unsigned 8-bit integer
ncp.remove_open_rights_comp Compatibility
  Boolean
ncp.remove_open_rights_dr Deny Read
  Boolean
ncp.remove_open_rights_dw Deny Write
  Boolean
ncp.remove_open_rights_ro Read Only
  Boolean
ncp.remove_open_rights_wo Write Only
  Boolean
ncp.remove_open_rights_write_thru Write Through
  Boolean
ncp.rename_flag Rename Flag
  Unsigned 8-bit integer
ncp.rename_flag_comp Compatability allows files that are marked read only to be
  Boolean
ncp.rename_flag_no Name Only renames only the specified name space entry name
  Boolean
ncp.rename_flag_ren Rename to Myself allows file to be renamed to it's original
  Boolean
ncp.replies_cancelled Replies Cancelled
  Unsigned 16-bit integer
ncp.reply_canceled Reply Canceled Count
  Unsigned 32-bit integer
ncp.reply_queue_job_numbers Reply Queue Job Numbers
  Unsigned 32-bit integer
```

```
ncp.req_frame_num  Response to Request in Frame Number
  Frame number
ncp.request_bit_map  Request Bit Map
  Unsigned 16-bit integer
ncp.request_bit_map_ratt  Return Attributes
  Boolean
ncp.request_bit_map_ret_acc_date  Access Date
  Boolean
ncp.request_bit_map_ret_acc_priv  Access Privileges
  Boolean
ncp.request_bit_map_ret_afp_ent  AFP Entry ID
  Boolean
ncp.request_bit_map_ret_afp_parent  AFP Parent Entry ID
  Boolean
ncp.request_bit_map_ret_bak_date  Backup Date&Time
  Boolean
ncp.request_bit_map_ret_cr_date  Creation Date
  Boolean
ncp.request_bit_map_ret_data_fork  Data Fork Length
  Boolean
ncp.request_bit_map_ret_finder  Finder Info
  Boolean
ncp.request_bit_map_ret_long_nm  Long Name
  Boolean
ncp.request_bit_map_ret_mod_date  Modify Date&Time
  Boolean
ncp.request_bit_map_ret_num_off  Number of Offspring
  Boolean
ncp.request_bit_map_ret_owner  Owner ID
  Boolean
ncp.request_bit_map_ret_res_fork  Resource Fork Length
  Boolean
ncp.request_bit_map_ret_short  Short Name
  Boolean
ncp.request_code  Request Code
  Unsigned 8-bit integer
ncp.requests_reprocessed  Requests Reprocessed
  Unsigned 16-bit integer
ncp.reserved  Reserved
  Unsigned 8-bit integer
ncp.reserved10  Reserved
  Byte array
ncp.reserved12  Reserved
  Byte array
```

```
ncp.reserved120  Reserved

ncp.reserved_or_directory_number  Reserved or Directory Number (see EAFlags)
                                   Unsigned 32-bit integer
ncp.resource_count  Resource Count
                   Unsigned 32-bit integer
ncp.resource_fork_len  Resource Fork Len
                       Unsigned 32-bit integer
ncp.resource_fork_size  Resource Fork Size
                        Unsigned 32-bit integer
ncp.resource_name  Resource Name
                  String
ncp.resource_sig  Resource Signature
                 String
```

```
ncp.restore_time  Restore Time
    Unsigned 32-bit integer
ncp.restriction  Disk Space Restriction
    Unsigned 32-bit integer
ncp.restrictions_enforced  Disk Restrictions Enforce Flag
    Unsigned 8-bit integer
ncp.ret_info_mask  Return Information
    Unsigned 16-bit integer
ncp.ret_info_mask_actual  Return Actual Information
    Boolean
ncp.ret_info_mask_alloc  Return Allocation Space Information
    Boolean
ncp.ret_info_mask_arch  Return Archive Information
    Boolean
ncp.ret_info_mask_attr  Return Attribute Information
    Boolean
ncp.ret_info_mask_create  Return Creation Information
    Boolean
ncp.ret_info_mask_dir  Return Directory Information
    Boolean
ncp.ret_info_mask_eattr  Return Extended Attributes Information
    Boolean
ncp.ret_info_mask_fname  Return File Name Information
    Boolean
ncp.ret_info_mask_id  Return ID Information
    Boolean
ncp.ret_info_mask_logical  Return Logical Information
    Boolean
ncp.ret_info_mask_mod  Return Modify Information
    Boolean
ncp.ret_info_mask_ns  Return Name Space Information
    Boolean
ncp.ret_info_mask_ns_attr  Return Name Space Attributes Information
    Boolean
ncp.ret_info_mask_rights  Return Rights Information
    Boolean
ncp.ret_info_mask_size  Return Size Information
    Boolean
ncp.ret_info_mask_tspace  Return Total Space Information
    Boolean
ncp.retry_tx_count  Transmit Retry Count
    Unsigned 32-bit integer
ncp.return_info_count  Return Information Count
    Unsigned 32-bit integer
```

```
ncp.returned_list_count  Returned List Count
    Unsigned 32-bit integer
ncp.rev_query_flag      Revoke Rights Query Flag
    Unsigned 8-bit integer
ncp.revent              Event
    Unsigned 16-bit integer
ncp.revision            Revision
    Unsigned 32-bit integer
ncp.rights_grant_mask   Grant Rights
    Unsigned 8-bit integer
ncp.rights_grant_mask_create  Create
    Boolean
ncp.rights_grant_mask_del   Delete
    Boolean
ncp.rights_grant_mask_mod   Modify
    Boolean
ncp.rights_grant_mask_open  Open
    Boolean
ncp.rights_grant_mask_parent  Parental
    Boolean
ncp.rights_grant_mask_read  Read
    Boolean
ncp.rights_grant_mask_search  Search
    Boolean
ncp.rights_grant_mask_write  Write
    Boolean
ncp.rights_revoke_mask   Revoke Rights
    Unsigned 8-bit integer
ncp.rights_revoke_mask_create  Create
    Boolean
ncp.rights_revoke_mask_del   Delete
    Boolean
ncp.rights_revoke_mask_mod   Modify
    Boolean
ncp.rights_revoke_mask_open  Open

ncp.rights_revoke_mask_read  Read
    Boolean
ncp.rights_revoke_mask_search  Search
    Boolean
ncp.rights_revoke_mask_write  Write
    Boolean
```

```
ncp.rip_socket_num  RIP Socket Number
    Unsigned 16-bit integer
ncp.rnum  Replica Number
    Unsigned 16-bit integer
ncp.route_hops  Hop Count
    Unsigned 16-bit integer
ncp.route_time  Route Time
    Unsigned 16-bit integer
ncp.router_dn_flag  Router Down Flag
    Boolean
ncp.rpc_c_code  RPC Completion Code
    Unsigned 16-bit integer
ncp.rpy_nearest_srv_flag  Reply to Nearest Server Flag
    Boolean
ncp.rstate  Replica State
    String
ncp.rtype  Replica Type
    String
ncp.rx_buffer_size  Receive Buffer Size
    Unsigned 32-bit integer
ncp.rx_buffers  Receive Buffers
    Unsigned 32-bit integer
ncp.rx_buffers_75  Receive Buffers Warning Level
    Unsigned 32-bit integer
ncp.rx_buffers_checked_out  Receive Buffers Checked Out Count
    Unsigned 32-bit integer
ncp.s_day  Day
    Unsigned 8-bit integer
ncp.s_day_of_week  Day of Week
    Unsigned 8-bit integer
ncp.s_hour  Hour
    Unsigned 8-bit integer
ncp.s_m_info  Storage Media Information
    Unsigned 8-bit integer
ncp.s_minute  Minutes
    Unsigned 8-bit integer
ncp.s_module_name  Storage Module Name
    String
ncp.s_month  Month
    Unsigned 8-bit integer
ncp.s_offset_64bit  64bit Starting Offset
    Byte array
ncp.s_second  Seconds
    Unsigned 8-bit integer
```

```
ncp.salvageable_file_entry_number  Salvageable File Entry Number
    Unsigned 32-bit integer
ncp.sap_socket_number  SAP Socket Number
    Unsigned 16-bit integer
ncp.sattr  Search Attributes
    Unsigned 8-bit integer
ncp.sattr_archive  Archive
    Boolean
ncp.sattr_execute_confirm  Execute Confirm
    Boolean
ncp.sattr_exonly  Execute-Only Files Allowed
    Boolean
ncp.sattr_hid  Hidden Files Allowed
    Boolean
ncp.sattr_ronly  Read-Only Files Allowed
    Boolean
ncp.sattr_shareable  Shareable
    Boolean
ncp.sattr_sub  Subdirectories Only
    Boolean
ncp.sattr_sys  System Files Allowed
    Boolean
ncp.saved_an_out_of_order_packet  Saved An Out Of Order Packet Count
    Unsigned 32-bit integer
ncp.scan_entire_folder  Wild Search
    Boolean
ncp.scan_files_only  Scan Files Only
    Boolean
ncp.scan_folders_only  Scan Folders Only
    Boolean
ncp.scan_items  Number of Items returned from Scan
    Unsigned 32-bit integer
ncp.search_att_archive  Archive
    Boolean
ncp.search_att_execute_confirm  Execute Confirm
    Boolean
ncp.search_att_execute_only  Execute-Only
    Boolean
ncp.search_att_hidden  Hidden Files Allowed
    Boolean
ncp.search_att_low  Search Attributes
    Unsigned 16-bit integer
ncp.search_att_read_only  Read-Only
    Boolean
```

```
ncp.search_att_shareable  Shareable
    Boolean
ncp.search_att_sub        Subdirectories Only

    String
ncp.server_network_address  Server Network Address
    Byte array
ncp.server_node  Server Node
    Byte array
ncp.server_serial_number  Server Serial Number
    Unsigned 32-bit integer
ncp.server_station  Server Station
    Unsigned 8-bit integer
ncp.server_station_list  Server Station List
    Unsigned 8-bit integer
ncp.server_station_long  Server Station
    Unsigned 32-bit integer
ncp.server_status_record  Server Status Record
    String
ncp.server_task_number  Server Task Number
    Unsigned 8-bit integer
ncp.server_task_number_long  Server Task Number
    Unsigned 32-bit integer
ncp.server_type  Server Type
    Unsigned 16-bit integer
ncp.server_utilization  Server Utilization
    Unsigned 32-bit integer
ncp.server_utilization_percentage  Server Utilization Percentage
    Unsigned 8-bit integer
ncp.set_cmd_category  Set Command Category
    Unsigned 8-bit integer
ncp.set_cmd_flags  Set Command Flags
    Unsigned 8-bit integer
ncp.set_cmd_name  Set Command Name
    String
ncp.set_cmd_type  Set Command Type
    Unsigned 8-bit integer
ncp.set_cmd_value_num  Set Command Value
    Unsigned 32-bit integer
ncp.set_mask  Set Mask
    Unsigned 32-bit integer
ncp.set_parm_name  Set Parameter Name
    String
ncp.sft_error_table  SFT Error Table
    Byte array
ncp.sft_support_level  SFT Support Level
    Unsigned 8-bit integer
```

```
ncp.shareable_lock_count  Shareable Lock Count
    Unsigned 16-bit integer
ncp.shared_memory_addresses  Shared Memory Addresses
    Byte array
ncp.short_name  Short Name
    String
ncp.short_stack_name  Short Stack Name
    String
ncp.shouldnt_be_ack_here  Shouldn't Be ACKing Here Count
    Unsigned 32-bit integer
ncp.sibling_count  Sibling Count
    Unsigned 32-bit integer
ncp.signature  Signature
    Boolean
ncp.slot  Slot
    Unsigned 8-bit integer
ncp.sm_info_size  Storage Module Information Size
    Unsigned 32-bit integer
ncp.smids  Storage Media ID's
    Unsigned 32-bit integer
ncp.software_description  Software Description
    String
ncp.software_driver_type  Software Driver Type
    Unsigned 8-bit integer
ncp.software_major_version_number  Software Major Version Number
    Unsigned 8-bit integer
ncp.software_minor_version_number  Software Minor Version Number
    Unsigned 8-bit integer
ncp.someone_else_did_it_0  Someone Else Did It Count 0
    Unsigned 32-bit integer
ncp.someone_else_did_it_1  Someone Else Did It Count 1
    Unsigned 32-bit integer
ncp.someone_else_did_it_2  Someone Else Did It Count 2
    Unsigned 32-bit integer
ncp.someone_else_using_this_file  Someone Else Using This File Count
    Unsigned 32-bit integer
ncp.source_component_count  Source Path Component Count
    Unsigned 8-bit integer
ncp.source_dir_handle  Source Directory Handle
    Unsigned 8-bit integer
ncp.source_originate_time  Source Originate Time
    Byte array
ncp.source_path  Source Path
    String
```

```
ncp.source_return_time  Source Return Time
    Byte array
ncp.space_migrated      Space Migrated
    Unsigned 32-bit integer
ncp.space_restriction_node_count  Space Restriction Node Count
    Unsigned 32-bit integer
ncp.space_used          Space Used
    Unsigned 32-bit integer
ncp.spx_abort_conn     SPX Aborted Connection
    Unsigned 16-bit integer
ncp.spx_bad_in_pkt     SPX Bad In Packet Count
    Unsigned 16-bit integer
ncp.spx_bad_listen     SPX Bad Listen Count
    Unsigned 16-bit integer
ncp.spx_bad_send       SPX Bad Send Count
    Unsigned 16-bit integer
ncp.spx_est_conn_fail  SPX Establish Connection Fail
    Unsigned 16-bit integer
ncp.spx_est_conn_req   SPX Establish Connection Requests
    Unsigned 16-bit integer
ncp.spx_incoming_pkt   SPX Incoming Packet Count
    Unsigned 32-bit integer
ncp.spx_listen_con_fail  SPX Listen Connect Fail
    Unsigned 16-bit integer
ncp.spx_listen_con_req  SPX Listen Connect Request
    Unsigned 16-bit integer
ncp.spx_listen_pkt     SPX Listen Packet Count
    Unsigned 32-bit integer
ncp.spx_max_conn       SPX Max Connections Count
    Unsigned 16-bit integer
ncp.spx_max_used_conn  SPX Max Used Connections
    Unsigned 16-bit integer
ncp.spx_no_ses_listen  SPX No Session Listen ECB Count
    Unsigned 16-bit integer
ncp.spx_send           SPX Send Count
    Unsigned 32-bit integer
ncp.spx_send_fail      SPX Send Fail Count
    Unsigned 16-bit integer
ncp.spx_supp_pkt       SPX Suppressed Packet Count
    Unsigned 16-bit integer
ncp.spx_watch_dog      SPX Watch Dog Destination Session Count
    Unsigned 16-bit integer
ncp.spx_window_choke   SPX Window Choke Count
    Unsigned 32-bit integer
```

```
ncp.src_connection  Source Connection ID
    Unsigned 32-bit integer
    The workstation's connection identification number

ncp.src_name_space  Source Name Space
    Unsigned 8-bit integer

ncp.srvr_param_boolean  Set Parameter Value
    Boolean

ncp.srvr_param_string  Set Parameter Value
    String

ncp.stack_count  Stack Count
    Unsigned 32-bit integer

ncp.stack_full_name_str  Stack Full Name
    String

ncp.stack_major_vn  Stack Major Version Number
    Unsigned 8-bit integer

ncp.stack_minor_vn  Stack Minor Version Number
    Unsigned 8-bit integer

ncp.stack_number  Stack Number
    Unsigned 32-bit integer

ncp.stack_short_name  Stack Short Name
    String

ncp.start_conn_num  Starting Connection Number
    Unsigned 32-bit integer

ncp.start_number  Start Number
    Unsigned 32-bit integer

ncp.start_number_flag  Start Number Flag
    Unsigned 16-bit integer

ncp.start_search_number  Start Search Number
    Unsigned 16-bit integer

ncp.start_station_error  Start Station Error Count
    Unsigned 32-bit integer

ncp.start_volume_number  Starting Volume Number
    Unsigned 32-bit integer

ncp.starting_block  Starting Block
    Unsigned 16-bit integer

ncp.starting_number  Starting Number
    Unsigned 32-bit integer

ncp.stat_major_version  Statistics Table Major Version
    Unsigned 8-bit integer

ncp.stat_minor_version  Statistics Table Minor Version
    Unsigned 8-bit integer

ncp.stat_table_major_version  Statistics Table Major Version
    Unsigned 8-bit integer

ncp.stat_table_minor_version  Statistics Table Minor Version
    Unsigned 8-bit integer
```

```
ncp.station_list  Station List
  Unsigned 32-bit integer
ncp.station_number  Station Number
  Byte array
ncp.status  Status
  Unsigned 16-bit integer
ncp.status_flag_bits  Status Flag
  Unsigned 32-bit integer
ncp.status_flag_bits_64bit  64Bit File Offsets
  Boolean
ncp.status_flag_bits_audit  Audit
  Boolean
ncp.status_flag_bits_comp  Compression
  Boolean
ncp.status_flag_bits_im_purge  Immediate Purge
  Boolean
ncp.status_flag_bits_migrate  Migration
  Boolean
ncp.status_flag_bits_nss  NSS Volume
  Boolean
ncp.status_flag_bits_ro  Read Only
  Boolean
ncp.status_flag_bits_suballoc  Sub Allocation
  Boolean
ncp.status_flag_bits_utf8  UTF8 NCP Strings
  Boolean
ncp.still_doing_the_last_req  Still Doing The Last Request Count
  Unsigned 32-bit integer
ncp.still_transmitting  Still Transmitting Count
  Unsigned 32-bit integer
ncp.stream_type  Stream Type
  Unsigned 8-bit integer
  Type of burst
ncp.sub_alloc_clusters  Sub Alloc Clusters
  Unsigned 32-bit integer
ncp.sub_alloc_freeable_clusters  Sub Alloc Freeable Clusters
  Unsigned 32-bit integer
ncp.sub_count  Subordinate Count
  Unsigned 32-bit integer
ncp.sub_directory  Subdirectory
  Unsigned 32-bit integer
ncp.subfunc  SubFunction
  Unsigned 8-bit integer
ncp.suggested_file_size  Suggested File Size
  Unsigned 32-bit integer
```

```
ncp.support_module_id  Support Module ID
    Unsigned 32-bit integer
ncp.synch_name  Synch Name
    String
ncp.system_flags  System Flags
    Unsigned 8-bit integer
ncp.system_flags.abt  ABT
    Boolean
    Is this an abort request?
ncp.system_flags.bsy  BSY
    Boolean
    Is the server busy?
ncp.system_flags.eob  EOB
    Boolean
    Is this the last packet of the burst?
ncp.system_flags.lst  LST
    Boolean
    Return Fragment List?
ncp.system_flags.sys  SYS
    Boolean
    Is this a system packet?
ncp.system_interval_marker  System Interval Marker
    Unsigned 32-bit integer
ncp.tab_size  Tab Size
    Unsigned 8-bit integer
ncp.target_client_list  Target Client List
    Unsigned 8-bit integer
ncp.target_connection_number  Target Connection Number
    Unsigned 16-bit integer
ncp.target_dir_handle  Target Directory Handle
    Unsigned 8-bit integer
ncp.target_entry_id  Target Entry ID
    Unsigned 32-bit integer
ncp.target_execution_time  Target Execution Time
    Byte array
ncp.target_file_handle  Target File Handle
    Byte array
ncp.target_file_offset  Target File Offset
    Unsigned 32-bit integer
ncp.target_message  Message
    String
ncp.target_ptr  Target Printer
    Unsigned 8-bit integer
ncp.target_receive_time  Target Receive Time
    Byte array
```

```
ncp.target_server_id_number  Target Server ID Number
    Unsigned 32-bit integer
ncp.target_transmit_time     Target Transmit Time
    Byte array
ncp.task                     Task Number
    Unsigned 8-bit integer
ncp.task_num_byte           Task Number
    Unsigned 8-bit integer
ncp.task_number_word        Task Number
    Unsigned 16-bit integer
ncp.task_state              Task State
    Unsigned 8-bit integer
ncp.tcpref                  Address Referral
    IPv4 address
ncp.text_job_description     Text Job Description
    String
ncp.thrashing_count         Thrashing Count
    Unsigned 16-bit integer
ncp.time                    Time from Request
    Time duration
    Time between request and response in seconds
ncp.time_to_net             Time To Net
    Unsigned 16-bit integer
ncp.timeout_limit           Timeout Limit
    Unsigned 16-bit integer
ncp.timesync_status_active  Time Synchronization is Active
    Boolean
ncp.timesync_status_ext_sync External Clock Status
    Boolean
ncp.timesync_status_external External Time Synchronization Active
    Boolean
ncp.timesync_status_flags   Timesync Status
    Unsigned 32-bit integer
ncp.timesync_status_net_sync Time is Synchronized to the Network
    Boolean
ncp.timesync_status_server_type Time Server Type
    Unsigned 32-bit integer
ncp.timesync_status_sync    Time is Synchronized
    Boolean
ncp.too_many_ack_frag       Too Many ACK Fragments Count
    Unsigned 32-bit integer
ncp.too_many_hops           Too Many Hops
    Unsigned 16-bit integer
ncp.total_blks_to_dcompress Total Blocks To Decompress
    Unsigned 32-bit integer
```

ncp.total\_blocks Total Blocks  
Unsigned 32-bit integer

ncp.total\_cache\_writes Total Cache Writes  
Unsigned 32-bit integer

ncp.total\_changed\_fats Total Changed FAT Entries  
Unsigned 32-bit integer

ncp.total\_cnt\_blocks Total Count Blocks  
Unsigned 32-bit integer

ncp.total\_common\_cnts Total Common Counts  
Unsigned 32-bit integer

ncp.total\_dir\_entries Total Directory Entries  
Unsigned 32-bit integer

ncp.total\_directory\_slots Total Directory Slots  
Unsigned 16-bit integer

ncp.total\_extended\_directory\_extants Total Extended Directory Extants  
Unsigned 32-bit integer

ncp.total\_file\_service\_packets Total File Service Packets  
Unsigned 32-bit integer

ncp.total\_files\_opened Total Files Opened  
Unsigned 32-bit integer

ncp.total\_lfs\_counters Total LFS Counters  
Unsigned 32-bit integer

ncp.total\_offspring Total Offspring  
Unsigned 16-bit integer

ncp.total\_other\_packets Total Other Packets  
Unsigned 32-bit integer

ncp.total\_queue\_jobs Total Queue Jobs  
Unsigned 32-bit integer

ncp.total\_read\_requests Total Read Requests  
Unsigned 32-bit integer

ncp.total\_request Total Requests  
Unsigned 32-bit integer

ncp.total\_request\_packets Total Request Packets  
Unsigned 32-bit integer

ncp.total\_routed\_packets Total Routed Packets  
Unsigned 32-bit integer

ncp.total\_rx\_packet\_count Total Receive Packet Count  
Unsigned 32-bit integer

ncp.total\_rx\_packets Total Receive Packets  
Unsigned 32-bit integer

ncp.total\_rx\_pkts Total Receive Packets  
Unsigned 32-bit integer

ncp.total\_server\_memory Total Server Memory  
Unsigned 16-bit integer

ncp.total\_trans\_backed\_out Total Transactions Backed Out  
Unsigned 32-bit integer

ncp.total\_trans\_performed Total Transactions Performed  
Unsigned 32-bit integer

ncp.total\_tx\_packet\_count Total Transmit Packet Count  
Unsigned 32-bit integer

ncp.total\_tx\_packets Total Transmit Packets  
Unsigned 32-bit integer

ncp.total\_tx\_pkts Total Transmit Packets  
Unsigned 32-bit integer

ncp.total\_unfilled\_backout\_requests Total Unfilled Backout Requests  
Unsigned 16-bit integer

ncp.total\_volume\_clusters Total Volume Clusters  
Unsigned 16-bit integer

ncp.total\_write\_requests Total Write Requests  
Unsigned 32-bit integer

ncp.total\_write\_trans\_performed Total Write Transactions Performed  
Unsigned 32-bit integer

ncp.track\_on\_flag Track On Flag  
Boolean

ncp.transaction\_disk\_space Transaction Disk Space  
Unsigned 16-bit integer

ncp.transaction\_fat\_allocations Transaction FAT Allocations  
Unsigned 32-bit integer

ncp.transaction\_file\_size\_changes Transaction File Size Changes  
Unsigned 32-bit integer

ncp.transaction\_files\_truncated Transaction Files Truncated  
Unsigned 32-bit integer

ncp.transaction\_number Transaction Number  
Unsigned 32-bit integer

ncp.transaction\_tracking\_enabled Transaction Tracking Enabled  
Unsigned 8-bit integer

ncp.transaction\_tracking\_supported Transaction Tracking Supported  
Unsigned 8-bit integer

ncp.transaction\_volume\_number Transaction Volume Number  
Unsigned 16-bit integer

ncp.transport\_addr Transport Address

ncp.transport\_type Communications Type  
Unsigned 8-bit integer

ncp.trustee\_acc\_mask Trustee Access Mask  
Unsigned 8-bit integer

ncp.trustee\_id\_set Trustee ID  
Unsigned 32-bit integer

ncp.trustee\_list\_node\_count Trustee List Node Count  
Unsigned 32-bit integer

```
ncp.trustee_rights_create  Create
    Boolean
ncp.trustee_rights_del    Delete
    Boolean
ncp.trustee_rights_low   Trustee Rights
    Unsigned 16-bit integer
ncp.trustee_rights_modify  Modify
    Boolean
ncp.trustee_rights_open  Open
    Boolean
ncp.trustee_rights_parent  Parental
    Boolean
ncp.trustee_rights_read  Read
    Boolean
ncp.trustee_rights_search  Search
    Boolean
ncp.trustee_rights_super  Supervisor
    Boolean
ncp.trustee_rights_write  Write
    Boolean
ncp.trustee_set_number  Trustee Set Number
    Unsigned 8-bit integer
ncp.try_to_write_too_much  Trying To Write Too Much Count
    Unsigned 32-bit integer
ncp.ttl_comp_blks      Total Compression Blocks
    Unsigned 32-bit integer
ncp.ttl_ds_disk_space_alloc  Total Streams Space Allocated
    Unsigned 32-bit integer
ncp.ttl_eas           Total EA's
    Unsigned 32-bit integer
ncp.ttl_eas_data_size  Total EA's Data Size
    Unsigned 32-bit integer
ncp.ttl_eas_key_size   Total EA's Key Size
    Unsigned 32-bit integer
ncp.ttl_inter_blks    Total Intermediate Blocks
    Unsigned 32-bit integer
ncp.ttl_migrated_size  Total Migrated Size
    Unsigned 32-bit integer
ncp.ttl_num_of_r_tags  Total Number of Resource Tags
    Unsigned 32-bit integer
ncp.ttl_num_of_set_cmds  Total Number of Set Commands
    Unsigned 32-bit integer
ncp.ttl_pkts_routed   Total Packets Routed
    Unsigned 32-bit integer
```

```
ncp.ttl_pkts_srvcd  Total Packets Serviced
    Unsigned 32-bit integer
ncp.ttl_values_length  Total Values Length
    Unsigned 32-bit integer
ncp.ttl_write_data_size  Total Write Data Size
    Unsigned 32-bit integer
ncp.tts_flag  Transaction Tracking Flag
    Unsigned 16-bit integer
ncp.tts_level  TTS Level
    Unsigned 8-bit integer
ncp.turbo_fat_build_failed  Turbo FAT Build Failed Count
    Unsigned 32-bit integer
ncp.turbo_used_for_file_service  Turbo Used For File Service
    Unsigned 16-bit integer
ncp.type  Type
    Unsigned 16-bit integer
    NCP message type
ncp.udpref  Address Referral
    IPv4 address
ncp.uint32value  NDS Value
    Unsigned 32-bit integer
ncp.un_claimed_packets  Unclaimed Packets
    Unsigned 32-bit integer
ncp.un_compressable_data_streams_count  Uncompressable Data Streams Count
    Unsigned 32-bit integer
ncp.un_used  Unused
    Unsigned 8-bit integer
ncp.un_used_directory_entries  Unused Directory Entries
    Unsigned 32-bit integer
ncp.un_used_extended_directory_extants  Unused Extended Directory Extants
    Unsigned 32-bit integer
ncp.unclaimed_packets  Unclaimed Packets
    Unsigned 32-bit integer
ncp.undefined_28  Undefined
    Byte array
ncp.undefined_8  Undefined
    Byte array
ncp.unique_id  Unique ID
    Unsigned 8-bit integer
ncp.unknown_network  Unknown Network
    Unsigned 16-bit integer
ncp.unused_disk_blocks  Unused Disk Blocks
    Unsigned 32-bit integer
ncp.update_date  Update Date
    Unsigned 16-bit integer
```

```
ncp.update_id  Update ID
                Unsigned 32-bit integer
ncp.update_time  Update Time
                Unsigned 16-bit integer
ncp.used_blocks  Used Blocks
                Unsigned 32-bit integer
ncp.used_space  Used Space
                Unsigned 32-bit integer
ncp.user_id  User ID
                Unsigned 32-bit integer
ncp.user_info_audit_conn  Audit Connection Recorded
                Boolean
ncp.user_info_audited  Audited
                Boolean
ncp.user_info_being_abort  Being Aborted
                Boolean
ncp.user_info_bindery  Bindery Connection
                Boolean
ncp.user_info_dsaudit_conn  DS Audit Connection Recorded
                Boolean
ncp.user_info_held_req  Held Requests
                Unsigned 32-bit integer
ncp.user_info_int_login  Internal Login
                Boolean
ncp.user_info_logged_in  Logged In
                Boolean
ncp.user_info_logout  Logout in Progress
                Boolean
ncp.user_info_mac_station  MAC Station
                Boolean
ncp.user_info_need_sec  Needs Security Change
                Boolean
ncp.user_info_temp_authen  Temporary Authenticated
                Boolean
ncp.user_info_ttl_bytes_rd  Total Bytes Read
                Byte array
ncp.user_info_ttl_bytes_wrt  Total Bytes Written
                Byte array
ncp.user_info_use_count  Use Count
                Unsigned 16-bit integer
ncp.user_login_allowed  Login Status
                Unsigned 8-bit integer
ncp.user_name  User Name
                String
```

```
ncp.user_name_16  User Name
String

ncp.uts_time_in_seconds  UTC Time in Seconds
Unsigned 32-bit integer

ncp.valid_bfrs_reused  Valid Buffers Reused
Unsigned 32-bit integer

ncp.value_available  Value Available
Unsigned 8-bit integer

ncp.value_bytes  Bytes
Byte array

ncp.value_string  Value
String

ncp.vap_version  VAP Version
Unsigned 8-bit integer

ncp.variable_bit_mask  Variable Bit Mask
Unsigned 32-bit integer

ncp.variable_bits_defined  Variable Bits Defined
Unsigned 16-bit integer

ncp.vconsole_rev  Console Revision
Unsigned 8-bit integer

ncp.vconsole_ver  Console Version
Unsigned 8-bit integer

ncp.verb  Verb
Unsigned 32-bit integer

ncp.verb_data  Verb Data
Unsigned 8-bit integer

ncp.version  Version
Unsigned 32-bit integer

ncp.version_num_long  Version
Unsigned 32-bit integer

ncp.vert_location  Vertical Location
Unsigned 16-bit integer

ncp.virtual_console_version  Virtual Console Version
Unsigned 8-bit integer

ncp.vol_cap_archive  NetWare Archive bit Supported
Boolean

ncp.vol_cap_cluster  Volume is a Cluster Resource
Boolean

ncp.vol_cap_comp  NetWare Compression Supported
Boolean

ncp.vol_cap_dfs  DFS is Active on Volume
Boolean

ncp.vol_cap_dir_quota  NetWare Directory Quotas Supported
Boolean
```

```
ncp.vol_cap_ea    OS2 style EA's Supported
  Boolean

ncp.vol_cap_file_attr  Full NetWare file Attributes Supported
  Boolean

ncp.vol_cap_nss    Volume is Mounted by NSS
  Boolean

ncp.vol_cap_nss_admin  Volume is the NSS Admin Volume
  Boolean

ncp.vol_cap_sal_purge  NetWare Salvage and Purge Operations Supported
  Boolean

ncp.vol_cap_user_space  NetWare User Space Restrictions Supported
  Boolean

ncp.vol_info_reply_len  Volume Information Reply Length
  Unsigned 16-bit integer

ncp.vol_name_stringz  Volume Name
  String

ncp.volume_active_count  Volume Active Count
  Unsigned 32-bit integer

ncp.volume_cached_flag  Volume Cached Flag
  Unsigned 8-bit integer

ncp.volume_capabilities  Volume Capabilities
  Unsigned 32-bit integer

ncp.volume_guid  Volume GUID
  String

ncp.volume_hashed_flag  Volume Hashed Flag
  Unsigned 8-bit integer

ncp.volume_id  Volume ID
  Unsigned 32-bit integer

ncp.volume_last_modified_date  Volume Last Modified Date
  Unsigned 16-bit integer

ncp.volume_last_modified_time  Volume Last Modified Time
  Unsigned 16-bit integer

ncp.volume_mnt_point  Volume Mount Point
  String

ncp.volume_mounted_flag  Volume Mounted Flag
  Unsigned 8-bit integer

ncp.volume_name  Volume Name
  String

ncp.volume_name_len  Volume Name
  String

ncp.volume_number  Volume Number
  Unsigned 8-bit integer

ncp.volume_number_long  Volume Number
  Unsigned 32-bit integer
```

```
ncp.volume_reference_count  Volume Reference Count
    Unsigned 32-bit integer
ncp.volume_removable_flag  Volume Removable Flag
    Unsigned 8-bit integer
ncp.volume_request_flags  Volume Request Flags
    Unsigned 16-bit integer
ncp.volume_segment_dev_num  Volume Segment Device Number
    Unsigned 32-bit integer
ncp.volume_segment_offset  Volume Segment Offset
    Unsigned 32-bit integer
ncp.volume_segment_size  Volume Segment Size
    Unsigned 32-bit integer
ncp.volume_size_in_clusters  Volume Size in Clusters
    Unsigned 32-bit integer
ncp.volume_type  Volume Type
    Unsigned 16-bit integer
ncp.volume_use_count  Volume Use Count
    Unsigned 32-bit integer
ncp.volumes_supported_max  Volumes Supported Max
    Unsigned 16-bit integer
ncp.wait_node  Wait Node Count
    Unsigned 32-bit integer
ncp.wait_node_alloc_fail  Wait Node Alloc Failure Count
    Unsigned 32-bit integer
ncp.wait_on_sema  Wait On Semaphore Count
    Unsigned 32-bit integer
ncp.wait_till_dirty_blcks_dec  Wait Till Dirty Blocks Decrease Count
    Unsigned 32-bit integer
ncp.wait_time  Wait Time
    Unsigned 32-bit integer
ncp.wasted_server_memory  Wasted Server Memory
    Unsigned 16-bit integer
ncp.write_curr_trans  Write Currently Transmitting Count
    Unsigned 32-bit integer
ncp.write_didnt_need_but_req_ack  Write Didn't Need But Requested ACK Count
    Unsigned 32-bit integer
ncp.write_didnt_need_this_frag  Write Didn't Need This Fragment Count
    Unsigned 32-bit integer
ncp.write_dup_req  Write Duplicate Request Count
    Unsigned 32-bit integer
ncp.write_err  Write Error Count
    Unsigned 32-bit integer
ncp.write_got_an_ack0  Write Got An ACK Count 0
    Unsigned 32-bit integer
```

```
ncp.write_got_an_ack1 Write Got An ACK Count 1
    Unsigned 32-bit integer
ncp.write_held_off Write Held Off Count
    Unsigned 32-bit integer
ncp.write_held_off_with_dup Write Held Off With Duplicate Request
    Unsigned 32-bit integer
ncp.write_incon_packet_len Write Inconsistent Packet Lengths Count
    Unsigned 32-bit integer
ncp.write_out_of_mem_for_ctl_nodes Write Out Of Memory For Control Nodes Count
    Unsigned 32-bit integer
ncp.write_timeout Write Time Out Count
    Unsigned 32-bit integer
ncp.write_too_many_buf_check Write Too Many Buffers Checked Out Count
    Unsigned 32-bit integer
ncp.write_trash_dup_req Write Trashed Duplicate Request Count
    Unsigned 32-bit integer
ncp.write_trash_packet Write Trashed Packet Count
    Unsigned 32-bit integer
ncp.wrt_blk_cnt Write Block Count
    Unsigned 32-bit integer
ncp.wrt_entire_blk Write Entire Block Count
    Unsigned 32-bit integer
ncp.year Year
    Unsigned 8-bit integer
ncp.zero_ack_frag Zero ACK Fragment Count
    Unsigned 32-bit integer
nds.fragment NDS Fragment
    Frame number
    NDPS Fragment
nds.fragments NDS Fragments
    No value
    NDPS Fragments
nds.segment.error Desegmentation error
    Frame number
    Desegmentation error due to illegal segments
nds.segment.multipletails Multiple tail segments found
    Boolean
    Several tails were found when desegmenting the packet
nds.segment.overlap Segment overlap
    Boolean
    Segment overlaps with other segments
nds.segment.overlap.conflict Conflicting data in segment overlap
    Boolean
    Overlapping segments contained conflicting data
```

nds.segment.toolongsegment Segment too long  
Boolean  
Segment contained data past end of packet

### NetWare Link Services Protocol (nlsp)

nlsp.header\_length PDU Header Length  
Unsigned 8-bit integer

nlsp.hello.circuit\_type Circuit Type  
Unsigned 8-bit integer

nlsp.hello.holding\_timer Holding Timer  
Unsigned 8-bit integer

nlsp.hello.multicast Multicast Routing  
Boolean  
If set, this router supports multicast routing

nlsp.hello.priority Priority  
Unsigned 8-bit integer

nlsp.hello.state State  
Unsigned 8-bit integer

nlsp.irpd NetWare Link Services Protocol Discriminator  
Unsigned 8-bit integer

nlsp.lsp.attached\_flag Attached Flag  
Unsigned 8-bit integer

nlsp.lsp.checksum Checksum  
Unsigned 16-bit integer

nlsp.lsp.lspdbol LSP Database Overloaded  
Boolean

nlsp.lsp.partition\_repair Partition Repair  
Boolean  
If set, this router supports the optional Partition Repair function

nlsp.lsp.router\_type Router Type  
Unsigned 8-bit integer

nlsp.major\_version Major Version  
Unsigned 8-bit integer

nlsp.minor\_version Minor Version  
Unsigned 8-bit integer

nlsp.nr Multi-homed Non-routing Server  
Boolean

nlsp.packet\_length Packet Length  
Unsigned 16-bit integer

nlsp.sequence\_number Sequence Number  
Unsigned 32-bit integer

nlsp.type Packet Type  
Unsigned 8-bit integer

**NetWare Serialization Protocol (nw\_serial)****Network Block Device (nbd)**

nbd.data Data  
Byte array

nbd.error Error  
Unsigned 32-bit integer

nbd.from From  
Unsigned 64-bit integer

nbd.handle Handle  
Unsigned 64-bit integer

nbd.len Length  
Unsigned 32-bit integer

nbd.magic Magic  
Unsigned 32-bit integer

nbd.response\_in Response In  
Frame number  
The response to this NBD request is in this frame

nbd.response\_to Request In  
Frame number  
This is a response to the NBD request in this frame

nbd.time Time  
Time duration  
The time between the Call and the Reply

nbd.type Type  
Unsigned 32-bit integer

**Network Data Management Protocol (ndmp)**

ndmp.addr.ip IP Address  
IPv4 address  
IP Address

ndmp.addr.ipc IPC  
Byte array  
IPC identifier

ndmp.addr.loop\_id Loop ID  
Unsigned 32-bit integer  
FCAL Loop ID

ndmp.addr.tcp\_port TCP Port  
Unsigned 32-bit integer  
TCP Port

ndmp.addr\_type Addr Type  
Unsigned 32-bit integer  
Address Type

ndmp.addr\_types Addr Types  
No value  
List Of Address Types

```
ndmp.auth.challenge Challenge
    Byte array
    Authentication Challenge

ndmp.auth.digest Digest
    Byte array
    Authentication Digest

ndmp.auth.id ID
    String
    ID of client authenticating

ndmp.auth.password Password
    String
    Password of client authenticating

ndmp.auth.types Auth types
    No value
    Auth types

ndmp.auth_type Auth Type
    Unsigned 32-bit integer
    Authentication Type

ndmp.bu.destination_dir Destination Dir
    String
    Destination directory to restore backup to

ndmp.bu.new_name New Name
    String
    New Name

ndmp.bu.operation Operation
    Unsigned 32-bit integer
    BU Operation

ndmp.bu.original_path Original Path
    String
    Original path where backup was created

ndmp.bu.other_name Other Name
    String
    Other Name

ndmp.bu.state.invalid_ebr EstimatedBytesLeft valid
    Boolean
    Whether EstimatedBytesLeft is valid or not

ndmp.bu.state.invalid_etr EstimatedTimeLeft valid
    Boolean
    Whether EstimatedTimeLeft is valid or not

ndmp.butype.attr.backup_direct Backup direct
    Boolean
    backup_direct

ndmp.butype.attr.backup_file_history Backup file history
    Boolean
    backup_file_history

ndmp.butype.attr.backup_filelist Backup file list
    Boolean
    backup_filelist
```

```
ndmp.butype.attr.backup_incremental  Backup incremental
  Boolean
  backup_incremental
ndmp.butype.attr.backup_utf8  Backup UTF8
  Boolean
  backup_utf8
ndmp.butype.attr.recover_direct  Recover direct
  Boolean
  recover_direct
ndmp.butype.attr.recover_filelist  Recover file list
  Boolean
  recover_filelist
ndmp.butype.attr.recover_incremental  Recover incremental
  Boolean
  recover_incremental
ndmp.butype.attr.recover_utf8  Recover UTF8
  Boolean
  recover_utf8
ndmp.butype.default_env  Default Env
  No value
  Default Env's for this Butype Info
ndmp.butype.env.name  Name
  String
  Name for this env-variable
ndmp.butype.env.value  Value
  String
  Value for this env-variable
ndmp.butype.info  Butype Info
  No value
  Butype Info
ndmp.butype.name  Butype Name
  String
  Name of Butype
ndmp.bytes_left_to_read  Bytes left to read
  Signed 64-bit integer
  Number of bytes left to be read from the device
ndmp.connected  Connected
  Unsigned 32-bit integer
  Status of connection
ndmp.connected.reason  Reason
  String
  Textual description of the connection status
ndmp.count  Count
  Unsigned 32-bit integer
  Number of bytes/objects/operations
ndmp.data  Data
  Byte array
  Data written/read
```

```
ndmp.data.bytes_processed  Bytes Processed
    Unsigned 64-bit integer
    Number of bytes processed

ndmp.data.est_bytes_remain  Est Bytes Remain
    Unsigned 64-bit integer
    Estimated number of bytes remaining

ndmp.data.est_time_remain  Est Time Remain
    Time duration
    Estimated time remaining

ndmp.data.halted  Halted Reason
    Unsigned 32-bit integer
    Data halted reason

ndmp.data.state  State
    Unsigned 32-bit integer
    Data state

ndmp.data.written  Data Written
    Unsigned 64-bit integer
    Number of data bytes written

ndmp.dirs  Dirs
    No value
    List of directories

ndmp.error  Error
    Unsigned 32-bit integer
    Error code for this NDMP PDU

ndmp.execute_cdb.cdb_len  CDB length
    Unsigned 32-bit integer
    Length of CDB

ndmp.execute_cdb.datain  Data in
    Byte array
    Data transferred from the SCSI device

ndmp.execute_cdb.datain_len  Data in length
    Unsigned 32-bit integer
    Expected length of data bytes to read

ndmp.execute_cdb.dataout  Data out
    Byte array
    Data to be transferred to the SCSI device

ndmp.execute_cdb.dataout_len  Data out length
    Unsigned 32-bit integer
    Number of bytes transferred to the device

ndmp.execute_cdb.flags.data_in  DATA_IN
    Boolean
    DATA_IN

ndmp.execute_cdb.flags.data_out  DATA_OUT
    Boolean
    DATA_OUT

ndmp.execute_cdb.sns_len  Sense data length
    Unsigned 32-bit integer
    Length of sense data
```

```
ndmp.execute_cdb.status  Status
    Unsigned 8-bit integer
    SCSI status

ndmp.execute_cdb.timeout Timeout
    Unsigned 32-bit integer
    Reselect timeout, in milliseconds

ndmp.file File
    String
    Name of File

ndmp.file.atime atime
    Date/Time stamp
    Timestamp for atime for this file

ndmp.file.ctime ctime
    Date/Time stamp
    Timestamp for ctime for this file

ndmp.file.fattr Fattr
    Unsigned 32-bit integer
    Mode for UNIX, fattr for NT

ndmp.file.fh_info FH Info
    Unsigned 64-bit integer
    FH Info used for direct access

ndmp.file.fs_type File FS Type
    Unsigned 32-bit integer
    Type of file permissions (UNIX or NT)

ndmp.file.group Group
    Unsigned 32-bit integer
    GID for UNIX, NA for NT

ndmp.file.invalid_atime Invalid atime
    Boolean
    invalid_atime

ndmp.file.invalid_ctime Invalid ctime
    Boolean
    invalid_ctime

ndmp.file.invalid_group Invalid group
    Boolean
    invalid_group

ndmp.file.links Links
    Unsigned 32-bit integer
    Number of links to this file

ndmp.file.mtime mtime
    Date/Time stamp
    Timestamp for mtime for this file

ndmp.file.names File Names
    No value
    List of file names

ndmp.file.node Node
    Unsigned 64-bit integer
    Node used for direct access
```

```
ndmp.file.owner  Owner
  Unsigned 32-bit integer
  UID for UNIX, owner for NT

ndmp.file.parent  Parent
  Unsigned 64-bit integer
  Parent node(directory) for this node

ndmp.file.size  Size
  Unsigned 64-bit integer
  File Size

ndmp.file.stats  File Stats
  No value
  List of file stats

ndmp.file.type  File Type
  Unsigned 32-bit integer
  Type of file

ndmp.files  Files
  No value
  List of files

ndmp.fraglen  Fragment Length
  Unsigned 32-bit integer
  Fragment Length

ndmp.fs.avail_size  Avail Size
  Unsigned 64-bit integer
  Total available size on FS

ndmp.fs.env  Env variables
  No value
  Environment variables for FS

ndmp.fs.env.name  Name
  String
  Name for this env-variable

ndmp.fs.env.value  Value
  String
  Value for this env-variable

ndmp.fs.info  FS Info
  No value
  FS Info

ndmp.fs.invalid.avail_size  Available size invalid
  Boolean
  If available size is invalid

ndmp.fs.invalid.total_inodes  Total number of inodes invalid
  Boolean
  If total number of inodes is invalid

ndmp.fs.invalid.total_size  Total size invalid
  Boolean
  If total size is invalid

ndmp.fs.invalid.used_inodes  Used number of inodes is invalid
  Boolean
  If used number of inodes is invalid
```

```
ndmp.fs.invalid.used_size  Used size invalid
    Boolean
    If used size is invalid

ndmp.fs.logical_device    Logical Device
    String
    Name of logical device

ndmp.fs.physical_device   Physical Device
    String
    Name of physical device

ndmp.fs.status            Status
    String
    Status for this FS

ndmp.fs.total_inodes      Total Inodes
    Unsigned 64-bit integer
    Total number of inodes on FS

ndmp.fs.total_size        Total Size
    Unsigned 64-bit integer
    Total size of FS

ndmp.fs.type              Type
    String
    Type of FS

ndmp.fs.used_inodes       Used Inodes
    Unsigned 64-bit integer
    Number of used inodes on FS

ndmp.fs.used_size         Used Size
    Unsigned 64-bit integer
    Total used size of FS

ndmp.halt                 Halt
    Unsigned 32-bit integer
    Reason why it halted

ndmp.halt.reason          Reason
    String
    Textual reason for why it halted

ndmp.header               NDMP Header
    No value
    NDMP Header

ndmp.hostid               HostID
    String
    HostID

ndmp.hostname             Hostname
    String
    Hostname

ndmp.lastfrag             Last Fragment
    Boolean
    Last Fragment

ndmp.log.message          Message
    String
    Log entry
```

```
ndmp.log.message.id  Message ID
    Unsigned 32-bit integer
    ID of this log entry

ndmp.log.type        Type
    Unsigned 32-bit integer
    Type of log entry

ndmp.mover.mode      Mode
    Unsigned 32-bit integer
    Mover Mode

ndmp.mover.pause     Pause
    Unsigned 32-bit integer
    Reason why the mover paused

ndmp.mover.state     State
    Unsigned 32-bit integer
    State of the selected mover

ndmp.msg             Message
    Unsigned 32-bit integer
    Type of NDMP PDU

ndmp.msg_type        Type
    Unsigned 32-bit integer
    Is this a Request or Response?

ndmp.nlist           Nlist
    No value
    List of names

ndmp.nodes           Nodes
    No value
    List of nodes

ndmp.os.type         OS Type
    String
    OS Type

ndmp.os.version      OS Version
    String
    OS Version

ndmp.record.num      Record Num
    Unsigned 32-bit integer
    Number of records

ndmp.record.size     Record Size
    Unsigned 32-bit integer
    Record size in bytes

ndmp.reply_sequence  Reply Sequence
    Unsigned 32-bit integer
    Reply Sequence number for NDMP PDU

ndmp.request_frame   Request In
    Frame number
    The request to this NDMP command is in this frame

ndmp.resid_count     Resid Count
    Unsigned 32-bit integer
    Number of remaining bytes/objects/operations
```

```
ndmp.response_frame  Response In
    Frame number
    The response to this NDMP command is in this frame

ndmp.scsi.controller  Controller
    Unsigned 32-bit integer
    Target Controller

ndmp.scsi.device      Device
    String
    Name of SCSI Device

ndmp.scsi.id          ID
    Unsigned 32-bit integer
    Target ID

ndmp.scsi.info        SCSI Info
    No value
    SCSI Info

ndmp.scsi.lun         LUN
    Unsigned 32-bit integer
    Target LUN

ndmp.scsi.model       Model
    String
    Model of the SCSI device

ndmp.seek.position    Seek Position
    Unsigned 64-bit integer
    Current seek position on device

ndmp.sequence         Sequence
    Unsigned 32-bit integer
    Sequence number for NDMP PDU

ndmp.server.product   Product
    String
    Name of product

ndmp.server.revision  Revision
    String
    Revision of this product

ndmp.server.vendor    Vendor
    String
    Name of vendor

ndmp.tape.attr.rewind Device supports rewind
    Boolean
    If this device supports rewind

ndmp.tape.attr.unload Device supports unload
    Boolean
    If this device supports unload

ndmp.tape.cap.name    Name
    String
    Name for this env-variable

ndmp.tape.cap.value   Value
    String
    Value for this env-variable
```

```
ndmp.tape.capability  Tape Capabilities
    No value
    Tape Capabilities
ndmp.tape.dev_cap    Device Capability
    No value
    Tape Device Capability
ndmp.tape.device    Device
    String
    Name of TAPE Device
ndmp.tape.flags.error  Error
    Boolean
    error
ndmp.tape.flags.no_rewind  No rewind
    Boolean
    no_rewind
ndmp.tape.flags.unload  Unload
    Boolean
    unload
ndmp.tape.flags.write_protect  Write protect
    Boolean
    write_protect
ndmp.tape.info    Tape Info
    No value
    Tape Info
ndmp.tape.invalid.block_no  Block no
    Boolean
    block_no
ndmp.tape.invalid.block_size  Block size
    Boolean
    block_size
ndmp.tape.invalid.file_num  Invalid file num
    Boolean
    invalid_file_num
ndmp.tape.invalid.partition  Invalid partition
    Boolean
    partition
ndmp.tape.invalid.soft_errors  Soft errors
    Boolean
    soft_errors
ndmp.tape.invalid.space_remain  Space remain
    Boolean
    space_remain
ndmp.tape.invalid.total_space  Total space
    Boolean
    total_space
ndmp.tape.model    Model
    String
    Model of the TAPE drive
```

```
ndmp.tape.mtio.op      Operation
    Unsigned 32-bit integer
    MTIO Operation

ndmp.tape.open_mode   Mode
    Unsigned 32-bit integer
    Mode to open tape in

ndmp.tape.status.block_no  block_no
    Unsigned 32-bit integer
    block_no

ndmp.tape.status.block_size  block_size
    Unsigned 32-bit integer
    block_size

ndmp.tape.status.file_num  file_num
    Unsigned 32-bit integer
    file_num

ndmp.tape.status.partition  partition
    Unsigned 32-bit integer
    partition

ndmp.tape.status.soft_errors  soft_errors
    Unsigned 32-bit integer
    soft_errors

ndmp.tape.status.space_remain  space_remain
    Unsigned 64-bit integer
    space_remain

ndmp.tape.status.total_space  total_space
    Unsigned 64-bit integer
    total_space

ndmp.tcp.default_env  Default Env
    No value
    Default Env's for this Butype Info

ndmp.tcp.env.name  Name
    String
    Name for this env-variable

ndmp.tcp.env.value  Value
    String
    Value for this env-variable

ndmp.tcp.port_list  TCP Ports
    No value
    List of TCP ports

ndmp.time  Time from request
    Time duration
    Time since the request packet

ndmp.timestamp  Time
    Date/Time stamp
    Timestamp for this NDMP PDU

ndmp.version  Version
    Unsigned 32-bit integer
    Version of NDMP protocol
```

```
ndmp.window.length  Window Length
                    Unsigned 64-bit integer
                    Size of window in bytes

ndmp.window.offset  Window Offset
                    Unsigned 64-bit integer
                    Offset to window in bytes
```

**Network File System (nfs)**

```
nfs.ace ace
      String
      Access Control Entry

nfs.aceflag4 aceflag
      Unsigned 32-bit integer

nfs.acemask4 acemask
      Unsigned 32-bit integer

nfs.acetype4 acetype
      Unsigned 32-bit integer

nfs.acl ACL
      No value
      Access Control List

nfs.atime atime
      Date/Time stamp
      Access Time

nfs.atime.nsec nano seconds
      Unsigned 32-bit integer
      Access Time, Nano-seconds

nfs.atime.sec seconds
      Unsigned 32-bit integer
      Access Time, Seconds

nfs.atime.usec micro seconds
      Unsigned 32-bit integer
      Access Time, Micro-seconds

nfs.attr mand_attr
      Unsigned 32-bit integer
      Mandatory Attribute

nfs.bytes_per_block bytes_per_block
      Unsigned 32-bit integer

nfs.cachethis4 Cache this?
      Boolean

nfs.call.operation Opcode
      Unsigned 32-bit integer

nfs.callback.ident callback_ident
      Unsigned 32-bit integer
      Callback Identifier

nfs.cb_location cb_location
      Unsigned 32-bit integer
```

```
nfs.cb_program    cb_program
                  Unsigned 32-bit integer
nfs.cbrenforce4   binding enforce?
                  Boolean
nfs.change_info.atomic Atomic
                  Boolean
nfs.changeid4     changeid
                  Unsigned 64-bit integer
nfs.changeid4.after changeid (after)
                  Unsigned 64-bit integer
nfs.changeid4.before changeid (before)
                  Unsigned 64-bit integer
nfs.clientid      clientid
                  Unsigned 64-bit integer
                  Client ID
nfs.cookie3       cookie
                  Unsigned 64-bit integer
nfs.cookie4       cookie
                  Unsigned 64-bit integer
nfs.cookieverf4   cookieverf
                  Unsigned 64-bit integer
nfs.count3        count
                  Unsigned 32-bit integer
nfs.count3_dircount dircount

```
nfs.secinfo.flavor_info.rpcsec_gss_info.oid  oid
    Byte array
nfs.secinfo.flavor_info.rpcsec_gss_info.qop  qop
    Unsigned 32-bit integer
nfs.secinfo.rpcsec_gss_info.service  service
    Unsigned 32-bit integer
nfs.seqid  seqid
    Unsigned 32-bit integer
    Sequence ID
nfs.server  server
    String
nfs.service4  gid
    Unsigned 32-bit integer
nfs.session_id4  sessionid
    Byte array
nfs.set_it  set_it
    Unsigned 32-bit integer
    How To Set Time
nfs.set_size3.size  size
    Unsigned 64-bit integer
nfs.slotid4  slot ID
    Unsigned 32-bit integer
nfs.specdata1  specdata1
    Unsigned 32-bit integer
nfs.specdata2  specdata2
    Unsigned 32-bit integer
nfs.ssvlen4  ssv len
    Unsigned 32-bit integer
nfs.stable_how4  stable_how4
    Unsigned 32-bit integer
nfs.stamp4  stamp
    Unsigned 32-bit integer
nfs.stat  Status
    Unsigned 32-bit integer
    Reply status
nfs.state_protect_num_gss_handles  State Protect num gss handles
    Unsigned 32-bit integer
nfs.state_protect_window  State Protect window
    Unsigned 32-bit integer
nfs.stateid4  stateid
    Unsigned 64-bit integer
nfs.stateid4.other  Data
    Byte array
nfs.statfs.bavail  Available Blocks
    Unsigned 32-bit integer
```

```
nfs.statfs.bfree  Free Blocks
    Unsigned 32-bit integer
nfs.statfs.blocks  Total Blocks
    Unsigned 32-bit integer
nfs.statfs.bsize  Block Size
    Unsigned 32-bit integer
nfs.statfs.tsize  Transfer Size
    Unsigned 32-bit integer
nfs.status  status
    Unsigned 32-bit integer
nfs.stripe devs  stripe devs
    Unsigned 32-bit integer
nfs.stripeindex  first stripe index
    Unsigned 32-bit integer
nfs.stripe type  stripe type
    Unsigned 32-bit integer
nfs.stripe unit  stripe unit
    Unsigned 64-bit integer
nfs.symlink.linktext  Name
    String
    Symbolic link contents
nfs.symlink.to  To
    String
    Symbolic link destination name
nfs.tag  Tag
    String
nfs.type  Type
    Unsigned 32-bit integer
    File Type
nfs.uid3  uid
    Unsigned 32-bit integer
nfs.uid4  uid
    Unsigned 32-bit integer
nfs.util  util
    Unsigned 32-bit integer
nfs.verifier4  verifier
    Unsigned 64-bit integer
nfs.wcc_attr.size  size
    Unsigned 64-bit integer
nfs.who  who
    String
nfs.write.beginoffset  Begin Offset
    Unsigned 32-bit integer
    Begin offset (obsolete)
nfs.write.committed  Committed
    Unsigned 32-bit integer
```

```
nfs.write.offset  Offset
    Unsigned 32-bit integer
nfs.write.stable  Stable
    Unsigned 32-bit integer
nfs.write.totalcount  Total Count
    Unsigned 32-bit integer
    Total Count (obsolete)
```

### **Network Lock Manager Protocol (nlm)**

```
nlm.block  block
    Boolean
    block
nlm.cookie  cookie
    Byte array
    cookie
nlm.exclusive  exclusive
    Boolean
    exclusive
nlm.holder  holder
    No value
    holder
nlm.lock  lock
    No value
    lock
nlm.lock.caller_name  caller_name
    String
    caller_name
nlm.lock.l_len  l_len
    Unsigned 64-bit integer
    l_len
nlm.lock.l_offset  l_offset
    Unsigned 64-bit integer
    l_offset
nlm.lock.owner  owner
    Byte array
    owner
nlm.lock.svid  svid
    Unsigned 32-bit integer
    svid
nlm.msg_in  Request MSG in
    Unsigned 32-bit integer
    The RES packet is a response to the MSG in this packet
nlm.procedure_v1  V1 Procedure
    Unsigned 32-bit integer
    V1 Procedure
nlm.procedure_v2  V2 Procedure
    Unsigned 32-bit integer
    V2 Procedure
```

```
nlm.procedure_v3  V3 Procedure
  Unsigned 32-bit integer
  V3 Procedure

nlm.procedure_v4  V4 Procedure
  Unsigned 32-bit integer
  V4 Procedure

nlm.reclaim  reclaim
  Boolean
  reclaim

nlm.res_in  Reply RES in
  Unsigned 32-bit integer
  The response to this MSG packet is in this packet

nlm.sequence  sequence
  Signed 32-bit integer
  sequence

nlm.share  share
  No value
  share

nlm.share.access  access
  Unsigned 32-bit integer
  access

nlm.share.mode  mode
  Unsigned 32-bit integer
  mode

nlm.share.name  name
  String
  name

nlm.stat  stat
  Unsigned 32-bit integer
  stat

nlm.state  state
  Unsigned 32-bit integer
  STATD state

nlm.test_stat  test_stat
  No value
  test_stat

nlm.test_stat.stat  stat
  Unsigned 32-bit integer
  stat

nlm.time  Time from request
  Time duration
  Time between Request and Reply for async NLM calls
```

#### **Network News Transfer Protocol (nntp)**

```
nntp.request  Request
  Boolean
  TRUE if NNTP request
```

nntp.response Response  
Boolean  
TRUE if NNTP response

### Network Service Over IP (nsip)

nsip.bvci BVCi  
Unsigned 16-bit integer  
BSSGP Virtual Connection Identifier

nsip.cause Cause  
Unsigned 8-bit integer

nsip.control\_bits.c Confirm change flow  
Boolean

nsip.control\_bits.r Request change flow  
Boolean

nsip.end\_flag End flag  
Boolean

nsip.ip4\_elements IP4 elements  
No value  
List of IP4 elements

nsip.ip6\_elements IP6 elements  
No value  
List of IP6 elements

nsip.ip\_address IP Address  
IPv4 address

nsip.ip\_element.data\_weight Data Weight  
Unsigned 8-bit integer

nsip.ip\_element.ip\_address IP Address  
IPv4 address

nsip.ip\_element.signalling\_weight Signalling Weight  
Unsigned 8-bit integer

nsip.ip\_element.udp\_port UDP Port  
Unsigned 16-bit integer

nsip.max\_num\_ns\_vc Maximum number of NS-VCs  
Unsigned 16-bit integer

nsip.ns\_vci NS-VCI  
Unsigned 16-bit integer  
Network Service Virtual Link Identifier

nsip.nsei NSEI  
Unsigned 16-bit integer  
Network Service Entity Identifier

nsip.num\_ip4\_endpoints Number of IP4 endpoints  
Unsigned 16-bit integer

nsip.num\_ip6\_endpoints Number of IP6 endpoints  
Unsigned 16-bit integer

```
nsip.pdu_type  PDU type
                Unsigned 8-bit integer
                PDU type information element
nsip.reset_flag  Reset flag
                Boolean
nsip.transaction_id  Transaction ID
                Unsigned 8-bit integer
```

#### **Network Status Monitor Callback Protocol (statnotify)**

```
statnotify.name  Name
                String
                Name of client that changed
statnotify.priv  Priv
                Byte array
                Client supplied opaque data
statnotify.procedure_v1  V1 Procedure
                Unsigned 32-bit integer
                V1 Procedure
statnotify.state  State
                Unsigned 32-bit integer
                New state of client that changed
```

#### **Network Status Monitor Protocol (stat)**

```
stat.mon  Monitor
          No value
          Monitor Host
stat.mon_id.name  Monitor ID Name
                String
                Monitor ID Name
stat.my_id  My ID
          No value
          My_ID structure
stat.my_id.hostname  Hostname
                String
                My_ID Host to callback
stat.my_id.proc  Procedure
                Unsigned 32-bit integer
                My_ID Procedure to callback
stat.my_id.prog  Program
                Unsigned 32-bit integer
                My_ID Program to callback
stat.my_id.vers  Version
                Unsigned 32-bit integer
                My_ID Version of callback
stat.name  Name
          String
          Name
```

```
stat.priv Priv
  Byte array
  Private client supplied opaque data

stat.procedure_v1 V1 Procedure
  Unsigned 32-bit integer
  V1 Procedure

stat.stat_chge Status Change
  No value
  Status Change structure

stat.stat_res Status Result
  No value
  Status Result

stat.stat_res.res Result
  Unsigned 32-bit integer
  Result

stat.stat_res.state State
  Unsigned 32-bit integer
  State

stat.state State
  Unsigned 32-bit integer
  State of local NSM
```

### **Network Time Protocol (ntp)**

```
ntp.ext Extension
  No value
  Extension

ntp.ext.associd Association ID
  Unsigned 32-bit integer
  Association ID

ntp.ext.flags Flags
  Unsigned 8-bit integer
  Flags (Response/Error/Version)

ntp.ext.flags.error Error bit
  Unsigned 8-bit integer
  Error bit

ntp.ext.flags.r Response bit
  Unsigned 8-bit integer
  Response bit

ntp.ext.flags.vn Version
  Unsigned 8-bit integer
  Version

ntp.ext.fstamp File Timestamp
  Unsigned 32-bit integer
  File Timestamp

ntp.ext.len Extension length
  Unsigned 16-bit integer
  Extension length
```

```
ntp.ext.op  Opcode
  Unsigned 8-bit integer
  Opcode

ntp.ext.sig  Signature
  Byte array
  Signature

ntp.ext.siglen  Signature length
  Unsigned 32-bit integer
  Signature length

ntp.ext.tstamp  Timestamp
  Unsigned 32-bit integer
  Timestamp

ntp.ext.val  Value
  Byte array
  Value

ntp.ext.vallen  Value length
  Unsigned 32-bit integer
  Value length

ntp.flags  Flags
  Unsigned 8-bit integer
  Flags (Leap/Version/Mode)

ntp.flags.li  Leap Indicator
  Unsigned 8-bit integer
  Leap Indicator

ntp.flags.mode  Mode
  Unsigned 8-bit integer
  Mode

ntp.flags.vn  Version number
  Unsigned 8-bit integer
  Version number

ntp.keyid  Key ID
  Byte array
  Key ID

ntp.mac  Message Authentication Code
  Byte array
  Message Authentication Code

ntp.org  Originate Time Stamp
  Byte array
  Originate Time Stamp

ntp.ppoll  Peer Polling Interval
  Unsigned 8-bit integer
  Peer Polling Interval

ntp.precision  Peer Clock Precision
  Signed 8-bit integer
  Peer Clock Precision

ntp.rec  Receive Time Stamp
  Byte array
  Receive Time Stamp
```

```
ntp.refid Reference Clock ID
  Byte array
  Reference Clock ID

ntp.reftime Reference Clock Update Time
  Byte array
  Reference Clock Update Time

ntp.rootdelay Root Delay
  Double-precision floating point
  Root Delay

ntp.rootdispersion Root Dispersion
  Double-precision floating point
  Root Dispersion

ntp.stratum Peer Clock Stratum
  Unsigned 8-bit integer
  Peer Clock Stratum

ntp.xmt Transmit Time Stamp
  Byte array
  Transmit Time Stamp

ntpctrl.flags2 Flags 2
  Unsigned 8-bit integer
  Flags (Response/Error/More/Opcode)

ntpctrl.flags2.error Error bit
  Unsigned 8-bit integer
  Error bit

ntpctrl.flags2.more More bit
  Unsigned 8-bit integer
  More bit

ntpctrl.flags2.opcode Opcode
  Unsigned 8-bit integer
  Opcode

ntpctrl.flags2.r Response bit
  Unsigned 8-bit integer
  Response bit

ntppriv.auth Auth bit
  Unsigned 8-bit integer
  Auth bit

ntppriv.auth_seq Auth, sequence
  Unsigned 8-bit integer
  Auth bit, sequence number

ntppriv.flags.more More bit
  Unsigned 8-bit integer
  More bit

ntppriv.flags.r Response bit
  Unsigned 8-bit integer
  Response bit

ntppriv.impl Implementation
  Unsigned 8-bit integer
  Implementation
```

ntppriv.reqcode Request code  
Unsigned 8-bit integer  
Request code

ntppriv.seq Sequence number  
Unsigned 8-bit integer  
Sequence number

### **Nortel SONMP (sonmp)**

sonmp.backplane Backplane type  
Unsigned 8-bit integer  
Backplane type of the agent sending the topology message

sonmp.chassis Chassis type  
Unsigned 8-bit integer  
Chassis type of the agent sending the topology message

sonmp.ipaddress NMM IP address  
IPv4 address  
IP address of the agent (NMM)

sonmp.nmmstate NMM state  
Unsigned 8-bit integer  
Current state of this agent

sonmp.numberoflinks Number of links  
Unsigned 8-bit integer  
Number of interconnect ports

sonmp.segmentident Segment Identifier  
Unsigned 24-bit integer  
Segment id of the segment from which the agent is sending the topology message

### **Novell Cluster Services (ncs)**

ncs.incarnation Incarnation  
Unsigned 32-bit integer

ncs.pan\_id Panning ID  
Unsigned 32-bit integer

### **Novell Distributed Print System (ndps)**

ndps.add\_bytes Address Bytes  
Byte array  
Address Bytes

ndps.addr\_len Address Length  
Unsigned 32-bit integer  
Address Length

ndps.admin\_submit\_flag Admin Submit Flag?  
Boolean  
Admin Submit Flag?

ndps.answer\_time Answer Time  
Unsigned 32-bit integer  
Answer Time

```
ndps.archive_size  Archive File Size
    Unsigned 32-bit integer
    Archive File Size

ndps.archive_type  Archive Type
    Unsigned 32-bit integer
    Archive Type

ndps.asn1_type     ASN.1 Type
    Unsigned 16-bit integer
    ASN.1 Type

ndps.attribue_value Value
    Unsigned 32-bit integer
    Value

ndps.attribute_set Attribute Set
    Byte array
    Attribute Set

ndps.attribute_time Time
    Date/Time stamp
    Time

ndps.auth_null    Auth Null
    Byte array
    Auth Null

ndps.banner_count Number of Banners
    Unsigned 32-bit integer
    Number of Banners

ndps.banner_name  Banner Name
    String
    Banner Name

ndps.banner_type  Banner Type
    Unsigned 32-bit integer
    Banner Type

ndps.broker_name  Broker Name
    String
    Broker Name

ndps.certified    Certified
    Byte array
    Certified

ndps.connection   Connection
    Unsigned 16-bit integer
    Connection

ndps.context      Context
    Byte array
    Context

ndps.context_len  Context Length
    Unsigned 32-bit integer
    Context Length

ndps.cred_type    Credential Type
    Unsigned 32-bit integer
    Credential Type
```

```
ndps.data [Data]
  No value
  [Data]

ndps.delivery_add_count Number of Delivery Addresses
  Unsigned 32-bit integer
  Number of Delivery Addresses

ndps.delivery_flag Delivery Address Data?
  Boolean
  Delivery Address Data?

ndps.delivery_method_count Number of Delivery Methods
  Unsigned 32-bit integer
  Number of Delivery Methods

ndps.delivery_method_type Delivery Method Type
  Unsigned 32-bit integer
  Delivery Method Type

ndps.doc_content Document Content
  Unsigned 32-bit integer
  Document Content

ndps.doc_name Document Name
  String
  Document Name

ndps.error_val Return Status
  Unsigned 32-bit integer
  Return Status

ndps.ext_err_string Extended Error String
  String
  Extended Error String

ndps.ext_error Extended Error Code
  Unsigned 32-bit integer
  Extended Error Code

ndps.file_name File Name
  String
  File Name

ndps.file_time_stamp File Time Stamp
  Unsigned 32-bit integer
  File Time Stamp

ndps.font_file_count Number of Font Files
  Unsigned 32-bit integer
  Number of Font Files

ndps.font_file_name Font File Name
  String
  Font File Name

ndps.font_name Font Name
  String
  Font Name

ndps.font_type Font Type
  Unsigned 32-bit integer
  Font Type
```

ndps.font\_type\_count Number of Font Types  
Unsigned 32-bit integer  
Number of Font Types

ndps.font\_type\_name Font Type Name  
String  
Font Type Name

ndps.fragment NDPS Fragment  
Frame number  
NDPS Fragment

ndps.fragments NDPS Fragments  
No value  
NDPS Fragments

ndps.get\_status\_flags Get Status Flag  
Unsigned 32-bit integer  
Get Status Flag

ndps.guid GUID  
Byte array  
GUID

ndps.inc\_across\_feed Increment Across Feed  
Byte array  
Increment Across Feed

ndps.included\_doc Included Document  
Byte array  
Included Document

ndps.included\_doc\_len Included Document Length  
Unsigned 32-bit integer  
Included Document Length

ndps.inf\_file\_name INF File Name  
String  
INF File Name

ndps.info\_boolean Boolean Value  
Boolean  
Boolean Value

ndps.info\_bytes Byte Value  
Byte array  
Byte Value

ndps.info\_int Integer Value  
Unsigned 8-bit integer  
Integer Value

ndps.info\_int16 16 Bit Integer Value  
Unsigned 16-bit integer  
16 Bit Integer Value

ndps.info\_int32 32 Bit Integer Value  
Unsigned 32-bit integer  
32 Bit Integer Value

ndps.info\_string String Value  
String  
String Value

```
ndps.interrupt_job_type  Interrupt Job Identifier
    Unsigned 32-bit integer
    Interrupt Job Identifier

ndps.interval  Interval
    Unsigned 32-bit integer
    Interval

ndps.ip  IP Address
    IPv4 address
    IP Address

ndps.item_bytes  Item Ptr
    Byte array
    Item Ptr

ndps.item_ptr  Item Pointer
    Byte array
    Item Pointer

ndps.language_flag  Language Data?
    Boolean
    Language Data?

ndps.last_packet_flag  Last Packet Flag
    Unsigned 32-bit integer
    Last Packet Flag

ndps.level  Level
    Unsigned 32-bit integer
    Level

ndps.local_id  Local ID
    Unsigned 32-bit integer
    Local ID

ndps.lower_range  Lower Range
    Unsigned 32-bit integer
    Lower Range

ndps.lower_range_n64  Lower Range
    Byte array
    Lower Range

ndps.message  Message
    String
    Message

ndps.method_flag  Method Data?
    Boolean
    Method Data?

ndps.method_name  Method Name
    String
    Method Name

ndps.method_ver  Method Version
    String
    Method Version

ndps.n64  Value
    Byte array
    Value
```

```
ndps.ndps_abort Abort?
  Boolean
  Abort?

ndps.ndps_address Address
  Unsigned 32-bit integer
  Address

ndps.ndps_address_type Address Type
  Unsigned 32-bit integer
  Address Type

ndps.ndps_attr_boolean Value?
  Boolean
  Value?

ndps.ndps_attr_type Value Syntax
  Unsigned 32-bit integer
  Value Syntax

ndps.ndps_attr_arg List Attribute Operation
  Unsigned 32-bit integer
  List Attribute Operation

ndps.ndps_bind_security Bind Security Options
  Unsigned 32-bit integer
  Bind Security Options

ndps.ndps_bind_security_count Number of Bind Security Options
  Unsigned 32-bit integer
  Number of Bind Security Options

ndps.ndps_car_name_or_oid Cardinal Name or OID
  Unsigned 32-bit integer
  Cardinal Name or OID

ndps.ndps_car_or_oid Cardinal or OID
  Unsigned 32-bit integer
  Cardinal or OID

ndps.ndps_card_enum_time Cardinal, Enum, or Time
  Unsigned 32-bit integer
  Cardinal, Enum, or Time

ndps.ndps_client_server_type Client/Server Type
  Unsigned 32-bit integer
  Client/Server Type

ndps.ndps_colorant_set Colorant Set
  Unsigned 32-bit integer
  Colorant Set

ndps.ndps_continuation_option Continuation Option
  Byte array
  Continuation Option

ndps.ndps_count_limit Count Limit
  Unsigned 32-bit integer
  Count Limit

ndps.ndps_criterion_type Criterion Type
  Unsigned 32-bit integer
  Criterion Type
```

```
ndps.ndps_data_item_type  Item Type
    Unsigned 32-bit integer
    Item Type

ndps.ndps_delivery_add_type  Delivery Address Type
    Unsigned 32-bit integer
    Delivery Address Type

ndps.ndps_dim_falg  Dimension Flag
    Unsigned 32-bit integer
    Dimension Flag

ndps.ndps_dim_value  Dimension Value Type
    Unsigned 32-bit integer
    Dimension Value Type

ndps.ndps_direction  Direction
    Unsigned 32-bit integer
    Direction

ndps.ndps_doc_content  Document Content
    Unsigned 32-bit integer
    Document Content

ndps.ndps_doc_num  Document Number
    Unsigned 32-bit integer
    Document Number

ndps.ndps_ds_info_type  DS Info Type
    Unsigned 32-bit integer
    DS Info Type

ndps.ndps_edge_value  Edge Value
    Unsigned 32-bit integer
    Edge Value

ndps.ndps_event_object_identifier  Event Object Type
    Unsigned 32-bit integer
    Event Object Type

ndps.ndps_event_type  Event Type
    Unsigned 32-bit integer
    Event Type

ndps.ndps_filter  Filter Type
    Unsigned 32-bit integer
    Filter Type

ndps.ndps_filter_item  Filter Item Operation
    Unsigned 32-bit integer
    Filter Item Operation

ndps.ndps_force  Force?
    Boolean
    Force?

ndps.ndps_get_resman_session_type  Session Type
    Unsigned 32-bit integer
    Session Type

ndps.ndps_get_session_type  Session Type
    Unsigned 32-bit integer
    Session Type
```

```
ndps.ndps_identifier_type  Identifier Type
    Unsigned 32-bit integer
    Identifier Type

ndps.ndps_ignored_type    Ignored Type
    Unsigned 32-bit integer
    Ignored Type

ndps.ndps_integer_or_oid  Integer or OID
    Unsigned 32-bit integer
    Integer or OID

ndps.ndps_integer_type_flag  Integer Type Flag
    Unsigned 32-bit integer
    Integer Type Flag

ndps.ndps_integer_type_value  Integer Type Value
    Unsigned 32-bit integer
    Integer Type Value

ndps.ndps_item_count      Number of Items
    Unsigned 32-bit integer
    Number of Items

ndps.ndps_lang_id        Language ID
    Unsigned 32-bit integer
    Language ID

ndps.ndps_language_count  Number of Languages
    Unsigned 32-bit integer
    Number of Languages

ndps.ndps_len            Length
    Unsigned 16-bit integer
    Length

ndps.ndps_lib_error      Library Error
    Unsigned 32-bit integer
    Library Error

ndps.ndps_limit_enc      Limit Encountered
    Unsigned 32-bit integer
    Limit Encountered

ndps.ndps_list_local_server_type  Server Type
    Unsigned 32-bit integer
    Server Type

ndps.ndps_list_profiles_choice_type  List Profiles Choice Type
    Unsigned 32-bit integer
    List Profiles Choice Type

ndps.ndps_list_profiles_result_type  List Profiles Result Type
    Unsigned 32-bit integer
    List Profiles Result Type

ndps.ndps_list_profiles_type  List Profiles Type
    Unsigned 32-bit integer
    List Profiles Type

ndps.ndps_list_services_type  Services Type
    Unsigned 32-bit integer
    Services Type
```

```
ndps.ndps_loc_object_name  Local Object Name
    String
    Local Object Name
ndps.ndps_location_value  Location Value Type
    Unsigned 32-bit integer
    Location Value Type
ndps.ndps_long_edge_feeds  Long Edge Feeds?
    Boolean
    Long Edge Feeds?
ndps.ndps_max_items  Maximum Items in List
    Unsigned 32-bit integer
    Maximum Items in List
ndps.ndps_media_type  Media Type
    Unsigned 32-bit integer
    Media Type
ndps.ndps_medium_size  Medium Size
    Unsigned 32-bit integer
    Medium Size
ndps.ndps_nameorid  Name or ID Type
    Unsigned 32-bit integer
    Name or ID Type
ndps.ndps_num_resources  Number of Resources
    Unsigned 32-bit integer
    Number of Resources
ndps.ndps_num_services  Number of Services
    Unsigned 32-bit integer
    Number of Services
ndps.ndps_numbers_up  Numbers Up
    Unsigned 32-bit integer
    Numbers Up
ndps.ndps_object_name  Object Name
    String
    Object Name
ndps.ndps_object_op  Operation
    Unsigned 32-bit integer
    Operation
ndps.ndps_operator  Operator Type
    Unsigned 32-bit integer
    Operator Type
ndps.ndps_other_error  Other Error
    Unsigned 32-bit integer
    Other Error
ndps.ndps_other_error_2  Other Error 2
    Unsigned 32-bit integer
    Other Error 2
ndps.ndps_page_flag  Page Flag
    Unsigned 32-bit integer
    Page Flag
```

```
ndps.ndps_page_order  Page Order
    Unsigned 32-bit integer
    Page Order

ndps.ndps_page_orientation  Page Orientation
    Unsigned 32-bit integer
    Page Orientation

ndps.ndps_page_size  Page Size
    Unsigned 32-bit integer
    Page Size

ndps.ndps_persistence  Persistence
    Unsigned 32-bit integer
    Persistence

ndps.ndps_printer_name  Printer Name
    String
    Printer Name

ndps.ndps_profile_id  Profile ID
    Unsigned 32-bit integer
    Profile ID

ndps.ndps_qual  Qualifier
    Unsigned 32-bit integer
    Qualifier

ndps.ndps_qual_name_type  Qualified Name Type
    Unsigned 32-bit integer
    Qualified Name Type

ndps.ndps_qual_name_type2  Qualified Name Type
    Unsigned 32-bit integer
    Qualified Name Type

ndps.ndps_realization  Realization Type
    Unsigned 32-bit integer
    Realization Type

ndps.ndps_resource_type  Resource Type
    Unsigned 32-bit integer
    Resource Type

ndps.ndps_ret_restrict  Retrieve Restrictions
    Unsigned 32-bit integer
    Retrieve Restrictions

ndps.ndps_server_type  NDPS Server Type
    Unsigned 32-bit integer
    NDPS Server Type

ndps.ndps_service_enabled  Service Enabled?
    Boolean
    Service Enabled?

ndps.ndps_service_type  NDPS Service Type
    Unsigned 32-bit integer
    NDPS Service Type

ndps.ndps_session  Session Handle
    Unsigned 32-bit integer
    Session Handle
```

```
ndps.ndps_session_type  Session Type
    Unsigned 32-bit integer
    Session Type

ndps.ndps_state_severity  State Severity
    Unsigned 32-bit integer
    State Severity

ndps.ndps_status_flags  Status Flag
    Unsigned 32-bit integer
    Status Flag

ndps.ndps_substring_match  Substring Match
    Unsigned 32-bit integer
    Substring Match

ndps.ndps_time_limit  Time Limit
    Unsigned 32-bit integer
    Time Limit

ndps.ndps_training  Training
    Unsigned 32-bit integer
    Training

ndps.ndps_xdimension  X Dimension
    Unsigned 32-bit integer
    X Dimension

ndps.ndps_xydim_value  XY Dimension Value Type
    Unsigned 32-bit integer
    XY Dimension Value Type

ndps.ndps_ydimension  Y Dimension
    Unsigned 32-bit integer
    Y Dimension

ndps.net  IPX Network
    IPX network or server name
    Scope

ndps.node  Node
    6-byte Hardware (MAC) Address
    Node

ndps.notify_lease_exp_time  Notify Lease Expiration Time
    Unsigned 32-bit integer
    Notify Lease Expiration Time

ndps.notify_printer_uri  Notify Printer URI
    String
    Notify Printer URI

ndps.notify_seq_number  Notify Sequence Number
    Unsigned 32-bit integer
    Notify Sequence Number

ndps.notify_time_interval  Notify Time Interval
    Unsigned 32-bit integer
    Notify Time Interval

ndps.num_address_items  Number of Address Items
    Unsigned 32-bit integer
    Number of Address Items
```

ndps.num\_areas Number of Areas  
Unsigned 32-bit integer  
Number of Areas

ndps.num\_argss Number of Arguments  
Unsigned 32-bit integer  
Number of Arguments

ndps.num\_attributes Number of Attributes  
Unsigned 32-bit integer  
Number of Attributes

ndps.num\_categories Number of Categories  
Unsigned 32-bit integer  
Number of Categories

ndps.num\_colorants Number of Colorants  
Unsigned 32-bit integer  
Number of Colorants

ndps.num\_destinations Number of Destinations  
Unsigned 32-bit integer  
Number of Destinations

ndps.num\_doc\_types Number of Document Types  
Unsigned 32-bit integer  
Number of Document Types

ndps.num\_events Number of Events  
Unsigned 32-bit integer  
Number of Events

ndps.num\_ignored\_attributes Number of Ignored Attributes  
Unsigned 32-bit integer  
Number of Ignored Attributes

ndps.num\_job\_categories Number of Job Categories  
Unsigned 32-bit integer  
Number of Job Categories

ndps.num\_jobs Number of Jobs  
Unsigned 32-bit integer  
Number of Jobs

ndps.num\_locations Number of Locations  
Unsigned 32-bit integer  
Number of Locations

ndps.num\_names Number of Names  
Unsigned 32-bit integer  
Number of Names

ndps.num\_objects Number of Objects  
Unsigned 32-bit integer  
Number of Objects

ndps.num\_options Number of Options  
Unsigned 32-bit integer  
Number of Options

ndps.num\_page\_informations Number of Page Information Items  
Unsigned 32-bit integer  
Number of Page Information Items

```
ndps.num_page_selects  Number of Page Select Items
    Unsigned 32-bit integer
    Number of Page Select Items

ndps.num_passwords    Number of Passwords
    Unsigned 32-bit integer
    Number of Passwords

ndps.num_results      Number of Results
    Unsigned 32-bit integer
    Number of Results

ndps.num_servers      Number of Servers
    Unsigned 32-bit integer
    Number of Servers

ndps.num_transfer_methods  Number of Transfer Methods
    Unsigned 32-bit integer
    Number of Transfer Methods

ndps.num_values       Number of Values
    Unsigned 32-bit integer
    Number of Values

ndps.num_win31_keys   Number of Windows 3.1 Keys
    Unsigned 32-bit integer
    Number of Windows 3.1 Keys

ndps.num_win95_keys   Number of Windows 95 Keys
    Unsigned 32-bit integer
    Number of Windows 95 Keys

ndps.num_windows_keys  Number of Windows Keys
    Unsigned 32-bit integer
    Number of Windows Keys

ndps.object           Object ID
    Unsigned 32-bit integer
    Object ID

ndps.objectid_def10   Object ID Definition
    No value
    Object ID Definition

ndps.objectid_def11   Object ID Definition
    No value
    Object ID Definition

ndps.objectid_def12   Object ID Definition
    No value
    Object ID Definition

ndps.objectid_def13   Object ID Definition
    No value
    Object ID Definition

ndps.objectid_def14   Object ID Definition
    No value
    Object ID Definition

ndps.objectid_def15   Object ID Definition
    No value
    Object ID Definition
```

```
ndps.objectid_def16  Object ID Definition
    No value
    Object ID Definition
ndps.objectid_def7   Object ID Definition
    No value
    Object ID Definition
ndps.objectid_def8   Object ID Definition
    No value
    Object ID Definition
ndps.objectid_def9   Object ID Definition
    No value
    Object ID Definition
ndps.octet_string    Octet String
    Byte array
    Octet String
ndps.oid              Object ID
    Byte array
    Object ID
ndps.os_count         Number of OSes
    Unsigned 32-bit integer
    Number of OSes
ndps.os_type          OS Type
    Unsigned 32-bit integer
    OS Type
ndps.pa_name          Printer Name
    String
    Printer Name
ndps.packet_count     Packet Count
    Unsigned 32-bit integer
    Packet Count
ndps.packet_type      Packet Type
    Unsigned 32-bit integer
    Packet Type
ndps.password         Password
    Byte array
    Password
ndps.pause_job_type   Pause Job Identifier
    Unsigned 32-bit integer
    Pause Job Identifier
ndps.port             IP Port
    Unsigned 16-bit integer
    IP Port
ndps.print_arg        Print Type
    Unsigned 32-bit integer
    Print Type
ndps.print_def_name   Printer Definition Name
    String
    Printer Definition Name
```

```
ndps.print_dir_name  Printer Directory Name
    String
    Printer Directory Name
ndps.print_file_name  Printer File Name
    String
    Printer File Name
ndps.print_security  Printer Security
    Unsigned 32-bit integer
    Printer Security
ndps.printer_def_count  Number of Printer Definitions
    Unsigned 32-bit integer
    Number of Printer Definitions
ndps.printer_id  Printer ID
    Byte array
    Printer ID
ndps.printer_type_count  Number of Printer Types
    Unsigned 32-bit integer
    Number of Printer Types
ndps.prn_manuf  Printer Manufacturer
    String
    Printer Manufacturer
ndps.prn_type  Printer Type
    String
    Printer Type
ndps.rbuffer  Connection
    Unsigned 32-bit integer
    Connection
ndps.record_length  Record Length
    Unsigned 16-bit integer
    Record Length
ndps.record_mark  Record Mark
    Unsigned 16-bit integer
    Record Mark
ndps.ref_doc_name  Referenced Document Name
    String
    Referenced Document Name
ndps.registry_name  Registry Name
    String
    Registry Name
ndps.reqframe  Request Frame
    Frame number
    Request Frame
ndps.res_type  Resource Type
    Unsigned 32-bit integer
    Resource Type
ndps.resubmit_op_type  Resubmit Operation Type
    Unsigned 32-bit integer
    Resubmit Operation Type
```

```
ndps.ret_code   Return Code
                Unsigned 32-bit integer
                Return Code

ndps.rpc_acc    RPC Accept or Deny
                Unsigned 32-bit integer
                RPC Accept or Deny

ndps.rpc_acc_prob  Access Problem
                Unsigned 32-bit integer
                Access Problem

ndps.rpc_acc_res  RPC Accept Results
                Unsigned 32-bit integer
                RPC Accept Results

ndps.rpc_acc_stat  RPC Accept Status
                Unsigned 32-bit integer
                RPC Accept Status

ndps.rpc_attr_prob  Attribute Problem
                Unsigned 32-bit integer
                Attribute Problem

ndps.rpc_doc_acc_prob  Document Access Problem
                Unsigned 32-bit integer
                Document Access Problem

ndps.rpc_obj_id_type  Object ID Type
                Unsigned 32-bit integer
                Object ID Type

ndps.rpc_oid_struct_size  OID Struct Size
                Unsigned 16-bit integer
                OID Struct Size

ndps.rpc_print_prob  Printer Problem
                Unsigned 32-bit integer
                Printer Problem

ndps.rpc_prob_type  Problem Type
                Unsigned 32-bit integer
                Problem Type

ndps.rpc_rej_stat  RPC Reject Status
                Unsigned 32-bit integer
                RPC Reject Status

ndps.rpc_sec_prob  Security Problem
                Unsigned 32-bit integer
                Security Problem

ndps.rpc_sel_prob  Selection Problem
                Unsigned 32-bit integer
                Selection Problem

ndps.rpc_serv_prob  Service Problem
                Unsigned 32-bit integer
                Service Problem

ndps.rpc_update_prob  Update Problem
                Unsigned 32-bit integer
                Update Problem
```

```
ndps.rpc_version  RPC Version
  Unsigned 32-bit integer
  RPC Version

ndps.sbuffer  Server
  Unsigned 32-bit integer
  Server

ndps.scope  Scope
  Unsigned 32-bit integer
  Scope

ndps.segment.error  Desegmentation error
  Frame number
  Desegmentation error due to illegal segments

ndps.segment.multipletails  Multiple tail segments found
  Boolean
  Several tails were found when desegmenting the packet

ndps.segment.overlap  Segment overlap
  Boolean
  Segment overlaps with other segments

ndps.segment.overlap.conflict  Conflicting data in segment overlap
  Boolean
  Overlapping segments contained conflicting data

ndps.segment.toolongsegment  Segment too long
  Boolean
  Segment contained data past end of packet

ndps.server_name  Server Name
  String
  Server Name

ndps.shutdown_type  Shutdown Type
  Unsigned 32-bit integer
  Shutdown Type

ndps.size_inc_in_feed  Size Increment in Feed
  Byte array
  Size Increment in Feed

ndps.socket  IPX Socket
  Unsigned 16-bit integer
  IPX Socket

ndps.sub_complete  Submission Complete?
  Boolean
  Submission Complete?

ndps.supplier_flag  Supplier Data?
  Boolean
  Supplier Data?

ndps.supplier_name  Supplier Name
  String
  Supplier Name

ndps.time  Time
  Unsigned 32-bit integer
  Time
```

```
ndps.tree      Tree
  String
  Tree

ndps.upper_range  Upper Range
  Unsigned 32-bit integer
  Upper Range

ndps.upper_range_n64  Upper Range
  Byte array
  Upper Range

ndps.user_name  Trustee Name
  String
  Trustee Name

ndps.vendor_dir  Vendor Directory
  String
  Vendor Directory

ndps.windows_key  Windows Key
  String
  Windows Key

ndps.xdimension_n64  X Dimension
  Byte array
  X Dimension

ndps.xid  Exchange ID
  Unsigned 32-bit integer
  Exchange ID

ndps.xmax_n64  Maximum X Dimension
  Byte array
  Maximum X Dimension

ndps.xmin_n64  Minimum X Dimension
  Byte array
  Minimum X Dimension

ndps.ymax_n64  Maximum Y Dimension
  Byte array
  Maximum Y Dimension

ndps.ymin_n64  Minimum Y Dimension
  Byte array
  Minimum Y Dimension

spx.ndps_error  NDPS Error
  Unsigned 32-bit integer
  NDPS Error

spx.ndps_func_broker  Broker Program
  Unsigned 32-bit integer
  Broker Program

spx.ndps_func_delivery  Delivery Program
  Unsigned 32-bit integer
  Delivery Program

spx.ndps_func_notify  Notify Program
  Unsigned 32-bit integer
  Notify Program
```

```
spx.ndps_func_print  Print Program
    Unsigned 32-bit integer
    Print Program

spx.ndps_func_registry  Registry Program
    Unsigned 32-bit integer
    Registry Program

spx.ndps_func_resman  ResMan Program
    Unsigned 32-bit integer
    ResMan Program

spx.ndps_program  NDPS Program Number
    Unsigned 32-bit integer
    NDPS Program Number

spx.ndps_version  Program Version
    Unsigned 32-bit integer
    Program Version
```

### **Novell Modular Authentication Service (nmas)**

```
nmas.attribute  Attribute Type
    Unsigned 32-bit integer
    Attribute Type

nmas.buf_size  Reply Buffer Size
    Unsigned 32-bit integer
    Reply Buffer Size

nmas.clearence  Requested Clearence
    String
    Requested Clearence

nmas.cqueue_bytes  Client Queue Number of Bytes
    Unsigned 32-bit integer
    Client Queue Number of Bytes

nmas.cred_type  Credential Type
    Unsigned 32-bit integer
    Credential Type

nmas.data  Data
    Byte array
    Data

nmas.enc_cred  Encrypted Credential
    Byte array
    Encrypted Credential

nmas.enc_data  Encrypted Data
    Byte array
    Encrypted Data

nmas.encrypt_error  Payload Error
    Unsigned 32-bit integer
    Payload/Encryption Return Code

nmas.frag_handle  Fragment Handle
    Unsigned 32-bit integer
    Fragment Handle
```

```
nmas.func    Function
             Unsigned 8-bit integer
             Function

nmas.length  Length
             Unsigned 32-bit integer
             Length

nmas.login_seq  Requested Login Sequence
              String
              Requested Login Sequence

nmas.login_state  Login State
                 Unsigned 32-bit integer
                 Login State

nmas.lsm_verb  Login Store Message Verb
              Unsigned 8-bit integer
              Login Store Message Verb

nmas.msg_verb  Message Verb
              Unsigned 8-bit integer
              Message Verb

nmas.msg_version  Message Version
                 Unsigned 32-bit integer
                 Message Version

nmas.num_creds  Number of Credentials
               Unsigned 32-bit integer
               Number of Credentials

nmas.opaque  Opaque Data
            Byte array
            Opaque Data

nmas.ping_flags  Flags
                Unsigned 32-bit integer
                Flags

nmas.ping_version  Ping Version
                  Unsigned 32-bit integer
                  Ping Version

nmas.return_code  Return Code
                 Unsigned 32-bit integer
                 Return Code

nmas.session_ident  Session Identifier
                   Unsigned 32-bit integer
                   Session Identifier

nmas.squeue_bytes  Server Queue Number of Bytes
                  Unsigned 32-bit integer
                  Server Queue Number of Bytes

nmas.subfunc  Subfunction
             Unsigned 8-bit integer
             Subfunction

nmas.subverb  Sub Verb
             Unsigned 32-bit integer
             Sub Verb
```

```
nmas.tree    Tree
             String
             Tree

nmas.user    User
             String
             User

nmas.version  NMAP Protocol Version
             Unsigned 32-bit integer
             NMAP Protocol Version
```

**OpenBSD Encapsulating device (enc)**

```

enc.af  Address Family
    Unsigned 32-bit integer
    Protocol (IPv4 vs IPv6)
enc.flags  Flags
    Unsigned 32-bit integer
    ENC flags
enc.spi  SPI
    Unsigned 32-bit integer
    Security Parameter Index

```

**OpenBSD Packet Filter log file (pflog)**

```

pflog.length  Header Length
    Unsigned 8-bit integer
    Length of Header
pflog.rulenr  Rule Number
    Signed 32-bit integer
    Last matched firewall main ruleset rule number
pflog.ruleset  Ruleset
    String
    Ruleset name in anchor
pflog.subrulenr  Sub Rule Number
    Signed 32-bit integer
    Last matched firewall anchored ruleset rule number

```

**OpenBSD Packet Filter log file, pre 3.4 (pflog-old)**

```
pflog.action  Action
              Unsigned 16-bit integer
              Action taken by PF on the packet

pflog.af     Address Family
              Unsigned 32-bit integer
              Protocol (IPv4 vs IPv6)

pflog.dir    Direction
              Unsigned 16-bit integer
              Direction of packet in stack (inbound versus outbound)

pflog.ifname Interface
              String
              Interface

pflog.reason Reason
              Unsigned 16-bit integer
              Reason for logging the packet

pflog.rnr    Rule Number
              Signed 16-bit integer
              Last matched firewall rule number
```

**Optimized Link State Routing Protocol (olsr)**

```
olsr.ansn    Advertised Neighbor Sequence Number (ANSN)
              Unsigned 16-bit integer
              Advertised Neighbor Sequence Number (ANSN)

olsr.data    Data
              Byte array
              Data

olsr.hop_count Hop Count
              Unsigned 8-bit integer
              Hop Count

olsr.htime   Hello emission interval
              Double-precision floating point
              Hello emission interval

olsr.interface6_addr Interface Address
              IPv6 address
              Interface Address

olsr.interface_addr Interface Address
              IPv4 address
              Interface Address

olsr.link_message_size Link Message Size
              Unsigned 16-bit integer
              Link Message Size

olsr.link_type Link Type
              Unsigned 8-bit integer
              Link Type

olsr.message_seq_num Message Sequence Number
              Unsigned 16-bit integer
              Message Sequence Number
```

```
olsr.message_size  Message
    Unsigned 16-bit integer
    Message Size in Bytes

olsr.message_type  Message Type
    Unsigned 8-bit integer
    Message Type

olsr.neighbor6_addr Neighbor Address
    IPv6 address
    Neighbor Address

olsr.neighbor_addr Neighbor Address
    IPv4 address
    Neighbor Address

olsr.netmask       Netmask
    IPv4 address
    Netmask

olsr.netmask6     Netmask
    IPv6 address
    Netmask

olsr.network6_addr Network Address
    IPv6 address
    Network Address

olsr.network_addr Network Address
    IPv4 address
    Network Address

olsr.origin6_addr Originator Address
    IPv6 address
    Originator Address

olsr.origin_addr  Originator Address
    IPv4 address
    Originator Address

olsr.packet_len   Packet Length
    Unsigned 16-bit integer
    Packet Length in Bytes

olsr.packet_seq_num Packet Sequence Number
    Unsigned 16-bit integer
    Packet Sequence Number

olsr.ttl          Time to Live
    Unsigned 8-bit integer
    Time to Live

olsr.vtime        Validity Time
    Double-precision floating point
    Validity Time

olsr.willingness  Willingness to Carry and Forward
    Unsigned 8-bit integer
    Willingness to Carry and Forward
```

ppi.80211n-mac.flags.greenfield  Greenfield flag
    Boolean
    PPI 802.11n MAC Greenfield Flag

ppi.80211n-mac.flags.ht20_40  HT20/HT40 flag
    Boolean
    PPI 802.11n MAC HT20/HT40 Flag

ppi.80211n-mac.flags.more_agg  More aggregates flag
    Boolean
    PPI 802.11n MAC More Aggregates Flag

ppi.80211n-mac.flags.rx.duplicate  Duplicate RX flag
    Boolean
    PPI 802.11n MAC Duplicate RX Flag

ppi.80211n-mac.flags.rx.short_guard_interval  RX Short Guard Interval (SGI) flag
    Boolean
    PPI 802.11n MAC RX Short Guard Interval (SGI) Flag

ppi.80211n-mac.num_delimiters  Num-Delimiters
    Unsigned 8-bit integer
    PPI 802.11n MAC number of zero-length pad delimiters

ppi.80211n-mac.reserved  Reserved
    Unsigned 24-bit integer
    PPI 802.11n MAC Reserved

ppi.8023_extension.errors  Errors
    Unsigned 32-bit integer
    PPI 802.3 Extension Errors

ppi.8023_extension.errors.error1  Error 1
    Boolean
    Debug Error 1

ppi.8023_extension.errors.error2  Error 2
    Boolean
    Debug Error 2

ppi.8023_extension.errors.error3  Error 3
    Boolean
    Debug Error 3

ppi.8023_extension.flags  Flags
    Unsigned 32-bit integer
    PPI 802.3 Extension Flags
```

```
ppi.8023_extension.flags.fcs_present  FCS Present Flag
    Boolean
    FCS (4 bytes) is present at the end of the packet
ppi.8023_extension.flags.flag2  Flag 2
    Boolean
    Debug Flag 2
ppi.8023_extension.flags.flag3  Flag 3
    Boolean
    Debug Flag 3
ppi.aggregation_extension.interface_id  Interface ID
    Unsigned 32-bit integer
    Zero-based index of the physical interface the packet was captured from
ppi.cap-info  Capture information
    Byte array
    PPI Capture information
ppi.dlt  DLT
    Unsigned 32-bit integer
    libpcap Data Link Type (DLT) of the payload
ppi.field_len  Field length
    Unsigned 16-bit integer
    PPI data field length
ppi.field_type  Field type
    Unsigned 16-bit integer
    PPI data field type
ppi.flags  Flags
    Unsigned 8-bit integer
    PPI header flags
ppi.flags.alignment  Alignment
    Boolean
    PPI header flags - 32bit Alignment
ppi.flags.reserved  Reserved
    Unsigned 8-bit integer
    PPI header flags - Reserved Flags
ppi.length  Header length
    Unsigned 16-bit integer
    Length of header including payload
ppi.proc-info  Process information
    Byte array
    PPI Process information
ppi.spectrum-map  Radio spectrum map
    Byte array
    PPI Radio spectrum map
ppi.version  Version
    Unsigned 8-bit integer
    PPI header format version
```

**PPP Bandwidth Allocation Control Protocol (bap)****PPP Bandwidth Allocation Protocol (bap)****PPP Bridging Control Protocol (bcp)**

```
bcp.flags  Flags
           Unsigned 8-bit integer

bcp.flags.bcontrol  Bridge control
                   Boolean

bcp.flags.fcs_present  LAN FCS present
                       Boolean

bcp.flags.zeropad  802.3 pad zero-filled
                   Boolean

bcp.mac_type  MAC Type
              Unsigned 8-bit integer

bcp.pads  Pads
          Unsigned 8-bit integer
```

`p_mul.analysis.dup_ack_no` Duplicate ACK #  
Unsigned 32-bit integer  
Duplicate Ack count

`p_mul.analysis.elapsed_time` Time since Address PDU  
Time duration  
The time between the Address PDU and this PDU

`p_mul.analysis.last_pdu_in` Last Data PDU in  
Frame number  
The last Data PDU found in this frame

`p_mul.analysis.msg_first_in` Retransmission of Message in  
Frame number  
This Message was first sent in this frame

`p_mul.analysis.pdu_delay` PDU Delay  
Time duration  
The time between the last PDU and this PDU

`p_mul.analysis.prev_pdu_in` Previous PDU in  
Frame number  
The previous PDU is found in this frame

`p_mul.analysis.prev_pdu_missing` Previous PDU missing  
No value  
The previous PDU for this packet is missing

`p_mul.analysis.retrans_no` Retransmission #  
Unsigned 32-bit integer  
Retransmission count

`p_mul.analysis.retrans_time` Retransmission Time  
Time duration  
The time between the last PDU and this PDU

```

p_mul.analysis.total_retrans_time  Total Retransmission Time
    Time duration
    The time between the first PDU and this PDU
p_mul.analysis.total_time  Total Time
    Time duration
    The time between the first Address PDU and the Ack
p_mul.ann_mc_group  Announced Multicast Group
    Unsigned 32-bit integer
    Announced Multicast Group
p_mul.checksum  Checksum
    Unsigned 16-bit integer
    Checksum
p_mul.checksum_bad  Bad
    Boolean
    True: checksum doesn't match packet content; False: matches content or not c
p_mul.checksum_good  Good
    Boolean
    True: checksum matches packet content; False: doesn't match content or not c
p_mul.data_fragment  Fragment of Data
    No value
    Fragment of Data
p_mul.dest_count  Count of Destination Entries
    Unsigned 16-bit integer
    Count of Destination Entries
p_mul.dest_entry  Destination Entry
    No value
    Destination Entry
p_mul.dest_id  Destination ID
    IPv4 address
    Destination ID
p_mul.expiry_time  Expiry Time
    Date/Time stamp
    Expiry Time
p_mul.fec.id  FEC ID
    Unsigned 8-bit integer
    Forward Error Correction ID
p_mul.fec.length  FEC Parameter Length
    Unsigned 8-bit integer
    Forward Error Correction Parameter Length
p_mul.fec.parameters  FEC Parameters
    No value
    Forward Error Correction Parameters
p_mul.first  First
    Boolean
    First
p_mul.fragment  Message fragment
    Frame number
    Message fragment

```

```
p_mul.fragment.error    Message defragmentation error
    Frame number
    Message defragmentation error
p_mul.fragment.multiple_tails  Message has multiple tail fragments
    Boolean
    Message has multiple tail fragments
p_mul.fragment.overlap  Message fragment overlap
    Boolean
    Message fragment overlap
p_mul.fragment.overlap.conflicts  Message fragment overlapping with conflicting
    Boolean
    Message fragment overlapping with conflicting data
p_mul.fragment.too_long_fragment  Message fragment too long
    Boolean
    Message fragment too long
p_mul.fragments  Message fragments
    No value
    Message fragments
p_mul.last  Last
    Boolean
    Last
p_mul.length  Length of PDU
    Unsigned 16-bit integer
    Length of PDU
p_mul.mc_group  Multicast Group
    Unsigned 32-bit integer
    Multicast Group
p_mul.message_id  Message ID (MSID)
    Unsigned 32-bit integer
    Message ID
p_mul.missing_seq_no  Missing Data PDU Seq Number
    Unsigned 16-bit integer
    Missing Data PDU Seq Number
p_mul.msg_seq_no  Message Sequence Number
    Unsigned 16-bit integer
    Message Sequence Number
p_mul.no_missing_seq_no  Total Number of Missing Data PDU Sequence Numbers
    Unsigned 16-bit integer
    Total Number of Missing Data PDU Sequence Numbers
p_mul.no_pdus  Total Number of PDUs
    Unsigned 16-bit integer
    Total Number of PDUs
p_mul.pdu_type  PDU Type
    Unsigned 8-bit integer
    PDU Type
p_mul.priority  Priority
    Unsigned 8-bit integer
    Priority
```

```

p_mul.reassembled.in  Reassembled in
    Frame number
    Reassembled in

p_mul.reserved_length  Length of Reserved Field
    Unsigned 16-bit integer
    Length of Reserved Field

p_mul.seq_no  Sequence Number of PDUs
    Unsigned 16-bit integer
    Sequence Number of PDUs

p_mul.source_id  Source ID
    IPv4 address
    Source ID

p_mul.source_id_ack  Source ID of Ack Sender
    IPv4 address
    Source ID of Ack Sender

p_mul.sym_key  Symmetric Key
    No value
    Symmetric Key

p_mul.timestamp  Timestamp Option
    Unsigned 64-bit integer
    Timestamp Option (in units of 100ms)

p_mul.unused  MAP unused
    Unsigned 8-bit integer
    MAP unused

```

#### **Packed Encoding Rules (ASN.1 X.691) (per)**

```

per._const_int_len  Constrained Integer Length
    Unsigned 32-bit integer
    Number of bytes in the Constrained Integer

per.arbitrary  arbitrary
    Byte array
    per.T_arbitrary

per.bit_string_length  Bit String Length
    Unsigned 32-bit integer
    Number of bits in the Bit String

per.choice_extension_index  Choice Extension Index
    Unsigned 32-bit integer
    Which index of the Choice within extension addition is encoded

per.choice_index  Choice Index
    Unsigned 32-bit integer
    Which index of the Choice within extension root is encoded

per.data_value_descriptor  data-value-descriptor
    String
    per.T_data_value_descriptor

per.direct_reference  direct-reference
    per.T_direct_reference

```

per.encoding encoding  
Unsigned 32-bit integer  
per.External\_encoding

per.enum\_extension\_index Enumerated Extension Index  
Unsigned 32-bit integer  
Which index of the Enumerated within extension addition is encoded

per.enum\_index Enumerated Index  
Unsigned 32-bit integer  
Which index of the Enumerated within extension root is encoded

per.extension\_bit Extension Bit  
Boolean  
The extension bit of an aggregate

per.extension\_present\_bit Extension Present Bit  
Boolean  
Whether this optional extension is present or not

per.generalstring\_length GeneralString Length  
Unsigned 32-bit integer  
Length of the GeneralString

per.indirect\_reference indirect-reference  
Signed 32-bit integer  
per.T\_indirect\_reference

per.num\_sequence\_extensions Number of Sequence Extensions  
Unsigned 32-bit integer  
Number of extensions encoded in this sequence

per.object\_length Object Identifier Length  
Unsigned 32-bit integer  
Length of the object identifier

per.octet\_aligned octet-aligned  
Byte array  
per.T\_octet\_aligned

per.octet\_string\_length Octet String Length  
Unsigned 32-bit integer  
Number of bytes in the Octet String

per.open\_type\_length Open Type Length  
Unsigned 32-bit integer  
Length of an open type encoding

per.optional\_field\_bit Optional Field Bit  
Boolean  
This bit specifies the presence/absence of an optional field

per.real\_length Raal Length  
Unsigned 32-bit integer  
Length of an real encoding

per.sequence\_of\_length Sequence-Of Length  
Unsigned 32-bit integer  
Number of items in the Sequence Of

per.single\_ASN1\_type single-ASN1-type  
No value  
per.T\_single\_ASN1\_type

per.small\_number\_bit Small Number Bit  
Boolean  
The small number bit for a section 10.6 integer

#### **Packet Cable Lawful Intercept (pcli)**

pcli.cccid CCCID  
Unsigned 32-bit integer  
Call Content Connection Identifier

#### **PacketCable (pktc)**

pktc.ack\_required ACK Required Flag  
Boolean  
ACK Required Flag

pktc.asd Application Specific Data  
No value  
KMMID/DOI application specific data

pktc.asd.ipsec\_auth\_alg IPsec Authentication Algorithm  
Unsigned 8-bit integer  
IPsec Authentication Algorithm

pktc.asd.ipsec\_enc\_alg IPsec Encryption Transform ID  
Unsigned 8-bit integer  
IPsec Encryption Transform ID

pktc.asd.ipsec\_spi IPsec Security Parameter Index  
Unsigned 32-bit integer  
Security Parameter Index for inbound Security Association (IPsec)

pktc.asd.snmp\_auth\_alg SNMPv3 Authentication Algorithm  
Unsigned 8-bit integer  
SNMPv3 Authentication Algorithm

pktc.asd.snmp\_enc\_alg SNMPv3 Encryption Transform ID  
Unsigned 8-bit integer  
SNMPv3 Encryption Transform ID

pktc.asd.snmp\_engine\_boots SNMPv3 Engine Boots  
Unsigned 32-bit integer  
SNMPv3 Engine Boots

pktc.asd.snmp\_engine\_id SNMPv3 Engine ID  
Byte array  
SNMPv3 Engine ID

pktc.asd.snmp\_engine\_id.len SNMPv3 Engine ID Length  
Unsigned 8-bit integer  
Length of SNMPv3 Engine ID

pktc.asd.snmp\_engine\_time SNMPv3 Engine Time  
Unsigned 32-bit integer  
SNMPv3 Engine ID Time

pktc.asd.snmp\_usm\_username SNMPv3 USM User Name  
String  
SNMPv3 USM User Name

```
pktc.asd.snmp_usm_username.len  SNMPv3 USM User Name Length
    Unsigned 8-bit integer
    Length of SNMPv3 USM User Name
pktc.ciphers  List of Ciphersuites
    No value
    List of Ciphersuites
pktc.ciphers.len  Number of Ciphersuites
    Unsigned 8-bit integer
    Number of Ciphersuites
pktc.doi  Domain of Interpretation
    Unsigned 8-bit integer
    Domain of Interpretation
pktc.grace_period  Grace Period
    Unsigned 32-bit integer
    Grace Period in seconds
pktc.kmmid  Key Management Message ID
    Unsigned 8-bit integer
    Key Management Message ID
pktc.mtafqdn.enterprise  Enterprise Number
    Unsigned 32-bit integer
    Enterprise Number
pktc.mtafqdn.fqdn  MTA FQDN
    String
    MTA FQDN
pktc.mtafqdn.ip  MTA IP Address
    IPv4 address
    MTA IP Address (all zeros if not supplied)
pktc.mtafqdn.mac  MTA MAC address
    6-byte Hardware (MAC) Address
    MTA MAC address
pktc.mtafqdn.manu_cert_revoked  Manufacturer Cert Revocation Time
    Date/Time stamp
    Manufacturer Cert Revocation Time (UTC) or 0 if not revoked
pktc.mtafqdn.msgtype  Message Type
    Unsigned 8-bit integer
    MTA FQDN Message Type
pktc.mtafqdn.pub_key_hash  MTA Public Key Hash
    Byte array
    MTA Public Key Hash (SHA-1)
pktc.mtafqdn.version  Protocol Version
    Unsigned 8-bit integer
    MTA FQDN Protocol Version
pktc.reestablish  Re-establish Flag
    Boolean
    Re-establish Flag
pktc.server_nonce  Server Nonce
    Unsigned 32-bit integer
    Server Nonce random number
```

```
pktc.server_principal  Server Kerberos Principal Identifier
    String
    Server Kerberos Principal Identifier
pktc.shal_hmac  SHA-1 HMAC
    Byte array
    SHA-1 HMAC
pktc.spl  Security Parameter Lifetime
    Unsigned 32-bit integer
    Lifetime in seconds of security parameter
pktc.timestamp  Timestamp
    String
    Timestamp (UTC)
pktc.version.major  Major version
    Unsigned 8-bit integer
    Major version of PKTC
pktc.version.minor  Minor version
    Unsigned 8-bit integer
    Minor version of PKTC
```

**PacketCable AVPs (paketcable\_avps)**

```
radius.vendor.pkt.bcid.ec  Event Counter
    Unsigned 32-bit integer
    PacketCable Event Message BCID Event Counter
radius.vendor.pkt.bcid.ts  Timestamp
    Unsigned 32-bit integer
    PacketCable Event Message BCID Timestamp
radius.vendor.pkt.ctc.cc  Event Object
    Unsigned 32-bit integer
    PacketCable Call Termination Cause Code
radius.vendor.pkt.ctc.sd  Source Document
    Unsigned 16-bit integer
    PacketCable Call Termination Cause Source Document
radius.vendor.pkt.emh.ac  Attribute Count
    Unsigned 16-bit integer
    PacketCable Event Message Attribute Count
radius.vendor.pkt.emh.emt  Event Message Type
    Unsigned 16-bit integer
    PacketCable Event Message Type
radius.vendor.pkt.emh.eo  Event Object
    Unsigned 8-bit integer
    PacketCable Event Message Event Object
radius.vendor.pkt.emh.et  Element Type
    Unsigned 16-bit integer
    PacketCable Event Message Element Type
radius.vendor.pkt.emh.priority  Priority
    Unsigned 8-bit integer
    PacketCable Event Message Priority
```

```
radius.vendor.pkt.emh.sn  Sequence Number
    Unsigned 32-bit integer
    PacketCable Event Message Sequence Number

radius.vendor.pkt.emh.st  Status
    Unsigned 32-bit integer
    PacketCable Event Message Status

radius.vendor.pkt.emh.st.ei  Status
    Unsigned 32-bit integer
    PacketCable Event Message Status Error Indicator

radius.vendor.pkt.emh.st.emp  Event Message Proxied
    Unsigned 32-bit integer
    PacketCable Event Message Status Event Message Proxied

radius.vendor.pkt.emh.st.eo  Event Origin
    Unsigned 32-bit integer
    PacketCable Event Message Status Event Origin

radius.vendor.pkt.emh.vid  Event Message Version ID
    Unsigned 16-bit integer
    PacketCable Event Message header version ID

radius.vendor.pkt.esi.cccp  CCC-Port
    Unsigned 16-bit integer
    PacketCable Electronic-Surveillance-Indication CCC-Port

radius.vendor.pkt.esi.cdcp  CDC-Port
    Unsigned 16-bit integer
    PacketCable Electronic-Surveillance-Indication CDC-Port

radius.vendor.pkt.esi.dfccca  DF_CDC_Address
    IPv4 address
    PacketCable Electronic-Surveillance-Indication DF_CCC_Address

radius.vendor.pkt.esi.dfcdca  DF_CDC_Address
    IPv4 address
    PacketCable Electronic-Surveillance-Indication DF_CDC_Address

radius.vendor.pkt.qs  QoS Status
    Unsigned 32-bit integer
    PacketCable QoS Descriptor Attribute QoS Status

radius.vendor.pkt.qs.flags.gi  Grant Interval
    Unsigned 32-bit integer
    PacketCable QoS Descriptor Attribute Bitmask: Grant Interval

radius.vendor.pkt.qs.flags.gpi  Grants Per Interval
    Unsigned 32-bit integer
    PacketCable QoS Descriptor Attribute Bitmask: Grants Per Interval

radius.vendor.pkt.qs.flags.mcb  Maximum Concatenated Burst
    Unsigned 32-bit integer
    PacketCable QoS Descriptor Attribute Bitmask: Maximum Concatenated Burst

radius.vendor.pkt.qs.flags.mdl  Maximum Downstream Latency
    Unsigned 32-bit integer
    PacketCable QoS Descriptor Attribute Bitmask: Maximum Downstream Latency

radius.vendor.pkt.qs.flags.mps  Minium Packet Size
    Unsigned 32-bit integer
    PacketCable QoS Descriptor Attribute Bitmask: Minimum Packet Size
```

radius.vendor.pkt.qs.flags.mrtr Minimum Reserved Traffic Rate  
Unsigned 32-bit integer  
PacketCable QoS Descriptor Attribute Bitmask: Minimum Reserved Traffic Rate

radius.vendor.pkt.qs.flags.msr Maximum Sustained Rate  
Unsigned 32-bit integer  
PacketCable QoS Descriptor Attribute Bitmask: Maximum Sustained Rate

radius.vendor.pkt.qs.flags.mtb Maximum Traffic Burst  
Unsigned 32-bit integer  
PacketCable QoS Descriptor Attribute Bitmask: Maximum Traffic Burst

radius.vendor.pkt.qs.flags.npi Nominal Polling Interval  
Unsigned 32-bit integer  
PacketCable QoS Descriptor Attribute Bitmask: Nominal Polling Interval

radius.vendor.pkt.qs.flags.sfst Service Flow Scheduling Type  
Unsigned 32-bit integer  
PacketCable QoS Descriptor Attribute Bitmask: Service Flow Scheduling Type

radius.vendor.pkt.qs.flags.srtp Status Request/Transmission Policy  
Unsigned 32-bit integer  
PacketCable QoS Descriptor Attribute Bitmask: Status Request/Transmission Policy

radius.vendor.pkt.qs.flags.tgj Tolerated Grant Jitter  
Unsigned 32-bit integer  
PacketCable QoS Descriptor Attribute Bitmask: Tolerated Grant Jitter

radius.vendor.pkt.qs.flags.toso Type of Service Override  
Unsigned 32-bit integer  
PacketCable QoS Descriptor Attribute Bitmask: Type of Service Override

radius.vendor.pkt.qs.flags.tp Traffic Priority  
Unsigned 32-bit integer  
PacketCable QoS Descriptor Attribute Bitmask: Traffic Priority

radius.vendor.pkt.qs.flags.tpj Tolerated Poll Jitter  
Unsigned 32-bit integer  
PacketCable QoS Descriptor Attribute Bitmask: Tolerated Poll Jitter

radius.vendor.pkt.qs.flags.ugs Unsolicited Grant Size  
Unsigned 32-bit integer  
PacketCable QoS Descriptor Attribute Bitmask: Unsolicited Grant Size

radius.vendor.pkt.qs.gi Grant Interval  
Unsigned 32-bit integer  
PacketCable QoS Descriptor Attribute Grant Interval

radius.vendor.pkt.qs.gpi Grants Per Interval  
Unsigned 32-bit integer  
PacketCable QoS Descriptor Attribute Grants Per Interval

radius.vendor.pkt.qs.mcb Maximum Concatenated Burst  
Unsigned 32-bit integer  
PacketCable QoS Descriptor Attribute Maximum Concatenated Burst

radius.vendor.pkt.qs.mdl Maximum Downstream Latency  
Unsigned 32-bit integer  
PacketCable QoS Descriptor Attribute Maximum Downstream Latency

radius.vendor.pkt.qs.mps Minimum Packet Size  
Unsigned 32-bit integer  
PacketCable QoS Descriptor Attribute Minimum Packet Size

```
radius.vendor.pkt.qs.mrtr  Minimum Reserved Traffic Rate
    Unsigned 32-bit integer
    PacketCable QoS Descriptor Attribute Minimum Reserved Traffic Rate
radius.vendor.pkt.qs.msr  Maximum Sustained Rate

                mpeg_pes.BIT_STRING_SIZE_12
mpeg-pes.horizontal_size_extension  horizontal-size-extension
                Unsigned 32-bit integer
                mpeg_pes.INTEGER_0_3
mpeg-pes.hour    hour
                Unsigned 32-bit integer
                mpeg_pes.INTEGER_0_32
mpeg-pes.length  length
                Unsigned 16-bit integer
                mpeg_pes.INTEGER_0_65535
```

```
mpeg-pes.load_intra_quantiser_matrix  load-intra-quantiser-matrix
  Boolean
  mpeg_pes.BOOLEAN
mpeg-pes.load_non_intra_quantiser_matrix  load-non-intra-quantiser-matrix
  Boolean
  mpeg_pes.BOOLEAN
mpeg-pes.low_delay  low-delay
  Boolean
  mpeg_pes.BOOLEAN
mpeg-pes.minute  minute
  Unsigned 32-bit integer
  mpeg_pes.INTEGER_0_64
mpeg-pes.must_be_0001  must-be-0001
  Byte array
  mpeg_pes.BIT_STRING_SIZE_4
mpeg-pes.must_be_one  must-be-one
  Boolean
  mpeg_pes.BOOLEAN
mpeg-pes.must_be_zero  must-be-zero
  Boolean
  mpeg_pes.BOOLEAN
mpeg-pes.original  original
  Boolean
  mpeg_pes.BOOLEAN
mpeg-pes.pack  Pack header
  No value
mpeg-pes.pack-length  pack length
  Unsigned 8-bit integer
mpeg-pes.padding  PES padding
  Byte array
mpeg-pes.prefix  prefix
  Byte array
  mpeg_pes.OCTET_STRING_SIZE_3
mpeg-pes.priority  priority
  Boolean
  mpeg_pes.BOOLEAN
mpeg-pes.private-data  private data
  Unsigned 16-bit integer
mpeg-pes.profile_and_level  profile-and-level
  Unsigned 32-bit integer
  mpeg_pes.INTEGER_0_255
mpeg-pes.program-mux-rate  PES program mux rate
  Unsigned 24-bit integer
mpeg-pes.progressive_sequence  progressive-sequence
  Boolean
  mpeg_pes.BOOLEAN
```

```
mpeg-pes.pstd-buffer  P-STD buffer size
    Unsigned 16-bit integer
mpeg-pes.pts  presentation time stamp (PTS)
    Time duration
mpeg-pes.pts_flag  pts-flag
    Boolean
    mpeg_pes.BOOLEAN
mpeg-pes.scr  system clock reference (SCR)
    Time duration
mpeg-pes.scrambling_control  scrambling-control
    Unsigned 32-bit integer
    mpeg_pes.T_scrambling_control
mpeg-pes.second  second
    Unsigned 32-bit integer
    mpeg_pes.INTEGER_0_64
mpeg-pes.sequence  sequence
    Unsigned 16-bit integer
mpeg-pes.stream  stream
    Unsigned 8-bit integer
    mpeg_pes.T_stream
mpeg-pes.stuffing  PES stuffing bytes
    Byte array
mpeg-pes.stuffing-length  PES stuffing length
    Unsigned 8-bit integer
mpeg-pes.temporal_sequence_number  temporal-sequence-number
    Byte array
    mpeg_pes.BIT_STRING_SIZE_10
mpeg-pes.vbv_buffer_size  vbv-buffer-size
    Byte array
    mpeg_pes.BIT_STRING_SIZE_10
mpeg-pes.vbv_buffer_size_extension  vbv-buffer-size-extension
    Unsigned 32-bit integer
    mpeg_pes.INTEGER_0_255
mpeg-pes.vbv_delay  vbv-delay
    Byte array
    mpeg_pes.BIT_STRING_SIZE_16
mpeg-pes.vertical_size  vertical-size
    Byte array
    mpeg_pes.BIT_STRING_SIZE_12
mpeg-pes.vertical_size_extension  vertical-size-extension
    Unsigned 32-bit integer
    mpeg_pes.INTEGER_0_3
mpeg-video.data  MPEG picture data
    Byte array
mpeg-video.gop  MPEG group of pictures
    No value
```

```

mpeg-video.picture  MPEG picture
    No value
mpeg-video.quant  MPEG quantization matrix
    Byte array
mpeg-video.sequence  MPEG sequence header
    No value
mpeg-video.sequence-ext  MPEG sequence extension
    No value

```

### Parallel Redundancy Protocol (IEC62439 Chapter 6) (prp)

```

prp.supervision_frame.length  length
    Unsigned 8-bit integer
prp.supervision_frame.length2  length2
    Unsigned 8-bit integer
prp.supervision_frame.prp_red_box_mac_address  redBoxMacAddress
    6-byte Hardware (MAC) Address
prp.supervision_frame.prp_source_mac_address_A  sourceMacAddressA
    6-byte Hardware (MAC) Address
prp.supervision_frame.prp_source_mac_address_B  sourceMacAddressB
    6-byte Hardware (MAC) Address
prp.supervision_frame.prp_vdan_mac_address  vdanMacAddress
    6-byte Hardware (MAC) Address
prp.supervision_frame.type  type
    Unsigned 8-bit integer
prp.supervision_frame.type2  type2
    Unsigned 8-bit integer
prp.supervision_frame.version  version
    Unsigned 16-bit integer
prp.trailer.prp_lan  lan
    Unsigned 16-bit integer
prp.trailer.prp_sequence_nr  sequenceNr
    Unsigned 16-bit integer
prp.trailer.prp_size  size
    Unsigned 16-bit integer

```

### Parallel Virtual File System (pvfs)

```

pvfs.aggregate_size  Aggregate Size
    Unsigned 64-bit integer
    Aggregate Size
pvfs.atime  atime
    Date/Time stamp
    Access Time
pvfs.atime.sec  seconds
    Unsigned 32-bit integer
    Access Time (seconds)

```

```
pvfs.atime.usec  microseconds
                Unsigned 32-bit integer
                Access Time (microseconds)

pvfs.attribute  attr
                Unsigned 32-bit integer
                Attribute

pvfs.attribute.key  Attribute key
                   String
                   Attribute key

pvfs.attribute.value  Attribute value
                     String
                     Attribute value

pvfs.attrmask  attrmask
              Unsigned 32-bit integer
              Attribute Mask

pvfs.b_size  Size of bstream (if applicable)
            Unsigned 64-bit integer
            Size of bstream

pvfs.bytes_available  Bytes Available
                    Unsigned 64-bit integer
                    Bytes Available

pvfs.bytes_completed  Bytes Completed
                     Unsigned 64-bit integer
                     Bytes Completed

pvfs.bytes_read  bytes_read
                Unsigned 64-bit integer
                bytes_read

pvfs.bytes_total  Bytes Total
                 Unsigned 64-bit integer
                 Bytes Total

pvfs.bytes_written  bytes_written
                   Unsigned 64-bit integer
                   bytes_written

pvfs.context_id  Context ID
                Unsigned 32-bit integer
                Context ID

pvfs.ctime  ctime
           Date/Time stamp
           Creation Time

pvfs.ctime.sec  seconds
               Unsigned 32-bit integer
               Creation Time (seconds)

pvfs.ctime.usec  microseconds
                Unsigned 32-bit integer
                Creation Time (microseconds)

pvfs.cur_time_ms  cur_time_ms
                Unsigned 64-bit integer
                cur_time_ms
```

```
pvfs.directory_version  Directory Version
    Unsigned 64-bit integer
    Directory Version

pvfs.dirent_count  Dir Entry Count
    Unsigned 64-bit integer
    Directory Entry Count

pvfs.distribution.name  Name
    String
    Distribution Name

pvfs.ds_type  ds_type
    Unsigned 32-bit integer
    Type

pvfs.encoding  Encoding
    Unsigned 32-bit integer
    Encoding

pvfs.end_time_ms  end_time_ms
    Unsigned 64-bit integer
    end_time_ms

pvfs.ereg  ereg
    Signed 32-bit integer
    ereg

pvfs.error  Result
    Unsigned 32-bit integer
    Result

pvfs.fh.hash  hash
    Unsigned 32-bit integer
    file handle hash

pvfs.fh.length  length
    Unsigned 32-bit integer
    file handle length

pvfs.flowproto_type  Flow Protocol Type
    Unsigned 32-bit integer
    Flow Protocol Type

pvfs.fs_id  fs_id
    Unsigned 32-bit integer
    File System ID

pvfs.handle  Handle
    Byte array
    Handle

pvfs.handles_available  Handles Available
    Unsigned 64-bit integer
    Handles Available

pvfs.id_gen_t  id_gen_t
    Unsigned 64-bit integer
    id_gen_t

pvfs.io_type  I/O Type
    Unsigned 32-bit integer
    I/O Type
```

```
pvfs.k_size  Number of keyvals (if applicable)
             Unsigned 64-bit integer
             Number of keyvals

pvfs.lb      lb
             Unsigned 64-bit integer
             lb

pvfs.load_average.15s  Load Average (15s)
                      Unsigned 64-bit integer
                      Load Average (15s)

pvfs.load_average.1s   Load Average (1s)
                      Unsigned 64-bit integer
                      Load Average (1s)

pvfs.load_average.5s   Load Average (5s)
                      Unsigned 64-bit integer
                      Load Average (5s)

pvfs.magic_nr  Magic Number
              Unsigned 32-bit integer
              Magic Number

pvfs.metadata_read  metadata_read
                  Unsigned 64-bit integer
                  metadata_read

pvfs.metadata_write metadata_write
                  Unsigned 64-bit integer
                  metadata_write

pvfs.mode  Mode
          Unsigned 32-bit integer
          Mode

pvfs.mtime  mtime
          Date/Time stamp
          Modify Time

pvfs.mtime.sec  seconds
              Unsigned 32-bit integer
              Modify Time (seconds)

pvfs.mtime.usec  microseconds
              Unsigned 32-bit integer
              Modify Time (microseconds)

pvfs.num_blocks  Number of blocks
                Unsigned 32-bit integer
                Number of blocks

pvfs.num_contig_chunks  Number of contig_chunks
                      Unsigned 32-bit integer
                      Number of contig_chunks

pvfs.num_eregs  Number of eregs
              Unsigned 32-bit integer
              Number of eregs

pvfs.offset  Offset
            Unsigned 64-bit integer
            Offset
```

```
pvfs.parent_atime  Parent atime
    Date/Time stamp
    Access Time

pvfs.parent_atime.sec  seconds
    Unsigned 32-bit integer
    Access Time (seconds)

pvfs.parent_atime.usec  microseconds
    Unsigned 32-bit integer
    Access Time (microseconds)

pvfs.parent_ctime  Parent ctime
    Date/Time stamp
    Creation Time

pvfs.parent_ctime.sec  seconds
    Unsigned 32-bit integer
    Creation Time (seconds)

pvfs.parent_ctime.usec  microseconds
    Unsigned 32-bit integer
    Creation Time (microseconds)

pvfs.parent_mtime  Parent mtime
    Date/Time stamp
    Modify Time

pvfs.parent_mtime.sec  seconds
    Unsigned 32-bit integer
    Modify Time (seconds)

pvfs.parent_mtime.usec  microseconds
    Unsigned 32-bit integer
    Modify Time (microseconds)

pvfs.path  Path
    String
    Path

pvfs.prev_value  Previous Value
    Unsigned 64-bit integer
    Previous Value

pvfs.ram.free_bytes  RAM Free Bytes
    Unsigned 64-bit integer
    RAM Free Bytes

pvfs.ram_bytes_free  RAM Bytes Free
    Unsigned 64-bit integer
    RAM Bytes Free

pvfs.ram_bytes_total  RAM Bytes Total
    Unsigned 64-bit integer
    RAM Bytes Total

pvfs.release_number  Release Number
    Unsigned 32-bit integer
    Release Number

pvfs.server_count  Number of servers
    Unsigned 32-bit integer
    Number of servers
```

```
pvfs.server_nr  Server #
                Unsigned 32-bit integer
                Server #

pvfs.server_op  Server Operation
                Unsigned 32-bit integer
                Server Operation

pvfs.server_param  Server Parameter
                  Unsigned 32-bit integer
                  Server Parameter

pvfs.size  Size
           Unsigned 64-bit integer
           Size

pvfs.sreg  sreg
          Signed 32-bit integer
          sreg

pvfs.start_time_ms  start_time_ms
                   Unsigned 64-bit integer
                   start_time_ms

pvfs.stride  Stride
            Unsigned 64-bit integer
            Stride

pvfs.strip_size  Strip size
                Unsigned 64-bit integer
                Strip size (bytes)

pvfs.tag  Tag
         Unsigned 64-bit integer
         Tag

pvfs.total_handles  Total Handles
                   Unsigned 64-bit integer
                   Total Handles

pvfs.ub  ub
        Unsigned 64-bit integer
        ub

pvfs.uptime  Uptime (seconds)
            Unsigned 64-bit integer
            Uptime (seconds)
```

                                 Unsigned 16-bit integer

pingpongprotocol.message_type   Type
                                 Unsigned 8-bit integer

pingpongprotocol.ping_data      Ping_Data
                                 Byte array

pingpongprotocol.ping_messageno  MessageNo
                                 Unsigned 64-bit integer

pingpongprotocol.pong_data       Pong_Data
                                 Byte array

pingpongprotocol.pong_messageno  MessageNo
                                 Unsigned 64-bit integer

pingpongprotocol.pong_replyno    ReplyNo
                                 Unsigned 64-bit integer
```

### **Plan 9 9P (9p)**

```
9p.aname  Aname
           String
           Access Name

9p.atime  Atime
           Date/Time stamp
           Access Time

9p.count  Count
           Unsigned 32-bit integer
           Count

9p.dev    Dev
           Unsigned 32-bit integer
```

```
9p.ename  Ename
          String
          Error

9p.fid    Fid
          Unsigned 32-bit integer
          File ID

9p.filename  File name
            String
            File name

9p.gid     Gid
          String
          Group id

9p.iounit  I/O Unit
          Unsigned 32-bit integer
          I/O Unit

9p.length  Length
          Unsigned 64-bit integer
          File Length

9p.maxsize  Max msg size
          Unsigned 32-bit integer
          Max message size

9p.mode     Mode
          Unsigned 8-bit integer
          Mode

9p.mode.orclose  Remove on close
          Boolean

9p.mode.rwx  Open/Create Mode
          Unsigned 8-bit integer
          Open/Create Mode

9p.mode.trunc  Trunc
          Boolean
          Truncate

9p.msglen   Msg length
          Unsigned 32-bit integer
          9P Message Length

9p.msgtype  Msg Type
          Unsigned 8-bit integer
          Message Type

9p.mtime    Mtime
          Date/Time stamp
          Modified Time

9p.muid     Muid
          String
          Last modifiers uid

9p.name     Name
          String
          Name of file
```

9p.newfid New fid  
Unsigned 32-bit integer  
New file ID

9p.nqid Nr Qids  
Unsigned 16-bit integer  
Number of Qid results

9p.nwalk Nr Walks  
Unsigned 32-bit integer  
Nr of walk items

9p.offset Offset  
Unsigned 64-bit integer  
Offset

9p.oldtag Old tag  
Unsigned 16-bit integer  
Old tag

9p.paramsz Param length  
Unsigned 16-bit integer  
Parameter length

9p.perm Permissions  
Unsigned 32-bit integer  
Permission bits

9p.qidpath Qid path  
Unsigned 64-bit integer  
Qid path

9p.qidtype Qid type  
Unsigned 8-bit integer  
Qid type

9p.qidvers Qid version  
Unsigned 32-bit integer  
Qid version

9p.sdlen Stat data length  
Unsigned 16-bit integer  
Stat data length

9p.statmode Mode  
Unsigned 32-bit integer  
File mode flags

9p.statttype Type  
Unsigned 16-bit integer  
Type

9p.tag Tag  
Unsigned 16-bit integer  
9P Tag

9p.uid Uid  
String  
User id

9p.uname Uname  
String  
User Name

9p.version Version  
String  
Version

9p.wname Wname  
String  
Path Name Element

### **Point-to-Point Protocol (ppp)**

ppp.address Address  
Unsigned 8-bit integer

ppp.control Control  
Unsigned 8-bit integer

ppp.direction Direction  
Unsigned 8-bit integer  
PPP direction

ppp.protocol Protocol  
Unsigned 16-bit integer

### **Point-to-Point Tunnelling Protocol (pptp)**

pptp.type Message type  
Unsigned 16-bit integer  
PPTP message type

### **Port Aggregation Protocol (pagp)**

pagp.flags Flags  
Unsigned 8-bit integer  
Information flags

pagp.flags.automode Auto Mode  
Boolean  
1 = Auto Mode enabled, 0 = Desirable Mode

pagp.flags.slowhello Slow Hello  
Boolean  
1 = using Slow Hello, 0 = Slow Hello disabled

pagp.flags.state Consistent State  
Boolean  
1 = Consistent State, 0 = Not Ready

pagp.flushlocaldevId Flush Local Device ID  
6-byte Hardware (MAC) Address  
Flush local device ID

pagp.flushpartnerdevId Flush Partner Device ID  
6-byte Hardware (MAC) Address  
Flush remote device ID

pagp.localdevId Local Device ID  
6-byte Hardware (MAC) Address  
Local device ID

pagp.locallearnCap Local Learn Capability  
Unsigned 8-bit integer  
Local learn capability

pagp.localgroupcap Local Group Capability  
Unsigned 32-bit integer  
The local group capability

pagp.localgroupifindex Local Group ifindex  
Unsigned 32-bit integer  
The local group interface index

pagp.localportpri Local Port Hot Standby Priority  
Unsigned 8-bit integer  
The local hot standby priority assigned to this port

pagp.localsentportifindex Local Sent Port ifindex  
Unsigned 32-bit integer  
The interface index of the local port used to send PDU

pagp.numtlvs Number of TLVs  
Unsigned 16-bit integer  
Number of TLVs following

pagp.partnercount Partner Count  
Unsigned 16-bit integer  
Partner count

pagp.partnerdevvid Partner Device ID  
6-byte Hardware (MAC) Address  
Remote Device ID (MAC)

pagp.partnergroupcap Partner Group Capability  
Unsigned 32-bit integer  
Remote group capability

pagp.partnergroupifindex Partner Group ifindex  
Unsigned 32-bit integer  
Remote group interface index

pagp.partnerlearncap Partner Learn Capability  
Unsigned 8-bit integer  
Remote learn capability

pagp.partnerportpri Partner Port Hot Standby Priority  
Unsigned 8-bit integer  
Remote port priority

pagp.partnersentportifindex Partner Sent Port ifindex  
Unsigned 32-bit integer  
Remote port interface index sent

pagp.tlv Entry  
Unsigned 16-bit integer  
Type/Length/Value

pagp.tlvagportmac Agport MAC Address  
6-byte Hardware (MAC) Address  
Source MAC on frames for this aggregate

pagp.tlvdevname Device Name  
String  
sysName of device

pagp.tlvportname Physical Port Name  
String  
Name of port used to send PDU

```
pagp.transid  Transaction ID
               Unsigned 32-bit integer
               Flush transaction ID

pagp.version  Version
               Unsigned 8-bit integer
               Identifies the PAgP PDU version: 1 = Info, 2 = Flush
```

**Portable Network Graphics (png)**

```
png.bkgd.blue  Blue
               Unsigned 16-bit integer

png.bkgd.green  Green
               Unsigned 16-bit integer

png.bkgd.greyscale  Greyscale
               Unsigned 16-bit integer

png.bkgd.palette_index  Palette Index
               Unsigned 8-bit integer

png.bkgd.red  Red
               Unsigned 16-bit integer

png.chunk.crc  CRC
               Unsigned 32-bit integer

png.chunk.data  Data
               No value

png.chunk.flag.ancillary  Ancillary
               Boolean

png.chunk.flag.private  Private
               Boolean

png.chunk.flag.stc  Safe To Copy
               Boolean

png.chunk.len  Len
               Unsigned 32-bit integer

png.chunk.type  Chunk
               String

png.ihdr.bitdepth  Bit Depth
               Unsigned 8-bit integer

png.ihdr.colour_type  Colour Type
               Unsigned 8-bit integer

png.ihdr.compression_method  Compression Method
               Unsigned 8-bit integer

png.ihdr.filter_method  Filter Method
               Unsigned 8-bit integer

png.ihdr.height  Height
               Unsigned 32-bit integer

png.ihdr.interlace_method  Interlace Method
               Unsigned 8-bit integer

png.ihdr.width  Width
               Unsigned 32-bit integer
```

```
png.phys.horiz  Horizontal pixels per unit
                Unsigned 32-bit integer

png.phys.unit   Unit
                Unsigned 8-bit integer

png.phys.vert   Vertical pixels per unit
                Unsigned 32-bit integer

png.signature   PNG Signature
                Byte array

png.text.keyword Keyword
                String

png.text.string String
                String

png.time.day    Day
                Unsigned 8-bit integer

png.time.hour   Hour
                Unsigned 8-bit integer

png.time.minute Minute
                Unsigned 8-bit integer

png.time.month  Month
                Unsigned 8-bit integer

png.time.second Second
                Unsigned 8-bit integer

png.time.year   Year
                Unsigned 16-bit integer
```

**Portmap (portmap)**

```
portmap.answer  Answer
                Boolean
                Answer

portmap.args    Arguments
                Byte array
                Arguments

portmap.port    Port
                Unsigned 32-bit integer
                Port

portmap.proc    Procedure
                Unsigned 32-bit integer
                Procedure

portmap.procedure_v1 V1 Procedure
                Unsigned 32-bit integer
                V1 Procedure

portmap.procedure_v2 V2 Procedure
                Unsigned 32-bit integer
                V2 Procedure
```

```
portmap.procedure_v3  V3 Procedure
    Unsigned 32-bit integer
    V3 Procedure

portmap.procedure_v4  V4 Procedure
    Unsigned 32-bit integer
    V4 Procedure

portmap.prog  Program
    Unsigned 32-bit integer
    Program

portmap.proto  Protocol
    Unsigned 32-bit integer
    Protocol

portmap.result  Result
    Byte array
    Result

portmap.rpcb  RPCB
    No value
    RPCB

portmap.rpcb.addr  Universal Address
    String
    Universal Address

portmap.rpcb.netid  Network Id
    String
    Network Id

portmap.rpcb.owner  Owner of this Service
    String
    Owner of this Service

portmap.rpcb.prog  Program
    Unsigned 32-bit integer
    Program

portmap.rpcb.version  Version
    Unsigned 32-bit integer
    Version

portmap.uaddr  Universal Address
    String
    Universal Address

portmap.version  Version
    Unsigned 32-bit integer
    Version
```

**Post Office Protocol (pop)**

```
pop.request  Request
    String
    Request

pop.request.command  Request command
    String
    Request command
```

```
pop.request.data  Data
  String
  Request data

pop.request.parameter  Request parameter
  String
  Request parameter

pop.response  Response
  String
  Response

pop.response.data  Data
  String
  Response Data

pop.response.description  Response description
  String
  Response description

pop.response.indicator  Response indicator
  String
  Response indicator
```

**PostgreSQL (pgsql)**

```
pgsql.authtype  Authentication type
  Signed 32-bit integer
  The type of authentication requested by the backend.

pgsql.code  Code
  String
  SQLState code.

pgsql.col.index  Column index
  Unsigned 32-bit integer
  The position of a column within a row.

pgsql.col.name  Column name
  String
  The name of a column.

pgsql.col.typemod  Type modifier
  Signed 32-bit integer
  The type modifier for a column.

pgsql.condition  Condition
  String
  The name of a NOTIFY condition.

pgsql.copydata  Copy data
  Byte array
  Data sent following a Copy-in or Copy-out response.

pgsql.detail  Detail
  String
  Detailed error message.

pgsql.error  Error
  String
  An error message.
```

pgsql.file File  
String  
The source-code file where an error was reported.

pgsql.format Format  
Unsigned 16-bit integer  
A format specifier.

pgsql.frontend Frontend  
Boolean  
True for messages from the frontend, false otherwise.

pgsql.hint Hint  
String  
A suggestion to resolve an error.

pgsql.key Key  
Unsigned 32-bit integer  
The secret key used by a particular backend.

pgsql.length Length  
Unsigned 32-bit integer  
The length of the message (not including the type).

pgsql.line Line  
String  
The line number on which an error was reported.

pgsql.message Message  
String  
Error message.

pgsql.oid OID  
Unsigned 32-bit integer  
An object identifier.

pgsql.oid.table Table OID  
Unsigned 32-bit integer  
The object identifier of a table.

pgsql.oid.type Type OID  
Unsigned 32-bit integer  
The object identifier of a type.

pgsql.parameter\_name Parameter name  
String  
The name of a database parameter.

pgsql.parameter\_value Parameter value  
String  
The value of a database parameter.

pgsql.password Password  
String  
A password.

pgsql.pid PID  
Unsigned 32-bit integer  
The process ID of a backend.

pgsql.portal Portal  
String  
The name of a portal.

pgsql.position Position  
String  
The index of the error within the query string.

pgsql.query Query  
String  
A query string.

pgsql.routine Routine  
String  
The routine that reported an error.

pgsql.salt Salt value  
Byte array  
The salt to use while encrypting a password.

pgsql.severity Severity  
String  
Message severity.

pgsql.statement Statement  
String  
The name of a prepared statement.

pgsql.status Status  
Unsigned 8-bit integer  
The transaction status of the backend.

pgsql.tag Tag  
String  
A completion tag.

pgsql.text Text  
String  
Text from the backend.

pgsql.type Type  
String  
A one-byte message type identifier.

pgsql.val.data Data  
Byte array  
Parameter data.

pgsql.val.length Column length  
Signed 32-bit integer  
The length of a parameter value, in bytes. -1 means NULL.

pgsql.where Context  
String  
The context in which an error occurred.

#### **Pragmatic General Multicast (pgm)**

pgm.ack.bitmap Packet Bitmap  
Unsigned 32-bit integer

pgm.ack.maxsqn Maximum Received Sequence Number  
Unsigned 32-bit integer

pgm.data.sqn Data Packet Sequence Number  
Unsigned 32-bit integer

```
pgm.data.trail  Trailing Edge Sequence Number
                Unsigned 32-bit integer

pgm.genopts.len  Length
                Unsigned 8-bit integer

pgm.genopts.opx  Option Extensibility Bits
                Unsigned 8-bit integer

pgm.genopts.type  Type
                Unsigned 8-bit integer

pgm.hdr.cksum  Checksum
                Unsigned 16-bit integer

pgm.hdr.cksum_bad  Bad Checksum
                Boolean

pgm.hdr.dport  Destination Port
                Unsigned 16-bit integer

**Printer Access Protocol (apap)**

```
pad.pad  Pad
    No value
    Pad Byte

pap.connid  ConnID
    Unsigned 8-bit integer
    PAP connection ID

pap.eof  EOF
    Boolean
    EOF

pap.function  Function
    Unsigned 8-bit integer
    PAP function

pap.quantum  Quantum
    Unsigned 8-bit integer
    Flow quantum

pap.seq  Sequence
    Unsigned 16-bit integer
    Sequence number

pap.socket  Socket
    Unsigned 8-bit integer
    ATP responding socket number

pap.status  Status
    String
    Printer status
```

**Prism capture header (prism)**

```
prism.frmlen.data  Frame Length Field
    Unsigned 32-bit integer

prism.istx.data  IstX Field
    Unsigned 32-bit integer

prism.msgcode  Message Code
    Unsigned 32-bit integer

prism.msglen  Message Length
    Unsigned 32-bit integer

prism.noise.data  Noise Field
    Unsigned 32-bit integer

prism.rate.data  Rate Field
    Unsigned 32-bit integer

prism.rssi.data  RSSI Field
    Unsigned 32-bit integer
```

prism.signal.data Signal Field  
Unsigned 32-bit integer

prism.sq.data SQ Field  
Unsigned 32-bit integer

#### **Privilege Server operations (rpriv)**

rpriv.get\_eptgt\_rqst\_authn\_svc Authn\_Svc  
Unsigned 32-bit integer

rpriv.get\_eptgt\_rqst\_authz\_svc Authz\_Svc  
Unsigned 32-bit integer

rpriv.get\_eptgt\_rqst\_key\_size Key\_Size  
Unsigned 32-bit integer

rpriv.get\_eptgt\_rqst\_key\_size2 Key\_Size  
Unsigned 32-bit integer

rpriv.get\_eptgt\_rqst\_key\_t Key\_t  
String

rpriv.get\_eptgt\_rqst\_key\_t2 Key\_t2  
String

rpriv.get\_eptgt\_rqst\_var1 Var1  
Unsigned 32-bit integer

rpriv.opnum Operation  
Unsigned 16-bit integer  
Operation

#### **Pro-MPEG Code of Practice #3 release 2 FEC Protocol (2dparityfec)**

2dparityfec.d Row FEC (D)  
Boolean

2dparityfec.e RFC2733 Extension (E)  
Boolean

2dparityfec.index Index  
Unsigned 8-bit integer

2dparityfec.lr Length recovery  
Unsigned 16-bit integer

2dparityfec.mask Mask  
Unsigned 24-bit integer

2dparityfec.na NA  
Unsigned 8-bit integer

2dparityfec.offset Offset  
Unsigned 8-bit integer

2dparityfec.payload FEC Payload  
Byte array

2dparityfec.ptr Payload Type recovery  
Unsigned 8-bit integer

2dparityfec.snbase\_ext SNBase ext  
Unsigned 8-bit integer

2dparityfec.snbase\_low SNBase low  
Unsigned 16-bit integer

2dparityfec.tsr Timestamp recovery  
Unsigned 32-bit integer

2dparityfec.type Type  
Unsigned 8-bit integer

2dparityfec.x Pro-MPEG Extension (X)  
Boolean

**Protocol Independent Multicast (pim)**

pim.cksum Checksum  
Unsigned 16-bit integer

pim.code Code  
Unsigned 8-bit integer

pim.type Type  
Unsigned 8-bit integer

pim.version Version  
Unsigned 8-bit integer

**Protocol for carrying Authentication for Network Access (pana)**

pana.avp.code AVP Code  
Unsigned 16-bit integer

pana.avp.data.bytes Value  
Byte array

pana.avp.data.enum Value  
Signed 32-bit integer

pana.avp.data.int32 Value  
Signed 32-bit integer

pana.avp.data.int64 Value  
Signed 64-bit integer

pana.avp.data.string Value  
String

pana.avp.data.uint32 Value  
Unsigned 32-bit integer

pana.avp.data.uint64 Value  
Unsigned 64-bit integer

pana.avp.flags AVP Flags  
Unsigned 16-bit integer

pana.avp.flags.v Vendor  
Boolean

pana.avp.length AVP Length  
Unsigned 16-bit integer

pana.avp.reserved AVP Reserved  
Unsigned 16-bit integer

pana.avp.vendorid AVP Vendor ID  
Unsigned 32-bit integer

```
pana.flags  Flags
            Unsigned 8-bit integer
pana.flags.a  Auth
            Boolean
pana.flags.c  Complete
            Boolean
pana.flags.i  IP Reconfig
            Boolean
pana.flags.p  Ping
            Boolean
pana.flags.r  Request
            Boolean
pana.flags.s  Start
            Boolean
pana.length  PANA Message Length
            Unsigned 16-bit integer
pana.reserved  PANA Reserved
            Unsigned 16-bit integer
pana.response_in  Response In
            Frame number
            The response to this PANA request is in this frame
pana.response_to  Request In
            Frame number
            This is a response to the PANA request in this frame
pana.seq  PANA Sequence Number
            Unsigned 32-bit integer
pana.sid  PANA Session ID
            Unsigned 32-bit integer
pana.time  Time
            Time duration
            The time between the Call and the Reply
pana.type  PANA Message Type
            Unsigned 16-bit integer
```

**Q.2931 (q2931)**

```
q2931.call_ref  Call reference value
            Byte array
q2931.call_ref_flag  Call reference flag
            Boolean
q2931.call_ref_len  Call reference value length
            Unsigned 8-bit integer
q2931.disc  Protocol discriminator
            Unsigned 8-bit integer
q2931.message_action_indicator  Action indicator
            Unsigned 8-bit integer
```

q2931.message\_flag Flag  
Boolean

q2931.message\_len Message length  
Unsigned 16-bit integer

q2931.message\_type Message type  
Unsigned 8-bit integer

q2931.message\_type\_ext Message type extension  
Unsigned 8-bit integer

**Q.931 (q931)**

q931.call\_ref Call reference value  
Byte array

q931.call\_ref\_flag Call reference flag  
Boolean

q931.call\_ref\_len Call reference value length  
Unsigned 8-bit integer

q931.called\_party\_number.digits Called party number digits  
String

q931.calling\_party\_number.digits Calling party number digits  
String

q931.cause\_location Cause location  
Unsigned 8-bit integer

q931.cause\_value Cause value  
Unsigned 8-bit integer

q931.channel.dchan D-channel indicator  
Boolean  
True if the identified channel is the D-Channel

q931.channel.element\_type Element type  
Unsigned 8-bit integer  
Type of element in the channel number/slot map octets

q931.channel.exclusive Indicated channel is exclusive  
Boolean  
True if only the indicated channel is acceptable

q931.channel.interface\_id\_present Interface identifier present  
Boolean  
True if the interface identifier is explicit in the following octets

q931.channel.interface\_type Interface type  
Boolean  
Identifies the ISDN interface type

q931.channel.map Number/map  
Boolean  
True if channel is indicates by channel map rather than number

q931.channel.number Channel number  
Unsigned 8-bit integer  
Channel number

q931.channel.selection Information channel selection  
Unsigned 8-bit integer  
Identifies the information channel to be used

q931.coding\_standard Coding standard  
Unsigned 8-bit integer

q931.connected\_number.digits Connected party number digits  
String

q931.disc Protocol discriminator  
Unsigned 8-bit integer

q931.extension\_ind Extension indicator  
Boolean

q931.information\_transfer\_capability Information transfer capability  
Unsigned 8-bit integer

q931.information\_transfer\_rate Information transfer rate  
Unsigned 8-bit integer

q931.message\_type Message type  
Unsigned 8-bit integer

q931.number\_type Number type  
Unsigned 8-bit integer

q931.numbering\_plan Numbering plan  
Unsigned 8-bit integer

q931.presentation\_ind Presentation indicator  
Unsigned 8-bit integer

q931.reassembled\_in Reassembled Q.931 in frame  
Frame number  
This Q.931 message is reassembled in this frame

q931.redirecting\_number.digits Redirecting party number digits  
String

q931.screening\_ind Screening indicator  
Unsigned 8-bit integer

q931.segment Q.931 Segment  
Frame number  
Q.931 Segment

q931.segment.error Defragmentation error  
Frame number  
Defragmentation error due to illegal fragments

q931.segment.multipletails Multiple tail fragments found  
Boolean  
Several tails were found when defragmenting the packet

q931.segment.overlap Segment overlap  
Boolean  
Fragment overlaps with other fragments

q931.segment.overlap.conflict Conflicting data in fragment overlap  
Boolean  
Overlapping fragments contained conflicting data

q931.segment.toolongfragment Segment too long  
Boolean  
Segment contained data past end of packet

q931.segment\_type Segmented message type  
Unsigned 8-bit integer

q931.segments Q.931 Segments  
No value  
Q.931 Segments

q931.transfer\_mode Transfer mode  
Unsigned 8-bit integer

q931.uill User information layer 1 protocol  
Unsigned 8-bit integer

### Q.932 (q932)

q932.InterpretationComponent InterpretationComponent  
Unsigned 32-bit integer  
q932.InterpretationComponent

q932.NetworkFacilityExtension NetworkFacilityExtension  
No value  
q932.NetworkFacilityExtension

q932.NetworkProtocolProfile NetworkProtocolProfile  
Unsigned 32-bit integer  
q932.NetworkProtocolProfile

q932.dataPartyNumber dataPartyNumber  
String  
q932.NumberDigits

q932.destinationEntity destinationEntity  
Unsigned 32-bit integer  
q932.EntityType

q932.destinationEntityAddress destinationEntityAddress  
Unsigned 32-bit integer  
q932.AddressInformation

q932.ie.data Data  
Byte array  
Data

q932.ie.len Length  
Unsigned 8-bit integer  
Information Element Length

q932.ie.type Type  
Unsigned 8-bit integer  
Information Element Type

q932.nSAPSubaddress nSAPSubaddress  
Byte array  
q932.NSAPSubaddress

q932.nationalStandardPartyNumber nationalStandardPartyNumber  
String  
q932.NumberDigits

```
q932.nd Notification description
    Unsigned 8-bit integer
    Notification description

### Quake II Network Protocol (quake2)

```

quake2.c2s  Client to Server
    Unsigned 32-bit integer
    Client to Server

```

```
quake2.connectionless  Connectionless
    Unsigned 32-bit integer
    Connectionless

quake2.connectionless.marker  Marker
    Unsigned 32-bit integer
    Marker

quake2.connectionless.text  Text
    String
    Text

quake2.game  Game
    Unsigned 32-bit integer
    Game

quake2.game.client.command  Client Command Type
    Unsigned 8-bit integer
    Quake II Client Command

quake2.game.client.command.move  Bitfield
    Unsigned 8-bit integer
    Quake II Client Command Move

quake2.game.client.command.move.angles  Angles (pitch)
    Unsigned 8-bit integer

quake2.game.client.command.move.buttons  Buttons
    Unsigned 8-bit integer

quake2.game.client.command.move.chksum  Checksum
    Unsigned 8-bit integer
    Quake II Client Command Move

quake2.game.client.command.move.impulse  Impulse
    Unsigned 8-bit integer

quake2.game.client.command.move.lframe  Last Frame
    Unsigned 32-bit integer
    Quake II Client Command Move

quake2.game.client.command.move.lightlevel  Lightlevel
    Unsigned 8-bit integer
    Quake II Client Command Move

quake2.game.client.command.move.movement  Movement (fwd)
    Unsigned 8-bit integer

quake2.game.client.command.move.msec  Msec
    Unsigned 8-bit integer
    Quake II Client Command Move

quake2.game.qport  QPort
    Unsigned 32-bit integer
    Quake II Client Port

quake2.game.rel1  Reliable
    Boolean
    Packet is reliable and may be retransmitted

quake2.game.rel2  Reliable
    Boolean
    Packet was reliable and may be retransmitted
```

quake2.game.seq1 Sequence Number  
Unsigned 32-bit integer  
Sequence number of the current packet

quake2.game.seq2 Sequence Number  
Unsigned 32-bit integer  
Sequence number of the last received packet

quake2.game.server.command Server Command  
Unsigned 8-bit integer  
Quake II Server Command

quake2.s2c Server to Client  
Unsigned 32-bit integer  
Server to Client

### Quake III Arena Network Protocol (quake3)

quake3.connectionless Connectionless  
Unsigned 32-bit integer  
Connectionless

quake3.connectionless.command Command  
String  
Command

quake3.connectionless.marker Marker  
Unsigned 32-bit integer  
Marker

quake3.connectionless.text Text  
String  
Text

quake3.direction Direction  
No value  
Packet Direction

quake3.game Game  
Unsigned 32-bit integer  
Game

quake3.game.qport QPort  
Unsigned 32-bit integer  
Quake III Arena Client Port

quake3.game.rel1 Reliable  
Boolean  
Packet is reliable and may be retransmitted

quake3.game.rel2 Reliable  
Boolean  
Packet was reliable and may be retransmitted

quake3.game.seq1 Sequence Number  
Unsigned 32-bit integer  
Sequence number of the current packet

quake3.game.seq2 Sequence Number  
Unsigned 32-bit integer  
Sequence number of the last received packet

```
quake3.server.addr  Server Address
    IPv4 address
    Server IP Address

quake3.server.port  Server Port
    Unsigned 16-bit integer
    Server UDP Port
```

**Quake Network Protocol (quake)**

```
quake.control.accept.port  Port
    Unsigned 32-bit integer
    Game Data Port

quake.control.command  Command
    Unsigned 8-bit integer
    Control Command

quake.control.connect.game  Game
    String
    Game Name

quake.control.connect.version  Version
    Unsigned 8-bit integer
    Game Protocol Version Number

quake.control.player_info.address  Address
    String
    Player Address

quake.control.player_info.colors  Colors
    Unsigned 32-bit integer
    Player Colors

quake.control.player_info.colors.pants  Pants
    Unsigned 8-bit integer
    Pants Color

quake.control.player_info.colors.shirt  Shirt
    Unsigned 8-bit integer
    Shirt Color

quake.control.player_info.connect_time  Connect Time
    Unsigned 32-bit integer
    Player Connect Time

quake.control.player_info.frag  Frags
    Unsigned 32-bit integer
    Player Frags

quake.control.player_info.name  Name
    String
    Player Name

quake.control.player_info.player  Player
    Unsigned 8-bit integer
    Player

quake.control.reject.reason  Reason
    String
    Reject Reason
```

```
quake.control.rule_info.lastrule  Last Rule
    String
    Last Rule Name
quake.control.rule_info.rule      Rule
    String
    Rule Name
quake.control.rule_info.value     Value
    String
    Rule Value
quake.control.server_info.address  Address
    String
    Server Address
quake.control.server_info.game     Game
    String
    Game Name
quake.control.server_info.map      Map
    String
    Map Name
quake.control.server_info.max_player  Maximal Number of Players
    Unsigned 8-bit integer
    Maximal Number of Players
quake.control.server_info.num_player  Number of Players
    Unsigned 8-bit integer
    Current Number of Players
quake.control.server_info.server    Server
    String
    Server Name
quake.control.server_info.version    Version
    Unsigned 8-bit integer
    Game Protocol Version Number
quake.header.flags                 Flags
    Unsigned 16-bit integer
    Flags
quake.header.length                 Length
    Unsigned 16-bit integer
    full data length
quake.header.sequence               Sequence
    Unsigned 32-bit integer
    Sequence Number
```

#### **QuakeWorld Network Protocol (quakeworld)**

```
quakeworld.c2s                     Client to Server
    Unsigned 32-bit integer
    Client to Server
quakeworld.connectionless           Connectionless
    Unsigned 32-bit integer
    Connectionless
```

```
quakeworld.connectionless.arguments Arguments
    String
    Arguments

quakeworld.connectionless.command Command
    String
    Command

quakeworld.connectionless.connect.challenge Challenge
    Signed 32-bit integer
    Challenge from the server

quakeworld.connectionless.connect.infostring Infostring
    String
    Infostring with additional variables

quakeworld.connectionless.connect.infostring.key Key
    String
    Infostring Key

quakeworld.connectionless.connect.infostring.key_value Key/Value
    String
    Key and Value

quakeworld.connectionless.connect.infostring.value Value
    String
    Infostring Value

quakeworld.connectionless.connect.qport QPort
    Unsigned 32-bit integer
    QPort of the client

quakeworld.connectionless.connect.version Version
    Unsigned 32-bit integer
    Protocol Version

quakeworld.connectionless.marker Marker
    Unsigned 32-bit integer
    Marker

quakeworld.connectionless.rcon.command Command
    String
    Command

quakeworld.connectionless.rcon.password Password
    String
    Rcon Password

quakeworld.connectionless.text Text
    String
    Text

quakeworld.game Game
    Unsigned 32-bit integer
    Game

quakeworld.game.qport QPort
    Unsigned 32-bit integer
    QuakeWorld Client Port

quakeworld.game.rell Reliable
    Boolean
    Packet is reliable and may be retransmitted
```

quakeworld.game.rel2 Reliable  
Boolean  
Packet was reliable and may be retransmitted

quakeworld.game.seq1 Sequence Number  
Unsigned 32-bit integer  
Sequence number of the current packet

quakeworld.game.seq2 Sequence Number  
Unsigned 32-bit integer  
Sequence number of the last received packet

quakeworld.s2c Server to Client  
Unsigned 32-bit integer  
Server to Client

#### **Qualified Logical Link Control (qllc)**

qllc.address Address Field  
Unsigned 8-bit integer

qllc.control Control Field  
Unsigned 8-bit integer

#### **RFC 2250 MPEG1 (mpeg1)**

mpeg1.stream MPEG-1 stream  
Byte array

rtp.payload\_mpeg\_T T  
Unsigned 16-bit integer

rtp.payload\_mpeg\_an AN  
Unsigned 16-bit integer

rtp.payload\_mpeg\_b Beginning-of-slice  
Boolean

rtp.payload\_mpeg\_bfc BFC  
Unsigned 16-bit integer

rtp.payload\_mpeg\_fbv FBV  
Unsigned 16-bit integer

rtp.payload\_mpeg\_ffc FFC  
Unsigned 16-bit integer

rtp.payload\_mpeg\_ffv FFV  
Unsigned 16-bit integer

rtp.payload\_mpeg\_mbz MBZ  
Unsigned 16-bit integer

rtp.payload\_mpeg\_n New Picture Header  
Unsigned 16-bit integer

rtp.payload\_mpeg\_p Picture type  
Unsigned 16-bit integer

rtp.payload\_mpeg\_s Sequence Header  
Boolean

rtp.payload\_mpeg\_tr Temporal Reference  
Unsigned 16-bit integer

**RFC 2435 JPEG (jpeg)**

jpeg.main\_hdr Main Header  
No value

jpeg.main\_hdr.height Height  
Unsigned 8-bit integer

jpeg.main\_hdr.offset Fragment Offset  
Unsigned 24-bit integer

jpeg.main\_hdr.q Q  
Unsigned 8-bit integer

jpeg.main\_hdr.ts Type Specific  
Unsigned 8-bit integer

jpeg.main\_hdr.type Type  
Unsigned 8-bit integer

jpeg.main\_hdr.width Width  
Unsigned 8-bit integer

jpeg.payload Payload  
Byte array

jpeg.qtable\_hdr Quantization Table Header  
No value

jpeg.qtable\_hdr.data Quantization Table Data  
Byte array

jpeg.qtable\_hdr.length Length  
Unsigned 16-bit integer

jpeg.qtable\_hdr.mbz MBZ  
Unsigned 8-bit integer

jpeg.qtable\_hdr.precision Precision  
Unsigned 8-bit integer

jpeg.restart\_hdr Restart Marker Header  
No value

jpeg.restart\_hdr.count Restart Count  
Unsigned 16-bit integer

jpeg.restart\_hdr.f F  
Unsigned 16-bit integer

jpeg.restart\_hdr.interval Restart Interval  
Unsigned 16-bit integer

jpeg.restart\_hdr.l L  
Unsigned 16-bit integer

**RFC 2833 RTP Event (rtpevent)**

rtpevent.duration Event Duration  
Unsigned 16-bit integer

rtpevent.end\_of\_event End of Event  
Boolean

rtpevent.event\_id Event ID  
Unsigned 8-bit integer

rtpevent.reserved Reserved  
Boolean

rtpevent.volume Volume  
Unsigned 8-bit integer

### **RIPng (ripng)**

ripng.cmd Command  
Unsigned 8-bit integer

ripng.version Version  
Unsigned 8-bit integer

### **RMCP Security-extensions Protocol (rsp)**

rsp.sequence Sequence  
Unsigned 32-bit integer  
RSP sequence

rsp.session\_id Session ID  
Unsigned 32-bit integer  
RSP session ID

### **RPC Browser (rpc\_browser)**

rpc\_browser.opnum Operation  
Unsigned 16-bit integer  
Operation

rpc\_browser.rc Return code  
Unsigned 32-bit integer  
Browser return code

rpc\_browser.unknown.bytes Unknown bytes  
Byte array  
Unknown bytes. If you know what this is, contact wireshark developers.

rpc\_browser.unknown.hyper Unknown hyper  
Unsigned 64-bit integer  
Unknown hyper. If you know what this is, contact wireshark developers.

rpc\_browser.unknown.long Unknown long  
Unsigned 32-bit integer  
Unknown long. If you know what this is, contact wireshark developers.

rpc\_browser.unknown.string Unknown string  
String  
Unknown string. If you know what this is, contact wireshark developers.

### **RS Interface properties (rs\_plcy)**

rs\_plcy.opnum Operation  
Unsigned 16-bit integer  
Operation

### **RSTAT (rstat)**

rstat.procedure\_v1 V1 Procedure  
Unsigned 32-bit integer  
V1 Procedure

```
rstat.procedure_v2  V2 Procedure
  Unsigned 32-bit integer
  V2 Procedure
rstat.procedure_v3  V3 Procedure
  Unsigned 32-bit integer
  V3 Procedure
rstat.procedure_v4  V4 Procedure
  Unsigned 32-bit integer
  V4 Procedure
```

**RSYNC File Synchroniser (rsync)**

```
rsync.command  Command String
  String
rsync.data  rsync data
  Byte array
rsync.hdr_magic  Magic Header
  String
rsync.hdr_version  Header Version
  String
rsync.motd  Server MOTD String
  String
rsync.query  Client Query String
  String
rsync.response  Server Response String
  String
```

**RTcfg (rtcfg)**

```
rtcfg.ack_length  Ack Length
  Unsigned 32-bit integer
  RTcfg Ack Length
rtcfg.active_stations  Active Stations
  Unsigned 32-bit integer
  RTcfg Active Stations
rtcfg.address_type  Address Type
  Unsigned 8-bit integer
  RTcfg Address Type
rtcfg.burst_rate  Stage 2 Burst Rate
  Unsigned 8-bit integer
  RTcfg Stage 2 Burst Rate
rtcfg.client_flags  Flags
  Unsigned 8-bit integer
  RTcfg Client Flags
rtcfg.client_flags.available  Req. Available
  Unsigned 8-bit integer
  Request Available
```

```
rtcfg.client_flags.ready  Client Ready
    Unsigned 8-bit integer
    Client Ready

rtcfg.client_flags.res    Reserved
    Unsigned 8-bit integer
    Reserved

rtcfg.client_ip_address  Client IP Address
    IPv4 address
    RTcfg Client IP Address

rtcfg.config_data        Config Data
    Byte array
    RTcfg Config Data

rtcfg.config_offset      Config Offset
    Unsigned 32-bit integer
    RTcfg Config Offset

rtcfg.heartbeat_period   Heartbeat Period
    Unsigned 16-bit integer
    RTcfg Heartbeat Period

rtcfg.id                 ID
    Unsigned 8-bit integer
    RTcfg ID

rtcfg.padding            Padding
    Unsigned 8-bit integer
    RTcfg Padding

rtcfg.s1_config_length   Stage 1 Config Length
    Unsigned 16-bit integer
    RTcfg Stage 1 Config Length

rtcfg.s2_config_length   Stage 2 Config Length
    Unsigned 32-bit integer
    RTcfg Stage 2 Config Length

rtcfg.server_flags       Flags
    Unsigned 8-bit integer
    RTcfg Server Flags

rtcfg.server_flags.ready  Server Ready
    Unsigned 8-bit integer
    Server Ready

rtcfg.server_flags.res0   Reserved
    Unsigned 8-bit integer
    Reserved

rtcfg.server_flags.res2   Reserved
    Unsigned 8-bit integer
    Reserved

rtcfg.server_ip_address  Server IP Address
    IPv4 address
    RTcfg Server IP Address

rtcfg.vers               Version
    Unsigned 8-bit integer
    RTcfg Version
```

rtcfg.vers\_id Version and ID  
Unsigned 8-bit integer  
RTcfg Version and ID

**RX Protocol (rx)**

rx.abort ABORT Packet  
No value  
ABORT Packet

rx.abort\_code Abort Code  
Unsigned 32-bit integer  
Abort Code

rx.ack ACK Packet  
No value  
ACK Packet

rx.ack\_type ACK Type  
Unsigned 8-bit integer  
Type Of ACKs

rx.bufferespace Bufferspace  
Unsigned 16-bit integer  
Number Of Packets Available

rx.callnumber Call Number  
Unsigned 32-bit integer  
Call Number

rx.challenge CHALLENGE Packet  
No value  
CHALLENGE Packet

rx.cid CID  
Unsigned 32-bit integer  
CID

rx.encrypted Encrypted  
No value  
Encrypted part of response packet

rx.epoch Epoch  
Date/Time stamp  
Epoch

rx.first First Packet  
Unsigned 32-bit integer  
First Packet

rx.flags Flags  
Unsigned 8-bit integer  
Flags

rx.flags.client\_init Client Initiated  
Boolean  
Client Initiated

rx.flags.free\_packet Free Packet  
Boolean  
Free Packet

```
rx.flags.last_packet  Last Packet
    Boolean
    Last Packet
rx.flags.more_packets  More Packets
    Boolean
    More Packets
rx.flags.request_ack  Request Ack
    Boolean
    Request Ack
rx.if_mtu  Interface MTU
    Unsigned 32-bit integer
    Interface MTU
rx.inc_nonce  Inc Nonce
    Unsigned 32-bit integer
    Incremented Nonce
rx.kvno  kvno
    Unsigned 32-bit integer
    kvno
rx.level  Level
    Unsigned 32-bit integer
    Level
rx.max_mtu  Max MTU
    Unsigned 32-bit integer
    Max MTU
rx.max_packets  Max Packets
    Unsigned 32-bit integer
    Max Packets
rx.maxskew  Max Skew
    Unsigned 16-bit integer
    Max Skew
rx.min_level  Min Level
    Unsigned 32-bit integer
    Min Level
rx.nonce  Nonce
    Unsigned 32-bit integer
    Nonce
rx.num_acks  Num ACKs
    Unsigned 8-bit integer
    Number Of ACKs
rx.prev  Prev Packet
    Unsigned 32-bit integer
    Previous Packet
rx.reason  Reason
    Unsigned 8-bit integer
    Reason For This ACK
rx.response  RESPONSE Packet
    No value
    RESPONSE Packet
```

```
rx.rwind  rwind
          Unsigned 32-bit integer
          rwind

rx.securityindex  Security Index
          Unsigned 32-bit integer
          Security Index

rx.seq  Sequence Number
       Unsigned 32-bit integer
       Sequence Number

rx.serial  Serial
          Unsigned 32-bit integer
          Serial

rx.serviceid  Service ID
             Unsigned 16-bit integer
             Service ID

rx.spare  Spare/Checksum
         Unsigned 16-bit integer
         Spare/Checksum

rx.ticket  ticket
          Byte array
          Ticket

rx.ticket_len  Ticket len
              Unsigned 32-bit integer
              Ticket Length

rx.type  Type
        Unsigned 8-bit integer
        Type

rx.userstatus  User Status
              Unsigned 32-bit integer
              User Status

rx.version  Version
           Unsigned 32-bit integer
           Version Of Challenge/Response
```

#### **Radio Access Network Application Part (ranap)**

```
ranap.APN  APN
          Byte array
          ranap.APN

ranap.AccuracyFulfilmentIndicator  AccuracyFulfilmentIndicator
                                   Unsigned 32-bit integer

  KEY

rsl.meas_res_no  Measurement result number
  Unsigned 8-bit integer
  Measurement result number

rsl.ms_fpc  FPC/EPC
  Boolean
  FPC/EPC

rsl.ms_power_lev  MS power level
  Unsigned 8-bit integer
  MS power level

rsl.msg_dsc  Message discriminator
  Unsigned 8-bit integer
  Message discriminator
```

```
rsl.msg_type  Message type
               Unsigned 8-bit integer
               Message type

rsl.na        Not applicable (NA)
               Boolean
               Not applicable (NA)

rsl.paging_grp  Paging Group
                Unsigned 8-bit integer
                Paging Group

rsl.paging_load  Paging Buffer Space
                 Unsigned 16-bit integer
                 Paging Buffer Space

rsl.phy_ctx    Physical Context
               Byte array
               Physical Context

rsl.power_lev  Power level
               Unsigned 8-bit integer
               Power level

rsl.prio       Priority
               Unsigned 8-bit integer
               Priority

rsl.ra_if_data_rte  Radio interface data rate
                    Unsigned 8-bit integer
                    Radio interface data rate

rsl.rach_acc_cnt  RACH Access Count
                  Unsigned 16-bit integer
                  RACH Access Count

rsl.rach_busy_cnt  RACH Busy Count
                   Unsigned 16-bit integer
                   RACH Busy Count

rsl.rach_slot_cnt  RACH Slot Count
                   Unsigned 16-bit integer
                   RACH Slot Count

rsl.rbit         R
                 Boolean
                 R

rsl.rel_mode     Release Mode
                 Unsigned 8-bit integer
                 Release Mode

rsl.req_ref_T1prim  T1'
                   Unsigned 8-bit integer
                   T1'

rsl.req_ref_T2     T2
                   Unsigned 8-bit integer
                   T2

rsl.req_ref_T3     T3
                   Unsigned 16-bit integer
                   T3
```

```
rsl.req_ref_ra  Random Access Information (RA)
    Unsigned 8-bit integer
    Random Access Information (RA)

rsl.rtd  Round Trip Delay (RTD)
    Unsigned 8-bit integer
    Round Trip Delay (RTD)

rsl.rxlev_full_up  RXLEV.FULL.up
    Unsigned 8-bit integer
    RXLEV.FULL.up

rsl.rxlev_sub_up  RXLEV.SUB.up
    Unsigned 8-bit integer
    RXLEV.SUB.up

rsl.rxqual_full_up  RXQUAL.FULL.up
    Unsigned 8-bit integer
    RXQUAL.FULL.up

rsl.rxqual_sub_up  RXQUAL.SUB.up
    Unsigned 8-bit integer
    RXQUAL.SUB.up

rsl.sapi  SAPI
    Unsigned 8-bit integer
    SAPI

rsl.sg_slt_cnt  Message Slot Count
    Unsigned 8-bit integer
    Message Slot Count

rsl.speech_coding_alg  Speech coding algorithm
    Unsigned 8-bit integer
    Speech coding algorithm

rsl.speech_or_data  Speech or data indicator
    Unsigned 8-bit integer
    Speech or data indicator

rsl.sys_info_type  System Info Type
    Unsigned 8-bit integer
    System Info Type

rsl.t_nt_bit  Transparent indication
    Boolean
    Transparent indication

rsl.tfo  TFO
    Boolean
    TFO

rsl.timing_adv  Timing Advance
    Unsigned 8-bit integer
    Timing Advance

rsl.timing_offset  Timing Offset
    Unsigned 8-bit integer
    Timing Offset
```

**Radius Protocol (radius)**

```
radius.3Com_User_Access_Level  3Com-User-Access-Level
    Unsigned 32-bit integer

radius.3Com_User_Access_Level.len  Length
    Unsigned 8-bit integer
    3Com-User-Access-Level Length

radius.3GPP2_A10_Connection_ID  3GPP2-A10-Connection-ID
    Unsigned 32-bit integer

radius.3GPP2_A10_Connection_ID.len  Length
    Unsigned 8-bit integer
    3GPP2-A10-Connection-ID Length

radius.3GPP2_Accounting_Container  3GPP2-Accounting-Container
    Byte array

radius.3GPP2_Accounting_Container.len  Length
    Unsigned 8-bit integer
    3GPP2-Accounting-Container Length

radius.3GPP2_Acct_Stop_Trigger  3GPP2-Acct-Stop-Trigger
    Unsigned 32-bit integer

radius.3GPP2_Acct_Stop_Trigger.len  Length
    Unsigned 8-bit integer
    3GPP2-Acct-Stop-Trigger Length

radius.3GPP2_Active_Time  3GPP2-Active-Time
    Unsigned 32-bit integer

radius.3GPP2_Active_Time.len  Length
    Unsigned 8-bit integer
    3GPP2-Active-Time Length

radius.3GPP2_Airlink_Priority  3GPP2-Airlink-Priority
    Unsigned 32-bit integer

radius.3GPP2_Airlink_Priority.len  Length
    Unsigned 8-bit integer
    3GPP2-Airlink-Priority Length

radius.3GPP2_Airlink_Record_Type  3GPP2-Airlink-Record-Type
    Unsigned 32-bit integer

radius.3GPP2_Airlink_Record_Type.len  Length
    Unsigned 8-bit integer
    3GPP2-Airlink-Record-Type Length

radius.3GPP2_Airlink_Sequence_Number  3GPP2-Airlink-Sequence-Number
    Unsigned 32-bit integer

radius.3GPP2_Airlink_Sequence_Number.len  Length
    Unsigned 8-bit integer
    3GPP2-Airlink-Sequence-Number Length

radius.3GPP2_Allowed_Diffserv_Marking  3GPP2-Allowed-Diffserv-Marking
    Byte array

radius.3GPP2_Allowed_Diffserv_Marking.len  Length
    Unsigned 8-bit integer
    3GPP2-Allowed-Diffserv-Marking Length
```

```
radius.3GPP2_Allowed_Persistent_TFTs  3GPP2-Allowed-Persistent-TFTs
    Unsigned 32-bit integer
radius.3GPP2_Allowed_Persistent_TFTs.len  Length
    Unsigned 8-bit integer
    3GPP2-Allowed-Persistent-TFTs Length
radius.3GPP2_BSID  3GPP2-BSID
    String
radius.3GPP2_BSID.len  Length
    Unsigned 8-bit integer
    3GPP2-BSID Length
radius.3GPP2_Bad_PPP_Frame_Count  3GPP2-Bad-PPP-Frame-Count
    Unsigned 32-bit integer
radius.3GPP2_Bad_PPP_Frame_Count.len  Length
    Unsigned 8-bit integer
    3GPP2-Bad-PPP-Frame-Count Length
radius.3GPP2_Begin_Session  3GPP2-Begin-Session
    Unsigned 32-bit integer
radius.3GPP2_Begin_Session.len  Length
    Unsigned 8-bit integer
    3GPP2-Begin-Session Length
radius.3GPP2_Compulsory_Tunnel_Indicator  3GPP2-Compulsory-Tunnel-Indicator
    Unsigned 32-bit integer
radius.3GPP2_Compulsory_Tunnel_Indicator.len  Length
    Unsigned 8-bit integer
    3GPP2-Compulsory-Tunnel-Indicator Length
radius.3GPP2_Correlation_Id  3GPP2-Correlation-Id
    String
radius.3GPP2_Correlation_Id.len  Length
    Unsigned 8-bit integer
    3GPP2-Correlation-Id Length
radius.3GPP2_DCCH_Frame_Size  3GPP2-DCCH-Frame-Size
    Unsigned 32-bit integer
radius.3GPP2_DCCH_Frame_Size.len  Length
    Unsigned 8-bit integer
    3GPP2-DCCH-Frame-Size Length
radius.3GPP2_DNS_Update_Capability  3GPP2-DNS-Update-Capability
    Unsigned 32-bit integer
radius.3GPP2_DNS_Update_Capability.len  Length
    Unsigned 8-bit integer
    3GPP2-DNS-Update-Capability Length
radius.3GPP2_DNS_Update_Required  3GPP2-DNS-Update-Required
    Unsigned 32-bit integer
radius.3GPP2_DNS_Update_Required.len  Length
    Unsigned 8-bit integer
    3GPP2-DNS-Update-Required Length
```

```
radius.3GPP2_Diffserv_Class_Option  3GPP2-Diffserv-Class-Option
    Unsigned 32-bit integer
radius.3GPP2_Diffserv_Class_Option.len  Length
    Unsigned 8-bit integer
    3GPP2-Diffserv-Class-Option Length
radius.3GPP2_Disconnect_Reason  3GPP2-Disconnect-Reason
    Unsigned 32-bit integer
radius.3GPP2_Disconnect_Reason.len  Length
    Unsigned 8-bit integer
    3GPP2-Disconnect-Reason Length
radius.3GPP2_ESN  3GPP2-ESN
    String
radius.3GPP2_ESN.len  Length
    Unsigned 8-bit integer
    3GPP2-ESN Length
radius.3GPP2_FCH_Frame_Size  3GPP2-FCH-Frame-Size
    Unsigned 32-bit integer
radius.3GPP2_FCH_Frame_Size.len  Length
    Unsigned 8-bit integer
    3GPP2-FCH-Frame-Size Length
radius.3GPP2_Foreign_Agent_Address  3GPP2-Foreign-Agent-Address
    IPv4 address
radius.3GPP2_Foreign_Agent_Address.len  Length
    Unsigned 8-bit integer
    3GPP2-Foreign-Agent-Address Length
radius.3GPP2_Forward_DCCH_Mux_Option  3GPP2-Forward-DCCH-Mux-Option
    Unsigned 32-bit integer
radius.3GPP2_Forward_DCCH_Mux_Option.len  Length
    Unsigned 8-bit integer
    3GPP2-Forward-DCCH-Mux-Option Length
radius.3GPP2_Forward_DCCH_RC  3GPP2-Forward-DCCH-RC
    Unsigned 32-bit integer
radius.3GPP2_Forward_DCCH_RC.len  Length
    Unsigned 8-bit integer
    3GPP2-Forward-DCCH-RC Length
radius.3GPP2_Forward_FCH_Mux_Option  3GPP2-Forward-FCH-Mux-Option
    Unsigned 32-bit integer
radius.3GPP2_Forward_FCH_Mux_Option.len  Length
    Unsigned 8-bit integer
    3GPP2-Forward-FCH-Mux-Option Length
radius.3GPP2_Forward_FCH_RC  3GPP2-Forward-FCH-RC
    Unsigned 32-bit integer
radius.3GPP2_Forward_FCH_RC.len  Length
    Unsigned 8-bit integer
    3GPP2-Forward-FCH-RC Length
```

```
radius.3GPP2_Forward_PDCH_RC  3GPP2-Forward-PDCH-RC
    Unsigned 32-bit integer
radius.3GPP2_Forward_PDCH_RC.len  Length
    Unsigned 8-bit integer
    3GPP2-Forward-PDCH-RC Length
radius.3GPP2_Forward_Traffic_Type  3GPP2-Forward-Traffic-Type
    Unsigned 32-bit integer
radius.3GPP2_Forward_Traffic_Type.len  Length
    Unsigned 8-bit integer
    3GPP2-Forward-Traffic-Type Length
radius.3GPP2_Home_Agent_IP_Address  3GPP2-Home-Agent-IP-Address
    IPv4 address
radius.3GPP2_Home_Agent_IP_Address.len  Length
    Unsigned 8-bit integer
    3GPP2-Home-Agent-IP-Address Length
radius.3GPP2_IP_QoS  3GPP2-IP-QoS
    Unsigned 32-bit integer
radius.3GPP2_IP_QoS.len  Length
    Unsigned 8-bit integer
    3GPP2-IP-QoS Length
radius.3GPP2_IP_Technology  3GPP2-IP-Technology
    Unsigned 32-bit integer
radius.3GPP2_IP_Technology.len  Length
    Unsigned 8-bit integer
    3GPP2-IP-Technology Length
radius.3GPP2_Ike_Preshared_Secret_Request  3GPP2-Ike-Preshared-Secret-Request
    Unsigned 32-bit integer
radius.3GPP2_Ike_Preshared_Secret_Request.len  Length
    Unsigned 8-bit integer
    3GPP2-Ike-Preshared-Secret-Request Length
radius.3GPP2_Inbound_Mobile_IP_Sig_Octets  3GPP2-Inbound-Mobile-IP-Sig-Octets
    Unsigned 32-bit integer
radius.3GPP2_Inbound_Mobile_IP_Sig_Octets.len  Length
    Unsigned 8-bit integer
    3GPP2-Inbound-Mobile-IP-Sig-Octets Length
radius.3GPP2_KeyID  3GPP2-KeyID
    String
radius.3GPP2_KeyID.len  Length
    Unsigned 8-bit integer
    3GPP2-KeyID Length
radius.3GPP2_Last_User_Activity_Time  3GPP2-Last-User-Activity-Time
    Unsigned 32-bit integer
radius.3GPP2_Last_User_Activity_Time.len  Length
    Unsigned 8-bit integer
    3GPP2-Last-User-Activity-Time Length
```

```
radius.3GPP2_MEID      3GPP2-MEID
    String
radius.3GPP2_MEID.len  Length
    Unsigned 8-bit integer
    3GPP2-MEID Length
radius.3GPP2_MIP_Lifetime  3GPP2-MIP-Lifetime
    Byte array
radius.3GPP2_MIP_Lifetime.len  Length
    Unsigned 8-bit integer
    3GPP2-MIP-Lifetime Length
radius.3GPP2_MN_AAA_Reoval_Indication  3GPP2-MN-AAA-Reoval-Indication
    Unsigned 32-bit integer
radius.3GPP2_MN_AAA_Reoval_Indication.len  Length
    Unsigned 8-bit integer
    3GPP2-MN-AAA-Reoval-Indication Length
radius.3GPP2_MN_HA_SPI  3GPP2-MN-HA-SPI
    Unsigned 32-bit integer
radius.3GPP2_MN_HA_SPI.len  Length
    Unsigned 8-bit integer
    3GPP2-MN-HA-SPI Length
radius.3GPP2_MN_HA_Shared_Key  3GPP2-MN-HA-Shared-Key
    String
radius.3GPP2_MN_HA_Shared_Key.len  Length
    Unsigned 8-bit integer
    3GPP2-MN-HA-Shared-Key Length
radius.3GPP2_Module_Orig_Term_Indicator  3GPP2-Module-Orig-Term-Indicator
    Byte array
radius.3GPP2_Module_Orig_Term_Indicator.len  Length
    Unsigned 8-bit integer
    3GPP2-Module-Orig-Term-Indicator Length
radius.3GPP2_Number_Active_Transitions  3GPP2-Number-Active-Transitions
    Unsigned 32-bit integer
radius.3GPP2_Number_Active_Transitions.len  Length
    Unsigned 8-bit integer
    3GPP2-Number-Active-Transitions Length
radius.3GPP2_Originating_Number_SDBs  3GPP2-Originating-Number-SDBs
    Unsigned 32-bit integer
radius.3GPP2_Originating_Number_SDBs.len  Length
    Unsigned 8-bit integer
    3GPP2-Originating-Number-SDBs Length
radius.3GPP2_Originating_SDB_Octet_Count  3GPP2-Originating-SDB-Octet-Count
    Unsigned 32-bit integer
radius.3GPP2_Originating_SDB_Octet_Count.len  Length
    Unsigned 8-bit integer
    3GPP2-Originating-SDB-Octet-Count Length
```

```
radius.3GPP2_Outbound_Mobile_IP_Sig_Octets  3GPP2-Outbound-Mobile-IP-Sig-Octets
    Unsigned 32-bit integer
radius.3GPP2_Outbound_Mobile_IP_Sig_Octets.len  Length
    Unsigned 8-bit integer
    3GPP2-Outbound-Mobile-IP-Sig-Octets Length
radius.3GPP2_PCF_IP_Address  3GPP2-PCF-IP-Address
    IPv4 address
radius.3GPP2_PCF_IP_Address.len  Length
    Unsigned 8-bit integer
    3GPP2-PCF-IP-Address Length
radius.3GPP2_PrePaid_Tariff_Switching  3GPP2-PrePaid-Tariff-Switching
    Byte array
radius.3GPP2_PrePaid_Tariff_Switching.len  Length
    Unsigned 8-bit integer
    3GPP2-PrePaid-Tariff-Switching Length
radius.3GPP2_Pre_Shared_Secret  3GPP2-Pre-Shared-Secret
    String
radius.3GPP2_Pre_Shared_Secret.len  Length
    Unsigned 8-bit integer
    3GPP2-Pre-Shared-Secret Length
radius.3GPP2_Prepaid_Acct_Quota  3GPP2-Prepaid-Acct-Quota
    Byte array
radius.3GPP2_Prepaid_Acct_Quota.len  Length
    Unsigned 8-bit integer
    3GPP2-Prepaid-Acct-Quota Length
radius.3GPP2_Prepaid_acct_Capability  3GPP2-Prepaid-acct-Capability
    Byte array
radius.3GPP2_Prepaid_acct_Capability.len  Length
    Unsigned 8-bit integer
    3GPP2-Prepaid-acct-Capability Length
radius.3GPP2_RN_Packet_Data_Inactivity_Timer  3GPP2-RN-Packet-Data-Inactivity-Ti
    Unsigned 32-bit integer
radius.3GPP2_RN_Packet_Data_Inactivity_Timer.len  Length
    Unsigned 8-bit integer
    3GPP2-RN-Packet-Data-Inactivity-Timer Length
radius.3GPP2_Received_HDLC_Octets  3GPP2-Received-HDLC-Octets
    Unsigned 32-bit integer
radius.3GPP2_Received_HDLC_Octets.len  Length
    Unsigned 8-bit integer
    3GPP2-Received-HDLC-Octets Length
radius.3GPP2_Release_Indicator  3GPP2-Release-Indicator
    Unsigned 32-bit integer
radius.3GPP2_Release_Indicator.len  Length
    Unsigned 8-bit integer
    3GPP2-Release-Indicator Length
```

```
radius.3GPP2_Remote_Address_Table_Index  3GPP2-Remote-Address-Table-Index
      Byte array
radius.3GPP2_Remote_Address_Table_Index.len  Length
      Unsigned 8-bit integer
      3GPP2-Remote-Address-Table-Index Length
radius.3GPP2_Remote_IP_Address  3GPP2-Remote-IP-Address
      Byte array
radius.3GPP2_Remote_IP_Address.len  Length
      Unsigned 8-bit integer
      3GPP2-Remote-IP-Address Length
radius.3GPP2_Remote_IPv4_Addr_Octet_Count  3GPP2-Remote-IPv4-Addr-Octet-Count
      Byte array
radius.3GPP2_Remote_IPv4_Addr_Octet_Count.len  Length
      Unsigned 8-bit integer
      3GPP2-Remote-IPv4-Addr-Octet-Count Length

    Unsigned 32-bit integer

radius.X_Ascend_Send_Auth.len  Length
    Unsigned 8-bit integer
    X-Ascend-Send-Auth Length

radius.X_Ascend_Send_Passwd  X-Ascend-Send-Passwd
    String

radius.X_Ascend_Send_Passwd.len  Length
    Unsigned 8-bit integer
    X-Ascend-Send-Passwd Length

radius.X_Ascend_Send_Secret  X-Ascend-Send-Secret
    String

radius.X_Ascend_Send_Secret.len  Length
    Unsigned 8-bit integer
    X-Ascend-Send-Secret Length

radius.X_Ascend_Session_Svr_Key  X-Ascend-Session-Svr-Key
    String
```

```
radius.X_Ascend_Session_Svr_Key.len  Length
    Unsigned 8-bit integer
    X-Ascend-Session-Svr-Key Length

radius.X_Ascend_Shared_Profile_Enable  X-Ascend-Shared-Profile-Enable
    Unsigned 32-bit integer

radius.X_Ascend_Shared_Profile_Enable.len  Length
    Unsigned 8-bit integer
    X-Ascend-Shared-Profile-Enable Length

radius.X_Ascend_TS_Idle_Limit  X-Ascend-TS-Idle-Limit
    Unsigned 32-bit integer

radius.X_Ascend_TS_Idle_Limit.len  Length
    Unsigned 8-bit integer
    X-Ascend-TS-Idle-Limit Length

radius.X_Ascend_TS_Idle_Mode  X-Ascend-TS-Idle-Mode
    Unsigned 32-bit integer

radius.X_Ascend_TS_Idle_Mode.len  Length
    Unsigned 8-bit integer
    X-Ascend-TS-Idle-Mode Length

radius.X_Ascend_Target_Util  X-Ascend-Target-Util
    Unsigned 32-bit integer

radius.X_Ascend_Target_Util.len  Length
    Unsigned 8-bit integer
    X-Ascend-Target-Util Length

radius.X_Ascend_Temporary_Rtes  X-Ascend-Temporary-Rtes
    Unsigned 32-bit integer

radius.X_Ascend_Temporary_Rtes.len  Length
    Unsigned 8-bit integer
    X-Ascend-Temporary-Rtes Length

radius.X_Ascend_Third_Prompt  X-Ascend-Third-Prompt
    String

radius.X_Ascend_Third_Prompt.len  Length
    Unsigned 8-bit integer
    X-Ascend-Third-Prompt Length

radius.X_Ascend-Token_Expiry  X-Ascend-Token-Expiry
    Unsigned 32-bit integer

radius.X_Ascend-Token_Expiry.len  Length
    Unsigned 8-bit integer
    X-Ascend-Token-Expiry Length

radius.X_Ascend-Token_Idle  X-Ascend-Token-Idle
    Unsigned 32-bit integer

radius.X_Ascend-Token_Idle.len  Length
    Unsigned 8-bit integer
    X-Ascend-Token-Idle Length

radius.X_Ascend-Token_Immediate  X-Ascend-Token-Immediate
    Unsigned 32-bit integer
```

```
radius.X_Ascend-Token-Immediate.len  Length
    Unsigned 8-bit integer
    X-Ascend-Token-Immediate Length

radius.X_Ascend-Transit-Number  X-Ascend-Transit-Number
    String

radius.X_Ascend-Transit-Number.len  Length
    Unsigned 8-bit integer
    X-Ascend-Transit-Number Length

radius.X_Ascend-Tunneling-Protocol  X-Ascend-Tunneling-Protocol
    Unsigned 32-bit integer

radius.X_Ascend-Tunneling-Protocol.len  Length
    Unsigned 8-bit integer
    X-Ascend-Tunneling-Protocol Length

radius.X_Ascend-User-Acct-Base  X-Ascend-User-Acct-Base
    Unsigned 32-bit integer

radius.X_Ascend-User-Acct-Base.len  Length
    Unsigned 8-bit integer
    X-Ascend-User-Acct-Base Length

radius.X_Ascend-User-Acct-Host  X-Ascend-User-Acct-Host
    IPv4 address

radius.X_Ascend-User-Acct-Host.len  Length
    Unsigned 8-bit integer
    X-Ascend-User-Acct-Host Length

radius.X_Ascend-User-Acct-Key  X-Ascend-User-Acct-Key
    String

radius.X_Ascend-User-Acct-Key.len  Length
    Unsigned 8-bit integer
    X-Ascend-User-Acct-Key Length

radius.X_Ascend-User-Acct-Port  X-Ascend-User-Acct-Port
    Unsigned 32-bit integer

radius.X_Ascend-User-Acct-Port.len  Length
    Unsigned 8-bit integer
    X-Ascend-User-Acct-Port Length

radius.X_Ascend-User-Acct-Time  X-Ascend-User-Acct-Time
    Unsigned 32-bit integer

radius.X_Ascend-User-Acct-Time.len  Length
    Unsigned 8-bit integer
    X-Ascend-User-Acct-Time Length

radius.X_Ascend-User-Acct-Type  X-Ascend-User-Acct-Type
    Unsigned 32-bit integer

radius.X_Ascend-User-Acct-Type.len  Length
    Unsigned 8-bit integer
    X-Ascend-User-Acct-Type Length

radius.X_Ascend-Xmit-Rate  X-Ascend-Xmit-Rate
    Unsigned 32-bit integer
```

```
radius.X_Ascend_Xmit_Rate.len  Length
    Unsigned 8-bit integer
    X-Ascend-Xmit-Rate Length

radius.Xedia_Address_Pool  Xedia-Address-Pool
    String

radius.Xedia_Address_Pool.len  Length
    Unsigned 8-bit integer
    Xedia-Address-Pool Length

radius.Xedia_Client_Access_Network  Xedia-Client-Access-Network
    String

radius.Xedia_Client_Access_Network.len  Length
    Unsigned 8-bit integer
    Xedia-Client-Access-Network Length

radius.Xedia_DNS_Server  Xedia-DNS-Server
    IPv4 address

radius.Xedia_DNS_Server.len  Length
    Unsigned 8-bit integer
    Xedia-DNS-Server Length

radius.Xedia_NetBios_Server  Xedia-NetBios-Server
    IPv4 address

radius.Xedia_NetBios_Server.len  Length
    Unsigned 8-bit integer
    Xedia-NetBios-Server Length

radius.Xedia_PPP_Echo_Interval  Xedia-PPP-Echo-Interval
    Unsigned 32-bit integer

radius.Xedia_PPP_Echo_Interval.len  Length
    Unsigned 8-bit integer
    Xedia-PPP-Echo-Interval Length

radius.Xedia_SSH_Privileges  Xedia-SSH-Privileges
    Unsigned 32-bit integer

radius.Xedia_SSH_Privileges.len  Length
    Unsigned 8-bit integer
    Xedia-SSH-Privileges Length

radius.authenticator  Authenticator
    Byte array

radius.call_id  call-id
    String

radius.call_id.len  Length
    Unsigned 8-bit integer
    call-id Length

radius.code  Code
    Unsigned 8-bit integer

radius.dup  Duplicate Message
    Unsigned 32-bit integer
    Duplicate Message
```

  Unsigned 32-bit integer
  RTMPT Header caller source
rtmpt.header.function  Function call
  Unsigned 8-bit integer
  RTMPT Header function call
rtmpt.header.handshake  Handshake data
  Byte array
  RTMPT Header handshake data
rtmpt.header.objid  ObjectID
  Unsigned 8-bit integer
  RTMPT Header object ID
rtmpt.header.timestamp  Timestamp
  Unsigned 24-bit integer
  RTMPT Header timestamp
```

### **Real Time Streaming Protocol (rtsp)**

```
X_Vig_Msisdn  X-Vig-Msisdn
  String
rtsp.content-length  Content-length
  Unsigned 32-bit integer
rtsp.content-type    Content-type
  String
rtsp.method          Method
  String
rtsp.rdt-feature-level  RDTFeatureLevel
  Unsigned 32-bit integer
rtsp.request         Request
  String
rtsp.response        Response
  String
rtsp.session         Session
  String
rtsp.status          Status
  Unsigned 32-bit integer
rtsp.transport       Transport
  String
```

rtsp.url URL  
String

### Real-Time Media Access Control (rtmac)

rtmac.header.flags Flags  
Unsigned 8-bit integer  
RTmac Flags

rtmac.header.flags.res Reserved Flags  
Unsigned 8-bit integer  
RTmac Reserved Flags

rtmac.header.flags.tunnel Tunnelling Flag  
Boolean  
RTmac Tunnelling Flag

rtmac.header.res Reserved  
Unsigned 8-bit integer  
RTmac Reserved

rtmac.header.type Type  
String  
RTmac Type

rtmac.header.ver Version  
Unsigned 16-bit integer  
RTmac Version

tdma-v1.msg Message  
Unsigned 32-bit integer  
TDMA-V1 Message

tdma-v1.msg.ack\_ack\_conf.padding Padding  
Byte array  
TDMA Padding

tdma-v1.msg.ack\_ack\_conf.station Station  
Unsigned 8-bit integer  
TDMA Station

tdma-v1.msg.ack\_conf.cycle Cycle  
Unsigned 8-bit integer  
TDMA Cycle

tdma-v1.msg.ack\_conf.mtu MTU  
Unsigned 8-bit integer  
TDMA MTU

tdma-v1.msg.ack\_conf.padding Padding  
Unsigned 8-bit integer  
TDMA PAdding

tdma-v1.msg.ack\_conf.station Station  
Unsigned 8-bit integer  
TDMA Station

tdma-v1.msg.ack\_test.counter Counter  
Unsigned 32-bit integer  
TDMA Counter

```
tdma-v1.msg.ack_test.tx TX
    Unsigned 64-bit integer
    TDMA TX

tdma-v1.msg.request_change_offset.offset Offset
    Unsigned 32-bit integer
    TDMA Offset

tdma-v1.msg.request_conf.cycle Cycle
    Unsigned 8-bit integer
    TDMA Cycle

tdma-v1.msg.request_conf.mtu MTU
    Unsigned 8-bit integer
    TDMA MTU

tdma-v1.msg.request_conf.padding Padding
    Unsigned 8-bit integer
    TDMA Padding

tdma-v1.msg.request_conf.station Station
    Unsigned 8-bit integer
    TDMA Station

tdma-v1.msg.request_test.counter Counter
    Unsigned 32-bit integer
    TDMA Counter

tdma-v1.msg.request_test.tx TX
    Unsigned 64-bit integer
    TDMA TX

tdma-v1.msg.start_of_frame.timestamp Timestamp
    Unsigned 64-bit integer
    TDMA Timestamp

tdma-v1.msg.station_list.ip IP
    IPv4 address
    TDMA Station IP

tdma-v1.msg.station_list.nr Nr.
    Unsigned 8-bit integer
    TDMA Station Number

tdma-v1.msg.station_list.nr_stations Nr. Stations
    Unsigned 8-bit integer
    TDMA Nr. Stations

tdma-v1.msg.station_list.padding Padding
    Byte array
    TDMA Padding

tdma.id Message ID
    Unsigned 16-bit integer
    TDMA Message ID

tdma.req_cal.rpl_cycle Reply Cycle Number
    Unsigned 32-bit integer
    TDMA Request Calibration Reply Cycle Number

tdma.req_cal.rpl_slot Reply Slot Offset
    Unsigned 64-bit integer
    TDMA Request Calibration Reply Slot Offset
```

```
tdma.req_cal.xmit_stamp  Transmission Time Stamp
    Unsigned 64-bit integer
    TDMA Request Calibration Transmission Time Stamp
tdma.rpl_cal.rcv_stamp   Reception Time Stamp
    Unsigned 64-bit integer
    TDMA Reply Calibration Reception Time Stamp
tdma.rpl_cal.req_stamp   Request Transmission Time
    Unsigned 64-bit integer
    TDMA Reply Calibration Request Transmission Time
tdma.rpl_cal.xmit_stamp  Transmission Time Stamp
    Unsigned 64-bit integer
    TDMA Reply Calibration Transmission Time Stamp
tdma.sync.cycle         Cycle Number
    Unsigned 32-bit integer
    TDMA Sync Cycle Number
tdma.sync.sched_xmit    Scheduled Transmission Time
    Unsigned 64-bit integer
    TDMA Sync Scheduled Transmission Time
tdma.sync.xmit_stamp    Transmission Time Stamp
    Unsigned 64-bit integer
    TDMA Sync Transmission Time Stamp
tdma.ver               Version
    Unsigned 16-bit integer
    TDMA Version
```

#### **Real-Time Publish-Subscribe Wire Protocol (rtps)**

```
rtps.issue_data        User Data
    Byte array
    Issue Data
rtps.octets_to_next_header  Octets to next header
    Unsigned 16-bit integer
    Octets to next header
rtps.parameter_id       Parameter Id
    Unsigned 16-bit integer
    Parameter Id
rtps.parameter_length    Parameter Length
    Unsigned 16-bit integer
    Parameter Length
rtps.submessage_flags    Submessage flags
    Unsigned 8-bit integer
    Submessage flags
rtps.submessage_id      Submessage Id
    Unsigned 8-bit integer
    Submessage flags
```

**Real-Time Transport Protocol (rtp)**

```
rtp.block-length  Block length
  Unsigned 16-bit integer
  Block Length

rtp.cc  Contributing source identifiers count
  Unsigned 8-bit integer

rtp.csrc.item  CSRC item
  Unsigned 32-bit integer

rtp.csrc.items  Contributing Source identifiers
  No value

rtp.ext  Extension
  Boolean

rtp.ext.len  Extension length
  Unsigned 16-bit integer

rtp.ext.profile  Defined by profile
  Unsigned 16-bit integer

rtp.extseq  Extended sequence number
  Unsigned 32-bit integer

rtp.follow  Follow
  Boolean
  Next header follows

rtp.fragment  RTP Fragment data
  Frame number
  RTP Fragment data

rtp.fragment.error  Defragmentation error
  Frame number
  Defragmentation error due to illegal fragments

rtp.fragment.multipletails  Multiple tail fragments found
  Boolean
  Several tails were found when defragmenting the packet

rtp.fragment.overlap  Fragment overlap
  Boolean
  Fragment overlaps with other fragments

rtp.fragment.overlap.conflict  Conflicting data in fragment overlap
  Boolean
  Overlapping fragments contained conflicting data

rtp.fragment.toolongfragment  Fragment too long
  Boolean
  Fragment contained data past end of packet

rtp.fragments  RTP Fragments
  No value
  RTP Fragments

rtp.hdr_ext  Header extension
  Unsigned 32-bit integer

rtp.hdr_exts  Header extensions
  No value
```

```
rtp.marker  Marker
            Boolean

rtp.p_type  Payload type
            Unsigned 8-bit integer

rtp.padding  Padding
            Boolean

rtp.padding.count  Padding count
            Unsigned 8-bit integer

rtp.padding.data  Padding data
            Byte array

rtp.payload  Payload
            Byte array

rtp.reassembled_in  RTP fragment, reassembled in frame
                   Frame number
                   This RTP packet is reassembled in this frame

rtp.seq  Sequence number
        Unsigned 16-bit integer

rtp.setup  Stream setup
          String
          Stream setup, method and frame number

rtp.setup-frame  Setup frame
                Frame number
                Frame that set up this stream

rtp.setup-method  Setup Method
                 String
                 Method used to set up this stream

rtp.ssrc  Synchronization Source identifier
         Unsigned 32-bit integer

rtp.timestamp  Timestamp
              Unsigned 32-bit integer

rtp.timestamp-offset  Timestamp offset
                    Unsigned 16-bit integer
                    Timestamp Offset

rtp.version  Version
            Unsigned 8-bit integer

srtp.auth_tag  SRTP Auth Tag
              Byte array
              SRTP Authentication Tag

srtp.enc_payload  SRTP Encrypted Payload
                Byte array
                SRTP Encrypted Payload

srtp.mki  SRTP MKI
        Byte array
        SRTP Master Key Index
```

**Real-time Transport Control Protocol (rtcp)**

```
rtcp.app.PoC1.subtype  Subtype
                       Unsigned 8-bit integer
rtcp.app.data          Application specific data
                       Byte array
rtcp.app.name          Name (ASCII)
                       String
rtcp.app.poc1          PoC1 Application specific data
                       No value
rtcp.app.poc1.ack.reason.code  Reason code
                               Unsigned 16-bit integer
rtcp.app.poc1.ack.subtype  Subtype
                               Unsigned 8-bit integer
rtcp.app.poc1.conn.add.ind.mao  Manual answer override
                               Boolean
rtcp.app.poc1.conn.content.a.dn  Nick name of inviting client
                               Boolean
rtcp.app.poc1.conn.content.a.id  Identity of inviting client
                               Boolean
rtcp.app.poc1.conn.content.grp.dn  Group name
                               Boolean
rtcp.app.poc1.conn.content.grp.id  Group identity
                               Boolean
rtcp.app.poc1.conn.content.sess.id  Session identity
                               Boolean
rtcp.app.poc1.conn.sdes.a.dn  Nick name of inviting client
                               String
rtcp.app.poc1.conn.sdes.a.id  Identity of inviting client
                               String
rtcp.app.poc1.conn.sdes.grp.dn  Group Name
                               String
rtcp.app.poc1.conn.sdes.grp.id  Group identity
                               String
rtcp.app.poc1.conn.sdes.sess.id  Session identity
                               String
rtcp.app.poc1.conn.session.type  Session type
                               Unsigned 8-bit integer
rtcp.app.poc1.disp.name  Display Name
                               String
rtcp.app.poc1.ignore.seq.no  Ignore sequence number field
                               Unsigned 16-bit integer
rtcp.app.poc1.last.pkt.seq.no  Sequence number of last RTP packet
                               Unsigned 16-bit integer
```

```
rtcp.app.pocl.new.time.request  New time client can request (seconds)
    Unsigned 16-bit integer
    Time in seconds client can request for
rtcp.app.pocl.participants      Number of participants
    Unsigned 16-bit integer
rtcp.app.pocl.priority          Priority
    Unsigned 8-bit integer
rtcp.app.pocl.qsresp.position    Position (number of clients ahead)
    Unsigned 16-bit integer
rtcp.app.pocl.qsresp.priority    Priority
    Unsigned 8-bit integer
rtcp.app.pocl.reason.code       Reason code
    Unsigned 8-bit integer
rtcp.app.pocl.reason.phrase     Reason Phrase
    String
rtcp.app.pocl.request.ts        Talk Burst Requist Timestamp
    String
rtcp.app.pocl.sip.uri           SIP URI
    String
rtcp.app.pocl.ssrc.granted       SSRC of client granted permission to talk
    Unsigned 32-bit integer
rtcp.app.pocl.stt               Stop talking timer
    Unsigned 16-bit integer
rtcp.app.subtype                Subtype
    Unsigned 8-bit integer
rtcp.bye_reason_not_padded      BYE reason string not NULL padded
    No value
    RTCP BYE reason string not padded
rtcp.fci                        Feedback Control Information (FCI)
    Byte array
    Feedback Control Information (FCI)
rtcp.length                     Length
    Unsigned 16-bit integer
    32-bit words (-1) in packet
rtcp.length_check               RTCP frame length check
    Boolean
    RTCP frame length check
rtcp.lsr-frame                  Frame matching Last SR timestamp
    Frame number
    Frame matching LSR field (used to calculate roundtrip delay)
rtcp.lsr-frame-captured         Time since Last SR captured
    Unsigned 32-bit integer
    Time since frame matching LSR field was captured
rtcp.nack.blp                   Bitmask of following lost packets
    Unsigned 16-bit integer
```

```
rtcp.nack.fsn  First sequence number
               Unsigned 16-bit integer

rtcp.padding  Padding
              Boolean

rtcp.padding.count  Padding count
                   Unsigned 8-bit integer

rtcp.padding.data  Padding data
                  Byte array

rtcp.profile-specific-extension  Profile-specific extension
                                  Byte array
                                  Profile-specific extension

rtcp.psfb.fmt  RTCP Feedback message type (FMT)
               Unsigned 8-bit integer
               RTCP Feedback message type (FMT)

rtcp.pt  Packet type
         Unsigned 8-bit integer

rtcp.rc  Reception report count
         Unsigned 8-bit integer

rtcp.roundtrip-delay  Roundtrip Delay(ms)
                     Signed 32-bit integer
                     Calculated roundtrip delay in ms

rtcp.rtpfb.fmt  RTCP Feedback message type (FMT)
               Unsigned 8-bit integer
               RTCP Feedback message type (FMT)

rtcp.rtpfb.nack  RTCP Transport Feedback NACK
                Unsigned 16-bit integer
                RTCP Transport Feedback NACK

rtcp.rtpfb.nack.blp  RTCP Transport Feedback NACK BLP
                    Unsigned 16-bit integer
                    RTCP Transport Feedback NACK BLP

rtcp.sc  Source count
        Unsigned 8-bit integer

rtcp.sdes.length  Length
                 Unsigned 32-bit integer

rtcp.sdes.prefix.length  Prefix length
                        Unsigned 8-bit integer

rtcp.sdes.prefix.string  Prefix string
                        String

rtcp.sdes.ssrc_csrc  SSRC / CSRC identifier
                    Unsigned 32-bit integer

rtcp.sdes.text  Text
               String

rtcp.sdes.type  Type
               Unsigned 8-bit integer

rtcp.sender.octetcount  Sender's octet count
                       Unsigned 32-bit integer
```

```
rtcp.sender.packetcount  Sender's packet count
    Unsigned 32-bit integer
rtcp.senderssrc  Sender SSRC
    Unsigned 32-bit integer
rtcp.setup  Stream setup
    String
    Stream setup, method and frame number
rtcp.setup-frame  Setup frame
    Frame number
    Frame that set up this stream
rtcp.setup-method  Setup Method
    String
    Method used to set up this stream
rtcp.ssrc.cum_nr  Cumulative number of packets lost
    Unsigned 32-bit integer
rtcp.ssrc.discarded  Fraction discarded
    Unsigned 8-bit integer
    Discard Rate
rtcp.ssrc.dlsr  Delay since last SR timestamp
    Unsigned 32-bit integer
rtcp.ssrc.ext_high  Extended highest sequence number received
    Unsigned 32-bit integer
rtcp.ssrc.fraction  Fraction lost
    Unsigned 8-bit integer
rtcp.ssrc.high_cycles  Sequence number cycles count
    Unsigned 16-bit integer
rtcp.ssrc.high_seq  Highest sequence number received
    Unsigned 16-bit integer
rtcp.ssrc.identifier  Identifier
    Unsigned 32-bit integer
rtcp.ssrc.jitter  Interarrival jitter
    Unsigned 32-bit integer
rtcp.ssrc.lsr  Last SR timestamp
    Unsigned 32-bit integer
rtcp.timestamp.ntp  NTP timestamp
    String
rtcp.timestamp.ntp.lsw  Timestamp, LSW
    Unsigned 32-bit integer
rtcp.timestamp.ntp.msw  Timestamp, MSW
    Unsigned 32-bit integer
rtcp.timestamp.rtp  RTP timestamp
    Unsigned 32-bit integer
rtcp.version  Version
    Unsigned 8-bit integer
rtcp.xr.beginseq  Begin Sequence Number
    Unsigned 16-bit integer
```

```
rtcp.xr.bl  Length
            Unsigned 16-bit integer
            Block Length

rtcp.xr.bs  Type Specific
            Unsigned 8-bit integer
            Reserved

rtcp.xr.bt  Type
            Unsigned 8-bit integer
            Block Type

rtcp.xr.dlrr Delay since last RR timestamp
            Unsigned 32-bit integer

rtcp.xr.endseq  End Sequence Number
            Unsigned 16-bit integer

rtcp.xr.lrr  Last RR timestamp
            Unsigned 32-bit integer

rtcp.xr.stats.devjitter  Standard Deviation of Jitter
            Unsigned 32-bit integer

rtcp.xr.stats.devttl  Standard Deviation of TTL
            Unsigned 8-bit integer

rtcp.xr.stats.dupflag  Duplicates Report Flag
            Boolean

rtcp.xr.stats.dups  Duplicate Packets
            Unsigned 32-bit integer

rtcp.xr.stats.jitterflag  Jitter Report Flag
            Boolean

rtcp.xr.stats.lost  Lost Packets
            Unsigned 32-bit integer

rtcp.xr.stats.lrflag  Loss Report Flag
            Boolean

rtcp.xr.stats.maxjitter  Maximum Jitter
            Unsigned 32-bit integer

rtcp.xr.stats.maxttl  Maximum TTL or Hop Limit
            Unsigned 8-bit integer

rtcp.xr.stats.meanjitter  Mean Jitter
            Unsigned 32-bit integer

rtcp.xr.stats.meanttl  Mean TTL or Hop Limit
            Unsigned 8-bit integer

rtcp.xr.stats.minjitter  Minimum Jitter
            Unsigned 32-bit integer

rtcp.xr.stats.minttl  Minimum TTL or Hop Limit
            Unsigned 8-bit integer

rtcp.xr.stats.ttl  TTL or Hop Limit Flag
            Unsigned 8-bit integer

rtcp.xr.tf  Thinning factor
            Unsigned 8-bit integer
```

```
rtcp.xr.voipmetrics.burstdensity  Burst Density
    Unsigned 8-bit integer
rtcp.xr.voipmetrics.burstduration  Burst Duration(ms)
    Unsigned 16-bit integer
rtcp.xr.voipmetrics.esdelay  End System Delay(ms)
    Unsigned 16-bit integer
rtcp.xr.voipmetrics.extrfactor  External R Factor
    Unsigned 8-bit integer
    R Factor is in the range of 0 to 100; 127 indicates this parameter is unavail
rtcp.xr.voipmetrics.gapdensity  Gap Density
    Unsigned 8-bit integer
rtcp.xr.voipmetrics.gapduration  Gap Duration(ms)
    Unsigned 16-bit integer
rtcp.xr.voipmetrics.gmin  Gmin
    Unsigned 8-bit integer
rtcp.xr.voipmetrics.jba  Adaptive Jitter Buffer Algorithm
    Unsigned 8-bit integer
rtcp.xr.voipmetrics.jbabsmax  Absolute Maximum Jitter Buffer Size
    Unsigned 16-bit integer
rtcp.xr.voipmetrics.jbmax  Maximum Jitter Buffer Size
    Unsigned 16-bit integer
rtcp.xr.voipmetrics.jbnominal  Nominal Jitter Buffer Size
    Unsigned 16-bit integer
rtcp.xr.voipmetrics.jbrate  Jitter Buffer Rate
    Unsigned 8-bit integer
rtcp.xr.voipmetrics.mosqc  MOS - Conversational Quality
    MOS is in the range of 1 to 5; 127 indicates this parameter is unavailable
rtcp.xr.voipmetrics.moslq  MOS - Listening Quality
    MOS is in the range of 1 to 5; 127 indicates this parameter is unavailable
rtcp.xr.voipmetrics.noiselevel  Noise Level
    Signed 8-bit integer
    Noise level of 127 indicates this parameter is unavailable
rtcp.xr.voipmetrics.plc  Packet Loss Concealment Algorithm
    Unsigned 8-bit integer
rtcp.xr.voipmetrics.rerl  Residual Echo Return Loss
    Unsigned 8-bit integer
rtcp.xr.voipmetrics.rfactor  R Factor
    Unsigned 8-bit integer
    R Factor is in the range of 0 to 100; 127 indicates this parameter is unavail
rtcp.xr.voipmetrics.rtdelay  Round Trip Delay(ms)
    Unsigned 16-bit integer
rtcp.xr.voipmetrics.signallevel  Signal Level
    Signed 8-bit integer
    Signal level of 127 indicates this parameter is unavailable
```

```
srtcp.auth_tag  SRTCP Auth Tag
  Byte array
  SRTCP Authentication Tag

srtcp.e  SRTCP E flag
  Boolean
  SRTCP Encryption Flag

srtcp.index  SRTCP Index
  Unsigned 32-bit integer
  SRTCP Index

srtcp.mki  SRTCP MKI
  Byte array
  SRTCP Master Key Index
```

### **Redback (redback)**

#### **Redback Lawful Intercept (redbackli)**

```
redbackli.eohpad  End of Header Padding
  Byte array

redbackli.label  Label
  String
  Label

redbackli.liid  Lawful Intercept Id
  Unsigned 32-bit integer

**Registry Server Attributes Manipulation Interface (rs\_attr)**

```
rs_attr.opnum  Operation
Unsigned 16-bit integer
Operation
```

**Registry server administration operations. (rs\_repadm)**

```
rs_repadmin.opnum  Operation
                   Unsigned 16-bit integer
                   Operation
```

**Reliable UDP (rudp)**

```
rudp.ack  Ack
          Unsigned 8-bit integer
          Acknowledgement Number

rudp.flags  RUDP Header flags
           Unsigned 8-bit integer

rudp.flags.0  0
             Boolean

rudp.flags.ack  Ack
              Boolean

rudp.flags.chk  CHK
              Boolean
              Checksum is on header or body

rudp.flags.eak  Eak
              Boolean
              Extended Ack

rudp.flags.nul  NULL
              Boolean
              Null flag

rudp.flags.rst  RST
              Boolean
              Reset flag

rudp.flags.syn  Syn
              Boolean

rudp.flags.tcs  TCS
              Boolean
              Transfer Connection System

rudp.hlen  Header Length
          Unsigned 8-bit integer

rudp.seq  Seq
         Unsigned 8-bit integer
         Sequence Number
```

**Remote Device Management (rdm)**

```
rdm.cc  Command class
        Unsigned 8-bit integer

rdm.checksum  Checksum
             Unsigned 16-bit integer

rdm.dst  Destination UID
        Byte array

rdm.intron  Intron
          Byte array
```

rdm.len Message length  
Unsigned 8-bit integer

rdm.mc Message count  
Unsigned 8-bit integer

rdm.pd Parameter data  
Byte array

rdm.pdl Parameter data length  
Unsigned 8-bit integer

rdm.pid Parameter ID  
Unsigned 16-bit integer

rdm.rt Response type  
Unsigned 8-bit integer

rdm.sc Start code  
Unsigned 8-bit integer

rdm.sd Sub-device  
Unsigned 16-bit integer

rdm.src Source UID  
Byte array

rdm.ssc Sub-start code  
Unsigned 8-bit integer

rdm.tn Transaction number  
Unsigned 8-bit integer

rdm.trailer Trailer  
Byte array

#### **Remote Management Control Protocol (rmcp)**

rmcp.class Class  
Unsigned 8-bit integer  
RMCP Class

rmcp.sequence Sequence  
Unsigned 8-bit integer  
RMCP Sequence

rmcp.type Message Type  
Unsigned 8-bit integer  
RMCP Message Type

rmcp.version Version  
Unsigned 8-bit integer  
RMCP Version

#### **Remote Override interface (roverride)**

roverride.opnum Operation  
Unsigned 16-bit integer  
Operation

**Remote Procedure Call (rpc)**

```
rpc.array.len    num
  Unsigned 32-bit integer
  Length of RPC array

rpc.auth.flavor  Flavor
  Unsigned 32-bit integer
  Flavor

rpc.auth.gid     GID
  Unsigned 32-bit integer
  GID

rpc.auth.length  Length
  Unsigned 32-bit integer
  Length

rpc.auth.machinename  Machine Name
  String
  Machine Name

rpc.auth.stamp   Stamp
  Unsigned 32-bit integer
  Stamp

rpc.auth.uid     UID
  Unsigned 32-bit integer
  UID

rpc.authdes.convkey  Conversation Key (encrypted)
  Unsigned 32-bit integer
  Conversation Key (encrypted)

rpc.authdes.namekind  Namekind
  Unsigned 32-bit integer
  Namekind

rpc.authdes.netname  Netname
  String
  Netname

rpc.authdes.nickname  Nickname
  Unsigned 32-bit integer
  Nickname

rpc.authdes.timestamp  Timestamp (encrypted)
  Unsigned 32-bit integer
  Timestamp (encrypted)

rpc.authdes.timeverf  Timestamp verifier (encrypted)
  Unsigned 32-bit integer
  Timestamp verifier (encrypted)

rpc.authdes.window  Window (encrypted)
  Unsigned 32-bit integer
  Windows (encrypted)

rpc.authdes.windowverf  Window verifier (encrypted)
  Unsigned 32-bit integer
  Window verifier (encrypted)
```

```
rpc.authgss.checksum  GSS Checksum
    Byte array
    GSS Checksum

rpc.authgss.context  GSS Context
    Byte array
    GSS Context

rpc.authgss.data     GSS Data
    Byte array
    GSS Data

rpc.authgss.data.length  Length
    Unsigned 32-bit integer
    Length

rpc.authgss.major    GSS Major Status
    Unsigned 32-bit integer
    GSS Major Status

rpc.authgss.minor    GSS Minor Status
    Unsigned 32-bit integer
    GSS Minor Status

rpc.authgss.procedure  GSS Procedure
    Unsigned 32-bit integer
    GSS Procedure

rpc.authgss.seqnum    GSS Sequence Number
    Unsigned 32-bit integer
    GSS Sequence Number

rpc.authgss.service   GSS Service
    Unsigned 32-bit integer
    GSS Service

rpc.authgss.token     GSS Token
    Byte array
    GSS Token

rpc.authgss.token_length  GSS Token Length
    Unsigned 32-bit integer
    GSS Token Length

rpc.authgss.version   GSS Version
    Unsigned 32-bit integer
    GSS Version

rpc.authgss.window    GSS Sequence Window
    Unsigned 32-bit integer
    GSS Sequence Window

rpc.authgssapi.handle  Client Handle
    Byte array
    Client Handle

rpc.authgssapi.isn    Signed ISN
    Byte array
    Signed ISN

rpc.authgssapi.message  AUTH_GSSAPI Message
    Boolean
    AUTH_GSSAPI Message
```

```
rpc.authgssapi.msgversion  Msg Version
    Unsigned 32-bit integer
    Msg Version

rpc.authgssapi.version  AUTH_GSSAPI Version
    Unsigned 32-bit integer
    AUTH_GSSAPI Version

rpc.call.dup  Duplicate to the call in
    Frame number
    This is a duplicate to the call in frame

rpc.dup  Duplicate Call/Reply
    No value
    Duplicate Call/Reply

rpc.fraglen  Fragment Length
    Unsigned 32-bit integer
    Fragment Length

rpc.fragment  RPC Fragment
    Frame number
    RPC Fragment

rpc.fragment.error  Defragmentation error
    Frame number
    Defragmentation error due to illegal fragments

rpc.fragment.multipletails  Multiple tail fragments found
    Boolean
    Several tails were found when defragmenting the packet

rpc.fragment.overlap  Fragment overlap
    Boolean
    Fragment overlaps with other fragments

rpc.fragment.overlap.conflict  Conflicting data in fragment overlap
    Boolean
    Overlapping fragments contained conflicting data

rpc.fragment.toolongfragment  Fragment too long
    Boolean
    Fragment contained data past end of packet

rpc.fragments  RPC Fragments
    No value
    RPC Fragments

rpc.lastfrag  Last Fragment
    Boolean
    Last Fragment

rpc.msgtyp  Message Type
    Unsigned 32-bit integer
    Message Type

rpc.procedure  Procedure
    Unsigned 32-bit integer
    Procedure

rpc.program  Program
    Unsigned 32-bit integer
    Program
```

```
rpc.programversion  Program Version
    Unsigned 32-bit integer
    Program Version

rpc.programversion.max  Program Version (Maximum)
    Unsigned 32-bit integer
    Program Version (Maximum)

rpc.programversion.min  Program Version (Minimum)
    Unsigned 32-bit integer
    Program Version (Minimum)

rpc.repframe  Reply Frame
    Frame number
    Reply Frame

rpc.reply.dup  Duplicate to the reply in
    Frame number
    This is a duplicate to the reply in frame

rpc.replystat  Reply State
    Unsigned 32-bit integer
    Reply State

rpc.reqframe  Request Frame
    Frame number
    Request Frame

rpc.state_accept  Accept State
    Unsigned 32-bit integer
    Accept State

rpc.state_auth  Auth State
    Unsigned 32-bit integer
    Auth State

rpc.state_reject  Reject State
    Unsigned 32-bit integer
    Reject State

rpc.time  Time from request
    Time duration
    Time between Request and Reply for ONC-RPC calls

rpc.value_follows  Value Follows
    Boolean
    Value Follows

rpc.version  RPC Version
    Unsigned 32-bit integer
    RPC Version

rpc.version.max  RPC Version (Maximum)
    Unsigned 32-bit integer
    RPC Version (Maximum)

rpc.version.min  RPC Version (Minimum)
    Unsigned 32-bit integer
    Program Version (Minimum)

rpc.xid  XID
    Unsigned 32-bit integer
    XID
```

**Remote Process Execution (exec)**

exec.command Command to execute  
String  
Command client is requesting the server to run.

exec.password Client password  
String  
Password client uses to log in to the server.

exec.stderr\_port Stderr port (optional)  
String  
Client port that is listening for stderr stream from server

exec.username Client username  
String  
Username client uses to log in to the server.

**Remote Program Load (rpl)**

rpl.adapterid Adapter ID  
Unsigned 16-bit integer  
RPL Adapter ID

rpl.bsmversion BSM Version  
Unsigned 16-bit integer  
RPL Version of BSM.obj

rpl.config Configuration  
Byte array  
RPL Configuration

rpl.connclass Connection Class  
Unsigned 16-bit integer  
RPL Connection Class

rpl.corrval Correlator Value  
Unsigned 32-bit integer  
RPL Correlator Value

rpl.data Data  
Byte array  
RPL Binary File Data

rpl.ec EC  
Byte array  
RPL EC

rpl.equipment Equipment  
Unsigned 16-bit integer  
RPL Equipment - AX from INT 11h

rpl.flags Flags  
Unsigned 8-bit integer  
RPL Bit Significant Option Flags

rpl.laddress Locate Address  
Unsigned 32-bit integer  
RPL Locate Address

rpl.lmac Loader MAC Address  
6-byte Hardware (MAC) Address  
RPL Loader MAC Address

rpl.maxframe Maximum Frame Size  
Unsigned 16-bit integer  
RPL Maximum Frame Size

rpl.memsize Memory Size  
Unsigned 16-bit integer  
RPL Memory Size - AX from INT 12h MINUS 32k MINUS the Boot ROM Size

rpl.respval Response Code  
Unsigned 8-bit integer  
RPL Response Code

rpl.sap SAP  
Unsigned 8-bit integer  
RPL SAP

rpl.sequence Sequence Number  
Unsigned 32-bit integer  
RPL Sequence Number

rpl.shortname Short Name  
Byte array  
RPL BSM Short Name

rpl.smac Set MAC Address  
6-byte Hardware (MAC) Address  
RPL Set MAC Address

rpl.type Type  
Unsigned 16-bit integer  
RPL Packet Type

rpl.xaddress XFER Address  
Unsigned 32-bit integer  
RPL Transfer Control Address

**Remote Quota (rquota)**

rquota.active active  
Boolean  
Indicates whether quota is active

rquota.bhardlimit bhardlimit  
Unsigned 32-bit integer  
Hard limit for blocks

rquota.bsize bsize  
Unsigned 32-bit integer  
Block size

rquota.bsoftlimit bsoftlimit  
Unsigned 32-bit integer  
Soft limit for blocks

rquota.btimeleft btimeleft  
Unsigned 32-bit integer  
Time left for excessive disk use

rquota.curblocks curblocks  
Unsigned 32-bit integer  
Current block count

```

rquota.curfiles  curfiles
    Unsigned 32-bit integer
    Current # allocated files

rquota.fhardlimit  fhardlimit
    Unsigned 32-bit integer
    Hard limit on allocated files

rquota.fsoftlimit  fsoftlimit
    Unsigned 32-bit integer
    Soft limit of allocated files

rquota.ftimeleft  ftimeleft
    Unsigned 32-bit integer
    Time left for excessive files

rquota.pathp  pathp
    String
    Filesystem of interest

rquota.procedure_v1  V1 Procedure
    Unsigned 32-bit integer
    V1 Procedure

rquota.rquota  rquota
    No value
    Rquota structure

rquota.status  status
    Unsigned 32-bit integer
    Status code

rquota.uid  uid
    Unsigned 32-bit integer
    User ID

```

#### **Remote Registry Service (winreg)**

```

winreg.KeySecurityAttribute.data_size  Data Size
    Unsigned 32-bit integer

winreg.KeySecurityAttribute.inherit  Inherit
    Unsigned 8-bit integer

winreg.KeySecurityAttribute.sec_data  Sec Data
    No value

winreg.KeySecurityData.data  Data
    Unsigned 8-bit integer

winreg.KeySecurityData.len  Len
    Unsigned 32-bit integer

winreg.KeySecurityData.size  Size
    Unsigned 32-bit integer

winreg.QueryMultipleValue.length  Length
    Unsigned 32-bit integer

winreg.QueryMultipleValue.name  Name
    String

winreg.QueryMultipleValue.offset  Offset
    Unsigned 32-bit integer

```

```
winreg.QueryMultipleValue.type  Type
    Unsigned 32-bit integer
winreg.access_mask  Access Mask
    Unsigned 32-bit integer
winreg.handle  Handle
    Byte array
winreg.opnum  Operation
    Unsigned 16-bit integer
winreg.sd  KeySecurityData
    No value
winreg.sd.actual_size  Actual Size
    Unsigned 32-bit integer
winreg.sd.max_size  Max Size
    Unsigned 32-bit integer
winreg.sd.offset  Offset
    Unsigned 32-bit integer
winreg.system_name  System Name
    Unsigned 16-bit integer
winreg.werror  Windows Error
    Unsigned 32-bit integer
winreg.winreg_AbortSystemShutdown.server  Server
    Unsigned 16-bit integer
winreg.winreg_AccessMask.KEY_CREATE_LINK  Key Create Link
    Boolean
winreg.winreg_AccessMask.KEY_CREATE_SUB_KEY  Key Create Sub Key
    Boolean
winreg.winreg_AccessMask.KEY_ENUMERATE_SUB_KEYS  Key Enumerate Sub Keys
    Boolean
winreg.winreg_AccessMask.KEY_NOTIFY  Key Notify
    Boolean
winreg.winreg_AccessMask.KEY_QUERY_VALUE  Key Query Value
    Boolean
winreg.winreg_AccessMask.KEY_SET_VALUE  Key Set Value
    Boolean
winreg.winreg_AccessMask.KEY_WOW64_32KEY  Key Wow64 32key
    Boolean
winreg.winreg_AccessMask.KEY_WOW64_64KEY  Key Wow64 64key
    Boolean
winreg.winreg_CreateKey.action_taken  Action Taken
    Unsigned 32-bit integer
winreg.winreg_CreateKey.keyclass  Keyclass
    String
winreg.winreg_CreateKey.name  Name
    String
```

```
winreg.winreg_CreateKey.new_handle  New Handle
    Byte array
winreg.winreg_CreateKey.options  Options
    Unsigned 32-bit integer
winreg.winreg_CreateKey.secdesc  Secdesc
    No value
winreg.winreg_DeleteKey.key  Key
    String
winreg.winreg_DeleteValue.value  Value
    String
winreg.winreg_EnumKey.enum_index  Enum Index
    Unsigned 32-bit integer
winreg.winreg_EnumKey.keyclass  Keyclass
    No value
winreg.winreg_EnumKey.last_changed_time  Last Changed Time
    Date/Time stamp
winreg.winreg_EnumKey.name  Name
    No value
winreg.winreg_EnumValue.enum_index  Enum Index
    Unsigned 32-bit integer
winreg.winreg_EnumValue.length  Length
    Unsigned 32-bit integer
winreg.winreg_EnumValue.name  Name
    No value
winreg.winreg_EnumValue.size  Size
    Unsigned 32-bit integer
winreg.winreg_EnumValue.type  Type
    Unsigned 32-bit integer
winreg.winreg_EnumValue.value  Value
    Unsigned 8-bit integer
winreg.winreg_GetKeySecurity.sec_info  Sec Info
    No value
winreg.winreg_GetVersion.version  Version
    Unsigned 32-bit integer
winreg.winreg_InitiateSystemShutdown.force_apps  Force Apps
    Unsigned 8-bit integer
winreg.winreg_InitiateSystemShutdown.hostname  Hostname
    Unsigned 16-bit integer
winreg.winreg_InitiateSystemShutdown.message  Message
    No value
winreg.winreg_InitiateSystemShutdown.reboot  Reboot
    Unsigned 8-bit integer
winreg.winreg_InitiateSystemShutdown.timeout  Timeout
    Unsigned 32-bit integer
```

```
winreg.winreg_InitiateSystemShutdownEx.force_apps  Force Apps
    Unsigned 8-bit integer
winreg.winreg_InitiateSystemShutdownEx.hostname  Hostname
    Unsigned 16-bit integer
winreg.winreg_InitiateSystemShutdownEx.message  Message
    No value
winreg.winreg_InitiateSystemShutdownEx.reason  Reason
    Unsigned 32-bit integer
winreg.winreg_InitiateSystemShutdownEx.reboot  Reboot
    Unsigned 8-bit integer
winreg.winreg_InitiateSystemShutdownEx.timeout  Timeout
    Unsigned 32-bit integer
winreg.winreg_LoadKey.filename  Filename
    String
winreg.winreg_LoadKey.keyname  Keyname
    String
winreg.winreg_NotifyChangeKeyValue.notify_filter  Notify Filter
    Unsigned 32-bit integer
winreg.winreg_NotifyChangeKeyValue.string1  String1
    String
winreg.winreg_NotifyChangeKeyValue.string2  String2
    String
winreg.winreg_NotifyChangeKeyValue.unknown  Unknown
    Unsigned 32-bit integer
winreg.winreg_NotifyChangeKeyValue.unknown2  Unknown2
    Unsigned 32-bit integer
winreg.winreg_NotifyChangeKeyValue.watch_subtree  Watch Subtree
    Unsigned 8-bit integer
winreg.winreg_OpenHKCU.access_mask  Access Mask
    Unsigned 32-bit integer
winreg.winreg_OpenHKPD.access_mask  Access Mask
    Unsigned 32-bit integer
winreg.winreg_OpenKey.access_mask  Access Mask
    Unsigned 32-bit integer
winreg.winreg_OpenKey.keyname  Keyname
    String
winreg.winreg_OpenKey.parent_handle  Parent Handle
    Byte array
winreg.winreg_OpenKey.unknown  Unknown
    Unsigned 32-bit integer
winreg.winreg_QueryInfoKey.classname  Classname
    String
winreg.winreg_QueryInfoKey.last_changed_time  Last Changed Time
    Date/Time stamp
```

```

winreg.winreg_QueryInfoKey.max_subkeylen  Max Subkeylen
    Unsigned 32-bit integer
winreg.winreg_QueryInfoKey.max_subkeysize  Max Subkeysize
    Unsigned 32-bit integer
winreg.winreg_QueryInfoKey.max_valbufsize  Max Valbufsize
    Unsigned 32-bit integer
winreg.winreg_QueryInfoKey.max_valnamelen  Max Valnamelen
    Unsigned 32-bit integer
winreg.winreg_QueryInfoKey.num_subkeys    Num Subkeys
    Unsigned 32-bit integer
winreg.winreg_QueryInfoKey.num_values     Num Values
    Unsigned 32-bit integer
winreg.winreg_QueryInfoKey.secdescsize    Secdescsize
    Unsigned 32-bit integer
winreg.winreg_QueryMultipleValues.buffer   Buffer
    Unsigned 8-bit integer
winreg.winreg_QueryMultipleValues.buffer_size  Buffer Size
    Unsigned 32-bit integer
winreg.winreg_QueryMultipleValues.key_handle  Key Handle
    Byte array
winreg.winreg_QueryMultipleValues.num_values  Num Values
    Unsigned 32-bit integer
winreg.winreg_QueryMultipleValues.values     Values
    No value
winreg.winreg_QueryValue.data              Data
    Unsigned 8-bit integer
winreg.winreg_QueryValue.length            Length
    Unsigned 32-bit integer
winreg.winreg_QueryValue.size              Size
    Unsigned 32-bit integer
winreg.winreg_QueryValue.type              Type
    Unsigned 32-bit integer
winreg.winreg_QueryValue.value_name        Value Name
    String
winreg.winreg_RestoreKey.filename           Filename
    String
winreg.winreg_RestoreKey.flags              Flags
    Unsigned 32-bit integer
winreg.winreg_RestoreKey.handle            Handle
    Byte array
winreg.winreg_SaveKey.filename              Filename
    String
winreg.winreg_SaveKey.handle                Handle
    Byte array

    Unsigned 16-bit integer
rstp.hello                   Hello Time
    Unsigned 16-bit integer
rstp.maxage                  Max Age
    Unsigned 16-bit integer
rstp.root.hw                 Root MAC
    6-byte Hardware (MAC) Address
```

#### **Rlogin Protocol (rlogin)**

```
rlogin.client_startup_flag  Client startup flag
    Unsigned 8-bit integer
rlogin.client_user_name      Client-user-name
    String
rlogin.control_message        Control message
    Unsigned 8-bit integer
rlogin.data                   Data
    String
```

```
rlogin.server_user_name  Server-user-name
    String
rlogin.startup_info_received_flag  Startup info received flag
    Unsigned 8-bit integer
rlogin.terminal_speed  Terminal-speed
    Unsigned 32-bit integer
rlogin.terminal_type  Terminal-type
    String
rlogin.user_info  User Info
    String
rlogin.window_size  Window Info
    No value
rlogin.window_size.cols  Columns
    Unsigned 16-bit integer
rlogin.window_size.rows  Rows
    Unsigned 16-bit integer
rlogin.window_size.ss  Window size marker
    String
rlogin.window_size.x_pixels  X Pixels
    Unsigned 16-bit integer
rlogin.window_size.y_pixels  Y Pixels
    Unsigned 16-bit integer
```

**Roofnet Protocol (roofnet)**

```
roofnet.cksum  Checksum
    Unsigned 16-bit integer
    Roofnet Header Checksum
roofnet.datalength  Data Length
    Unsigned 16-bit integer
    Data Payload Length
roofnet.flags  Flags
    Unsigned 16-bit integer
    Roofnet Flags
roofnet.link.age  Age
    Unsigned 32-bit integer
    Information Age
roofnet.link.dst  Dst IP
    IPv4 address
    Roofnet Message Destination
roofnet.link.forward  Forward
    Unsigned 32-bit integer
    Forward
roofnet.link.rev  Rev
    Unsigned 32-bit integer
    Revision Number
```

```
roofnet.link.seq  Seq
    Unsigned 32-bit integer
    Link Sequential Number
roofnet.link.src  Source IP
    IPv4 address
    Roofnet Message Source
roofnet.links     Links
    No value
roofnet.next      Next Link
    Unsigned 8-bit integer
    Roofnet Next Link to Use
roofnet.nlinks   Number of Links
    Unsigned 8-bit integer
    Roofnet Number of Links
roofnet.querydst  Query Dst
    IPv4 address
    Roofnet Query Destination
roofnet.seq       Seq
    Unsigned 32-bit integer
    Roofnet Sequential Number
roofnet.ttl       Time To Live
    Unsigned 16-bit integer
    Roofnet Time to Live
roofnet.type      Type
    Unsigned 8-bit integer
    Roofnet Message Type
roofnet.version   Version
    Unsigned 8-bit integer
    Roofnet Version
```

#### **Router-port Group Management Protocol (rgmp)**

```
rgmp.checksum     Checksum
    Unsigned 16-bit integer
    Checksum
rgmp.checksum_bad Bad Checksum
    Boolean
    Bad Checksum
rgmp.maddr        Multicast group address
    IPv4 address
    Multicast group address
rgmp.type         Type
    Unsigned 8-bit integer
    RGMP Packet Type
```

#### **Routing Information Protocol (rip)**

```
rip.auth.passwd  Password
    String
    Authentication password
```

```
rip.auth.type  Authentication type
               Unsigned 16-bit integer
               Type of authentication

rip.command    Command
               Unsigned 8-bit integer
               What type of RIP Command is this

rip.family     Address Family
               Unsigned 16-bit integer
               Address family

rip.ip         IP Address
               IPv4 address
               IP Address

rip.metric     Metric
               Unsigned 16-bit integer
               Metric for this route

rip.netmask    Netmask
               IPv4 address
               Netmask

rip.next_hop   Next Hop
               IPv4 address
               Next Hop router for this route

rip.route_tag  Route Tag
               Unsigned 16-bit integer
               Route Tag

rip.routing_domain Routing Domain
               Unsigned 16-bit integer
               RIPv2 Routing Domain

rip.version    Version
               Unsigned 8-bit integer
               Version of the RIP protocol
```

#### **Routing Table Maintenance Protocol (rtmp)**

```
nbp.nodeid    Node
               Unsigned 8-bit integer
               Node

nbp.nodeid.length Node Length
               Unsigned 8-bit integer
               Node Length

rtmp.function  Function
               Unsigned 8-bit integer
               Request Function

rtmp.net       Net
               Unsigned 16-bit integer
               Net

rtmp.tuple.dist Distance
               Unsigned 16-bit integer
               Distance
```

```
rtmp.tuple.net Net
  Unsigned 16-bit integer
  Net

rtmp.tuple.range_end Range End
  Unsigned 16-bit integer
  Range End

rtmp.tuple.range_start Range Start
  Unsigned 16-bit integer
  Range Start
```

**SADMIND (sadmind)**

```
sadmind.procedure_v1  V1 Procedure
    Unsigned 32-bit integer
    V1 Procedure

sadmind.procedure_v2  V2 Procedure
    Unsigned 32-bit integer
    V2 Procedure

sadmind.procedure_v3  V3 Procedure
    Unsigned 32-bit integer
    V3 Procedure
```

**SAIA S-Bus (sbus)**

```
sbus.CPU_status  CPU status
    Unsigned 8-bit integer
    SAIA PCD CPU status

sbus.addr_EEPROM  Base address of EEPROM register
    Unsigned 16-bit integer
    Base address of 32 bit EEPROM register to read or write

sbus.addr_IOF  Base address IOF
    Unsigned 16-bit integer
    Base address of binary elements to read

sbus.addr_RTC  Base address RTC
    Unsigned 16-bit integer
    Base address of 32 bit elements to read

sbus.addr_prog  Base address of user memory or program lines
    Unsigned 24-bit integer
    Base address of the user memory or program lines (read or write)

sbus.address  S-Bus address
    Unsigned 8-bit integer
    SAIA S-Bus station address

sbus.att  Telegram attribute
    Unsigned 8-bit integer
    SAIA Ether-S-Bus telegram attribute, indicating type of telegram

sbus.block_nr  Block/Element nr
    Unsigned 16-bit integer
    Program block / DataBlock number

sbus.block_type  Block type
    Unsigned 8-bit integer
    Program block type read

sbus.cmd  Command
    Unsigned 8-bit integer
    SAIA S-Bus command

sbus.cmd_extn  Command extension
    Unsigned 8-bit integer
    SAIA S-Bus command extension

sbus.crc  Checksum
    Unsigned 16-bit integer
    CRC 16
```

```
sbus.crc_bad    Bad Checksum
                Boolean
                A bad checksum in the telegram

sbus.data_byte  Data bytes
                Unsigned 8-bit integer
                One byte from PCD

sbus.data_byte_hex  Data bytes (hex)
                Unsigned 8-bit integer
                One byte from PCD (hexadecimal)

sbus.data_display_register  PCD Display register
                Unsigned 32-bit integer
                The PCD display register (32 bit value)

sbus.data_iof    S-Bus binary data
                Unsigned 32-bit integer
                8 binaries

sbus.data_rtc    S-Bus 32-bit data
                Unsigned 32-bit integer
                One register/timer of counter (32 bit value)

sbus.destination  Destination
                Unsigned 8-bit integer
                SAIA S-Bus destination address

sbus.fio_count    FIO Count (amount of bits)
                Unsigned 8-bit integer
                Number of binary elements to be written

sbus.flags.accu    ACCU
                Boolean
                PCD Accumulator

sbus.flags.error  Error flag
                Boolean
                PCD error flag

sbus.flags.nflag  N-flag
                Boolean
                Negative status flag

sbus.flags.zflag  Z-flag
                Boolean
                Zero status flag

sbus.fmodule_type  F-module type
                String
                Module type mounted on B1/2 slot

sbus.fw_version    Firmware version
                String
                Firmware version of the PCD or module

sbus.hw_modification  Hardware modification
                Unsigned 8-bit integer
                Hardware modification of the PCD or module

sbus.hw_version    Hardware version
                String
                Hardware version of the PCD or the module
```

```
sbus.len Length (bytes)
    Unsigned 32-bit integer
    SAIA Ether-S-Bus telegram length

sbus.nakcode ACK/NAK code
    Unsigned 16-bit integer
    SAIA S-Bus ACK/NAK response

sbus.nbr_elements Number of elements
    Unsigned 16-bit integer
    Number of elements or characters

sbus.pcd_type PCD type
    String
    PCD type (short form)

sbus.proto Protocol type
    Unsigned 8-bit integer
    SAIA Ether-S-Bus protocol type

sbus.rcount R-count
    Unsigned 8-bit integer
    Number of elements expected in response

sbus.rtc.date RTC date (YYMMDD)
    Unsigned 24-bit integer
    Year, month and day of the real time clock

sbus.rtc.time RTC time (HHMMSS)
    Unsigned 24-bit integer
    Time of the real time clock

sbus.rtc.week_day RTC calendar week and week day
    Unsigned 16-bit integer
    Calendar week and week day number of the real time clock

sbus.seq Sequence
    Unsigned 16-bit integer
    SAIA Ether-S-Bus sequence number

sbus.sysinfo System information number
    Unsigned 8-bit integer
    System information number (extension to command code)

sbus.sysinfo0.b1 Slot B1
    Boolean
    Presence of EEPROM information on slot B1

sbus.sysinfo0.b2 Slot B2
    Boolean
    Presence of EEPROM information on slot B2

sbus.sysinfo0.mem Mem size info
    Boolean
    Availability of memory size information

sbus.sysinfo0.pgubaud PGU baud
    Boolean
    Availability of PGU baud switch feature

sbus.sysinfo0.trace Trace buffer
    Boolean
    Availability of trace buffer feature
```

```
sbus.sysinfo_length  System information length
    Unsigned 8-bit integer
    System information length in response

sbus.various  Varous data
    No value
    Various data contained in telegrams but nobody will search for it

sbus.vers  Version
    Unsigned 8-bit integer
    SAIA Ether-S-Bus version

sbus.wcount  W-count (raw)
    Unsigned 8-bit integer
    Number of bytes to be written

sbus.wcount_calc  W-count (32 bit values)
    Unsigned 8-bit integer
    Number of elements to be written

sbus.web.aid  AID
    Unsigned 8-bit integer
    Web server command/status code (AID)

sbus.web.seq  Sequence
    Unsigned 8-bit integer
    Web server sequence nr (PACK_N)

sbus.web.size  Web server packet size
    Unsigned 8-bit integer
    Web server packet size
```

**SAMR (pidl) (samr)**

```
samr.alias.access_mask  Access Mask
    Unsigned 32-bit integer

samr.alias_handle  Alias Handle
    Byte array

samr.connect.access_mask  Access Mask
    Unsigned 32-bit integer

samr.connect_handle  Connect Handle
    Byte array
